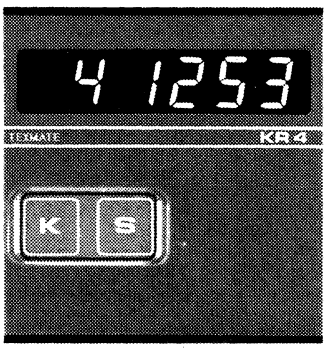
Temperature and Process Controllers

GOSSEN

See Gossen/Texmate ad in Power Supplies: Lab, EEM Vol. D

Temperature Controllers in DIN Case

Pantatherm KR4 $1,100.00



The Pantatherm KR4 is a 4-channel, microprocessor controlled, 2- or 3-term PID temperature controller • The KR4 controller is designed for system where ON/OFF switching of the heating or cooling phases is possible.

Operator control unit and display integrated in a single front panel • Thermocouple or resistance thermometer type sensor • Adaptive control to the controlled system adjustable when starting up • Controller outputs and MAX/MIN values • Adjustable MAX/MIN or MAX/MIN band • Adjustable setpoint limit • Adjustable measurement ranges• Inputs and outputs DC decoupled • Non-volatile memory without battery backup • Data interface either 20mA current loop or RS 485 • Local and remote modes available • Controller front-withdrawable • Line voltage 110 to 240VAC/DC or 24VAC/DC • DIN Case 96x96 • A special version, the KR4-PS, provides feedback interloop cascade control with PC/AT program download/upload capability via the serial link. Multiple units can be cascaded for special 8-12-16-32 loop requirements.

Pantatherm D1 $499.00

The PANTATHERM DI is a microprocessor controlled single channel controller • The D1 is a 2- or 3-term PID temperature controller for systems where ON/OFF switching of the heating or cooling phases is possible. The D1 can be used with thermocouples or RTD sensors • Relay or logic control outputs provided • Adjustable setpoints • Ramp function start-up adjustable • May also be operated with P,PI, or PD control actions• Auto/manual operating modes • Local or remote operation • Optional data interface with RS485 or 20mA half duplex • Non-volatile EEPROM to retain stored values without back-up battery • DIN Case 48x96.

Pantatherm S1 $865.00

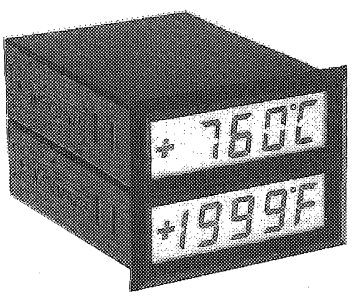
The PANTATHERM S1 is a microprocessor controlled single channel controller • The S1 is a 3-term stepper controller with PI action, for stepping electric motor actuated control elements, such as motorized valves, dampers and auto transformers. • Accepts DC 0 to 20mA, 4 to 20mA inputs or thermocouple or RTD sensors • Adjustable measuring ranges • Input for position feedback potentiometer.• Auto/manual operating modes • Local or remote operation • Optional data interface with RS485 or 20mA half duplex • Non-volatile EEPROM to retain stored values without back-up battery • DIN Case 48x96.

'J' or 'K' Thermocouple Temperature Measuring Meters

TM-35X *LCD version* $104.00

TM-35 *LED version* $94.00

Normally shipped in standard Slim Bezel Cases but may be ordered in any combination of End Mount and Center Mount cases as pictured.



Low cost LCD (TM-35X) or LED (TM-35) meter for 'J' or 'K' thermocouples • +5VDC powered • User-selectable °C/°F descriptor • Thermocouple break detection and indication • Display Hold • Display Test • Auto-Polarity indication • Edge connector or screw terminal connections • Differential Input which facilitates operation with both grounded and ungrounded probes • Available in Slim Bezel stackable cases as shown.

Mini-Controller™ TC-48 (temperature) $199.00

Mini-Controller™ PC-48 (process) $249.00

Mini-controller™ 48x48mm case • PID auto-tune temperature and process controller • Accuracy ±0.5% of full scale • Multiple user selected ranges from 0-999°C/°F • Sensors RTD, thermocouples J or K • PV and SP are displayed simultaneously • Alarms • Output options 3 amp or SSR driver • ON/Off control for heating or cooling • Power 100-240VAC, 50/60Hz • Also available the PC-48, a proportional controller with thermocouple or 4-20mA input • Setpoint is via 3-digit thumbwheel and process variable read on 3-digit LED display • Output relay, 4-20mA or 1-5V signal to control Valves, positioners or motors.

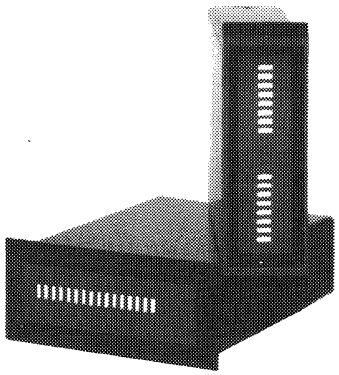
Bargraphs, Digital/Bargraphs and Meter Relays

LED 20-Segment Bargraph Meters

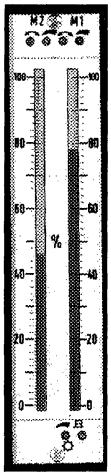
AM-20 $49.00



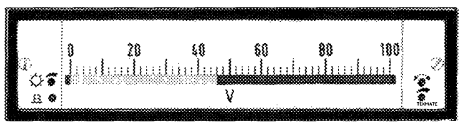
Rugged versatile solid state analog DPM • 20-segment LED bargraph • Single-ended positive inputs only • Ranges 200mV, 2V, 20V, 200V and 1200V • Selectable Dot or Bar mode and scale indicators • Custom scaling available • Operates as a center-zero meter with isolated 5V power supply • 0.15" segments • Current consumption = 20mA in Dot mode; 240mA in Bar mode • 5V DC powered • Available in Slim Bezel stackable cases.

LED 101-Segment Bargraph Meters

AM-100 $560 (dual) or $530 (single)
AM-100-R Dual relay version $695.00

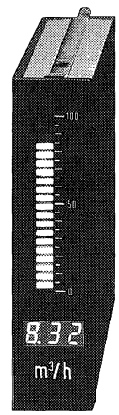


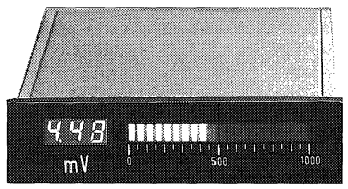
The AM-100 is a single or dual, microprocessor controlled, 101 segment LED 4" bargraph • Adjustable brightness with front panel control • 1200 baud serial output is standard Powered from 110/240VAC 50/60Hz or optional 18 to 36VDC/24VAC power • Measures DC voltage and current with 1% resolution • Optional vernier for increased 0.1% resolution • Each bar may be individually set up for left hand or center zero operation • The AM-100 can be ordered as a dual bargraph with optional dual setpoints and changeover relay contacts • Horizontal or vertical mounting formats available • Optional green LEDs $40.00 • Case size is DIN 144x36.
Dedicated Inputs: 4-20mA or 0-1VDC standard. Also available 0-60mV or 0-100VDC scaled to read 0-99.9 or 0-999.



Dual Digital/Bargraph Meters

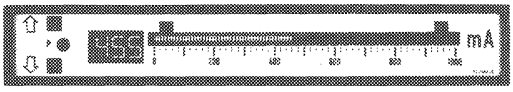
AM-20D $265.00

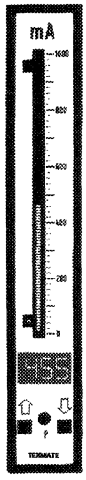




110~240V AC or optional 18 to 36VDC/24VAC power • 20-segment 2" LED bargraph with 3 digit numerical display • Input ranges from 150mV to 250VDC and 4-20mA DC • Separate inputs so bargraph and DPM can be read separately • Analog zero isolated from power supply voltage • Available in vertical or horizontal formats • Optional green LEDs $40.00 • Case size is DIN 96x24.

AM-100D $525 (grn) or $485 (red)





The AM-100D is a 101-segment, microprocessor controlled, adjustable brightness, 1% resolution, LED 3.35" bargraph with 3 digit numerical display • Powered from 110/240VAC 50/60Hz or optional 18 to 36VDC/24VAC power • Modular plug-in input signal conditioning boards are available to measure AC/DC voltage and current, resistance, frequency and temperature with 100 ohms RTD or with thermocouples • Maximum and minimum values can be saved and displayed • Bar display zero may be left hand, right hand, center or offset • Auto-tare function • Logarithmic scale available • Horizontal or vertical mounting formats available • Bar display zoom for 10 times magnification • The AM-100D can be ordered with optional dual set points and changeover relay contacts • Adjustable averaging for noisy input signals • Case size is DIN 144x24.

Input/Output Modules for AM-100D

Input Board Options = DC standard: 2/20/200V $15.00 • DC Universal Volts/Amps: 2-500V/5-500mA $50.00 • DC mV: ±200, ±400, ±2000mV $55.00 • AC Volts/Amps Avg.: 2-700V/2μ-2A $75.00 • AC Volts/Amps RMS: 200mA-700V/200mA-2A $145.00; 5A $155 • T/C types: J,K,R,S $75.00 • RTD: Pt100 $75.00 • RPM/Frequency: 5-200Hz, 5-200kHz $90.00• 4-20mA $45.00 • Resistance 2-4 wire $85 • AC Line Frequency $80

Control Output Options = 5A Relays: Single $60.00; Dual $75.00

TEXMATE NEW! PC Based Data Acquisition & Control for PC/XT/AT Compatibles

Serial Communications Boards

to Interface Texmate's Serial Output Panel Meters, Temperature Controllers and Bargraphs

For example: The dual independent port RS-485 PC-48AT will support up to 64 external devices such as Texmate's DI-45C smart meter.Prices include board and manual only. All boards are half length (except PC-31AT).

Dual port RS-232C/422	**PC-41AT** $245.00
Dual port RS-485/422	**PC-45AT** $245.00
Dual port RS-232C/485	**PC-46AT** $245.00
Dual independent port RS-232C	**PC-47AT** $245.00
Dual independent port RS-485	**PC-48AT** $245.00
Dual independent port RS-422	**PC-49AT** $245.00
Eight RS-232 ports	***PC-31AT** $675.00

Optional Supporting Software

COMBIOS™ RS-232C/422/485 Communication Software $225.00
Manual included and both 3.5" & 5.25" disks. One software supports unlimited ports.

PC-42 Communication Software $105.00
Manual included and both 3.5" & 5.25" disks. One software supports one serial board above.

*** PC-32AT Communication Software/Documentation $105.00**
Required for PC-31AT serial board (eight RS-232 ports)

IoCalc ™ $545.00

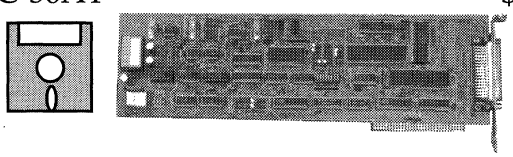
Real-time Spreadsheet Data Acquisition Software

IoCalc™ is a powerful real-time, multi-tasking data acquisition and data processing software package that is compatible with Microsoft Windows™. User friendly menus allow Texmate's intelligent meters to be used as smart transmitters communicating in real-time with up to 32 or 64 channels. Designed for engineering or scientific applications, IoCalc™ is equally at home in either the lab or pilot plant. Uses include: energy management, tank inventory, test and monitoring, especially where data save and multi-tasking are required. IoCalc™ drivers with source code are available for all Texmate serial output meters, controllers and pc boards including VPM 1. IoCalc's easy to use high level development environment allows user modification of existing drivers to suit virtually any register based pc boards.

DMA Data Acquisition & Control Board

The PC-30AT is IBM PC/XT/AT 286, 386 compatible and will function correctly in any true compatible. It has an A/D & D/A card with digital I/O, counter timers and DMA capability, manual and sampling software in callable Turbo Pascal and Quick BASIC libraries and 'C' drivers.

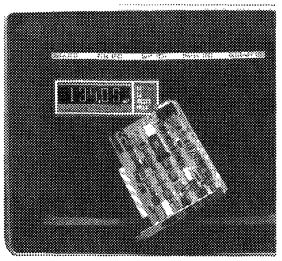
PC-30AT $699.00



16 channels of 12 bit A/D and 2 channels of 12 bit D/A • DMA capability on A/D, throughput 90kHz maximum and D/A 200kHz maximum • Typical conversion time 10 micro seconds • Unipolar and bipolar operation with selectable input ranges • 20 TTL compatible CMOS digital input/output lines • Triple 16 bit counter timer with on board crystal oscillator • Turbo Pascal and Quick BASIC callable libraries included • Suitable for any IBM PC/XT/AT 286, 386 or true compatibles • Applications include: process control, high performance data acquisition, accurate waveform generation, experimental and teaching tool • Options include screw terminal assembly (50 pin), connecting cable, connector and applications notebook.

IBM, IBM PC/XT, IBM PC/AT are registered trademarks of the International Business Machines Corp.
Microsoft Windows is a registered trademark of Microsoft Corp.

Virtual Digital Panel Meter



VPM 1 or Virtual Panel Meter 1 is a new concept in industrial measurement, it combines the simplicity of a panel meter with the performance and flexibility of a personal computer. It includes over 20 functions available on standard panel meters. Software is supplied with every board that presents a picture of a familiar panel meter on the screen of the computer and allows it to be configured just as you would any other panel meter.

VPM 1 (includes software, board & manual) $545.00
Demonstration Software Disk (5.25") $10.00

16 bit A/D converter • Opto isolated input • 2.5, 3.5, 4.5 and 5 digit scale lengths • Integrated hardware and software instrument • Menu driven, no programming • Context sensitive on line help • No jumpers or trimmers after installation • Peak/Valley hold available • Two flexible set points • Variable bandwidth and display update rate • Selectable display color • Easy bezel engraving • Easy range change or special scaling • Applications include: process control panels, weighing, any single range voltmeter, flow metering and level monitoring, lab instrumentation.

Economical Analog Data Acquisition

The PC-27 is a low cost A/D board that incorporates features normally only found on more expensive boards. It has 16 channel 12 bit A/D with counter/timer circuit .

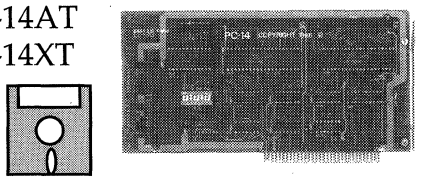
PC-27 A/D Board $265.00

Full function16 channel 12 bit A/D • Very low price • Typical conversion time 10 micro seconds • On board 4MHz frequency reference • Two 16 bit counters available • Three conversion trigger options • Flexible base address • Suitable for any IBM PC/XT/AT 286, 386 or true compatibles • Demonstration software available • Applications include: Quality control, low cost data acquisition, educational establishments, production testing, data logging • 40-pin screw terminal assembly $115 • Connecting cable $35 • DASH 27 Software $85

Digital I/O with Counter Timer

The PC-14AT board has two 82C55 programmable peripheral interface chips and an 82C53 counter timer chip, along with a 4MHz oscillator. This combination provides a very flexible general purpose interface board for all kinds of digital input and outputs. Demonstration software is provided written in BASIC and Turbo Pascal covering most of the possible functions of the board, source code is included and both 5.25 and 3.5 inch formats are supplied.

PC-14AT $175.00
PC-14XT $135.00



48 programmable I/O lines • 3 independent 16 bit counter/timers • On-board 4MHz oscillator • Count rate up to 5MHz • Software or hardware triggered counting • Low power version available for 'Captops' • Fully PC/XT/AT 286 & 386 compatible • Digital I/O and counter chips are socketed to allow easy replacement if they become damaged by faulty inputs • Demonstration software supplied free • Applications include: event counter and timer, machine control interface, frequency measurement, pulse or timebase generation.

DIN Standard International Series Analog Meters and Meter Relays

As a result of an affiliation and collaboration agreement with Gossen, the leading German and European meter manufacturer, Texmate now offers an extensive range of finely crafted analog meters and meter relays in square and edgewise configurations, all of which meet the international DIN 43 700 standard. This world class range of analog meters includes moving-coil, moving iron, power factor meters, bimetal ammeters, frequency meters as well as special-application meters. Write or call now for pricing information and the latest literature on these and other quality instrumentation products from Texmate.

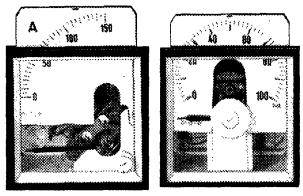
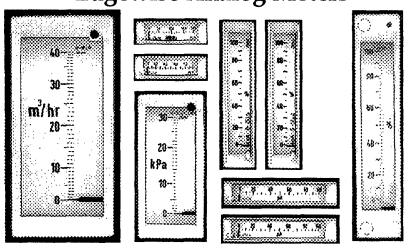
Analog Panel Meters with Changable Scales



Edgewise Analog Meters



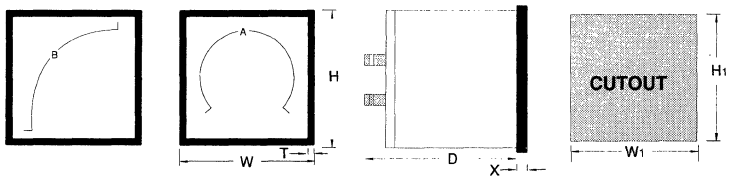
Ordering Information

To order an analog panel meter, please specify meter type, case size, and required range desired. See meter descriptions on next page for more information. A detailed illustrative brochure is available upon request.

Square Case (S)

Sizes 48mm, 72mm, 96mm, and 144mm. Dimension 'D' varies with meter type.

Quadrant Scale 90° (Q) Circular Scale 240° (CS)

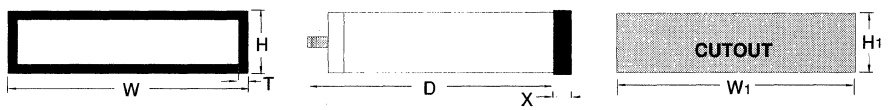


Square Case Dimensions (mm)

	S48	S72	S96	S144
H & W	48	72	96	144
T	3	4	4	5
X	5	5	5	8
H_1 & W_1	≈45	≈68	≈92	≈138

Edgewise Case (ES)

Sizes 72mm, 96mm, and 144mm. Horizontal or vertical formats available.



Edgewise Case Dimensions(mm)

	ES72	ES96	ES144
W	72	96	144
H	36	48	72
T	4.0	4.0	5.0
D	95	120	175
X	5.0	5.0	8.0
W_1	≈68	≈92	≈138
H_1	≈33	≈45	≈68

TEXMATE Analog Panel Meter Types GOSSEN

See Gossen/Texmate ad in Power Supplies:Lab, EEM Vol. D

Accuracy of 1.5% full scale unless otherwise stated. All meters have substantial overrange capability.

AC Ammeters

Direct reading and 5A CT operated

Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q
Ranges: 40mA to 25A

Direct reading, 5A CT operated, and rectified rms output.

Edgewise Case = ES72, ES96, ES144
Ranges: 40mA to 60A

AC Voltmeters

Direct reading moving coil or moving iron and rectified, moving coil or moving iron. Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q. Ranges: Direct reading=6V to 600V; Rectified=10V to 600V. Potential transformer inputs = S48Q, S72Q, S96Q, S144Q; PT secondary voltage = 110V

Square case, circular scale = S48CS, S72CS, S96CS, S144CS
Ranges: Direct reading=6V to 600V; Rectified=10V to 600V

Edgewise case = ES72, ES96, ES144
Ranges: Direct reading=6V to 600V; Rectified=10V to 600V

DC Ammeters

Direct reading moving coil or moving iron

Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q
Ranges: 10μA to 60A; 4 to 20mA

Square case, circular scale = S48CS, S72CS, S96CS, S144CS
Ranges: 10μA to 60A; 4 to 20mA

Edgewise Case = ES72, ES96, ES144
Ranges: 10μA to 60A; 4 to 20mA

Shunt operated DC ammeters also available in square quadrant or circular scale cases. Specify full scale reading (amps) with either 50mV or 100mV shunt.

DC Voltmeters

Direct reading moving coil or moving iron

Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q.
Range: 0 to 600mV, 0 to 600V

Square case, circular scale = S48CS, S72CS, S96CS, S144CS. Range: 0-150 mV to 0-600V

Edgewise case = ES72, ES96, ES144.
Range: 0-100mV to 0-600V.

Synchroscopes

Accuracy 2° at synchronous point. Color coded scales. Electrodynamic ratio measuring/comparing of single or 3ø circuits. Scale: "slow-fast"

Square case, quadrant scale = S96Q, S144Q
Input ranges: 110/220/380/500VAC

Frequency Meters

Accuracy (±0.5% @60Hz; ±1% ≥70Hz)
Moving Coil

Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q
Frequencies: 45-50-55Hz; 55-60-65Hz; 360-400-440Hz

Square case, circular scale = S48CS, S72CS, S96CS, S144CS
Frequencies: 45-50-55Hz; 55-60-65Hz; 360-400-440Hz

Vibrating Reed
Reeds: 21 reeds, side by side
Square case, vibrating reed scale = S96, S144
Frequency: 45-50-55Hz, 55-60-65Hz

Maximum Demand Meters

Accuracy 3% of full scale
Bi-metallic, Thermal lag (15 min.), 20% overscale

Square case, quadrant scale = S48Q, S72Q, S96Q, S144Q
Input: 1 amp or 5 amps

Ammeter with combined bi-metallic/moving iron movement

Square case, quadrant scale = S72Q, S96Q, S144Q
Input: 1 amp or 5 amps

Meter Relays

Adjustable controller contacts for voltage, current, temperature, frequency, and power

Square case, quadrant scale = S96Q, S144Q
Range: Depending on input

Edgewise case = ES72, ES96, ES144.
Also available in smaller edgewise cases.
Range: Depending on input

Power Factor Meters

Iron cored wattmeters that convert power factor ratios into direct mechanical displacement. Single or 3 phase.

Square case, quadrant scale = S96Q, S144Q
Ranges: Frequency from 59.5 to 60.0 to 60.5Hz. Scale: 0.5-1.0-0.5. Current from 1A to 10A; Voltage from 50V to 500VAC

Wattmeters and Varmeter

Single and 3-Phase units

Square case, quadrant scale = S96Q
Ranges: 1 to 10A, 110/220/380/500VAC

Square case, circular scale = S96CS
Ranges: 1 to 10A, 110/220/380/500VAC

Edgewise case format also available. Call for information.

TEXMATE

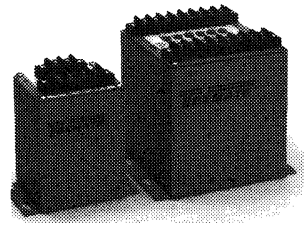
Power Transducers and Hydraulic Panel Punch Driver

Power Transducers

Texmate offers a versatile, low cost, line of power transducers to suit most requirements. Accuracy ranges from 0.25% to 0.5%. The circuitry provides highly accurate and stable output, allowing precison measurement of distorted waveforms, thyristors, fluorescent lamps, motors, transformers, magnetic circuits, etc.

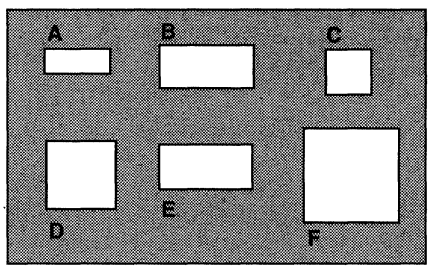
Transducer types available:

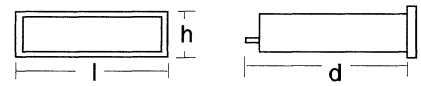
- DC voltage/Current
- AC Voltage
- AC Current - single or 3-phase
- Watt/Var - single or 3-phase
- Watt hour - single or 3-phase
- Watt (active power) single or 3-phase
- VAR (reactive power) - single or 3-phase
- Phase angle - single or 3-phase
- Frequency
- VAR hour - single or 3-phase
- Power factor - single or 3-phase
- RTD or Thermocouple
- Frequency to DC/DC to frequency
- Position & match function transmitters

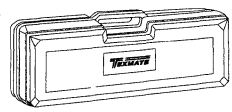


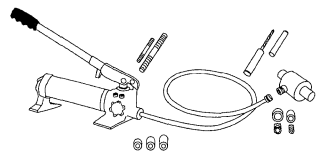
Hydraulic Punch Driver Kit and Panel Cutout Punches

Panel Cutout Comparisons









The ram-type Texmate Hydraulic Punch Driver Kit and Panel Punches save time in making accurate, clean, panel cuts without any sawing or additional filing required. The automatic two-speed operation of the hand pump allows the user to position the die accurately and smoothly. The hydraulic punch driver's ease-of-use design enables it to operate in a vertical or horizontal position. The pump comes equipped with a 6'6" (2m) high pressure hose and industry standard removable couplers. The powerful 12-ton ram type hydraulic punch driver is made of heavy-duty, heat-treated tool steel to give maximum strength and durability. Accessory panel punches are available to punch cutout sizes for Texmate's Slim Bezel and Replacer Series cases, as well as four different sizes of DIN panel cutouts. A sturdy reinforced plastic case is supplied with each hydraulic punch driver kit and panel punch.

Product	Order Part No.	Price
Hydraulic Punch Driver Kit	PT-DRIVER	$425.00

Case Reference	Panel Cutout Size	Bezel Dimensions l x h	Min. Depth Req. 'd' (without connector)	Punch Tool Part No.	Price
A. Slim Bezel Case	64.8mm x 24.6mm	69.6mm x 29.3mm	89.4mm	PT-SLIMCASE	$315.00
B. RP-Series Case	91.4mm x 42.5mm	103.1mm x 48.5mm	104.9mm	PT-RPCASE	$475.00
C. DIN 48X48 Case	45mm x 45mm	48mm x 48mm	See specific meter	PT-DIN48X48	$335.00
D. DIN 72X72 Case	68mm x 68mm	72mm x 72mm	See specific meter	PT-DIN72X72	$385.00
E. DIN 96X48 Case	92mm x 45mm	96mm x 48mm	See specific meter	PT-DIN96X48	$525.00
F. DIN 96X96 Case	92mm x 92mm	96mm x 96mm	See specific meter	PT-DIN96X96	$575.00

Conduit punches are also available in diameters from 1/2" to 4". Call for pricing.

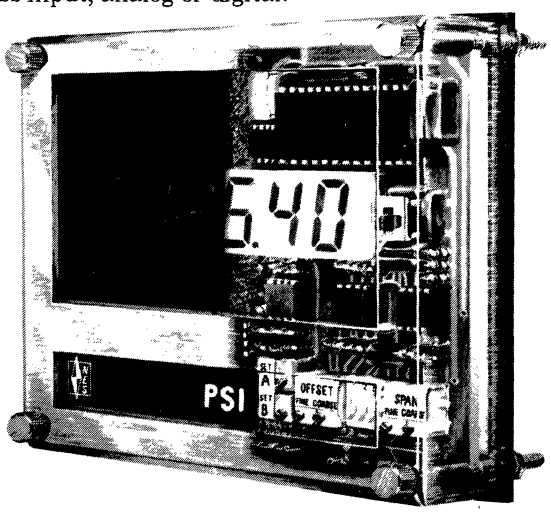
WESCHLER INSTRUMENTS

The total solution to your instrumentation needs!

DIGITAL PANEL METERS

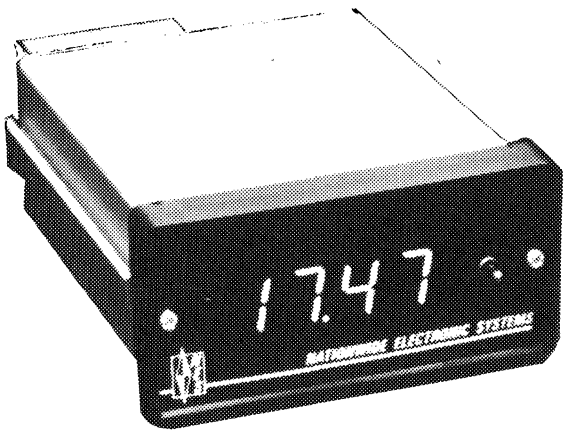
SLIMLINE

Surface Mount digital panel instruments designed to access nearly any process input, analog or digital.

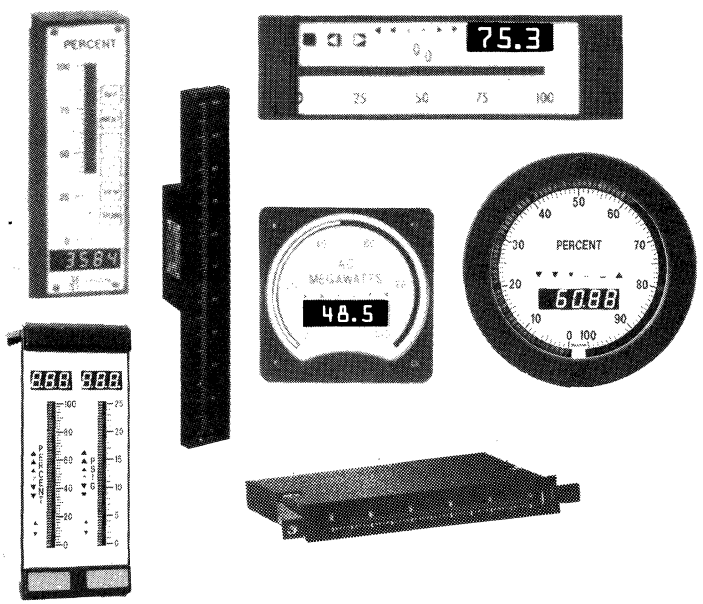


SLIM VIEW

1/8 DIN digital panel meters for direct retrofit, with the highest degree of reliability.



BARGRAPH METERS



The most complete line of digital BarGraph™ instruments for new and replacement applications. The LED bar provides the operator additional trend and numerical data.

- Multi-color LED bar display.
- Full military specified bargraphs.
- Nuclear qualified 1L and 1E.
- Measure, display and control: voltage, current, temperature, flow, frequency, power and process signals.
- AC & DC powered with restransmit and communication.

Weschler Instruments purchased and now manufactures the BOWMAR and NES meter lines.

Replacements for Bailey, YEW, Ashcroft, International Instruments, G.E. and others.

WESCHLER / NES

SLIMLINE INSTRUMENTS

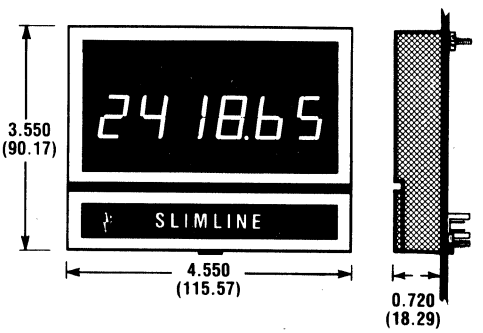
Slimline Surface Mount Panel Instruments

Quality

Since ACCURACY and LONGEVITY are our primary concerns, we have backed all of our products with a 3 YEAR WARRANTY since 1968.

Flexibility

- Surface mount package: 4.62"W x 3.64"H x 0.79"D
- Front panel access to controls
- Switchable noise filtering for use in noisy environments
- Quick and easy set-up
- Plug-in resistors for signal input range changing on process inputs
- Set points, relay outputs, open collector outputs and transducer excitation available
- Red LED display 0.56" high
- Optional stainless steel NEMA 4-X Bezel, for the toughest environments
- Standard low voltage power at 7-10 Vac, 5 Vdc, 7-12 Vdc or 24 Vdc
- 120 Vac, power with plug-in transformer or optional support module
- Available 12 Vdc isolated automotive powering



Surface Mount Slimline Meter **Rear Mount Optional Support Module**

Communication

Serial ASCII:

- RS232, RS422 or 20/60 mA current loop
- Interface to computers, PLCs, robots or any processor based device with a serial port
- User programmable character string
- Addressable to 100 units

Parallel BCD:

- Individual digit or meter enable capability allows multiplexing of several meters on the same data bus.
- Open collector BCD data permits interfacing with high voltage logic (up to +48 Vdc).
- Internal socketed pull-up resistors mean no external components and mounting problems.
- Optional optical isolation provides better noise immunity and communication over longer distances.

Metering Systems Flexibility

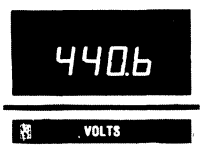
WESCHLER/NES

SLIMLINE INSTRUMENTS

Process/Transducer Meters

These meters take most standard DC process signals such as 4-20 mA, 0.5 V, 0-1 mA, etc. and displays them in any desired process units, i.e. a 4-20 mA loop can be read in PSI, gal/min, °F, %, etc. Models with set point outputs. Outputs; BCD to 48 V, RS232C, etc.

- 3½ & 4½ digit models
- Open collector or tri-state BCD data
- DC voltage or current inputs
- Plug-in range changing resistor
- Multi-turn coarse & fine pots
- Serial ASCII, RS232, RS422 or current loop
- Price from $233.00



Voltmeters

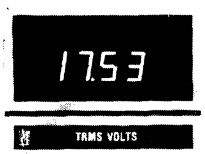
Measure AC or DC volts from 0-300mV dc to 0-300 Vdc. Units are available with 2 or 3 set points and open collector set point outputs. Serial ASCII units have peak and valley storage and an ASCII controllable latching output.

- 3½ & 4½ digit models
- Auto zero & high stability circuitry
- Switchable response time & noise filtering
- High input impedance
- Open collector & tri-state BCD data
- Serial ASCII, RS232, RS422 or current loop
- Switch selectable decimal point position
- Priced from $196.00

Ammeters

AC or DC current measurement from microamps to kiloamps. 5 A scaleable units allow fast and easy custom field scaling. Two or four set point output units allow system control. Serial ASCII units have peak and valley storage and an ASCII controllable latching output.

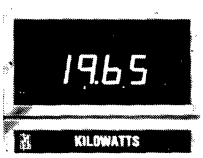
- 3½ & 4½ digit models
- Auto zero & high stability circuitry
- Bi-polar, auto polarity operation
- Low input impedance
- High common mode rejection
- Serial or parallel BCD communication available
- Priced from $196.00



TRMs Ammeters & Voltmeters

Allows proper reading of non-uniform waveforms, such as circuits with coils, capacitors and SCR's. Great for motor controller circuitry, Fluorescent lighting circuits, etc. Switch selection of the DC components allows reading TRMs or DC.

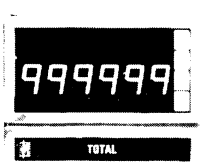
- 3½ & 4½ digit models
- Frequency response - 30 Hz to 5 kHz
- Auto zero & high stability circuitry
- Switchable response time & noise filtering
- High common mode rejection
- Crest factor to 6
- Priced from $196.00



Power Measurement Meters

Reads True AC Watts directly, available in either single or 3-phase models. Either Delta or Wye connections available for 3-phase. Also VAR, Power Factor and Watthour Meters to cover most any range. Models are available with set points, BCD, ASCII, etc.

- Serial ASCII or parallel BCD communication available
- 3½ & 4½ digits
- Auto zero & high stability circuitry
- Minimum circuit loading
- Compensates for power factor
- Two or four set point outputs available
- Priced from $196.00



Counters & Totalizers

Units are available to: (1) count up, (2) count up and down, (3) count up or down to or from a preset limit, and (4) to divide the count by any 4-digit switch-selected number. Available with permanent count store and scaling for watthour transducers.

- Serial or parallel BCD communication available
- 2, 3, 4, 5 or 6 digit models
- Manual or remote control
- Differential 0.2 to 80 Vdc
- Variable switch-selectable noise filtering
- Easy direct connection onto rotary encoder
- Prescaling, Divide-by-N & preset units
- Priced from $160.00

Ratemeters

Field scaleable to measure machine rate directly in any desired unit. For example, one pulse per bottle can be read out in six packs/minute, cases/hour, etc. Powerful microprocessor-based circuitry allows flexibility.

- 4, 4½ or 6 digit models
- TTL parallel BCD data
- 2.9 to 41 Vdc variable threshold input
- Variable switch-selectable noise filtering
- Four pulses per hour minimum
- Remote control capability
- Priced from $260.00

WESCHLER / NES

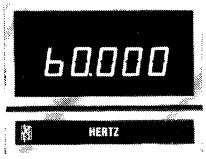
SLIMLINE INSTRUMENTS

Tachometers

Scaleable to monitor RPM from a wide range of gears and input signals. Units can accept external time base signals for ratio measurements. Microprocessor-based unit does not require 60-tooth gears. Serial ASCII meter displays English prompts for easy set-up.

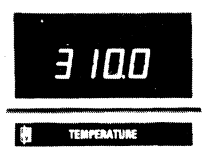
- 4, 4½ or 6 digit models
- 2.9 to 41 Vdc, switch input standard
- Four pulses per hour minimum
- Remote control capability
- High accuracy crystal time base
- Serial ASCII or parallel BCD communication available
- Priced from $260.00



Frequency Meters

Measures from 0.001 to 30 kHz by gated counter or calculation mode techniques. Selectable input averaging. Can be easily scaled to monitor frequency, ratio, deviation, percentage or period. Serial ASCII meter displays English prompts for easy set-up.

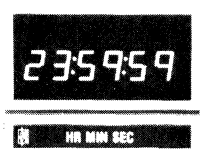
- Serial ASCII or parallel BCD communication available
- 4 or 6 digit models
- Two or four set point outputs
- Switchable input filtering
- High accuracy crystal time base
- Digital preset scaling
- Digitally scaled time bases



Thermometers

Thermocouple types J, K, T, R, S, E to cover from -328° to 3092°F (-200° to 1700°C). Platinum 100Ω RTD from -58° to 1112°F (-50°F to 600°C). Thermistor from +32.0° to 212.0°F (0.0° to 100.0°C). Available with serial ASCII, parallel BCD or set point outputs.

- Open collector or tri-state BCD data
- Dual range models to display °C or °F
- 0.1° resolution available
- Long lead length compensation circuitry
- Ideal junction sensing
- Continuous linearization over entire range
- Priced from $230.00



Clocks

Give accurate day and time-of-day for control panels, clock systems, programmable controllers, computers, etc. Can be expanded into battery back-up, master-slave and variable time zone clock systems. Available with serial ASCII, parallel BCD or set point outputs.

- 12/24 hr, hr/min, hr/min/sec & time zone formats
- 10/50/60 Hz or 0.005% crystal time base
- Remote control capability standard
- Day-of-year or automatic month/day
- Automatic leap year
- Priced from $179.00

Timers & Stopwatches

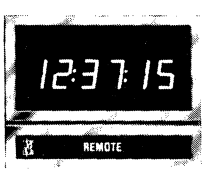
Manually or automatically time events. Control events after a countdown, countup or at regularly recurring cycles. For timing events from 1 microsecond up to 99:59:59 hr/min/sec. We offer the widest variety of ranges anywhere. Available with serial ASCII, parallel BCD or set point outputs.

- High noise immunity filtering
- Range 999999 microsecond to 999.999 hours
- Continuously updated or single cycle timing
- 2, 4 or 6 digit models
- 50/60 Hz or 0.005% crystal time base
- Remote control standard
- Start, stop, run, hold inputs
- Priced from $204.00

Interval Meters

Use Interval meters to measure on-time, off-time, time between pulses or duration. These fully automatic timers resolve to 0.001 seconds. Connects directly to AC or DC control circuits. Easy 2-wire hook-up. Available with serial ASCII, parallel BCD or set point outputs.

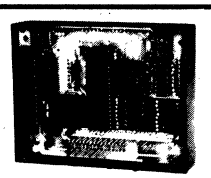
- No external control needed
- 0.005% accuracy
- Holds last interval reading until next reading
- 2.9 to 41 Vdc; 120, 240 Vac or switch input
- High electrical noise immunity
- Priced from $251.00



Remote Displays

Provide a large, bright readout from BCD, octal or hexadecimal data. Flexible addressing capabilities. Optional latches for use with programmable controllers, computers, etc. Units available to accept serial ASCII input and provide open collector outputs for control.

- 3, 4, 5 or 6 digit models
- Parallel, strobe, RS232, RS422/423/485, 20/60 mA loop modes
- Normal or inverted strobe capability
- Data input operate from 5 to 48 Vdc
- LCD units available
- Priced from $183.00



Data Converters

Meter interface via serial ASCII port of programmable controllers, computers, printers, etc. Excellent for transmitting contact status. User specific protocol up to 31 characters. Works with Slimline meters or other BCD source.

- RS232, RS422 or 20/60 mA
- Selectable baud rate - 110 to 9600
- High electrical noise immunity
- Receiver & transmitter models
- Selectable ID to address 100 units
- Priced from $150.00

SLIMVIEW 1/8 DIN PANEL METERS

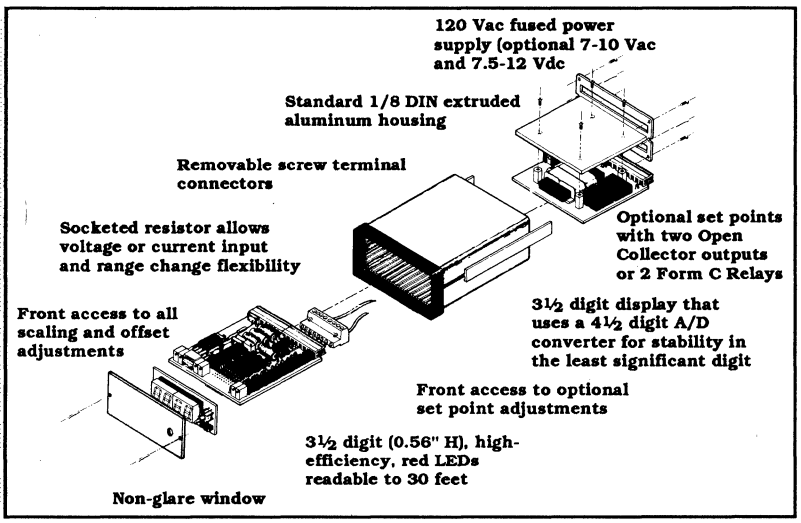
Process Meters (Scaleable DC Volts/Amps)

Description

Process meters take voltage or current signals and display them directly in any engineering unit. For example, a 4-20 mA unit can be scaled to read 0 to 1000 PSI, 0.0 to 6.80 ATMOSPHERES or 0 to 204 INCHES OF MERCURY.

Quality

Since accuracy and longevity are our primary concerns, we have backed all of our products with a 3 YEAR WARRANTY since 1968.



Features

- ❑ 3½ digit red LED display 0.56" high
- ❑ Display scalability: Minimum = 0 to 199, Maximum = 0 to 1999
- ❑ Power: 120 Vac @ 180 mA, 50/60 Hz
- ❑ Accuracy: ±0.05% of full scale
- ❑ Display Update Rate: 2½ times per second
- ❑ Stability: ±0.005% of full scale per °C

Current Input

SIGNAL RANGE	DISPLAY RESOLUTION	SCALING RESISTOR	PRICE	MODEL NUMBER
1-5 mA dc	3½ Digits	50 Ω	$250	IPM 6100
4-20 mA dc		13 Ω		IPM 6101
10-50 mA dc		5 Ω		IPM 6102
0-2 mA dc		124 Ω		IPM 6103
0-1 mA dc		249 Ω		IPM 6104
0-20 mA dc		10 Ω		IPM 6105
0-10 mA dc		20 Ω		IPM 6106
0-100 mA dc		2 Ω		IPM 6107
For measuring currents greater than the ranges shown above, use an IPM 6111 with an external shunt (Consult factory).				

Voltage Input

SIGNAL RANGE	DISPLAY RESOLUTION	SCALING RESISTOR	PRICE	MODEL NUMBER
1-5 Vdc	3½ Digits	52.3 kΩ	$250	IPM 6110
0-200 mV dc		None		IPM 6111
0-500 mV dc		634 kΩ		IPM 6112
0-1 Vdc		249 kΩ		IPM 6113
0-2 Vdc		110 kΩ		IPM 6114
0-5 Vdc		41.2 kΩ		IPM 6115
0-10 Vdc		20 kΩ		IPM 6116
0-100 Vdc		2 kΩ		IPM 6117
0-200 Vdc		1 kΩ		IPM 6118

Optional Features

DESCRIPTION	PRICE	OPTION NUMBER
Low voltage power input, 7 to 10 Vac or 7.5 to 12 Vdc	$25	- 64
Set points with two Form C Relay outputs	$65	- 41
Set points with two Open Collector outputs	$50	- 46

TRENDLINE TRI-COLOR BARGRAPHS

Why you need color . . .

Color-changing bargraph calls your attention!

Green* = SAFE
Indicates normal operating conditions.

Yellow* = CAUTION
Indicates that a problem is developing.

Red* = WARNING
Indicates that a problem exists.

The ENTIRE bar changes color!

*NOTE: WARNING, CAUTION and SAFE zone colors are user selectable as red, yellow or green.

The complexity of modern control rooms can hide problems that occur during a process. The quickest way to spot a problem is to have instrumentation that calls it to your attention. **Color** is the best way to do this. Color has always been used to convey information, such as color coded wires, signal corp flags, stoplights, maps, etc.

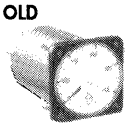
Trendlines are the first meters to offer a color-changing bargraph for immediate problem recognition. Whether you have 2 meters or 2000, the color-changing bargraph allows your operators to spot developing or existing problems immediately.

The time saved through immediate recognition will help prevent equipment damage, reduce down-time and maintenance overhead, and help improve operational safety.

DIRECT REPLACEMENT
Form, Fit and Function

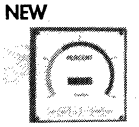
Trendline Meters are designed for direct retrofit to existing edgewise and switchboard meters.

OLD



Circular Switchboard

NEW



Circular Trendline

OLD

6" Edgewise

NEW

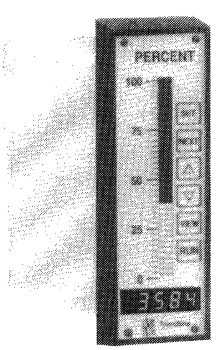
6" Trendline

The perfect fit for your applications . . .

Trendline's optional features offer expandability to meet your growing needs.

- Serial ASCII communication
- Two form C relay outputs
- Four open collector outputs
- 0-5 Vdc scaleable analog output
- 4-20 mA scaleable analog output
- Control inputs
- NEMA rated stainless steel bezel

Made to order faceplates allow selection of legend and bar scale to fit your process.



Scaleable digital display from -9999 to 29999 counts in large, bright 7-segment LED's.

Selectable bottom or center zero bargraph reduces your inventory needs.

Capability to zoom-in on a specific portion of the entire scaled range.

Set point indicators may be continually displayed or push-button activated.

Adjustable light intensity for the bar display.

Operator access to both peak and valley values and clear peak/valley.

Verbal prompts for easy set-up.

Lock-out feature limits access to all set-up parameters with a four digit code selectable by you.

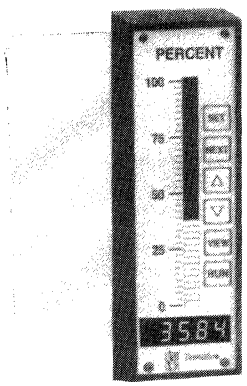
TRENDLINE TRI-COLOR BARGRAPHS

6" EDGEWISE



Features

- ❑ 115 Vac powered
- ❑ Front panel access to set-up controls
- ❑ Bar display is 3.7" (high) x 0.20" (wide)
- ❑ Digital display has 5 green, 7-segment LED characters, 0.30" in height
- ❑ 3 user-selectable bar colors, 4 user-selectable color-change set points
- ❑ User-selectable bar display intensity level, decimal point location, center/bottom zero format
- ❑ Fully scaleable digital display and bar display
- ❑ A socketed scaling resistor can be used to convert a 4-20 mA meter to nearly any analog input
- ❑ Various levels of input signal filtering are selectable
- ❑ Accuracy: ±0.01% of full scale ±0.3°F (Thermocouple Inputs)
- ❑ Stability: ±0.005% of full scale/°C
- ❑ Display Update Rate: 2½ times per second

Process Inputs

Process meters take voltage or current signals and display them directly in any engineering unit. For example, a 4-20 mA unit can be scaled to read 0 to 1000 PSI, 0.0 to 68.0 ATMOSPHERES or 0 to 2036 INCHES OF MERCURY. The bargraph can be set up to show any portion of the digital display. The color-change points can be placed anywhere within the bargraph range.

Current Input — $595.00

SIGNAL RANGE	MODEL NUMBER	SIGNAL RANGE	MODEL NUMBER
1-5 mA dc	TPM 5100	0-1 mA dc	TPM 5104
4-20 mA dc	TPM 5101	0-20 mA dc	TPM 5105

TRENDLINE OPTION GUIDE

Serial ASCII Communication

Option #34, 35, 36 ..... $75.00

- ❑ Baud rate is selectable from 300 to 9600
- ❑ Limitless individual meter addressability
- ❑ Two-way (I/O) serial capability
  - Transmit: Display, ID, polarity, and up to a 17 character message
  - Receive: Set point data; commands to send display, set points, peak, valley, clear peak and valley
- ❑ Available serial formats:
  - RS422 (option #34)
  - 20/60 mA Current loop (option #35)
  - RS232 (option #36)

Two Relay Outputs

Option #41 ..... $65.00

- ❑ 2 form C relays (which can be wired normally open or normally closed) with switching currents of:

0.6 Amps	125 Vac
0.6 Amps	110 Vdc
2.0 Amps	30 Vdc

- ❑ Digital set points
- ❑ The operation of the two relays is independent
- ❑ Update rate is 2½ times per second
- ❑ 1500 volt isolation from signal ground
- ❑ Removable screw terminal connector

Four Open Collector Outputs

(Non-isolated)

Option #45 ..... $50.00

- ❑ Maximum switching current is 100 mA resistive load (50 volts)
- ❑ Digital set points
- ❑ The operation of the four outputs is independent
- ❑ Update rate is 2½ times per second
- ❑ Removable screw terminal connector

0-5 Vdc Scaleable Analog Output

(Non-isolated)

Option #50 ..... $150.00

- ❑ 12 bit resolution
- ❑ Internal voltage source
- ❑ Rear access to output calibration adjustment
- ❑ Removable screw terminal connector
- ❑ Update rate is 2½ times per second

4-20 mA Scaleable Analog Output

(Non-isolated)

Option #51 ..... $150.00

- ❑ 12 bit resolution
- ❑ Rear access to output calibration adjustment
- ❑ Removable screw terminal connector
- ❑ Update rate is 2½ times per second

Note: External current source required

Control Inputs

Option #53 ..... $65.00

- ❑ 7 individual logic level inputs compatible with CMOS or TTL
- ❑ External control to flash bar, tare* and bar color override
- ❑ Removable screw terminal connector

*Example: Weighing the contents of a container. Place the empty container on the scale and tare the meter; the display will read 0. Now, only the material placed in the container will be weighed.

Tamper-proof Panel

Option #74 ..... No charge

- ❑ Set up parameters only accessible with remote programming unit

Note: Remote programming unit required (part # PG 95200), $105.00

Stainless Steel Bezel

Option #93 ..... $75.00

- ❑ NEMA 1, 2, 3, 4 and 12
- ❑ 316 stainless steel housing

Note: 1) Adds approximately 0.25" to height and width of the meter

2) Requires remote programming unit (part # PG 95200), $105.00

WESCHLER BARGRAPHS™

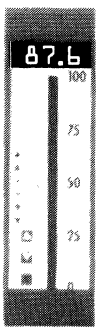
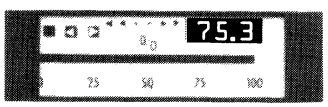
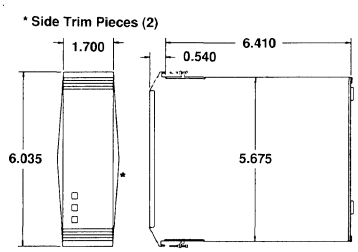
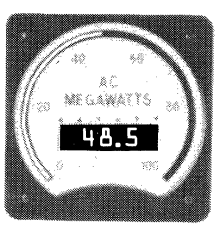
BG252 6" Vertical
BH252 6" Horizontal BarGraph

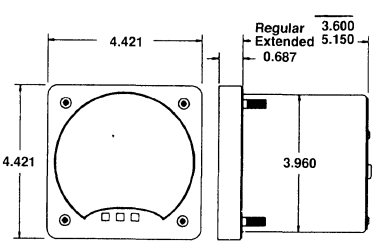






BG 241 4½" Square BarGraph





*Features . . .

- **High Resolution** 101 segment LED BarGraph™ displays 1% resolution.
- **4½ or 3½ Digit Digital Display** scaled to match the BAR process or other related engineering units. All digital displays have a negative sign.
- **Versatile Two or Four Set Points** are available all having form C relay outputs for use as a simple on/off or differential gap controller. Set point levels are easily programmed from the front of the instrument as HI-HI, HI, LO and LO-LO to the exact numeric value required. Set points have selectable hysteresis 0.5%, 1% or 2% of FS. Two fail safe set points.
- **Bar Form** meter bar start position (zero point) can be set anywhere on or off the BarGraph scale.
- **Real-time Visual Trend Indication** of measured signal for easy recognition of system status.
- **True Peak Hold** stored in memory of the highest value of the process signal.
- **Thermocouples** J, K, T, R, S & E and input signals that are non-linear are linearized through a **50 point or greater** algorithm. **Square root extraction** for flow and **strapping tables** for tank applications are available.

***Features and applications apply to all meters on pages D•1398 to D•1401**

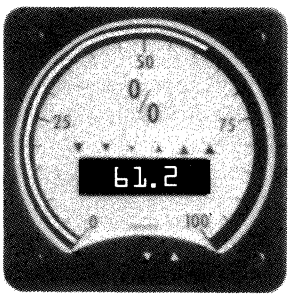
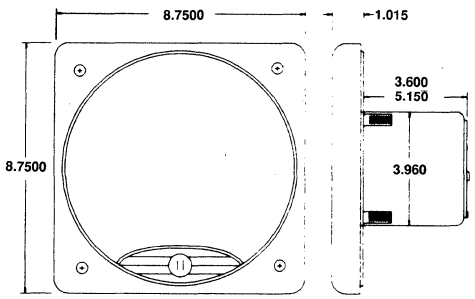
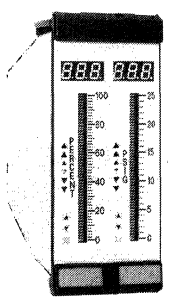
WESCHLER BARGRAPHS™

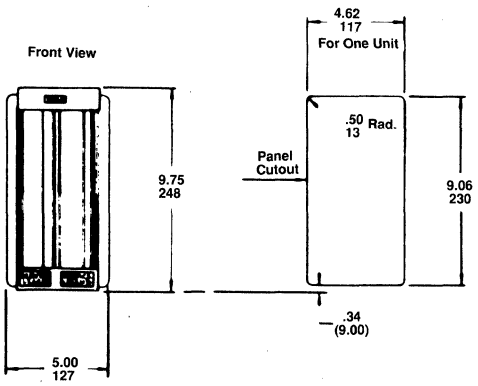
BG261 8 1/2" Square BarGraph





PG101 & 202 9" BarGraph (Bailey PG Replacement)





* Features . . .

- BarGraph is **powered** directly from 120 Vac/240 Vac or 5 Vdc, 12 Vdc, 24 Vdc, 28 Vdc, 48 Vdc or 125 Vdc.
- **Communication** on RS232, RS422 and bi-directional on RS485. RS485 can operate as a two wire LAN with up to 32 other units and is capable of addressable polling of multiple units and high throughput at 9600 baud.
- The measured parameter can be **retransmitted** as a standard process signal (4-20 mA, 0-1 mA, 1-5 volts or BCD). The signals are input isolated at an accuracy of 0.3%.
- **Connection** to each instrument is easily accomplished via **Terminal Block** style connectors. The connectors will accept up to a 14 gauge wire.
- **Easy Set-up** of system parameters from the front panel. Features such as zero adjust, gain, set points and meter scaling are all set with a touch of a button.
- AC current and AC voltage measurements are **true RMS** readings to the 7th harmonic.
- Visual safety **overrange** indication is provided whenever the measured signal exceeds the bar full scale value. In this condition, the full scale LED will flash, the **digital display** will flash and continue to read to the full meter count.
- **Colored LED Displays:** standard is red, optional - green and amber.
- The BarGraph's inherent solid state circuitry provides excellent **high shock** and **vibration** characteristics.

*** Features and applications apply to all meters on pages D•1398 to D•1401**

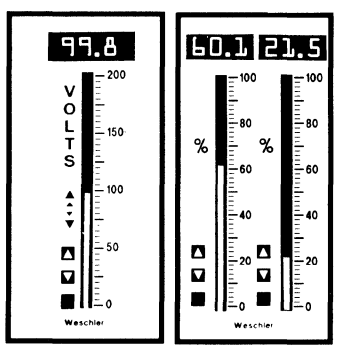
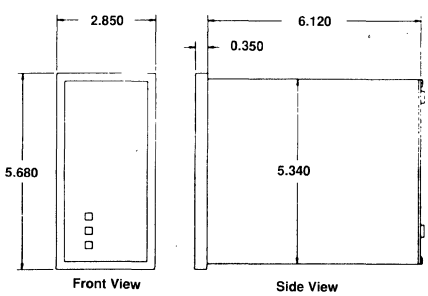
PC 101/202 (72 x 144mm) Vertical Bar Graph



PC101 PC202



Front View Side View

* APPLICATIONS

- DC Voltage measurements from 50 mV dc to 250 Vdc directly. Higher voltages can be measured and displayed with an external divider network.
- DC current from 50 µA dc to 5 Adc can be measured directly. Higher ranges are measured with an external current shunt.
- AC Voltage measurements are true RMS readings up to 250 Vac directly. Frequently response is from DC to 25 kHz. Accuracy is maintained for AC voltages with crest factors up to 3:1.
- AC Current are true RMS readings up to 5.0 A directly. Current transformers are employed for higher readings.
- Thermocouple - J, K, T, R S & E are accepted. Ice point reference and cold-junction compensation is internal. Linearization tables are pre-programmed and stored for each thermocouple type. The BarGraph can be calibrated and scaled in degrees C or F.
- 100 ohm platinum RTD with DIN 43760 standard temperature coefficient alpha = 0.00385/°C is linearized within the instrument. The meter can be configured for a 2 or 3 wire system and can be calibrated in C or F. Linearity for other RTD's can be compensated.
- Frequency or rate indication from Magnetic Pickups, mechanical counters or optical sensors. The BarGraph accepts signals from 5 to 250 V over the frequency range of 10 Hz or 20 kHz directly. AC signals are optically isolated at the meter input for reliability.
- Power-watts for single phase, three-phase three wire and four wire sinusoidal signals are directly measured (no external transducer required). Transformer input isolation. Power is calculated EI cos Θ and displayed on the bar and digital display or can be retransmitted as a standard process signal.
- Reactive power is measured and displayed (VARS) for single phase and three phase, three and four wire systems. No external transducer required; input from CT's (5 A) and PT's (120 V or 240 V) directly to meter. Reactive power is calculated EI sin Θ.
- Power factor is measured and displayed on a center zero scale with center scale equal to 1.0 power factor. Meter input is transformer isolated. Power factor is calculated:
  $\cos \Theta = P \text{ (watts)} / \sqrt{P^2 + Q^2 \text{ (VARS)}}$
- Phase angle of sinusoidal voltage and the start of sinusoidal current. The BarGraph is center zero and calibrated (Neg.) LAG/LEAD (Pos.) in degrees. Measurements are made on voltages up to 250 Vac directly, 50 to 400 Hz.
- Conventional process signals are easily displayed on all BarGraph meters. Flow, pressure, speed, position, temperature and level can be measured and displayed in the appropriate engineering units.

***Features and applications apply to all meters on pages D•1398 to D•1401**

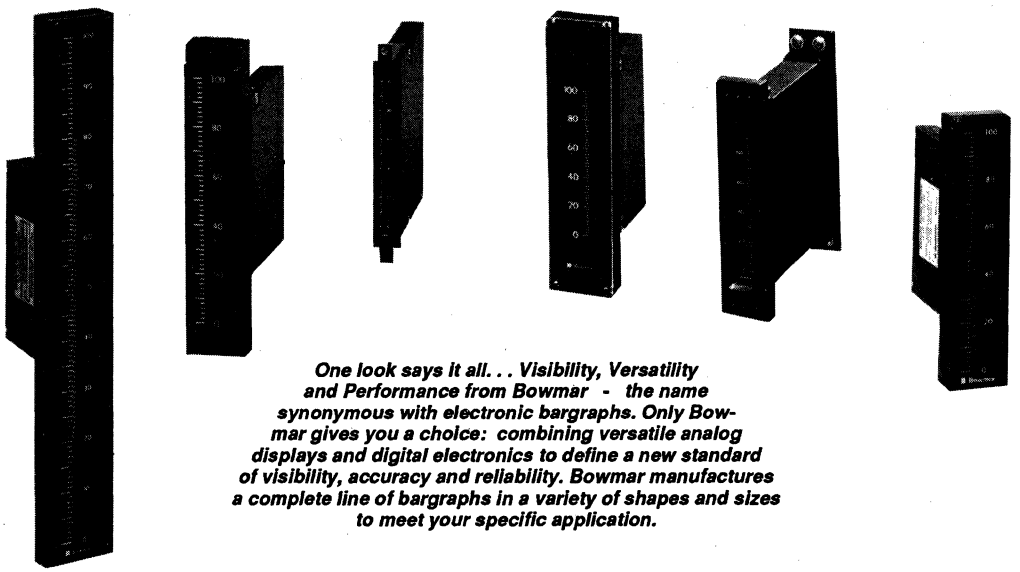
WESCHLER/BOWMAR



One look says it all. . . Visibility, Versatility and Performance from Bowmar - the name synonymous with electronic bargraphs. Only Bowmar gives you a choice: combining versatile analog displays and digital electronics to define a new standard of visibility, accuracy and reliability. Bowmar manufactures a complete line of bargraphs in a variety of shapes and sizes to meet your specific application.

WESCHLER/BOWMAR

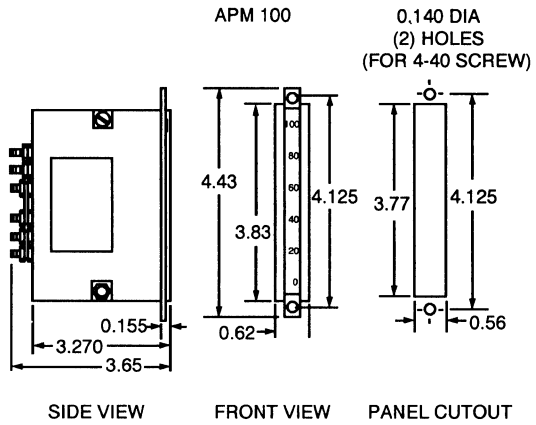
APM 100 Series — Priced from $180.00

The most popular Bowmar meter provides the maximum features in the smallest package of any 100-segment bargraph. The excellent visibility of this meter permits a greater number of variables to be presented in less space than by conventional means. Two basic designs are available: End-reading (bar grows from one end) and Center-zero (bar grows in either direction from the center).

Features

- 100 segments (0.55" x 3.75")
- 1% resolution, 0.5% accuracy
- End-reading or center-zero display
- Visible or non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Full range of inputs
- Front or rear mounting

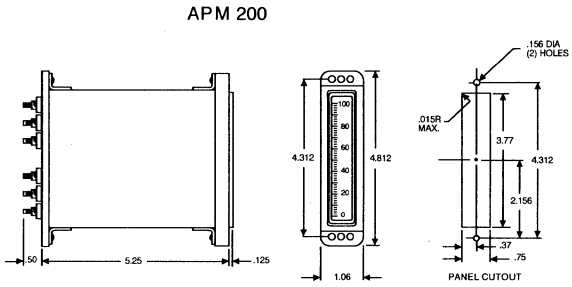


APM 200 Series — Priced from $480.00

The military version of the APM 100 series is qualified for a number of military standards and features a watertight case. This meter is ideal for harsh and unusual environments in industrial plants, equipment, jet engine test instrumentation, ships, and aircraft. The rugged construction and all-metal case of this 100-segment bargraph holds up to the worst possible abuse. Specialized military versions include a digital display, lighting mask and custom ranging among other options.

Features

- 100 segments (0.75" x 3.75")
- 1% resolution, 0.5% accuracy
- End-reading or center-zero display
- Visible or non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Full range of inputs
- Front or rear mounting

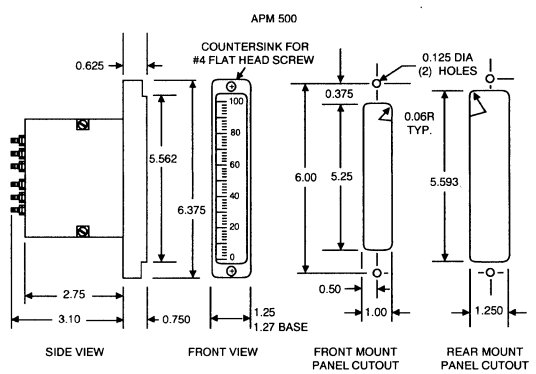


APM 500 Series — Priced from $215.00

This thin-lined 50-segment meter permits easy replacement of edge-reading analog meters. The wide viewing angle of this bargraph permits the operator to work anywhere within the vicinity of the meter and still read the variable. The meter mounts from the front (or optionally from the rear) of the panel.

Features

- 50 segments (1.25" x 6.375")
- 2% resolution, 0.5% accuracy
- End-reading display
- Visible or non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Full range of inputs
- Front or rear mounting



WESCHLER/BOWMAR

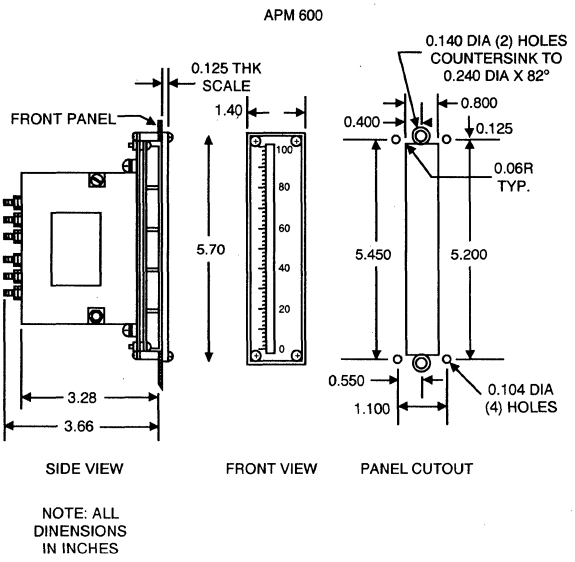
APM 600 Series **Priced from $215.00**

This flush mount meter projects only 0.125" in front of the panel - just the thickness of the scale. Visible at greater than fifty feet, the APM 600 has a clean look. An optional NEMA-4 bezel provides a watertight panel for use in harsh environments.

Features

- 50 segments (1.40" x 5.70")
- 2% resolution, 0.5% accuracy
- End-reading display
- NEMA-4 drip-proof bezel (optional)
- Visible or non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Full range of inputs
- Rear mounting

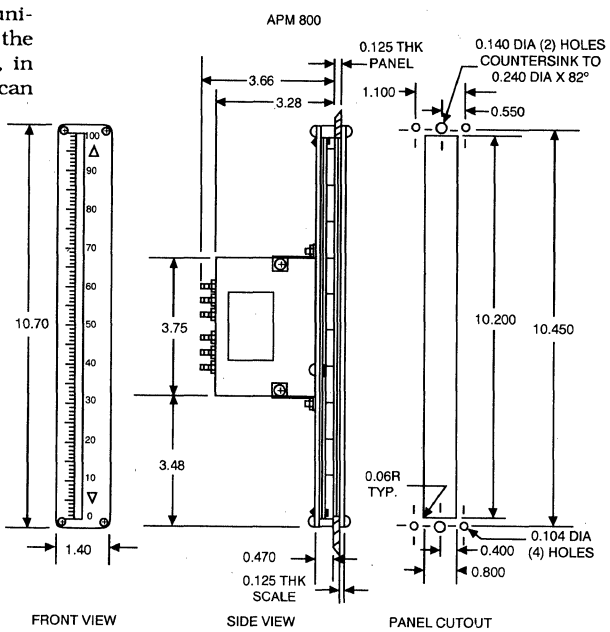


APM 800 Series **Priced from $280.00**

This ten-inch bargraph is an extremely effective communicator at any distance. The meter electronics mount from the rear of the panel while the scale mounts from the front, in similar fashion to its shorter cousin, the APM 600. You can see the strong visual impact of this bargraph meter.

Features

- 100 segments (1.40" x 10.70")
- 1% resolution, 0.5% accuracy
- End-reading or center-zero display
- Visible or non-visible setpoints
- 5 volt power
- Bar or point display
- Full range of inputs
- Rear mounting



WESCHLER/BOWMAR

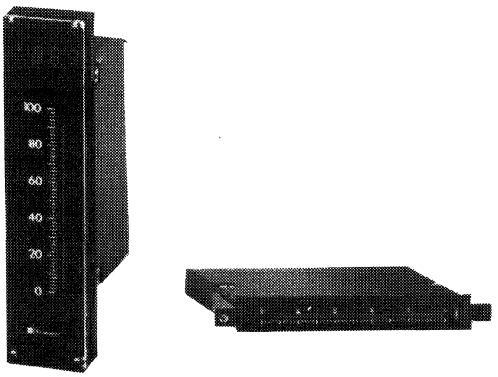
BG Bargraph Series



The BG 100 and BG600 are low-cost versions of the APM Series. These meters are available in a limited number of standard ranges. The available ranges are designed to work with off-the-shelf transducers to measure virtually any phenomenon. The BGD Series effectively communicates information more directly and at greater distances than a simple digital display. The bar display provides relative information such as percentage or level while the digital display provides absolute value or quantity.

BG100 & BG600 Features

- End-reading display
- Non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Inputs: 0-1, 0-5, 0-10 Vdc, 4-20 mA
- Solder-type edge connector supplied

BG100 Features

- 100 segments (0.55" x 3.75")
- 1% resolution, 0.5% accuracy
- Front or rear mounting

BG600 Features

- 50 segments (1.40" x 5.70")
- 2% resolution, 0.5% accuracy
- Drip-proof bezel (optional)
- Rear mounting

BGD Features

- 100 segments (1.40" x 5.70")
- 1% resolution, 0.5% accuracy
- 3½ or 4 digits
- End-reading or center-zero display
- Visible or non-visible set points
- 5 volt power
- Bar or point display
- Brightness control
- Full range of inputs

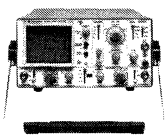
40 MHz BATTERY OPERATED SCOPE WITH CURSORS AND READOUTS

NEW



Model 1443
$1,695.00

■ **On-screen display of voltage, time and frequency** ■ **Complete self-contained portable scope** ■ **Battery pack** *included* ■ **Battery charger** *included* ■ **Soft carrying case** *included* ■ **Two 10:1 probes** *included* ■ **Dual Trace** ■ **1mV/div sensitivity** ■ **Optional high-impact protective case** ■ **AC** *or* **DC operation** ■ **Fixed signal display**

SPECIFICATIONS

VERTICAL AMPLIFIERS (CH 1 and CH 2). **Sensitivity:** 1mV to 5V/div; 12 ranges in 1-2-5 steps with fine adjustment. **Accuracy:** ±3%. **Input Impedance:** 1 MΩ±2%, 30pF ±10%. **Frequency Response:** DC: DC to 40MHz (−3 dB). AC: 10Hz to 40MHz (−3 dB). **Rise Time:** 8.8nS. **Crosstalk:** At least 1000:1 (60 dB) at 50 kHz. **Operating Modes:** CH-1, CH-2, Dual (ALT and CHOP), ADD. **Max. Input Voltage:** 250V (DC + AC peak).

HORIZONTAL AMPLIFIER: X-Y Mode: Set SEC-DIV switch to X-Y position; CH1: Y axis; CH 2: X axis. **Sensitivity:** 1 mV to 5V/div. **Input Impedance:** 1 MΩ±2%, 30pF ±10%. **Frequency Response:** DC to 1 MHz (−3 dB).

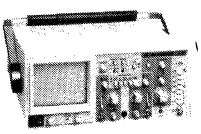
SWEEP SYSTEM: Sweep Speed: 0.5 µs to 0.5 s/div, ±3%, in 19 ranges, 1-2-5 steps with fine adjustment. **Sweep Magnification:** X10, ±6%. **Linearity:** ±3%; ±6% for X10 magnification.

TRIGGERING: Trigger Modes: AUTO, NORM, TV-H, TV-V. **Trigger Sensitivity:** Internal: 1 div or more, 20 Hz to 40 MHz; Ext: 1V or more, 20 Hz to 40 MHz.

CRT: Readouts: CH 1 and CH 2 volts per division, DUAL, ADD INCAL, and INV for vertical axis; Time/Div, UNCAL, and X10 MAG for horizontal axis. **Cursors:** Measure voltages, time and frequency. **CRT Type:** 3.5-inch rectangular with internal graticule. **Display Area:** 8×10 divisions. **Accelerating Voltage:** 15 kV.

GENERAL: Calibrating Voltage: 2V p-p ±2%, 1 kHz square wave. **Power Requirements:** 90 to 130 VAC and 180 to 260 VAC, 48 to 440 Hz; 11 to 14 VDC at approx. 0.8A. **Built-in Battery:** Ni-Cad type, 1 hour operating time, 12 to 14 hour charging time. **Dimensions (H×W×D):** 11×21.5×33.5 cm (4.3×8.5×13.2 in.). **Weight:** 14 lbs. (6.3kg).

DIGITAL STORAGE/ANALOG OSCILLOSCOPE



Model 2522
$1,050.00

■ **20MHz analog bandwidth** ■ **10MS/s sampling rate** ■ **2k memory per channel** ■ **20MHz equivalent time sampling** ■ **Pre-trigger capture**

SPECIFICATIONS

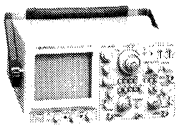
Storage Word Size: 2048×8 bits/channel (2 k/channel with direct sampling, 1 k/channel with equivalent time sampling). **Vertical Resolution:** 1 in 256, approximately 25 steps/div. **Horizontal Resolution:** 1 in 2048, approximately 200 samples/div. **Sampling Rate:** 10 M samples/sec to 10 samples/sec, reduced in proportion to t.b. Direct sampling at time base settings of 20 µ/s div and slower, equivalent time sampling at t.b. settings of 10 µ s/div and faster. **Time Base Expander:** For storage of slow time events, time base steps 10 ms/div and slower have selectable 1/1 or 1/100 rate. 1/100 rate expands time base from 1 sec/div to 20 sec/div in 1-2-5 sequence. **Equivalent Time Sampling Bandwidth:** 20 MHz for repetitive waveforms. **Dot Joining:** Linear interpolation between samples.

DIGITAL DISPLAY MODES
Roll: Stored data and display updated by triggered sweep. **Hold:** Freezes channel 1 and channel 2 data. **Save CH2:** Freezes channel 2 data immediately. **Pretrigger Storage:** Switchable to 0% or 50%.

PLOT OUTPUT
CH 1 and CH 2 Outputs: Selected by PLOT switch on rear panel. **Output Sweep Rate:** Output sweep rate is 1/10 of TIME/DIV setting (and 1/100 switch when applicable). **Pen Lift Output:** Available at PEN DOWN jack on rear panel. TTL high, pen up. TTL low, pen down.

ANALOG MODE SPECIFICATIONS
Similar to Model 2120.

TRIPLE-INPUT SIX-TRACE PORTABLE 100 MHz OSCILLOSCOPE



Model 2190
$1,645.00

■ **1 mV sensitivity to full bandwidth** ■ **Three channel 6-trace display** ■ **Dual timebase** ■ **23 calibrated sweeps** ■ **Rectangular CRT with internal graticule and scale illumination** ■ **19 kV accelerating voltage** ■ **V mode—displays signals unrelated in frequency** ■ **Alternate sweep function** ■ **Signal delay line** ■ **20 MHz bandwidth limiter** ■ **Video separators** ■ **CH 1 output.**

SPECIFICATIONS

VERTICAL AMPLIFIERS (CH 1 and CH 2): **Deflection Factor:** 1 mV/div to 5 V/div with vernier. **Accuracy:** ±3%
Response: DC: DC to 100 MHz (−3 dB). AC: 10 Hz to 100 MHz (−3 dB). **Rise Time:** 3.5 ns or less. **Input Z:** 1 MΩ ±1%/22 pF. **Modes:** CH1, ADD, CH2, CH3.

TRIGGERING
A trigger: Signal Source: INT, LINE, EXT, EXT ÷5. **Sensitivity:** DC to 10 MHz: 0.4 DIV (INT), 0.04V (EXT). 10 MHz to 100MHz; 1.5 DIV (INT), 0.15V (EXT). Video signal: 2 DIV (INT), 0.2V (EXT). **Coupling:** AC HF REF, TV, DC. **B trigger:** triggering signal is A. **EXT trigger:** CH3 uses the same trigger. **Input Z:** 1 MΩ ±2% 22pF ±2pF. **Max. input voltage:** 100V (DC + AC peak).

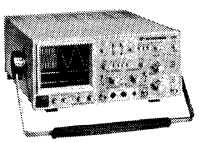
HORIZONTAL
Horizontal axis display: A, ALT, B, B TRIG'D

A Sweep: Sweep modes: AUTO, NORM, SINGLE. **Sweep Time:** 20nS to 0.5S/DIV; 2nS to 50nS/DIV (at ×10 MAG): 23 step selection in 1-2-5 sequence, ±3% for 10°C to 35°C. **B sweep:** Delay system: Continuous delay, Triggered delay, Triggered to A trigger. **Sweep magnification:** 10 times (max. sweep time is 2nS/DIV). **X-Y Operation:** CH 1 becomes X axis, CH 2 is Y axis. **Z-AXIS INPUT.** Sensitivity: 3V p-p. Response: DC-5MHz. **CRT Type:** 6" rectangular.

OTHER SPECIFICATIONS
Power: 90-253 VAC; 50/60 Hz, approx. 65 W. **Dimension:** (H×W×D): 15.2×29.4×40 cm. **Weight:** 7.8 kg

ACCESSORIES SUPPLIED
Two 10:1 Probes, Instruction Manual, Schematic Diagram and Parts List.

60 MHz DUAL-TRACE DUAL TIME BASE OSCILLOSCOPE



Model 2160
$1,099.00

■ **1 mV sensitivity** ■ **sweep to 5 ns/div** ■ **22 calibrated ranges—main time base** ■ **19 calibrated ranges—delayed time base** ■ **Rectangular CRT with internal graticule** ■ **12 kV accelerating voltage** ■ **Signal delay line** ■ **Beam Finder** ■ **V mode—displays two signals unrelated in frequency** ■ **Component Tester** ■ **Channel 1 output** ■ **Z axis input** ■ **X-Y operation** ■ **Single sweep.**

SPECIFICATIONS

VERTICAL AMPLIFIERS (CH 1 and CH 2): **Sensitivity:** 1 mv/div to 5 mv/div. **Attenuator:** 12 calibrated steps in 1-2-5 sequence. Vernier control provided. **Input Impedance:** 1 MΩ + 2%. 30 pF + 5 pF. **Frequency Response:** 5 mV/div to V/div: DC: DC to 60 MHz (−3 dB). AC: 5 Hz to 60 MHz (−3 dB). **Rise Time:** 5 mV/div to 5 V/div: 5.8 ns. **Operating Modes:** CH 1: CH 1, single trace. CH 2: CH 2, single trace. DUAL: CH 1 and CH 2, dual trace. Alternate or Chop selectable at any sweep rate. ADD: algebraic sum of CH 1 + CH 2.

SWEEP SYSTEM: Operating Modes: Main, Mix. **Delay Main Time Base:** 0.05 µs/div to 0.5 s/div in 1-2-5 sequence, 22 steps, Vernier control provided. **Delayed Time Base:** 0.5 µs/div to 50 ms/div in 1-2-5 sequence, 19 steps. **Holdoff:** Continuously adjustable for main time base from NORM to 10 times normal. **Delay Time Position:** Continuously variable.

TRIGGERING: Trigger Modes: AUTO (free run), NORM, SINGLE. **Source:** CH 1, CH 2, ALT (V MODE), EXT, LINE.

HORIZONTAL AMPLIFIER: X-Y mode: CH 1: Y axis, CH 2: X axis. **Frequency Response:** DC: DC to 2 MHz (−3 dB). AC: 5 Hz to 2 MHz (−3 dB).

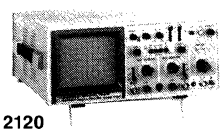
CRT: Type: 6-inch rectangle with internal graticule. **Display Area:** 8 x 10 div (1 div = 1 cm). **Accelerating Voltage:** 12 kV. **Phosphor:** P31. **Scale Illumination:** Continuously variable.

COMPONENT TESTER: Components Tested: Resistors, capacitors, inductors, and semiconductors.

OTHER SPECIFICATIONS: Environment: Full Operation: 0° to +40°C, 85% max. R.H. **Power Requirements:** 120 V/220 V ±10%, 50/60 Hz. **Dimensions:** (H x W x D) 5¾ x 13⅜ x 17" (146 x 340 x 430 mm).

ACCESSORIES SUPPLIED: Two 10:1 Probes, Instruction Manual, Schematic Diagram and Parts List. AC Power Cord.

20 MHz DUAL-TRACE OSCILLOSCOPE



Model 2120
$549.00

■ **Dual or single trace operation** ■ **1 mV/div sensitivity** ■ **20 MHz response at a true 3 dB** ■ **AUTO/NORM triggered sweep operation with AC, TVH, TVV and Line coupling** ■ **Calibrated 18 step time-base with x10 maginifier** ■ **X-Y operation** ■ **Bright, sharp rectangular CRT with P31 phosphor** ■ **Front panel trace rotation control** ■ **Tilt stand and soft handle** ■ **Selectable + slope** ■ **Built in calibration source** ■ **Compact low-profile design.**

SPECIFICATIONS

VERTICAL AMPLIFIERS (CH 1 and CH 2): **Sensitivity:** 5 mV/div to 5V/div in 1-2-5 sequence, 10 steps. Plus Vernier control. **Input Impedance:** 1 MΩ + 2%, 35pF + 5pF. **Frequency Response:** 5 mV to 5V/div (CAL): DC to 20 MHz (−3 dB). 1 mV/div (uncalibrated): DC to 10 MHz (−3 dB). **Rise Time:** Approximately 17.5 ns. **Operating Modes: CH 1:** CH 1, single trace. **CH 2:** CH 2, single trace. **ALT:** Dual trace, alternating. **CHOP:** dual trace, chopped. **ADD:** Algebraic sum of CH 1 + CH 2. **DC to 20 MHz:** 4 divisions. **DC to 10 MHZ:** 8 divisions.

TRIGGERING
Trigger Modes: AUTO (free run) or NORM. **Trigger Source:** CH 1, CH 2, ALT, EXT, LINE. **Maximum External Trigger Voltage:** 200 Vdc + ac peak. **Trigger Coupling:** AC 30 Hz to 30 MHz. TV H, TV V

SWEEP SYSTEM
Sweep Speed: 0.5 µs/div to 0.2 s/div in 1-2-5 sequence, 18 steps. Vernier control. **Sweep Magnification:** 10x, ±6%.

HORIZONTAL AMPLIFIER
X-Y Mode: CH 1 Y axis. CH 2 X axis.

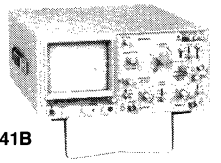
CRT
Type: Rectangular with internal graticule. **Display Area:** 8 x 10 div (1 div = 1 cm). **Accelerating Voltage:** 2 kV. **Phosphor:** P31.

OTHER SPECIFICATIONS
Power: 115 V/230 V ±10%, 50/60 Hz, approx. 35W. **Dimensions:** (W x H x D): 12.6 x 5.1 x 14.2" (320 x 130 x 361 mm). **Weight:** Approximately 15 lbs (6.75 kg).

ACCESSORIES SUPPLIED
Two Probes, Schematic Diagram and Parts List, AC Power Cord, Spare Fuse.

40 MHz DUAL TRACE OSCILLOSCOPE

NEW



Model 1541B
$845.00

■ **1 mV/div sensitivity** ■ **20 calibrated sweeps** ■ **Video sync separators** ■ **Z axis input** ■ **x10 sweep mag. Single sweep** ■ **V mode-dispays two signals unrelated in frequency** ■ **Channel 1.output**

SPECIFICATIONS

VERTICAL AMPLIFIERS (CH 1 and CH 2): **Sensitivity:** 5 mV/div to 5 V/div. 1 mV/div, with x5 gain. **Input Impedance:** 1 MΩ ± 2%/30pF. **Frequency Response:** DC to 40 MHz (−3 dB), DC to 20 MHz (−3 dB) at x5 gain. **Rise Time:** 8.8 ns (x5 gain: 17.5 ns). **Operating Modes:** CH 1: CH 2: DUAL; Alternate/Chop, ADD.

SWEEP SYSTEM
Sweep Speed: 0.2µs/div to 0.5 s/div (±3%) in 1-2-5 sequence, 20 steps, Vernier control provided. **Sweep Magnification:** 10x ± 5%.

EXTERNAL TRIGGER
Imput Impedance: 1 MΩ ± 2%, approximately 30 pF. **Maximum Input:** 100 V (DC + AC peak) to 1 kHz.

HORIZONTAL AMPLIFER:
(Input thru EXT TRIG). **EXT Horizontal Mode:** Trace swept by exit. horiz. signal. Vert. Axis modes CH 1, CH 2, DUAL, and ADD. **Bandwidth:** DC to 2 MHz (−3 dB).

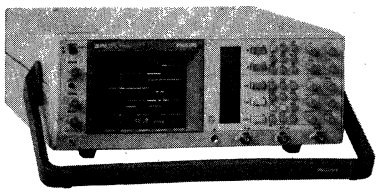
OTHER SPECIFICATIONS
Operating Environment: Same as Model 2160.
Power Requirements: 100 V/120 V/220 V/230 V/240 V ±10%, 50/60 Hz, approximately 35W.
Dimensinos: (H x W x D) 6.3 x 12.8 x 17.7" (34 x 14.5 x 45 cm). **Weight:** 16.5 lbs (7.4 kg).

ACCESSORIES SUPPLIED
Two 10:1 probes, manual, schematic parts list.

FLUKE AND PHILIPS – THE GLOBAL ALLIANCE IN TEST & MEASUREMENT

FLUKE® PHILIPS

Oscilloscopes

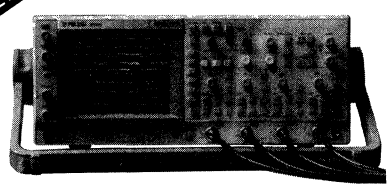


PM 3070

PM 3050/55 60 MHz & PM 3065/70 100 MHz

- AUTOSET for automatic amplitude, time, and trigger setting
- LCD panel displays status and settings
- 16 kV CRT acceleration voltage
- Fast action up/down controls and cold switching
- GPIB/IEEE-488 interface option
- Single timebase, dual timebase and cursor versions

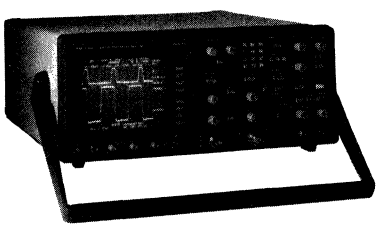
NEW



PM 3094

PM 3092 and PM 3094 Analog Oscilloscopes

- Choice of 2 models with 200 MHz bandwidths
- Unprecedented 1% voltage and timing accuracy
- Autoset for instant, optimized display
- Delayed Time Base with full trigger capabilities
- Powerful cursor measurements with direct numeric readout
- On-screen ground level indicators, channel identifiers & trigger level display
- Automatic voltmeter measurements
- Probe recognition, automatic or manually selectable
- Standard RS-232-C interface, IEEE-488.2 optional, full remote capability
- ISO 9001 quality certification
- HDTV trigger facilities



PM 3340

PM 3340 2 GHz Digitizing Oscilloscope

- DC to 2 GHz bandwidth
- 175 ps risetime
- Trigger response up to 2 GHz
- 4 memories of 4K bytes x 10-bit words
- 1 mV/div vertical sensitivity
- Automatic cursor measurements of amplitude, time, frequency and phase
- Signal processing including basic algebraic functions, plus filter, FFT and histogram
- Eye pattern mode for PCM inspection
- Standard GPIB/IEEE-488 and RS-232C interfaces
- Probes operate over full bandwidth
- AUTOSET function gives instant front panel set-up for any input signal

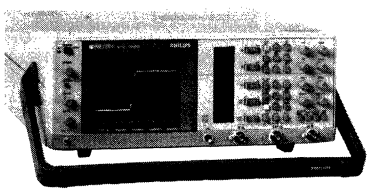
Also see our Multimeters in EEM Section 2900.

Call Fluke toll-free at 1-800-44-FLUKE to order or for more information

FLUKE AND PHILIPS - THE GLOBAL ALLIANCE IN TEST & MEASUREMENT

FLUKE® PHILIPS

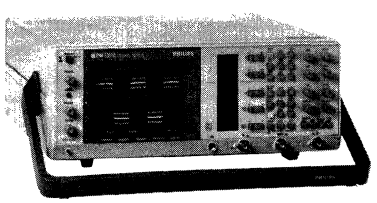
Oscilloscopes



PM 3350A

PM 3350A & PM 3355 Digital Storage Oscilloscopes

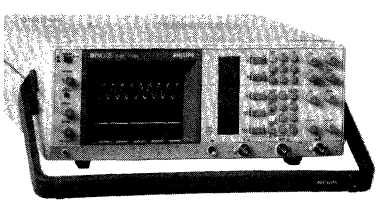
- Analog oscilloscope plus fast digital storage oscilloscope
- Sample rates of 250 MS/s (PM 3355) or 100 MS/s (PM 3350A) on each channel
- Synchronous sampling on both channels
- 60 MHz analog bandwidth with 100 MHz triggering on both models
- AUTOSET for instant on-screen trace display in both operating modes
- 64 front-panel set up memories
- 12K reference memory stores up to 6 reference traces
- Advanced cursors for automatic measurements of voltage & time parameters
- Average and envelope display modes
- Dual time base referencing with autozoom
- GPIB/IEEE-488 and RS-232C interface options



PM 3365A

PM 3365A & PM 3375 Digital Storage Oscilloscopes

- Dual digital and analog oscilloscope functionality in one
- Synchronous real time sampling on both channels up to a high 250 MS/s (PM 3375) or 100 MS/s (PM 3365A), plus sequential sampling
- Analog and digital repetitive bandwidth to a full 100 MHz with 150 MHz triggering
- AUTOSET for instant display of any input signal in both operating modes
- 64 front panel set-up memories
- 12K reference memory stores up to 6 reference traces
- Advanced cursors for automatic measurements
- Average and envelope display modes
- Dual time base referencing with autozoom
- Interface options for extensive remote control or screen plot/print



PM 3335

PM 3335, 60 MHz, 20 MS/s Digital Storage Oscilloscope

- Analog oscilloscope plus full function digital storage oscilloscope
- 20 MS/s synchronous real time sample rate on each channel
- 60 MHz analog bandwidth
- Deep 8K bytes x 8-bit waveform acquisition memory even at max sample rate
- Second reference memory for comparison of waveforms
- AUTOSET for instant on-screen trace display
- Standard cursors for many on-screen measurements
- GPIB/IEEE-488 and RS-232 interface options

Also see our Multimeters in EEM Section 2900.

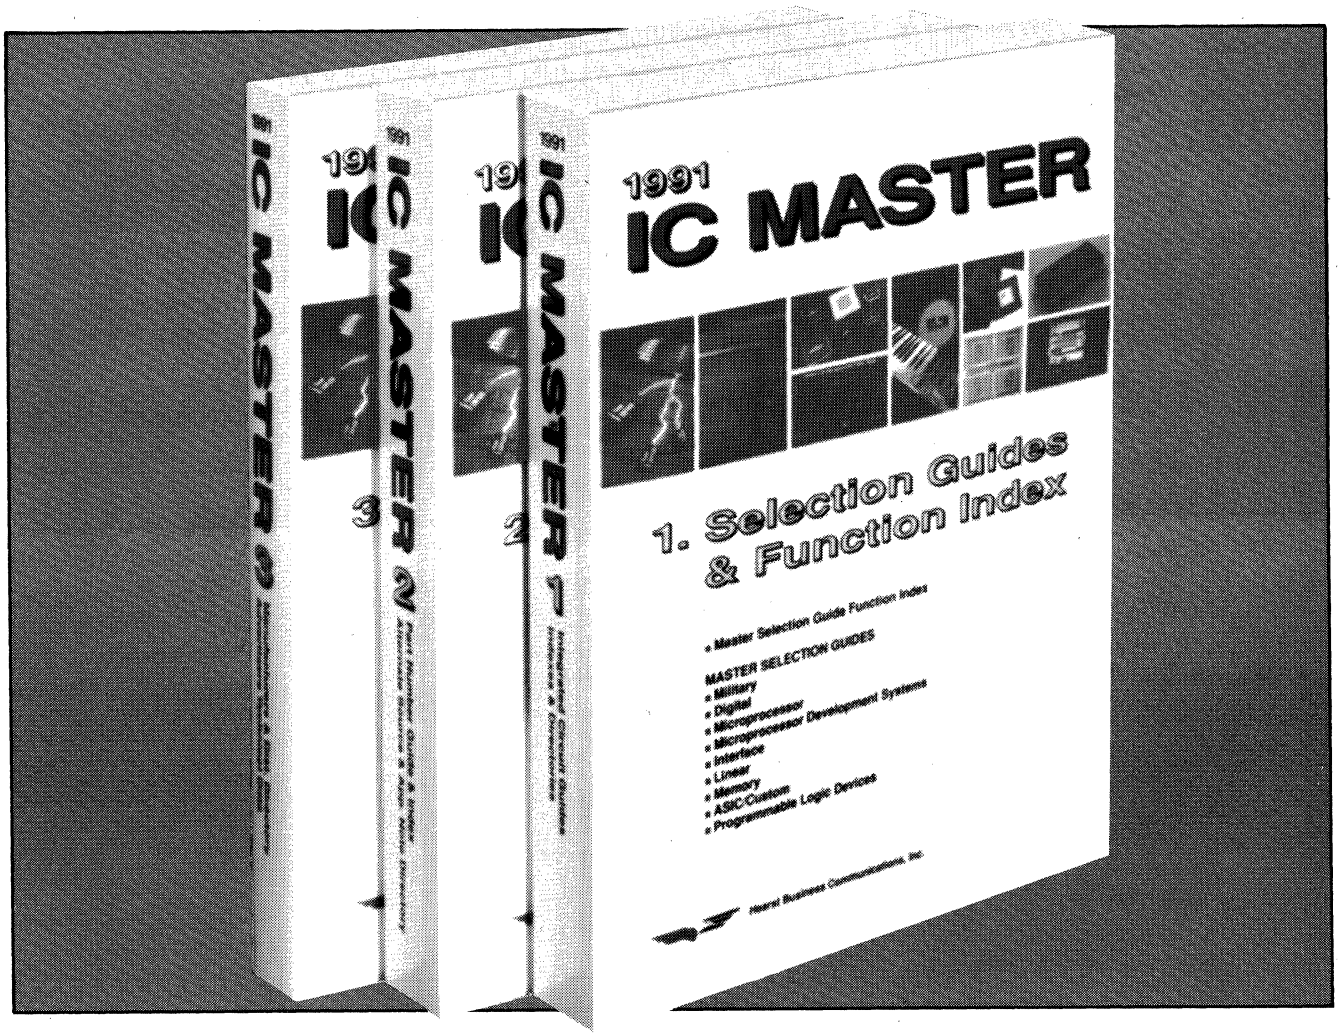
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

IC MASTER

KIK OSCILLOSCOPES

For A Clearer View.

KIK offers feature packed, precision oscilloscopes, from 20 to 100 MHz, analog and digital storage for bench testing, engineering labs, field service and educational applications. Scopes vary from 1 to 4 channels.

All offer peak-to-peak level lock automatic triggering that holds the signal in-sync no matter how often you change vertical input range or time base controls.

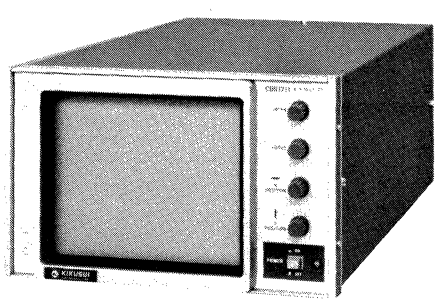
ANALOG AND DIGITAL STORAGE

- 20 - 100 MHz frequency bandwidth
- 2 - 4 display channels
- Displays up to 8 traces
- Patented auto focus
- Alternate sweep mode
- GPIB programmable (opt.)
- Rugged, portable

For sales and service available nationwide call us.

X-Y DISPLAY MONITORS

- 6″ and 7″ CRT
- Modular design
- Built-in or bench
- DC-5 MHz band for X, Y, Z axes
- .45 mm spot size for high definition
- Switching regulated power supply
- BNC connectors for easy hookup
- Modifications to suit your requirement



Also see our ads under Power Supplies, AC Sources and Hi-Pot Testers.

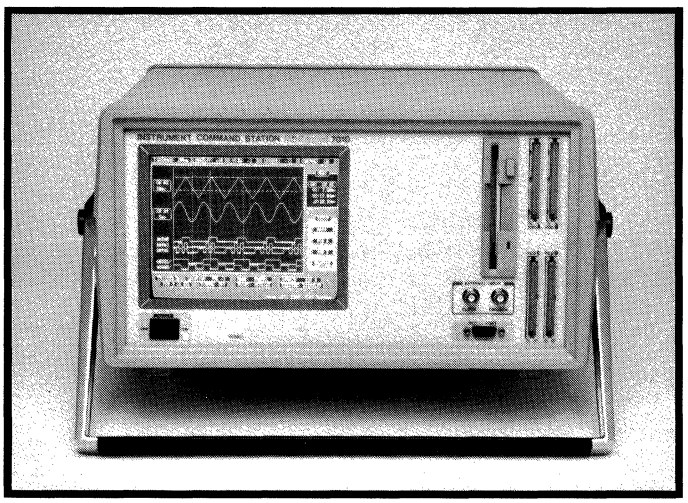
MiNT Systems™

Designed for Versatility



7010 Instrument Command Station™

- **Application-specific instrumentation platform, supports up to 4 instruments simultaneously (via Instrument Pods™)**
- **Provides up to 8 Digital Storage Oscilloscope (DSO) 100 MHz channels**
- **100 ps Time Base resolution**
- **Up to 64 logic timing analyzer channels**
- **Combination trigger setups**
- **Modular instrument approach provides a host of test and measurement capabilities**

The MiNT Systems ICS™ 7010 (Instrument Command Station) is a cost effective solution for general test and measurement requirements. Starting with the basic command station, the user can configure the system by selecting unique Instrument Pods™. For example, combine DSO and logic analyzer pods to allow simultaneous acquisition of analog and digital data that can be labeled and sized on the display screen. Add analog and digital stimulus pods to create a complete test system. The modular design of the ICS allows the user to select various instrument combinations for specific test and measurement applications.

Specifications

Concurrent Instruments: 4 max.

Display
9-inch Raster CRT
External Color Monitor (optional)

Non-Volatile Storage (for test setups and waveform data)
3.5-inch High Density Floppy Disk Drive
3.5-inch Hard Disk Drive (optional)

Test Setup Modes: 3
Disk setup mode
Auto setup mode
Manual setup mode

Time Base
Range: 1 ns/div to 10 s/div
Resolution: 100 ps
Accuracy: 0.01% or 100 ps

Trigger
Sources: line, individual channel or combination of channels
Pre-trigger: 0 to 20 divisions
Post-trigger: 0 to 2,000 divisions
Modes: Auto, Normal, Single, and Roll

Time Measurement
Range: 1 ns to 100 s
Accuracy: 0.01% or 100 ps

Frequency Measurement
Range: 0.1 Hz to 100 MHz
Accuracy: 0.01%

Signal Average: 2, 4, 8, 16, 32, 64, and 128

Math Functions: Invert, Add, Subtract, Multiply, and Divide

Statistical: Histogram per bit weight

X-Y Operation
Any two Analog channels
Z intensity: Any Analog channel

Cursors
Vertical cursors: 3
Horizontal cursors: 3

Waveform Memory: 2 per signal channel

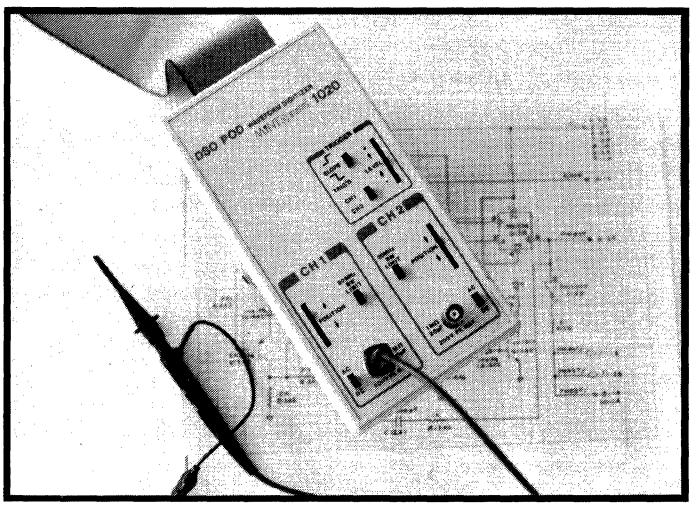
Hardcopy: parallel graphic printer output

Communications Interface: RS232, IEEE488 (optional)

Modular iNstruments and Test Systems
MiNT Systems Corporation 1633 S. Main Street, Milpitas, California 95035 USA

MiNT Systems™

Designed for Versatility

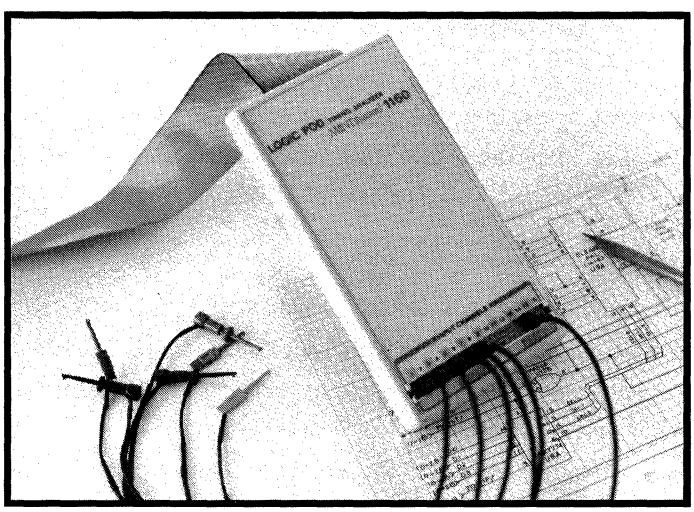


DSO Pod™

- **100 MHz Analog Signal Bandwidth**
- **Full-featured Digital Storage Oscilloscope**
- **Capability of channel number expansion**
- **100 M samples/sec single-shot**
- **10 G samples/sec equivalent sampling rate on repetitive signals**

Specifications

Number of channels: 2
Bandwidth (-3db): DC to 100 MHz
AC coupling: 10 Hz to 100 MHz
Rise Time: 3.5 ns
Input Impedance: 1 MΩ and 20 pf
Trigger Sensitivity: 0.5 div
Vertical Sensitivity: 1 mV/div to 5 V/div
Vertical resolution: 0.4% (8-bit)
Maximum Sampling Rate
100 M Samples/sec, single channel
50 M Samples/sec, dual channel
Waveform Record Length: 8000 points



Logic Timing Pod™

- **100 MHz maximum clock rate**
- **8K memory depth**
- **16 channels, expandable to 64**
- **Glitch capture**
- **Auto Setups**
- **±10 V input signal range**
- **Detachable probe tips**
- **Pre-set logic levels for TTL, ECL, and CMOS**

Specifications

Number of Channels: 16
Input Impedance: 100 KΩ and 20 pf
Input Signal: ±10 V
Threshold Accuracy: 100 mV
Glitch Capture: 5 ns
Maximum Sampling Rate
100 MHz 8 channels, 50 MHz 16 channels
Trigger: external and any channel combination

Hearst Engineering Software

ICMASD...IC Alternate Source Directory

The all new 1991 version of the world famous Alternate Source Directory is now available in floppy disk form for your IBM XT & AT and 100% compatible personal computer with hard drive.

The **1991 ICMASD** contains the more than 180,000 listings that appear in the Alternate Source Directory Section contained in Volume Two of the printed version of the 1991 IC Master ...plus additional discontinued parts. The database includes complete vendor addresses and phone numbers.

You can personalize the **ICMASD** for your application. The program allows you to add comments, up to 20 digits long, to each listing. These comments can be part numbers, prices, or any information specific to your needs. You may also add, delete and/or discontinue devices!

For greater flexibility the base number search feature enables you to access parts by base number, i.e., the device number stripped of prefixes and suffixes. You don't need to know the manufactures codes to call up any of the alternates to these devices.

The **1991 ICMASD** is fast, convenient and very user friendly!

Complete program documentation is included. When ordering, be sure to specify if you want the **1991 ICMASD** on three, double-sided, double-density disks OR on one high-density disk.

For immediate delivery you can order the **1991 ICMASD** at $179.50* simply by charging your Visa or MasterCard credit card. To place your order or for more information, call or write:

ANOTHER ASTRO-MED FIRST IN 8-CHANNEL RECORDERS

LASER PRINTER RESOLUTION!

- **Laser Quality Writing—300 dpi**
- **20 kHz Frequency Response**
- **Automatic Self-Calibration—Traceable to NBS**
- **Expandable to 16 Channels**
- **Data Capture with 200 kHz Sample Rate Per Channel**
- **Built-In Programmable Signal Conditioners**

From its laser-sharp charts to its unparalleled frequency response, this remarkable new 8-channel recorder brings you the technology of the Twenty-First Century today! It outperforms even Astro-Med's MT-9500, which in 1987 was heralded as the first breakthrough in 8-channel recorders in 20 years. It has 50% more resolution, 4 times higher frequency response, and 8 times more memory than the MT-9500. With automatic self-calibration traceable to NBS, expandability to 16 channels, and a host of other important features. We call it the MT-95000, a product so unique that it is protected by U.S. Patent No. 4,739,344.

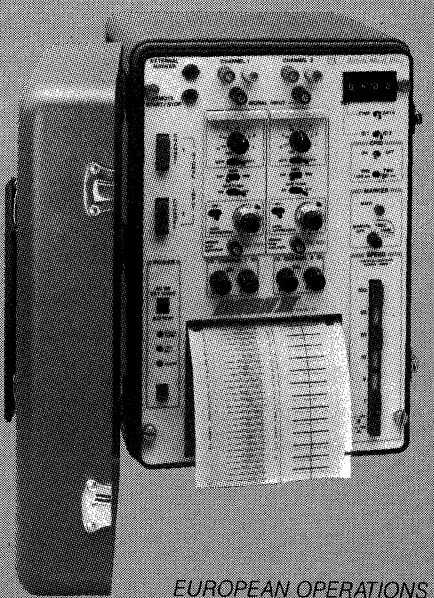
ASTRO-MED'S NEW TECHNOLOGY LEADS THE WORLD IN PORTABLE FIELD AND LAB RECORDERS

Astro-Med's New Technology–with its advanced software and no moving parts–brings you the Dash IV, the world's most powerful and reliable 4-channel recorder. Lightweight, compact, and built into a tough plastic carrying case, it's ready to take anywhere. In either the field or lab, the Dash IV simplifies your most complex recording tasks with its menu-driven operation and automatic self-calibration. You get many other outstanding features too: like 25 kHz real time frequency response, data capture, the sharpest tracings you've ever seen, and a complete family of "personality modules" (signal conditioners) that adapt the Dash IV for virtually any application.

- **DC to 25 kHz Real Time**
- **Battery/AC or 12 VDC**
- **Data Capture and Playback**
- **Separate Channels or Full Overlap**
- **Simple Menu-Driven Operation**
- **Automatic Self-Calibration**

Astro-Med's New Technology is the ideal design for a field recorder. Operating without vulnerable moving parts, the Dash II 2-channel field recorder assures reliable, accurate performance under the most brutal operating conditions: shock, vibration, heat, cold, etc. To simplify data analysis, it prints a system log channel and signal conditioner switch settings on the chart. It's very compact and lightweight and built into a tank tough carrying case, so you can carry it easily into any environment. The Dash II is the worlds only *true* field recorder.



- **Compact & Lightweight; Only 32 Lbs with Batteries**
- **Battery/AC or 12 VDC**
- **DC to 500 Hz Full Scale Real Time Frequency Response**
- **Prints Time and Date**
- **Separate or Overlapping Channels**
- **Rugged Protective Case**

Phone, Fax, or write for literature and a demonstration of any of these recorders.

Astro-Med, Inc.

DC TO 25 kHz REAL TIME RESPONSE

FINALLY! A BATTERY POWERED 8-CHANNEL FIELD AND LAB RECORDER

- Only 28 Lbs Including Internal Battery
- Full 8-1/2 Inch Wide Chart
- Data Capture and Playback– 32 kSamples per Channel
- Eight Separate and Over-lapping Channels
- Internal Battery, AC, and 12 VDC Operation
- Chart Speeds to 200 mm/sec

The new Dash 8 Field and Lab Recorder is the world's first and only truly portable eight channel recorder. Powered by an internal battery (or external 120/220 VAC), the Dash 8 is at home anywhere.

The Dash 8 records eight channels of data from DC to 25 kHz real time as well as eight event channels along with eight channels of alphanumeric data.

Traces are clear and sharp under all conditions. There are no pens, no liquids, and no moving parts to break and wear out thanks to Astro-Med's New Technology thermal recording technique.

Phone, write or Fax for details!

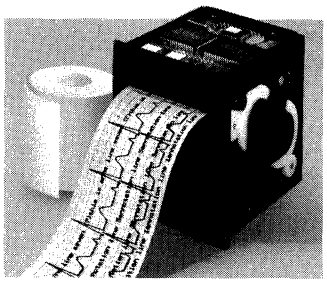
Only From General Scanning...
the industry's smallest, highest-resolution, most versatile thermal array

PRINTER/RECORDERS

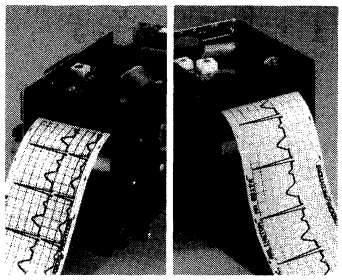
For manufacturers of medical, scientific & industrial instruments.

Sub-Compact 2" Recorder
AR-42

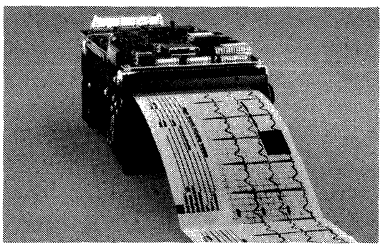


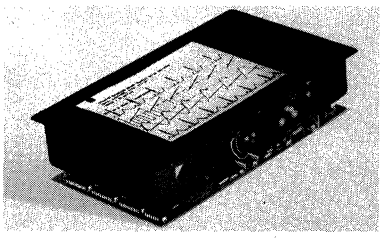
Featuring the smallest size, lightest weight and lowest power drain available, this 2" printer is ideal for both portable and table-top applications. It provides full output capabilities, including waveforms, text and bit-mapped graphics printed in real time over customized background grids. An unmatched 800 dpi resolution and curve-smoothing software ensure clean, accurate waveforms. Prints up to three traces simultaneously, with real-time annotation. Macro file capability facilitates data transfer from host. Designed for simple integration into host instrument.

Compact 2" Recorders
AR-40/AR-41



These reliable, high-precision recorders are designed to handle the output requirements of a wide range of diagnostic, analytical and monitoring instruments. Available data formats include bit-mapped graphics, vertical and horizontal text and multichannel waveforms with 2 lines of floating annotation. Background grids are user-programmable. High-resolution recording (200 × 800 dots/in) ensure crisp, well-defined images. Interfacing with a host instrument is simple and straightforward. Model AR-41 uses host power supply. Model AR-40 has integral supply.





Compact 4" Recorders
AR-100/AR-100 FB

The **Model AR-100** is a compact, versatile recorder that prints text, graphics and waveforms over user-customized background grids. It provides up to 6 output channels for side-by-side traces, complete with up to 6 lines of real-time annotation. Proprietary, curve-smoothing software, extremely high printing resolution (200 × 800 dots/in) and a 10-bit dynamic range provide accurate, high-definition wave reproduction. Electrical and mechanical interfacing with the host instrument is simple and straight forward. Chart speeds are continuously variable from 1 mm/hr to 100 mm/sec. An extremely compact mechanical configuration saves valuable space in the host instrument.

The **Model AR-100 FB** is similar in specifications and performance to the Model AR-100, but provides the added convenience of a flat, horizontal writing surface that facilitates the addition of notes and comments directly on the emerging record.

APPLICATIONS SUPPORT

GSI works with you from product concept and design through production. As a partner in your design and implementation, we support all of your software and hardware needs, ensuring quick and easy integration of our recorders into your products.

CUSTOM PRODUCT SUPPORT

When you have special electrical, mechanical, or output requirements to meet specific market demands, our engineering staff is available to assist you. We may suggest simple modifications to our standard products; or, to truly differentiate your product, a full custom recorder.

For Information or assistance, call TOLL-FREE 1-800-342-3757

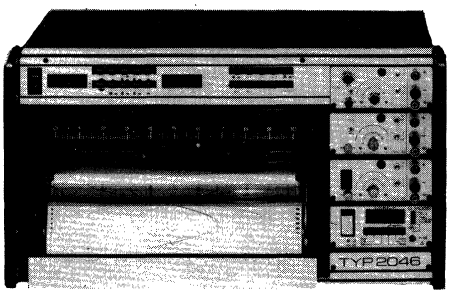
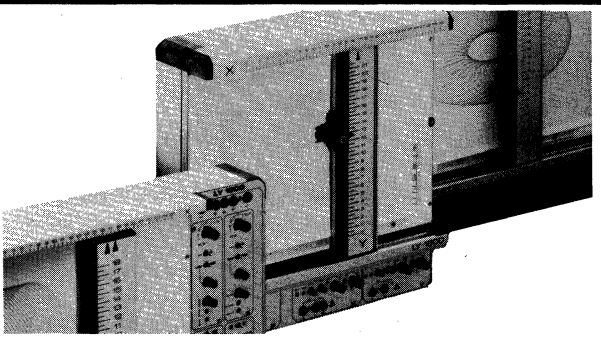
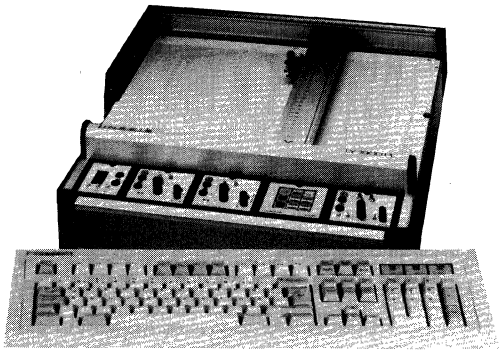
The Recorder Company Presents:



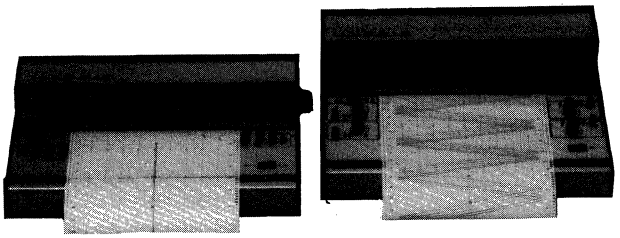
L 2006
Modular rackmount recorder
Plot-function for each channel, time and event marker
Data synchronization(MZK), 35 input modules



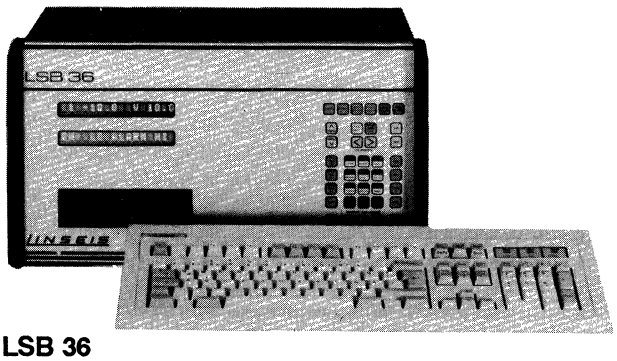
LY 1400 / LY 1500 / LY 1600
Universal standard XY-recorders
High writing speed, US-format 7x10 inch
Stable construction, powerfull, solid construction



LY 1900 PL
Fast XY-recorder combined with digital plotter to print out comments to analog curves, Time base generator
Exchangeable modules for XY-operation



L 6510 / L 6530
Economy standard flatbed recorder
Linearized thermocouples (Type S, K, J, T)
Special input module to measure humidity



LSB 36
Scanner / Hybrid Recorder
Datalogger function, User scaling, Seperate channel programming, 1.52 sec sampling for all 36 channels

L 4100 / L 4000
Digital flatbed recorder
5 functions in one: Chart recorder, Temperature recorder, XY-recorder, Plotter, Computer-front end

MFE Instruments has the intelligent solution for all your recording needs.

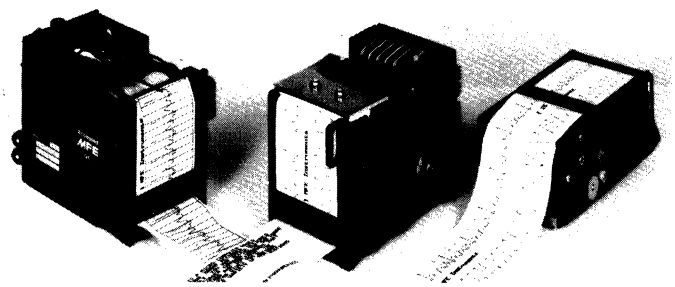
HIGH PERFORMANCE OEM RECORDER MODULES

Compact, Cost-Effective, 40mm or 50mm Chart Widths

4000 SERIES

Time-Tested Thermal Stylus Design

- High Quality Pen Motor and Stylus
- Single and Dual Channel Models
- Alphanumeric Edge Printer
- DC or Stepper Motor



9000 SERIES NEW

New Generation of Thermal Array

- High Resolution Printhead
- Waveforms/Alphanumerics
- Analog and Digital Inputs
- Graphics
- IBM Compatible

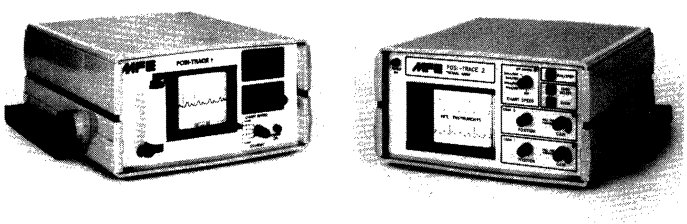
COMPACT END USER RECORDERS

Low-Cost, Versatile, User Friendly

POSI-TRACE 1

Thermal Stylus

- High Quality Pen Motor and Stylus
- Multiple Chart Speeds
- Proven Performance
- 40mm Chart Width



POSI-TRACE 2 NEW

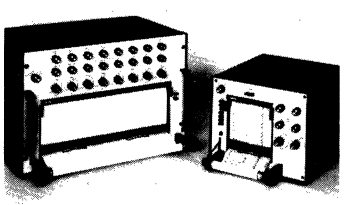
New End User Thermal Array

- High Resolution Printhead
- Single, Dual, and Dual Overlapping Modes
- Analog and Digital Inputs
- Alphanumerics and Graphics
- IBM Compatible
- Battery Power Optional

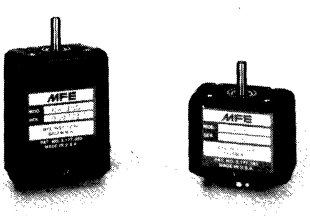
1000 SERIES MULTI-CHANNEL END USER RECORDERS

High Performance/Low-Cost

- Thermal Stylus
- Two Through Eight Channel Models
- Wide Sensitivity Range
- Two-Year Warranty
- Multiple Chart Speeds
- Portable and Rackmount



LIMITED ROTATION MOTORS



Linear Torque Output

Applications:

- Pen Motors
- Scanning and Positioning
- Bar Code Readers
- Actuators
- Laser and Optic Systems

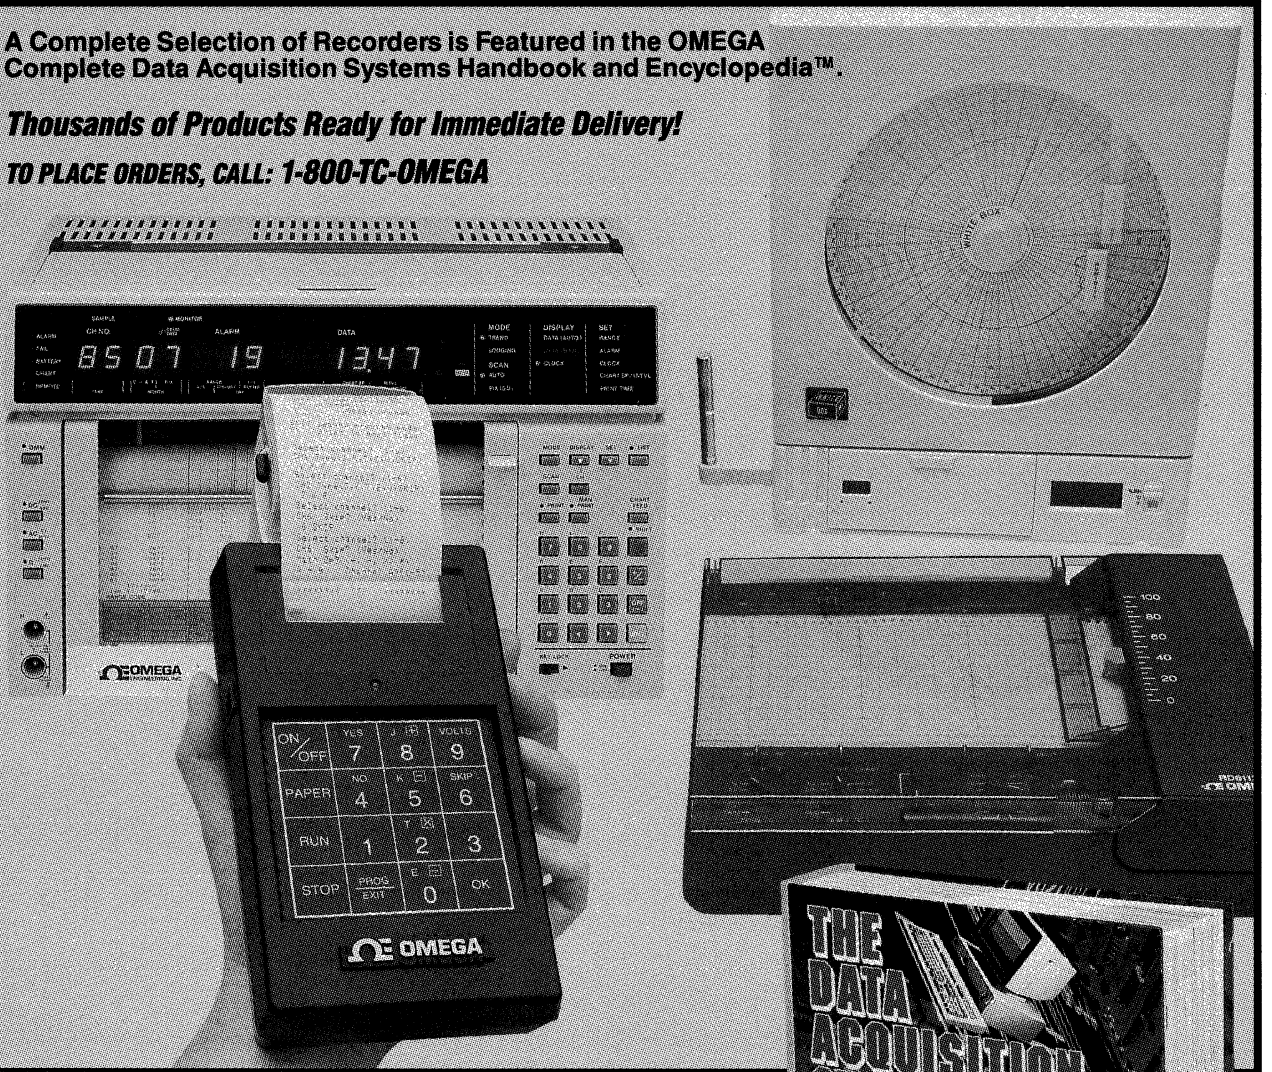
RECORDERS AND DATALOGGERS

A Complete Selection of Recorders is Featured in the OMEGA Complete Data Acquisition Systems Handbook and Encyclopedia™.

Thousands of Products Ready for Immediate Delivery!

TO PLACE ORDERS, CALL: 1-800-TC-OMEGA



The OMEGA Complete Data Acquisition And Computer Interface Handbook And Encyclopedia®

- Over 600 Full Color Pages
- Complete Technical and Ordering Information on Hundreds of New Products
- All Prices Included

Thousands of Products Ready for Immediate Delivery!

Features:

- Communication-Based Acquisition Systems
- Dataloggers
- Stand Alone Computer Interfaces
- Plug-In Cards
- Software
- Signal Conditioners
- Recorder, Printers, Plotters
- And Much More

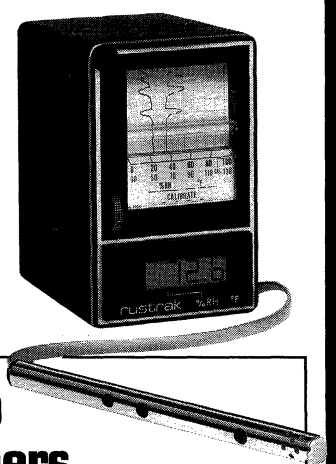
RECORDERS AND DATA LOGGERS...

FOR ALL YOUR RECORDING NEEDS, THINK RUSTRAK



Rustrak Ranger Data Loggers

Rustrak Ranger data loggers are microprocessor-based recording, reporting and analyzing systems. Data is collected, stored in memory and then transferred to a PC. Recording can take place for a year or more. Rangers are rugged enough for use in the harshest environments; their battery operation and compact size also make them ideal for use in remote locations or where space is limited. Easily programmed through just two keys, the Ranger's LCD prompts the operator during the set-up sequence. Pronto software, included free with every data logger, is used for plotting, analyzing, hard copy reporting and storage of the data. Accessories include input modules, probes and tamper-proof and weatherproof enclosures. Available in a 4 channel or an 8 channel analog/digital model with 4 math channels.

Rustrak Strip Chart Recorders

For over 30 years, Rustrak has produced the most comprehensive strip chart recorder line in the industry for the accurate and dependable recording of trend data. Compact size makes Rustrak the ideal choice for portable applications and for areas where space is limited. Packaged in 1 to 3 channel or 100 mm configurations, the recorders are used for recording input signals such as dc voltage and current, ac voltage and current, temperature, humidity, pressure, events and more. Over 350 combinations of writing and chart speed are available. Available with or without digital display. Continuous recording from 10 minutes to 1500 days on one roll of paper. Accuracy as low as 1% of span and response time as fast as .25 second. Standard features include interchangeable gear trains, access window, chart advance, tear-off or reroll mode, a rugged finish, and mounting brackets.

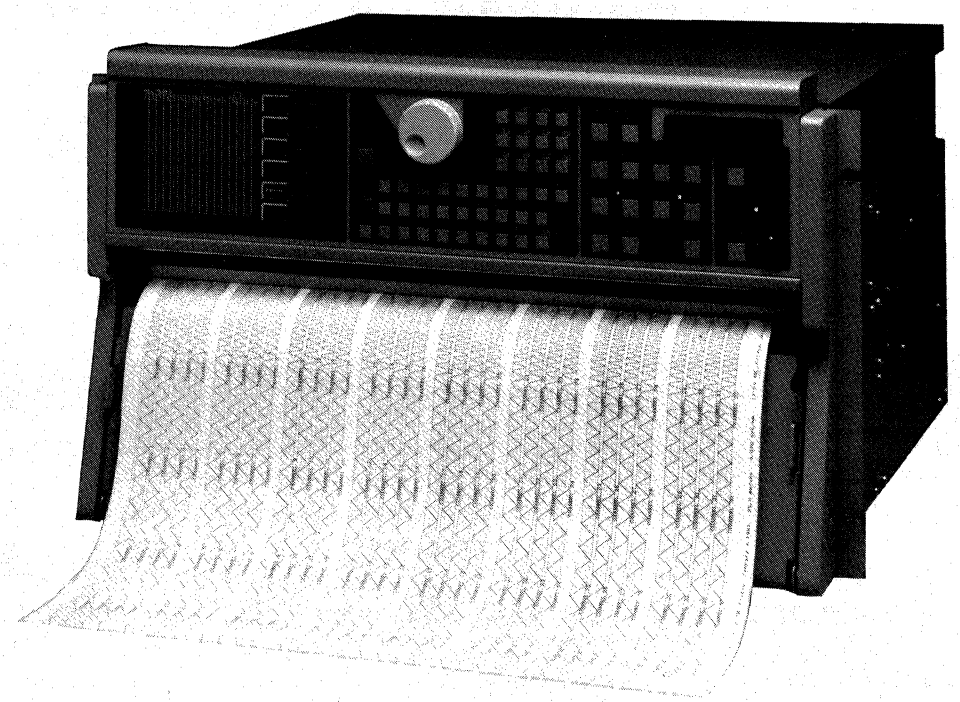
Wow! That Must Be a Western Graphtec Recorder...



Western Graphtec has the right technology for every challenge: high performance ***Arraycorders*** *with four to 32 channels, as well as a wide selection of field portable models. Proven* ***Pen Recorders*** *from one to twelve channels, made for lab and field use. A comprehensive line of* ***Servocorders****, now including some of the most modern digital models.* ***Multicorders*** *and* ***Hybrid Recorders*** *for every budget.* ***X—Y Recorders****, and* ***Data Acquisition Systems****...and so much more.*

And yet despite all of our science and technological innovations, we never forget that high tech was supposed to make our lives easier—not more difficult. Western Graphtec: dedicated to the ***Science of Simplicity.***

Shown above, the remarkable new Mark 12 Data Management System. Combining the best features of paper-based recorders and computer-based data acquisition systems:

- *4 to 32 channels—each with 20kHz bandwidth*
- *Built in video monitor*
- *SCSI port for streaming data to disk in real-time.*
- *Design-your-own-charts and grids versatility*
- *2 million sample battery-backed memory*

We even created our own printhead—a single 15" array which eliminates the data gap suffered by 2-headed recorders. Completely designed and built right here in the USA with a two year warranty on everything. That's power. That's Western Graphtec.

SAFT BATTERIES. ONE FOR ALL. ALL FROM ONE.

Powering the portable electronics of the 80's has been a major problem for product design engineers. And the 90's will be even more challenging. But there is a one source supplier who can meet almost any portable power design challenge. With the industry's broadest line of Nicad® batteries and a variety of lithium chemistries, SAFT allows today's design engineer to design portability into a broad spectrum of electronics, from simple toys to sophisticated computers. And, best of all, this full range of portable power is available from a single source–one order, one shipment, one invoice.

For more information on our complete line of Nicad batteries, contact SAFT America Inc., Portable Battery Division, 711 Industrial Boulevard, Valdosta, Georgia 31601, or call (912) 247-2331. For information on our variety of lithium chemistries, contact SAFT America Inc., Advanced Battery Systems Division, 107 Beaver Court, Cockeysville, Maryland 21030, or call (301) 771-3200.

OUR KEY QUESTIONS ANSWER YOUR DESIGN NEEDS

You'll get the right battery design package the first time around, with delivery to meet your schedule. We know the right questions to ask, up front - when it counts.

23 years experience

Each year Alexander:

- Grades and sorts more than seven million nickel-cadmium cells.
- Assembles more than three million batteries.
- Produces 16 million mercury cells.
- Welcomes FDA inspections.
- Manufactures sophisticated nickel-cadmium battery chargers and analyzers/conditioners.

In-house packaging

Alexander Batteries are packaged with your choice of casing including:

- Shrink-wrapped insulation vinyl.
- Custom-design vacuum formed.
- Custom-designed injection molded. Tools and dies are produced 'in-house'.

Major suppliers

- Alexander
- Emmerich
- Eveready
- Gates (GE)
- Panasonic
- Powersonic
- Rayovac
- Saft
- Sanyo
- Varta

Electrochemical systems

- Alkaline
- Carbon Zinc
- Lithium
- Mercury
- Nickel-Cadmium
- Lead Acid
- Silver Oxide
- Zinc Chloride

Call, fax or write for additional information and design assistance.

AVEX CORPORATION

PORTABLE BATTERY DIVISION

...YOUR PARTNER(S) FOR PORTABLE POWER

*At AVEX, every day is **Earth Day.** To help you promote a better **environment,** AVEX will accept your used NICAD cells and packs for **disposal.** There will be **no charge** for this service, although shipping charges must be prepaid.*

AVEX is the largest SAFT INC. contract value-added distributor and assembler for NICAD™ and LITHIUM batteries and BATTERY PACKS in the U.S. From sales to engineering to service, the people at AVEX PORTABLE BATTERY await your call. We are eager to be of service.

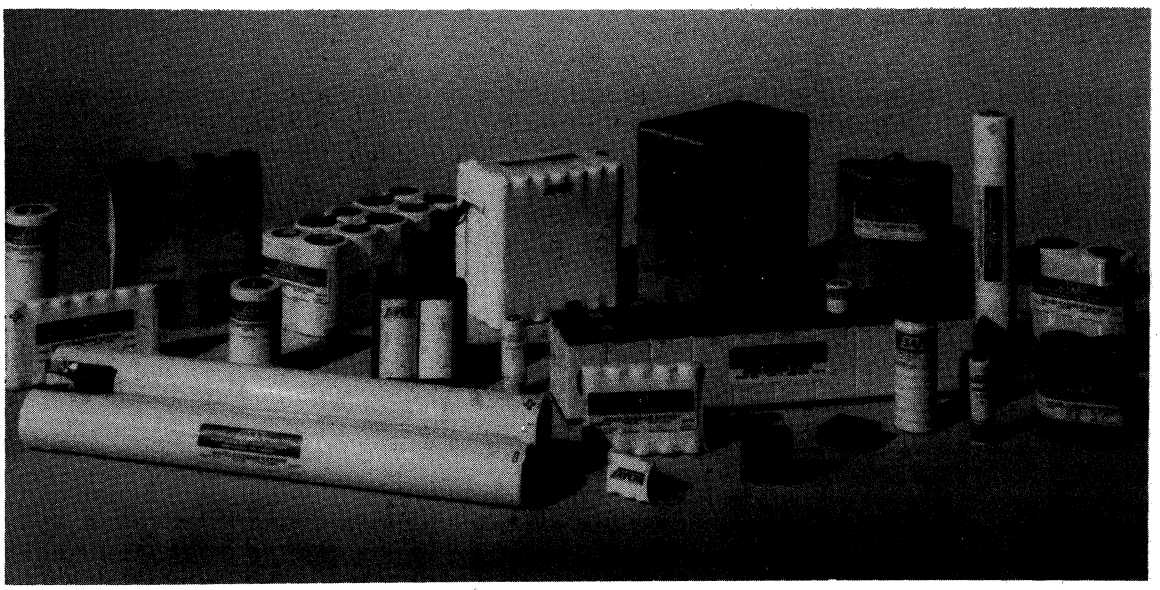
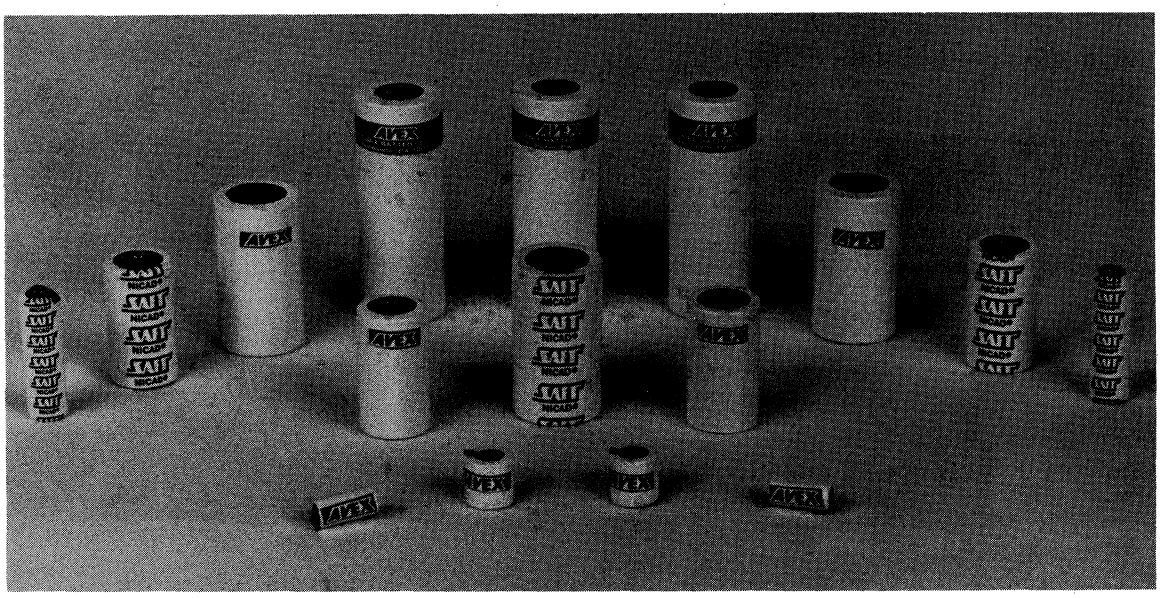
FAX 1-215-638-9108 **1-215-638-1515 (IN PA)**

AVEX . . . YOUR PARTNER FOR PORTABLE POWER



CUSTOM PACKS™

AVEX manufactures, assembles, and tests a wide variety of battery packs, custom designed to fit your most exacting specifications. Both AVEX/SAFT, NICAD and LITHIUM Batteries are offered. Voltage ratings from 1.2 on up. Current capacities from 10 mAh to 10 Ah. Contact your AVEX salesperson for more details.



NICAD™

AVEX distributes the full SAFT line of NICAD batteries, from a 1/3AA cell rated at 0.110 mAh to a super F cell rated at 10.0 Ah. AVEX's complete range of batteries includes standard cells, high temperature Polytemp™ cells and the fast charge, low resistance VR series of cells. AVEX has a cell available to solve even the most difficult battery requirement. Additional information on any of these products is available from our office.

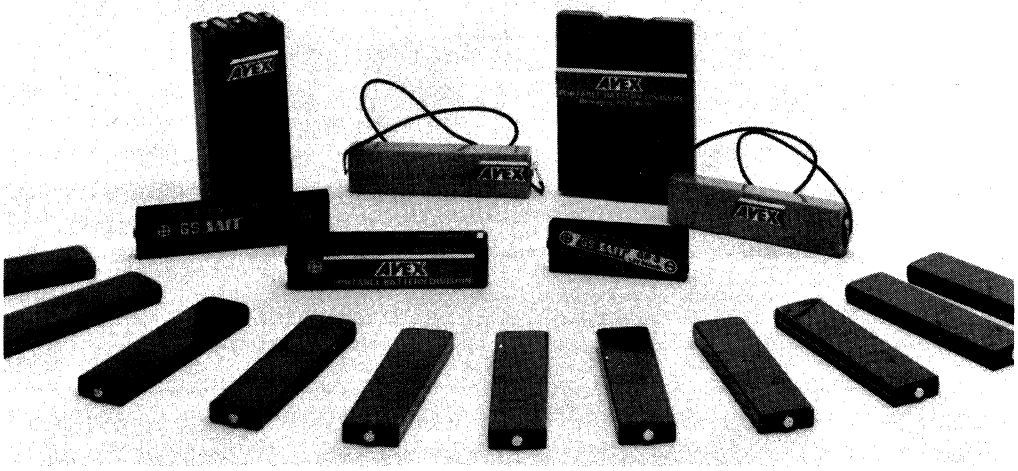
AVEX . . . YOUR PARTNER FOR PORTABLE POWER



AVEX/SAFT Introduces The World's First *Flat* Nicad Cell!

PRISMATIC NICAD CELL'S G.P. SERIES

THIS FLAT CELL DESIGN AFFORDS 30% HIGHER VOLUME EFFICIENCY when compared to regular cylindrical cells. G.P. SERIES cells can be made into a multitude of packs. Cells range from 360 mAh = GP4, 540 mAh = GP6, 765 mAh = GP9, and 1800 mAh = GP20. Consult your AVEX salesperson for more details.

LITHIUM

AVEX/SAFT lithium batteries offer performance characteristics unequalled by other battery types: exceptional shelf life, high cell voltages, wide operating temperature ranges and the highest energy densities. There are a variety of cell chemistries available to assure a proper fit between application and battery: LS-Lithium/Thionyl Chloride Batteries, 3.5V, −40 to +70°C; LX-Lithium/Sulfur Dioxide Batteries, 2.95V, −55 to +70°C; LC-Lithium/Copper Oxide Batteries, 1.5V, −40 to +70°C; LCP-Lithium/Copper Oxyphosphate Batteries, 2.4V, −40 to +75°C; LM-Lithium/Manganese Dioxide Batteries 3.0V, −20 to + 55°C. These different chemistries are available in a number of sizes and shapes. Capacity at 70°F. 24 hr. rate. Additional information on any of these products is available from our offices.

Hydrazine[c]	N_2H_4	Air	1.5	2,100	0.7	800[b]	[l]
Methanol[c]	CH_2OH	Air	1.3	1,400	0.9	175[b]	185[m]

a Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.
b Based on fuel consumption only.
c Weight of air not considered in computation of watt hours.
d Water-activated
e Automatically activated; high rate discharge; 2- to 10-min rate.
f Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.
g Four-minute discharge rate.
h β-alumina electrolyte, 300°C operation.
i Fused salt; 350°C operation.
j Solid $RbAg_4I_5$ electrolyte.
k Several different cathode materials used.
l Fuel consumption is based on source of H_2.
m Based on methanol battery-fuel supply in situ.

BEI LITHIUM THIONYL CHLORIDE CELLS

"PRIMACELL" FEATURES

- Hermetic all-welded 304 SS construction
- Reinforced glass-to-metal seals
- Long shelf life
- 3.6V cell voltage
- Stable operating voltage
- 100% inspection
- Suitable for medical and military applications
- 200°C operation available

GENERAL PURPOSE TYPES (−55 to +100°C)

BATTERIES

Custom Battery Packs

• Nickel Cadmium • Lithium • Alkaline

Cell-Con battery packs carry a full 1-year warranty. We provide prototypes within several days of stocked cells and offer competitive pricing with responsible service.

BATTERY CSB

SEALED RECHARGEABLE LEAD ACID BATTERIES

"The BATTERY CSB Advantage"

- No Gelled Electrolyte
- 100% Capacity 1st Cycle
- Lead Calcium Grid Design
- Usable in any Position
- Starved Electrolyte Design
- Cyclical or standby application
- No Memory Effect
- Gas Recombination Technology

® MH14533

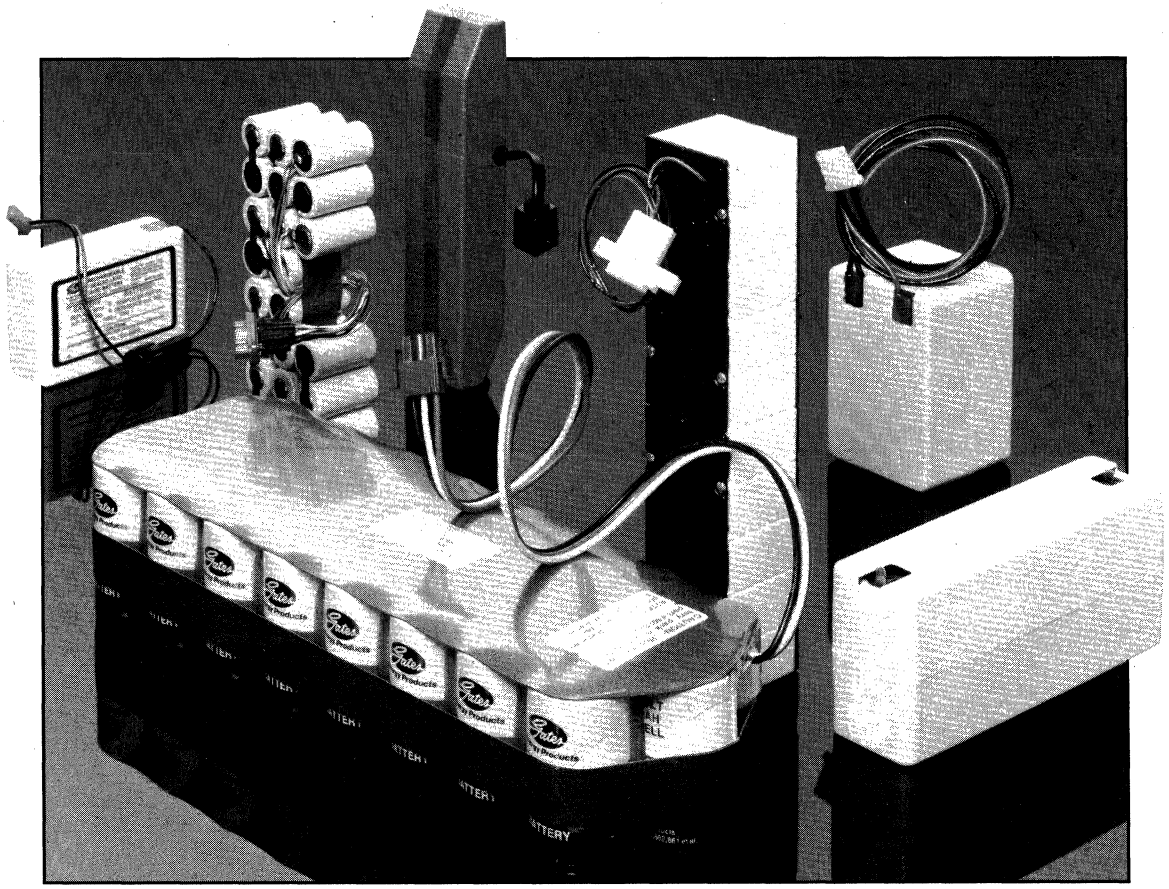
PORTABLE POWER



THE WAY YOU WANT IT!

A Commitment to Total Service. When you call Battery Specialties, you get action. Whether you need stock pricing, cross-referencing assistance, technical help, or even if you're just checking order status, we're committed to delivering complete satisfaction in the shortest possible time.

Custom Assembly & Test. Since 1979 we have met the West's growing demand for custom, lightweight power in portable applications. We work with you, ideally during design phase, to determine the optimum solution for your requirements.

Many leading manufacturers whose products we distribute have selected Battery Specialties for their "authorized assembler" programs, which includes cost-effective engineering, subsystem manufacturing and state-of-the-art testing to the AQL you specify. Every phase of our assembly and test adheres to MIL-SPEC standards.

And We Ship—Fast. Stock orders are shipped same day or following morning. First article prototypes on custom assemblies ship in one to four weeks, depending on complexity.

Off-the-Shelf Inventory. *Nickel Cadmium Sealed Lead Acid ■ Lithium ■ Alkaline ■ Mercury Carbon Zinc ■ Zinc Air ■ Silver Oxide ■ Communications Biomedical ■ Batteries for Computer Laptops & Clocks.*

We Proudly Stock *Gates ■ Sanyo ■ Duracell PowerSonic ■ Technacell ■ Eveready ■ Electrochem Saft ■ Tadiran ■ Varta ■ Ray O Vac ■ Millenium Johnson Controls ■ Motorola ■ Power Conversion MPD ■ ICC ■ Eagle Picher.*

After 20 Years, Service is Still Our Most Important Product.

DURACELL®

SPECIFICATION SUMMARY

Premium Primary Batteries for OEM Applications:
Alkaline • Lithium • Zinc Air • Silver • Mercury

DURACELL *BATTERIES*

ALKALINE
CELLS & BATTERIES

DURACELL®alkaline-manganese dioxide batteries are the popular choice for most consumer, industrial and military applications where an economical, general purpose battery is required. Advantages include high energy output, reliability, long shelf life, and superior low temperature performance.(1) In standard sizes, the DURACELL® alkaline battery system is generally available in cylindrical and multicell configurations.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Sales Engineers can provide expert applications and product specifications assistance to help you match the optimum premium primary battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Sales Engineers, please contact Duracell. To receive detailed information on a particular battery system, or on a specific battery product, call (800) 431-2656 for the latest technical literature. We would appreciate hearing from you.

LITHIUM/MnO_2 CELLS & BATTERIES

DURACELL®XL™ lithium/manganese dioxide (Li/MnO_2) batteries possess high energy density, high rate capability over a broad temperature range,[1] and excellent capacity retention determined at over 95% after five years at room temperature. DURACELL®XL™ Li/MnO_2 batteries are ideally suited for a wide range of uses, from supplying high current output for pulse-type applications to providing long-term standby power for memory retention.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Sales Engineers can provide expert applications and product specifications assistance to help you match the optimum premium primary battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Sales Engineers, please contact Duracell. To receive detailed information on a particular battery system, or on a specific battery product, call (800) 431-2656 for the latest technical literature. We would appreciate hearing from you.

DURACELL *BATTERIES*

ZINC AIR
CELLS & BATTERIES

When discharged on a continuous or frequent basis, DURACELL® zinc air cells and batteries deliver high energy density at a low operating cost compared to other primary systems. Zinc air batteries also provide a constant output voltage throughout their operating life and are well suited for various medical, communications and monitoring applications. Each cell and battery is sealed at the factory to provide a consistently fresh product to the end user. DURACELL® zinc air button cells can be designed and manufactured into multicell battery packs, capable of meeting specific electrical/mechanical requirements.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Sales Engineers can provide expert applications and product specifications assistance to help you match the optimum premium primary battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Sales Engineers, please contact Duracell. To receive detailed information on a particular battery system, or on a specific battery product, call (800) 431-2656 for the latest technical literature. We would appreciate hearing from you.

MERCURY
CELLS & BATTERIES

Mercury batteries from Duracell are able to withstand high ambient temperature and high humidity. These cells have high volumetric energy density, stable voltage and good shelf life.

Duracell also offers a complete line of silver cells and batteries. Call (800) 431-2656 to receive detailed technical information.

Duracell is committed to working with manufacturers in the design and production of tomorrow's electronic products. Our Sales Engineers can provide expert applications and product specifications assistance to help you match the optimum premium primary battery system to your requirements. We are also ready to assist you in developing your concepts into successful products by offering global supply and distribution information and production launch support. If you have additional questions, or would like to discuss your applications with one of our Sales Engineers, please contact Duracell. To receive detailed information on a particular battery system, or on a specific battery product, call (800) 431-2656 for the latest technical literature. We would appreciate hearing from you.

For manufacturers' sales offices, see yellow pages

Carefree®

Valve Regulated, Lead-Acid Rechargeable Batteries

Eagle-Picher features the world's largest selection of sealed, lead-acid, rechargeable batteries

Powerful Features

Performs at rated capacity on first cycle.

No memory limitations.

Delivers rated capacity upon demand, whether use is cyclic or stand-by.

Lead-Calcium grid. Maintains constant charge characteristics throughout life.

Long life and High reliability.

Requires only proper recharging for years of service.

Rechargeable. Provides hundreds of charge-discharge cycles.

Charging

The life of all maintenance-free, lead-acid batteries can be greatly affected by the charging method used. To achieve optimum performance and life from batteries, the charging method must be adjusted to the conditions of service.

Float Service

A battery in float service is being subjected to continuous charging and is called upon to deliver power at infrequent intervals or in case of a power outage. Under this condition, the battery charging should be:

Constant Potential	2.28-2.32 Volts/Cell
Limiting Current	20%- Rated Capacity in Amps
Charging Time	Continuous

Cyclic Service

A battery in cyclic service is normally being discharged at a more frequent interval than when it is in float service. In cyclic service it has less time to recharge. Under this condition, the battery charging should be:

Constant Potential	2.50-2.55 Volts/Cell
Limiting Current	50%-Rated Capacity in Amps
Charging Time	10-24 Hours

Carefree Sealed Lead-Acid Batteries

Keeper II®

Memory Backup & Consumer Replaceable Batteries

The electrochemistry of Eagle-Picher's Keeper II Lithium batteries ensures years of dependable service in stand-by applications where long-life memory back-up is required.

Its prismatic design allows the Keeper II to be customized to meet unique commercial applications.

Keeper II® Batteries

Years of low rate, continuous use.

Standby power for 10 years and more.

Microcalorimetry tests show an 80% retention of capacity in 15 years.

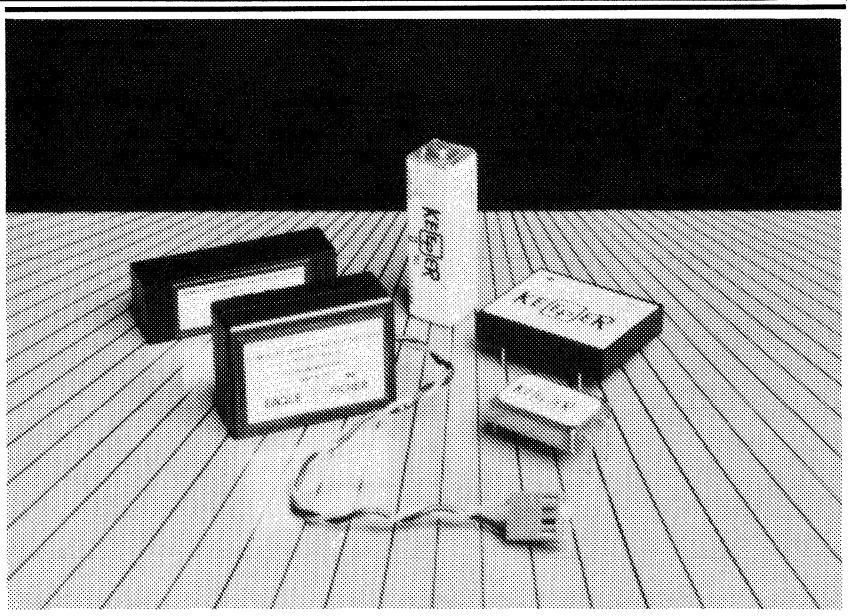
Highest utilization of valuable board space when compared to round and cylindrical cells.

Energy density is significantly higher than other chemistries.

Wave solderability.

Underwriters Laboratories recognized component.

Hermetically sealed to ensure long life and non leakage at high temperatures.



All Eagle-Picher batteries are made in the United States of America

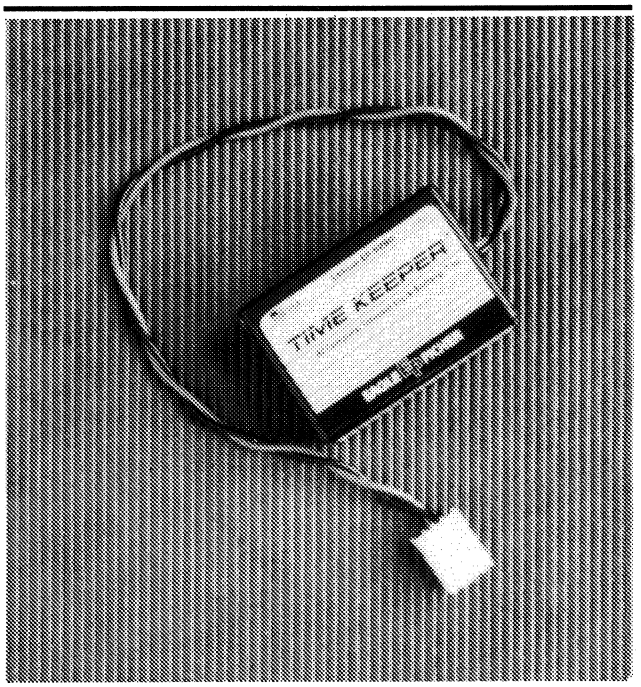
TIME KEEPER™ Computer Clock Batteries



Save Time Every Day. Save Money Every Time.

Introducing Time Keeper Computer Clock Batteries.

Powerful, new alternatives which rival any original equipment battery for safety, reliability and service life. And they're available immediately!

Your Customers Save Time And Money, Too!
Over 9 million 286 and 386-based PC's are currently in use. An estimated 14 million more will be shipped in the next two years. Each one requires a replaceable battery which maintains the internal real time clock and important configuration files.

Your customers can rely on Time Keeper to provide that power. Every Day! And, because these batteries are produced in the USA, you can rely on Eagle-Picher for lower prices, reliable service and instant delivery. Every Time!

Time Keeper Computer Clock Batteries. Available immediately. Call now for more details!

Customer Service

Eagle-Picher's battery facilities benefit from a unique combination of multiple system capability and a large support organization. those benefits, coupled with strong customer orientation, Midwest economics and our long-term commitment to the product, have made us a leader in the industry of special purpose military batteries. The large existing production base, plus continued development into new battery technologies, is assurance that Eagle-Picher will meet your battery needs now, and still be here to produce them in the future.

EAGLE PICHER
Lithium Batteries Group
P.O. Box 47 • Joplin, MO 64802 • Phone: (417) 623-8000 • TWX: 910-774-4508 • FAX: (417) 623-8000, ext. 201

Lithium Batteries

For Military And Aerospace Applications

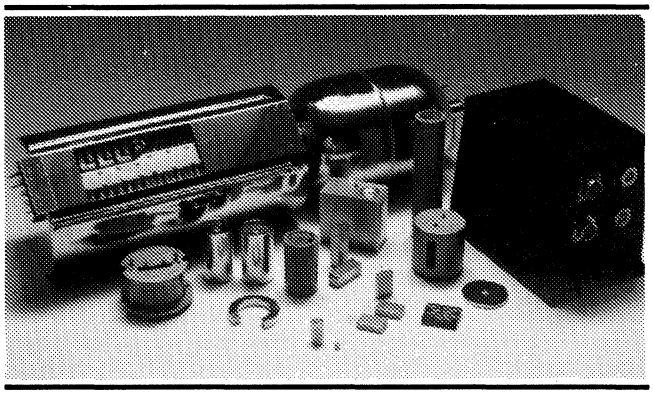
Eagle-Picher's been producing cells and batteries for the Aerospace market for over 30 years. This long-term commitment has made us one of the world's most diversified battery manufacturers.

Today, our Electronics Division produces more than 20 different cell systems, including:

- Lithium/Carbon Monofluoride
- Lithium/Thionyl Chloride
- Reserve Lithium/Thionyl Chloride
- Calcium/Thionyl Chloride
- Silver-Zinc
- Reserve Silver-Zinc
- Nickel-Hydrogen
- Calcium/Calcium Chromate Thermal
- Lithium-Alloy/Iron Disulfide Thermal
- Lead Acid
- Sealed Nickel-Cadmium
- Vented Nickel-Cadmium
- Nickel-Zinc

Lithium Battery Systems

Eagle-Picher produces the two most energetic lithium systems available on the market today: Lithium/Carbon monofluoride (Li/CF_x) and Lithium/Thionyl chloride (Li/$SOCl_2$).



Development And Production Capabilities

Eagle-Picher's in-house capabilities are unmatched in the industry. A group of over 100 engineers, for design and project management, enables Eagle-Picher to staff a battery program of any magnitude. 200 people in our machine tool facility fabricate tooling and fixturing for hardware development and production.

Eagle-Picher has built qualified batteries for nearly every major weapons system currently used by the U.S. Government. We've earned a reputation for high quality, low cost development and production.

Eagle-Picher produces Lithium anode cells in Li/CF_x, Li/$SOCL_2$, and Reserve Li/$SOCL_2$. Batteries and cells are produced both as special purpose designs and 'off the shelf' existing designs. Some of the existing cells and batteries are listed below.

Batt/Cell Part #	Type & Configuration	OCV	Cap. (Ahr.)	Vol. (In^3)	Wt. (g.)	Remarks

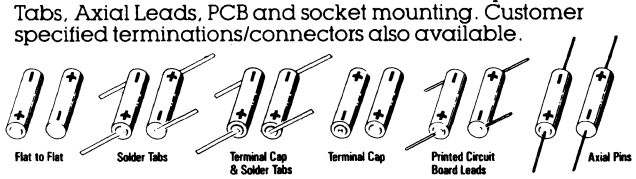
QTC 85 ⅔AA 3B950	1.5	.08	3.6	-40/+85
QTC 85 AA 3B940	1.9	0.1	3.6	-40/+85

Other Lithium Systems

E•I offers additional lithium cell technologies for a wide variety of special applications: high/low temperature, very high drain rates, tough environmental conditions, non-magnetic, etc. Call for technical assistance.

Terminations

Broad range of standard and coin cell terminations available Flat to Flat, Solder Tabs, Terminal Cap & Solder Tabs, Axial Leads, PCB and socket mounting. Customer specified terminations/connectors also available.



Custom Battery Packs

Our experienced Custom Pack Engineering Group can design a package of lithium power cells specifically for your application. Special fusing, protection circuitry, and insulation provide an extra measure of safety. All E•I battery packs undergo strict in-process and final Q.C. to assure highest reliability.

CELLection™ Service

We start with *your* requirements – space, voltage, current drain, temperature range, etc. – then the unique, structured CELLection process and our battery experts prepare a detailed recommendation for the optimum lithium power cell or pack for *your* application.

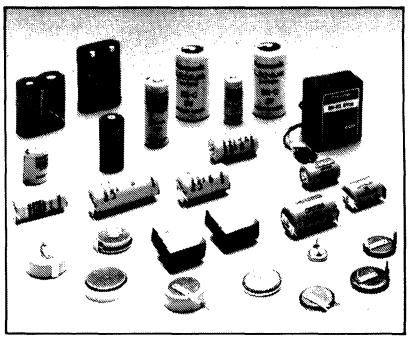
MISCELLANEOUS PRIMARY TECHNOLOGIES
LITHIUM BATTERIES



PANASONIC CYLINDRICAL TYPE LITHIUM BATTERIES

Panasonic Lithium cells meet the most demanding requirements.

- (CF)n/Li and MnO_2/Li
- 5 cell configurations: C, A, 2/3A, 1/2A, 2/3AA
- Nominal voltage: 3V
- Capacities (mAh); 600 - 5,000

User Replaceable Packs:

- Three Standard Packs: BR-P2, CR-P2, CR123A
- Nominal Voltage: 3V & 6V
- Nominal Capacity: 1,200 mAh, 1,300 mAh

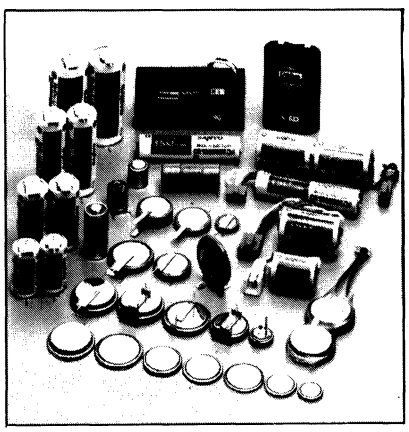
PANASONIC COIN TYPE LITHIUM BATTERIES

- High voltage of 3 volts is about twice that of conventional batteries.
- Extremely high energy density per unit of weight.
- For use in watches, cameras, calculators, memory back-up.
- 25 models in (CF)n/Li or MnO_2/Li
- Seven (7) Diameters from 10.0 mm - 30.0 mm
- Seven (7) Heights from 1.60 mm - 7.70 mm
- Weight from 0.6 g - 10.5 g

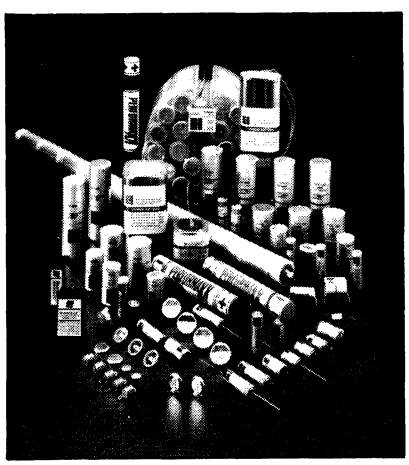
CARBON LITHIUM RECHARGEABLE BATTERIES/PIN TYPE LITHIUM BATTERIES/1.55V COPPER OXIDE LITHIUM BATTERIES

SANYO MANGANESE DIOXIDE LITHIUM BATTERIES

- A single 3-volt cell to replace two or three conventional units.
- High energy density.
- UL-approved safety, thanks to the use of manganese dioxide and stainless steel casing.
- Low self-discharge—0.5% for laser-sealed units, 1% per year for crimp seals.
- High discharge characteristics, even at high or low temperatures.
- Wide temperature range— −40 to+85°Cfor laser-sealed, −20to+70°C for crimp-sealed batteries.
- Capacities from 35 to 5000 mAh.



ELECTROCHEM LITHIUM SYSTEMS



Electrochem offers a wide variety of lithium technologies and cell sizes form DD's to tiny button cells and capacities from 70 mAh to over 30 Ah, with operating voltages from 2.7 to 3.8 volts. For maximum packaging efficiency, cells with a variety of lead configurations are available, including solder tabs. Cells are available to operate at temperatures as high as 150°C.

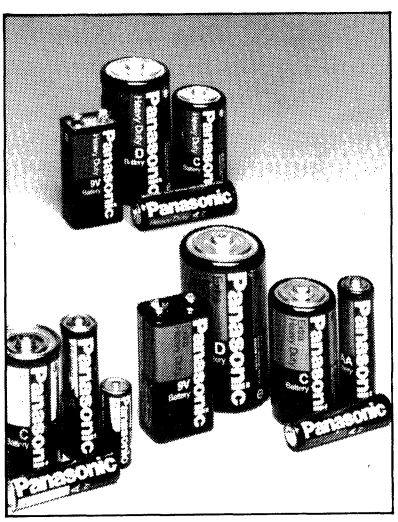
CARBON ZINC BATTERIES
PANASONIC
GENERAL PURPOSE BATTERIES

Panasonic Carbon Zinc Batteries are available in sizes ranging from "AAA" to "D", at 1.5 or 9 volts. Both general-purpose, heavy-duty, and extra heavy-duty batteries are available. The latter offer high leakage resistance and discharge characteristics that may be selected for virtually any application.

MERCURIC OXIDE BATTERIES
PANASONIC
EXCELLENT VOLTAGE STABILITY, LARGE CAPACITY

Mercury batteries offer superb performance as compact, high-strength power sources. With capacities ranging from 60 to 11,500 mAh at 1.35V, they are available in sizes from 7.9 mm diameter by 3.6 mm height, to 26 mm dia by 119 mm high. Major features include:

- Compact size.
- Stable operating voltage.
- Long shelf life.
- Wide operating temperature range.
- Ruggedness.
- Can be stacked to meet custom designs.



ALKALINE BATTERIES
PANASONIC CELL

Panasonic alkaline manganese batteries offer these features:

- Low cost.
- Long shelf life.
- High capacities (14 to 580 mAh).
- Compact size (6.8 to 24 mm dia. by 2.15 to 50.5 mm height).
- Superior low-temperature discharge characteristics.

EAC ENGINEERED ASSEMBLIES & COMPONENTS 380 North Street, Teterboro, N.J. 07608

EAC Custom Battery Assembly and Distribution

RECHARGEABLE NICKEL CADMIUM BATTERIES

SANYO NiCd BATTERIES (Standard "CADNICA")

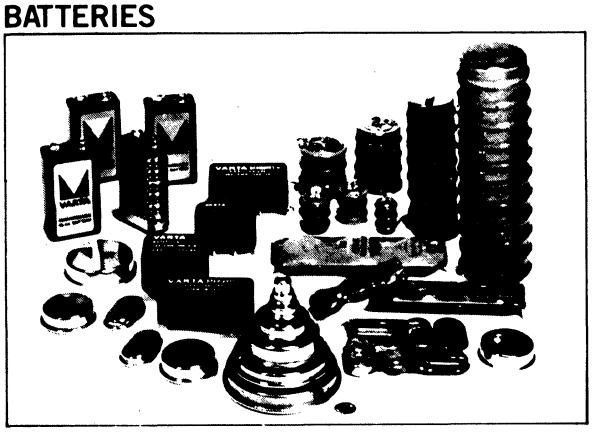
- Over 63 models.
- Capacities range from 50 to 20,000 mAh.
- Standard or quick-charge.
- Wide operating temperature range.

SANYO High Capacity CADNICA Batteries (E Series)
High capacity CADNICA batteries feature a capacity almost 40% higher than conventional CADNICA batteries, thanks to the use of high density electrode plates and a new design concept. This results in more energy density compared to batteries of the same size.

SANYO NiCd Batteries (CADNICA SLIM SERIES)
For increased packaging flexibility, CADNICA Slim KF Series NiCd batteries offer extremely thin profile—only 6 to 10.5 mm (about 1/4" to 3/8"). This permits the design of thin packages with either single or multiple KF Series cells (e.g., calculators, tape recorders, etc.).

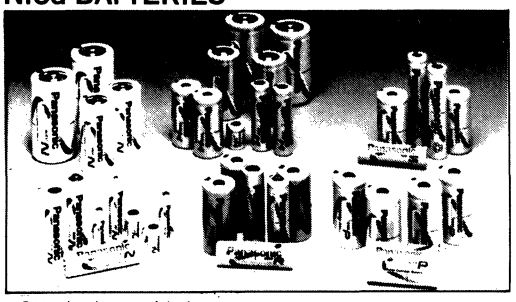
- Flat, rectangular shape.
- Capacities from 600 to 1200 mAh.
- Fast charging (one hour).
- Completely sealed.

VARTA NiCd BATTERIES



- A large variety of button cells.
- A wide range of capacities - 11 to 600 mAh.
- Can be assembled into custom battery packs.
- 500-2000 charge discharge cycles.
- Light weight and long life.
- High charge retention.
- No memory effect.

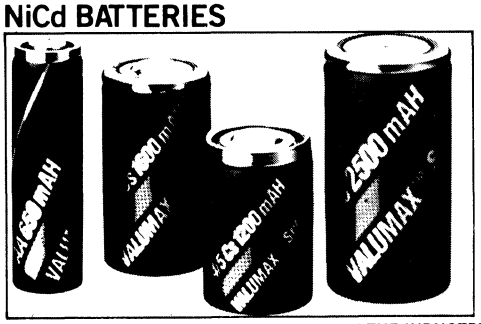
PANASONIC NiCd BATTERIES



- Standard or rapid charge.
- High operating temperature.
- High discharge rates.
- Over 500 charge/discharge cycles.
- High capacities (from 110 to 4400 mAh).

Panasonic High Capacity NiCd batteries (E Type)
Panasonic's unique technology has made it possible to produce a high capacity battery combining a high density positive plate and a large capacity pasted negative plate. The result is a capacity of 20% greater than that of a standard battery of the same size.

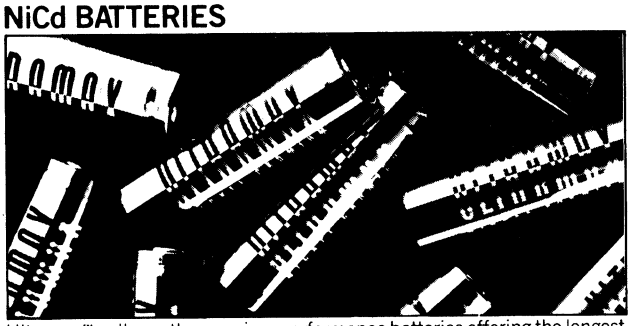
GATES VALUMAX™ NiCd BATTERIES



INTRODUCING THE HIGHEST STANDARDS IN THE INDUSTRY GATES NEW HIGH CAPACITY VALUMAX™ LINE

VALUMAX™ cells are available in virtually all sizes. Some of their major features include up to 25% more run time and up to 33% more capacity (4/5Cs, Cs and AAs)

GATES ULTRAMAX™ NiCd BATTERIES



Ultramax™ cells are the premium performance batteries offering the longest running times in nickel-cadmium technology today. Greater power density permitting smaller and lighter products, and fast recharge capability (full charge in just one hour), meet today's most demanding requirements.

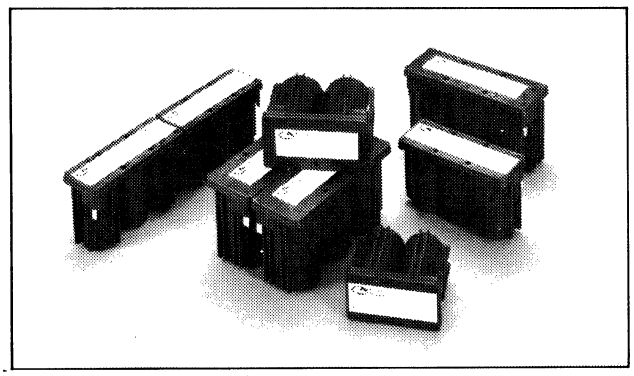
EAC ENGINEERED ASSEMBLIES & COMPONENTS 380 North Street, Teterboro, N.J. 07608

For more information call TOLL FREE: 1-800-447-5639

EAC Custom Battery Assembly and Distribution

RECHARGEABLE SEALED-LEAD BATTERIES (Valve Regulated)

GATES SEALED-LEAD MONOBLOC BATTERIES

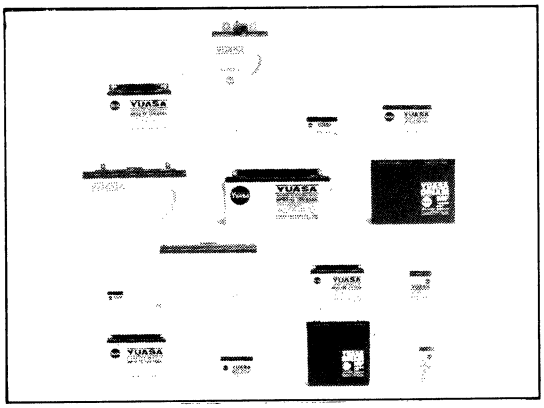


The outstanding features of Gates monobloc series is that it offers *internal* battery connections (rather than the conventional approach where individual cells are connected into a battery with external leads). This greatly improves battery reliability by drastically reducing the parts count. For additional voltage/current capacity, monobloc batteries may be connected in series or parallel.

For improved safety, a self-resealing vent will release excessive pressure that might occur under improper recharging conditions.

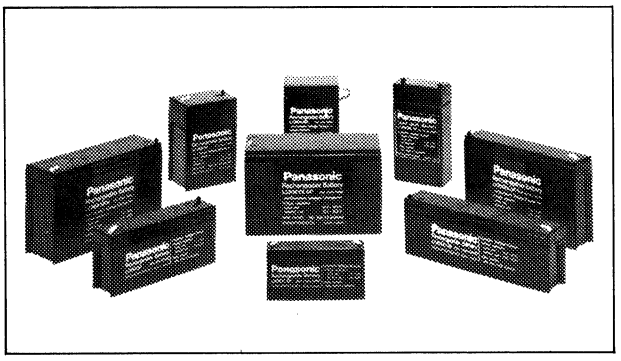
- Battery voltages—4 to 6 volts.
- High capacity—2.7 to 8.6 Ah.
- Low internal resistance—as low as 0.001 ohm.
- Cost effective—200-2000 charge/discharge cycles.
- Wide operating temperature range— -65° to +65°C.
- Long float life—up to eight years.

YUASA SEALED-LEAD NP SERIES BATTERIES



- Maintenance free. High energy density.
- Wide capacity range—0.8 to 65 Ah.
- Three voltages—4, 6, or 12 volts.
- Long cyclic or float life.
- Fully-sealed construction.

PANASONIC SEALED-LEAD LC SERIES BATTERIES



Thanks to its lead-calcium system, Panasonic LC sealed-lead batteries can withstand tough operating conditions, such as overcharge and deep discharge. Other user-oriented benefits include:

- Wide capacity range—1.3 to 120 Ah.
- Convenient voltage range—4, 6, or 12 volts.
- Long life, float or charge/discharge.
- Starved electrolyte.
- Maintenance free.
- Can be charged, discharged, or stored in any position.
- Leakproof (approved by DOT as "Drycell" for air shipment).
- UL recognized (File #MN137723).

GATES CYCLON SINGLE-CELL SEALED-LEAD BATTERIES

- High capacities—2.7 to 26 Ah.
- High peak power—135 to 600 W.
- Low internal resistance—as low as 0.001 ohm.
- High cell voltage—2V.
- Wide operating temperature range— -65 to +65°C.
- Long storage life—around four years at room temperature.
- Cost effective—200 to 2000 charge/discharge cycles.
- Long float life—up to eight years.

EVEREADY® ENGINEERING FOR INNOVATION

The name consumers trust

1991 marks 100 years of EVEREADY innovation and ingenuity. EVEREADY developed the world's first dry cell in the late 1800's. Since then, through a total commitment to quality, EVEREADY remains one of the most recognized and most trusted brand names of consumer products the world over.

Comprehensive technical support

EVEREADY provides a consulting service of experienced battery engineers as an aid to manufacturers in need of special battery designs. In a recent survey of OEM customers, EVEREADY sales managers were rated significantly better than the competition on their knowledge and expertise in battery technology and in the service they provide.

For help with your specific battery problems, call (314)982-2000 or write Eveready Battery Company, Inc., Battery Engineering, 1EBC, Checkerboard Square, St. Louis, MO 63164.

CHOOSE THE RIGHT BATTERY FOR THE RIGHT JOB

	Characteristics	Configurations	Battery Voltage	Applications
CLASSIC (Zn/MnO_2) Standard C/Zn 	Economical, dependable Variety of shapes and sizes Good shelf life Voltage drops gradually with use Reduced performance at low temperatures	AA AAA C D 6V 9V Other Cylindrical and Rectangular	1.5 to 510	*Low to moderate periodic power needs* Radios, flashlights, lanterns, small lighted toys and novelties, barricade flashers, lighting and alarm systems, electric fence controllers, laboratory instruments, smoke detectors, remote control transmitters
SUPER HEAVY DUTY (Zn/MnO_2) Premium C/Zn 	Premium power at popular prices Variety of shapes and sizes Good shelf life Excellent leakage resistance Lasts longer than standard C/Zn batteries	AA AAA C D 6V 9V Other Rectangular	1.5 to 9	*Moderate to heavy current or regular use* Flashlights and lanterns, moderate power portable audio devices, calculators, motor driven devices, communication equipment, electronic games, remote control transmitters, clocks
ENERGIZER (Zn/MnO_2) Alkaline 	Premium price Variety of shapes and sizes Best, longest lasting power source Excellent shelf life Best low temperature characteristics Best voltage maintenance under load	AA AAA AAAA C D 9V Other Cylindrical and Rectangular	1.5 to 9	*Heavy current or continuous use* High power flashlights and lanterns, cameras and photo accessories, high drain toys and games, high power portable audio devices - Boom Boxes, CD players, personal stereo - "Walkman," portable TV's, smoke detectors, shavers, portable communication systems, medical instruments, clocks

	Characteristics	Configurations	Battery Voltage	Applications
MANGANESE DIOXIDE (Zn/MnO_2) 	Lower cost and energy density than silver oxide, mercuric oxide, and zinc air Variety of shapes and sizes Excellent shelf life Gradual sloping discharge curve Good low temperature characteristics Good resistance to shock, vibration, and acceleration	Miniature	1.5 to 12	*Miniature battery powered electronic equipment* Calculators, photo, novelties, watches, remote controls
MERCURIC OXIDE (Zn/HgO) 	Variety of shapes and sizes Outstanding shelf life High capacity Good resistance to shock, vibration, and acceleration Relatively flat discharge curve	AA 9V Miniature Other Cylindrical	1.35 to 8.4	*Miniature battery powered electronic equipment* Cameras, exposure meters, instruments, hearing aids, watches, calculators, microphones
SILVER OXIDE (Zn/Ag_2O) 	Variety of shapes and sizes Outstanding shelf life High capacity Flat discharge curve Good low temperature characteristics Good voltage maintenance under load Exceptional salting resistance Good resistance to shock, vibration, and acceleration	Miniature Photo	1.5 to 6	*Miniature battery powered electronic equipment* Hearing aids, cameras, instruments, watches, calculators
ZINC AIR (Zn/O_2) 	Variety of shapes and sizes Excellent shelf life until activated Highest capacity-to-volume ratio for miniature batteries Flat discharge curve Good low temperature characteristics Good resistance to shock, vibration, and acceleration Activated by removing tab covering from air access hole Must have access to air (oxygen) to operate	Miniature Hearing Aid 9V	1.4 to 8.4	*Miniature battery powered electronic equipment* Hearing aids, pagers
NICKEL CADMIUM (Ni/Cd) Rechargeable 	Variety of shapes and sizes Can be assembled into multicell packs Relatively flat discharge curve Good high and low temperature performance High resistance to shock, vibration, and acceleration Long cycle life, up to 1000 charges Higher self discharge than ENERGIZER alkaline Fast charge types available Consumer cells and chargers available Capacities from 80 mAh to 4 Ah available	AA AAA C D 9V	1.2 to 7.2	*Rechargeable devices, standby power and replacement cells for high usage devices* Portable tools and appliances, photoflash, remote control models, standby power, alarm systems, personal pagers, cordless phones, cellular phones, high use consumer devices, portable computers
LITHIUM (Li)	Variety of shapes and sizes High energy density Outstanding shelf life Leak resistant UL Recognition on most sizes Good low and high temperature use and storage performance Eveready Battery Company, Inc. St. Louis, MO 63164	AA Miniature Cylindrical	1.5 to 6	*Long life, low to moderate drain electronic equipment* Watches, calculators, cameras, memory back-up, hearing aids, pagers 1.5V AA for High Drain, High Tech Applications

Gates Energy Products

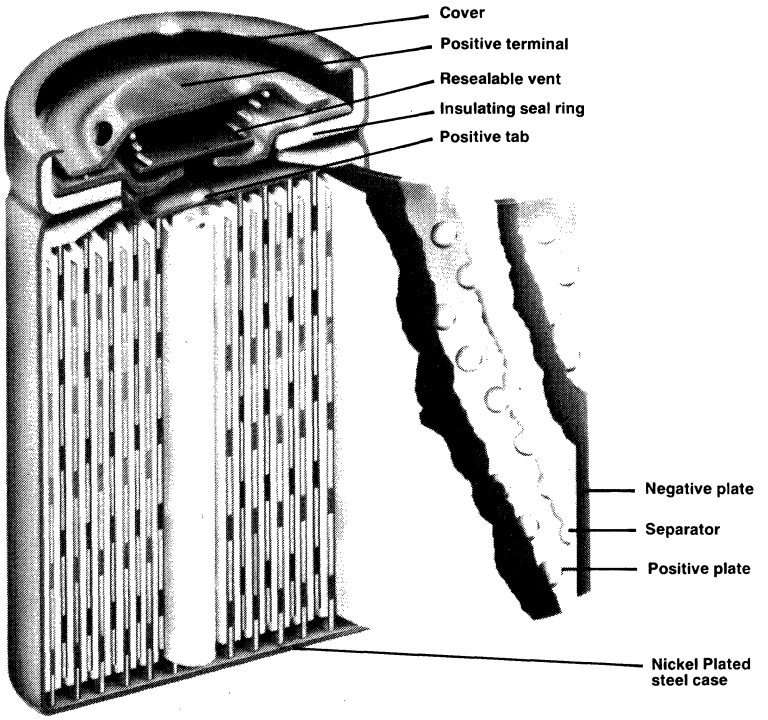
GATES SEALED RECHARGEABLE BATTERIES

Gates Energy Products, Inc. is a leading manufacturer of sealed rechargeable batteries, offering a full line of nickel-cadmium and sealed-lead cells, with capacities ranging from 0.065 Ah to 25 Ah. Gates technology adds power to your product with the Nickel-Metal Hydride and ULTRAMAX, the world's highest capacity nickel-cadmium battery which provide superior performance to your portable products. And, our Genesis sealed-lead battery for UPS applications is the most advanced design avaliable on the market today.

The Gates commitment to technical excellence goes beyond the product itself, to helping customers develop their own successful product designs. Our customer support helps you choose the battery that's right for your application and ensures that your product design achieves maximum performance.

- **Technical Support**
  Even the best product performs better when our batteries characteristics are matched to your product design. That is why at Gates our technical support staff works with you from the beginning in the design and development of your rechargeable, battery-powered products.
- **Applications Engineering**
  Our applications laboratory and engineers tackle your more complicated design questions, testing your product designs with Gates batteries to ensure compatibility **before** you make major manufacturing decisions.
- **Value-Added Services**
  One source can supply you with Gates nickel-cadmium and sealed-lead batteries built to your exact specifications. Whatever the configuration, we can provide the custom-built battery you need, including multi-cell shrink sleeve and plastic case assemblies and product packaging.

GATES NICKEL-CADMIUM RECHARGEABLE BATTERIES



Choose from a variety of cell performance types to meet your battery power needs:

- **VALUMAX™ Cells-** Premium capacity at a standard price makes VALUMAX your best value, dollar for dollar
- **Fast Charge Cells—** When you need quick turnaround, Fast charge cells can be recharged in one hour
- **GEMAX™ Cells-** Improved power delivery and long run times make GEMAX the choice for demanding applications
- **Goldtop™ Cells-** Excellent life in high-temperature environments
- **Goldtop Plus™ Cells–**The benefits of Goldtop with improved high-temperature charge acceptance for emergency lighting applications.
- **ULTRAMAX–**The highest capacity nickel-cadmium batteries you can buy, designed for ultra long run times
- **Millennium™ Power System–**The new name in consumer rechargeable batteries, available in traditional round cell sizes and camcorder packs.

The construction of Gates cells provides other performance advantages:

- **Long Life**
  Batteries have a long life while on standby charge. Since nickel-cadmium batteries neither consume nor lose active material during charging, they may be continuously overcharged at the specified rates with negligible effect on performance or life.
- **No maintenance and easy storage.**
  Nickel-cadmium batteries may be placed in open circuit storage in any state of charge for extended periods of time, without damage or loss of rechargeability. Because of their sealed configuration, there's no need to replenish electrolyte.
- **Excellent discharge capacity**
  Due to their low internal resistance, batteries can be discharged at rates up to 20 times their 1-hour discharge rate without impacting service life.
- **Resealable safety vent**
  If needed, Gates safety vent opens to relieve excessive pressure, then reseals automatically to prevent the cell from drying out.
- **Overcharge capability**
  Gates cells can be held on constant current overcharge for years, then provide instant power necessary for the load.
- **Flat discharge voltage profile**
  A flat voltage discharge curve means voltage will vary as little as 100 millivolts per cell until they near the end of discharge. Power delivery remains relatively constant during 80 to 90% of discharge.
- **Mount in any position**
  Small, lightweight cells will operate in any position. Maintenance-free, long-life performance makes them ideal for numerous cordless applications.
- **Operational over wide temperature range**
  Gates Energy Products nickel-cadmium batteries are available in operational ranges from −20°C to +50°C. High-temperature cells range up to +70° (cell temperature). Cells have long life even at elevated temperatures.

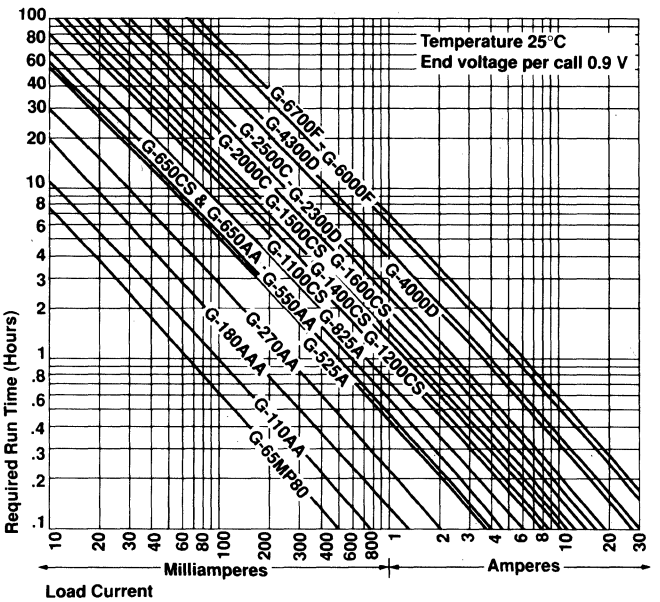
Nickel-Cadmium Performance Characteristics

Use of Selector Guide

1. Locate the room-temperature discharge current for your application on horizontal axis.
2. Choose the desired run time on the vertical axis.
3. The intersection of the run time and the discharge current defines the necessary capacity. The required capacity is indicated by the model number which provides a reference for the cell specifications.
4. Any cell that is above or to the right of the intersection will meet the cell discharge requirement at room temperature. If the application requires a cell with special characteristics such as operation at high temperature, refer to the cell description section to determine the availability of a suitable product.
5. Because of ongoing changes in the product line, not all cells listed in the cell description section are represented on the chart.

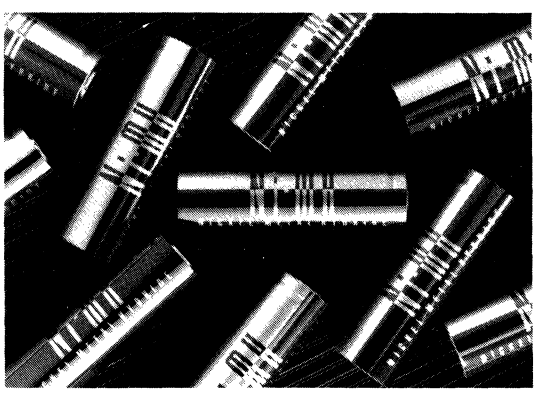
Example: The application requires a discharge current of 300mA for 5 hours.

Solution: The run time and discharge current intersect on the capacity line marked "G-1500CS." This model number indicates a Cs diameter cell from Gates product line would meet the minimum capacity required for this application. Other cell options are indicated on the chart (anything above and to the right).



Note: This chart uses nominal room-temperature parameters. Careful attention must be paid to various derating factors such as charge temperature, discharge temperature, etc. which may cause the cell to deliver less capacity. If this occurs, a larger cell may be required. Consult Gates Energy Products for additional assistance in determining the appropriate cell size and design for specific applications.

NICKEL-METAL HYDRIDE CELLS



Nickel-Metal Hydride has been heralded as the rechargeable technology of the future. It offers up to twice the run time of standard Nickel-Cadmium batteries of the same size. This allows designers to create portable products that are smaller and lighter. The cell sizes in the Nickel-Metal Hydride line were chosen for their utility in high-growth areas, such as cellular phones and new smaller, lighter-weight laptop and notebook computers.

Cell Selection

Model Number	Cell Size	Capacity (mAhr)
GMH-1100AA	AA	1100
GMH-900A	2/3A	900
GMH-1400A	4/5A	1400
GMH-1600A	A	1600
GMH-2300A	4/3A	2300
GMH-2700CS	Cs	2700

GATES SEALED-LEAD BATTERIES

Gates invented and patented the starved-electrolyte, oxygen recombining sealed-lead battery. The unique construction of Gates sealed-lead cells offers advantages not found in conventional lead-acid batteries. The starved electrolyte system allows recombination of gas to prevent dry-out and the venting of acid vapor, effectively eliminating terminal corrosion and allowing mounting in any position.

Gates offers a wide range of sealed-lead single-cell and monobloc batteries.

- **Cyclon®**—single cells for design versatility
- **Monoblocs**—standard batteries for volume applications
- **Genesis™**—reliable prismatic batteries for use in uninterruptible power supplies

Single cells can be custom assembled to meet your precise needs. Available in four basic design sizes—D,X,J and BC—Gates single cells can be connected in series or parallel to meet voltage, capacity and space reqirements.

Monobloc batteries offer you the convenience of a preassembled component for a diversity of applications. Monoblocs are available in 4-and 6-volt modules of D,X, and E sizes. 6-volt monoblocs are available in UL94VO flame-retardant cases. These can also be connected in series or in parallel for additional voltage capacity.

Gates new Genesis sealed-lead battery is available in 15-minute ratings of 120 and 190 watts per cell, to provide unsurpassed reliability and performance for uninterruptible power supplies. Genesis delivers all the power needed in those first critical minutes, while setting new industry standards in weight, size, terminal design, reliability and high-rate discharge power.

Standard batteries are available in a wide range of voltage and amp-hour choices using either shrink-sleeve or plastic case packaging. If your needs are more specialized, Gates can custom assemble batteries to your precise amp-hour and voltage requirements with the packaging type, geometry and terminations best suited to your design.

Gates Energy Products

Gates' sealed-lead cell construction offers numerous other performance advantages over conventional designs:

- **Long life float and cyclic applications**
  In both float and cyclic applications, Gates sealed-lead batteries have proven long life.
- **Impressive low-temperature performance**
  Gates cells offer excellent performance in high- and low-temperature environments.
- **Long storage life**
  Low self-discharge rates mean Gates sealed-lead cells can be stored for long periods of time compared to conventional batteries.
- **Dependable use in any application**
  Sealed design allows use in any position, even near delicate electronic circuitries. Available UL rating of 94-VO (flame-retardant) for both single cell and monobloc batteries qualifies them for use in emergency lighting, office products, data processing and medical equipment.
- **High rate charge/discharge**
  Low internal resistance allows a high rate of charge or discharge.
- **Excellent mechanical and vibrational characteristics**
  Wound construction is inherently stronger than rectangular configuration.

GENESIS™ SEALED-LEAD BATTERIES FOR UPS

The new Genesis line of sealed-lead batteries has been specifically designed to meet the needs of the uninterruptible power supply marketplace. Genesis will supply all the required power in those first critical minutes, while setting new industry standards in weight, size, terminal design, longevity and high-rate discharge power.

High Energy Density
Genesis provides 60% more power than existing batteries of the same case size at the 15-minute rate.

Excellent Reliability
Genesis features the Gates patented starved-electrolyte, recombining technology developed almost two decades ago. All features have been designed to optimize Gates patented technology for high-rate, UPS applications.

Smaller & Lighter
Because of its high energy density, Genesis allows UPS systems designers to downsize their systems by 30% to 50%.

Industry Standard Sizes
Genesis is designed to fit into existing UPS cabinets, thereby reducing the amount of engineering needed for retrofit.

Maintenance-Free Design
Recombinant sealed technology combined with hardened copper terminals eliminates periodic terminal tightening, while assuring no acid leakage.

Office Compatible
The Genesis battery features a flame-retardant, UL 94-VO case, flame arrestor vent and sealed design for use in the office environment.

Long Life
Gates technology has been proven in demanding telecommunications field conditions for over seventeen years.

APPLICATIONS
Primary applications for the Genesis G12V120W15 are uninterruptible power supplies used as distributed power backup systems, especially for minicomputer and networked PC applications.

SPECIFICATIONS (G12V120W15)

Nominal Voltage
12 volts (6 cells @ 2 volts/cell)

Power Output
5 Minute - 250 watts/cell 1500 watts/battery
10 Minute - 190 watts/cell 1140 watts/battery
15 Minute - 120 watts/cell 720 watts/battery

Operating Temperature Range
Maximum - 60°C
Minimum - – 40°C

Weight
10 kg (22 lbs)

Nominal Dimensions
Height - 4.92 in. (125 mm)
Length - 6.54 in. (166 mm)
Width - 6.89 in. (175 mm)

Terminals
Construction - hardened copper
Hardware - M6x1-6H12SS bolt with washer

DEVELOPMENT HISTORY AND STATUS
Genesis batteries are prismatic forms of the wound sealed-lead batteries produced by Gates Energy Products since the early 70's. Genesis uses the basic electrochemistry and design techniques proved by the wound cells in rugged commercial applications.

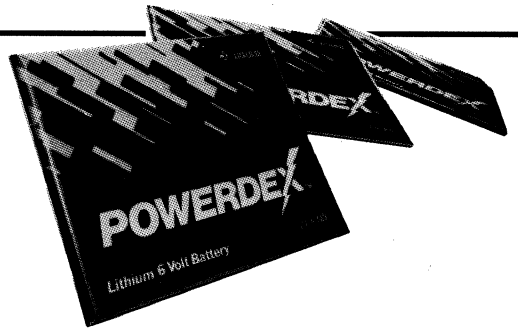
POWERDEX®

An Ultra-Thin, Ultra-Light, High-Energy Lithium Battery.

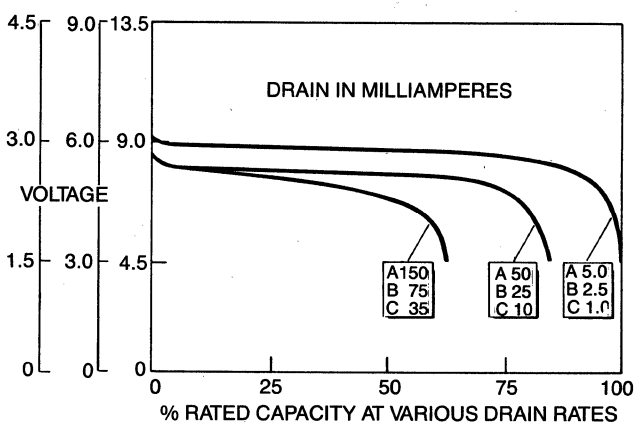
PORTABLE POWER/ HIGH ENERGY LITHIUM BATTERIES

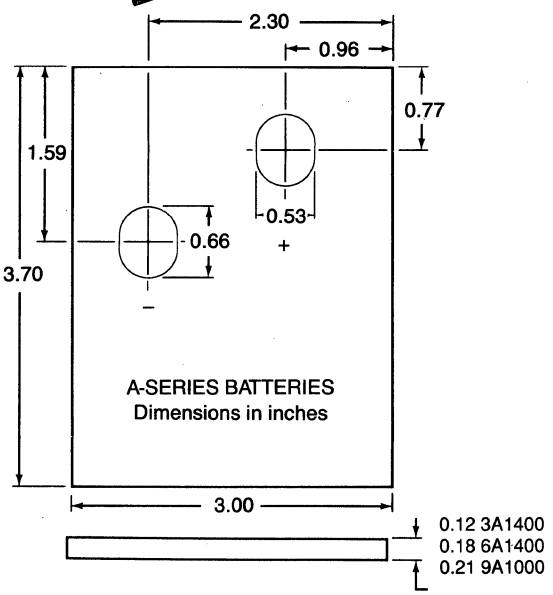


Portable Power

The Gould POWERDEX® battery is portable power technology brought to a new plane. Phenomenal power-to-weight and power-to-volume ratios offer the broadest possible freedom for product designs. The construction of POWERDEX™ batteries results in a safe solution for high energy density in a planar geometry battery.

Technical Data





Advantages

- High energy density
- Flat discharge curve
- Long shelf life
- Planar construction
- Wide operating temperature range
- Unique terminal arrangement
- Safe operation

An Ultra-Thin, Ultra-Light, High-Energy Lithium Battery.

A New Dimension in Portable Power...
The POWERDEX® battery brings planar geometry to the contemporary design of electronic equipment. With high energy density, high capacity, a flat discharge profile, and a shelf life of more than five years, the advanced technology of POWERDEX® planar batteries expands the potential of product design and performance.

The exceptionally efficient bipolar cell design and construction of POWERDEX® battery provides reliable, low-resistance connection between cells. Together with this advanced construction, lithium manganese dioxide chemistry produces a portable power source safe for industrial and consumer devices.

...For a New Generation of Products
The POWERDEX® battery is an excellent choice of portable power for low- to medium-drain industrial and consumer applications. Its planar geometry can be accommodated in a wide range of electronic devices.

COIN CELL SERIES

Printed circuit board-mounted lithium coin cell battery holders eliminate the need for permanent solder tab mounting of cells. Unique molded design permits easy insertion and removal of battery without desoldering or special tools. Fits 3-volt coin cells: sizes 12mm, 20mm, 23mm and 24mm. UL flammability rating — UL94V-0.

HORIZONTAL SERIES

Fits 3-volt lithium and other horizontal cells: sizes 2/3A, 1/2AA, AA, C, 2N and 1/3N, 9 volt batteries, too. Simple PC board mounting with fast-on tab terminals for hardware soldering and eyelet mounting. UL flammability rating — UL94V-0.

BATTERY PACK SERIES

Three styles: PC (Printed Circuit), W (Wire), SF (Snap Fastener, male/female terminals). Fits all AA and AAA type cells, 2, 3 and 4 cell capacity. Corrosion-free nickel plated contacts; impact-resistant nylon #6, UL flammability rating — UL94V-2.

RECHARGEABLE SEALED LEAD-ACID BATTERIES

General Description

The LCR Series is a sealed lead-acid rechargeable battery system. The lead-calcium rechargeable (LCR) battery, will stand up to tough operating conditions such as overcharge and deep discharge. In field service, troubles due to abnormal, improper operation or misuse are reduced to a minimum.

Applications

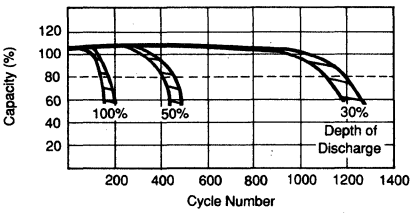
- **Consumer Applications**
  Portable VTR/VCR, TV, record players, tape recorders, vacuum cleaners and appliances, and as portable power supplies.
- **Communication and Telephone Equipment**
  Cordless portable telephones, and transceivers
- **Office Equipment**
  Portable calculators, computers, electronic cash registers, printer, and typewriters.
- **Memory Back up & UPS**
  UPS systems, electronic cash registers, computers, sequencers.
- **Tools and Engine-start**
  Grass and hedge trimmers, cordless drills, screwdrivers, engine-start, and electric saws.
- **Instrument and Medical Equipment**
  Electronic instruments, measuring equipment, medical electronics and heart defibrillators.
- **Photography**
  Electronic cameras strobe, VTR and movie lights.
- **Toys and Hobby**
  Radio-controllers, motor driving, lights.
- **Emergency Devices**
  Lights, fire and burglar alarms, communication systems, fire shutters.

Features

- Exceptional deep discharge recovery
- Long service life; float or cyclic
- Starved electrolyte
- Maintenance-free operation
- Charge, discharege, or store in any position
- No corrosive gas generation
- Leakproof design
- No memory effect
- Approved as "dry cell" for airshipment by Department of Transportation and IATA
- UL component recognized (all major models) File #MH13723(N)

• Cycle Life

Cycle life is very much dependent on the depth of the discharge which the battery encounters during each cycle.



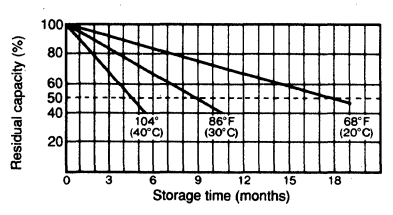
Cycle Life vs. Depth of Discharge

• Float or Back up Life

The expected float life at room temperature is approximately 8 years on the basis of accelerated tests.

• "Shelf Life"

Self-discharge rate is very much dependent on the storage temperature as shown in the graph. Lower temperatures allow the battery to be stored for longer periods. (Each ten degree drop results in halving of self-discharge rate and doubles storage time.)



Shelf Life vs. Storage Temperature

• Temperature Range Summary

Discharge:	5° ~ 122°F	– 15° ~ 50°C
Charge:	32° ~ 104°F	0° ~ 40°C
Storage:	5° ~ 104°F	– 15° ~ 40°C

• Charging method and battery application

	Cyclic operation	Trickle operation	Float operation
Constant Voltage (Note: all at 68°F, 20°C)	Regulation range of controlled voltage: 6 volt batteries: 7.3V to 7.5V 12 volt batteries: 14.6V to 15.0V Initial current: 0.4C or less	Regulation range of controlled voltage: 6 volt batteries: 6.8V to 6.9V 12 volt batteries: 13.6V to 13.8V Initial current: 0.4C or less	Regulation range of controlled voltage: 6 volt batteries: 6.8V to 6.9V 12 volt batteries: 13.6 to 13.8V Initial current: 0.4C or less

RECHARGEABLE NICKEL CADMIUM BATTERIES

General Description

Panasonic offers a wide range of cells for various applications and requirements:

• Standard • Rapid-charge • High-temperature emergency and memory back-up • High-capacity • High-rate discharge and rapid charge • Super high capacity and rapid charge

Discharge

The discharge characteristics of the Panasonic Ni-Cd cell are extremely flat when compared to those of dry cells.

Discharge voltage characteristics depend upon discharge current and temperature.

Life

The Panasonic Ni-Cd cell can be charged and discharged hundreds of times.

Under normal conditions, more than 500 cycles (charge/discharge) can be expected. The cell has reached its end of life when capacity falls below 80% of original rating.

Life is decreased by charge/discharge cycles beyond the specified temperature or current range or by extended storage under conditions which exceed specified temperature limits or by cell reversal.

Effects of Temperature upon Performance

The standard Panasonic Ni-Cd cell has excellent discharge characteristics at normal temperatures. If the temperature during charge and discharge is high, capacity tends to decrease. When cells are trickle-charged at a high temperature, this tendency is accelerated. Therefore, it is recommended that special high temperature cells be used for applications in high temperature ambients.

Special Purpose Batteries

Rapid-charge Type

The rapid charge type has a specially improved negative plate with increased gas absorption characteristics. It can be subjected to uncontrolled charging at the 1 C rate and a rapid-charge in 1 to 1.5 hours is possible.

High-temperature Type

By using a polypropylene separator, this type cell can withstand a temperature of 65°C (149°F) during use. When charge is conducted at a low charging current of C/20 to C/30 in a high-temperature ambient, this type cell has a sharply improved capacity compared to a standard cell, due to special electrolyte.

Panasonic cells for high-temperature use can be classified into two types according to application: the emergency back-up type and the memory back-up type.

(A) Emergency back-up

Emergency back-up normally uses DH, CH, SCH or AAH, and a trickle or float charge of C/20 to C/30 is usually applied.

(B) Memory back-up

This application requires less capacity and normally uses AAH, 1/3AAH. In addition to excellent high-temperature characteristics, the charge/discharge characteristics for small currents in the μA range are excellent.

High-capacity Type

The extra capacity cells combine a high-capacity density positive plate with a high-density paste negative plate. These cells have 20 ~ 30% more capacity than equivalent standard cells.

High-rate Discharge and rapid charge type

Using edge-welded plates and terminals the resulting cell has sharply reduced internal resistance and improved voltage characteristics during high rate discharge.

Super high capacity and rapid charge type

The super high capacity and rapid charge type is designed to meet the demands of high capacity and rapid charge applications. It combines a high-density positive plate which is made of form nickel positive and pasted negative plates. The resulting capacity is approximately 40% greater than that of Panasonic rapid charge type battery of the same size.

Applications

• For Cyclic Use

Consumer Applications

Shavers, portable VTRs (VCRS), radios, television, tape recorders, portable computers.

Communication and Telephone Equipment

Cordless and portable telephones, transceivers, pocket pagers, car telephone systems.

Instruments and Medical Equipment

Electronic instruments, measuring equipment, medical electronics, heart defibrillators.

Tools

Grass and hedge trimmers, cordless drills, screwdrivers, hammer drills, saws.

Office Equipment

Portable calculators, lap top computers, electronic cash registers, printers, typewriters

Photography

Electronic cameras, strobe, VTR and movie lights.

Toys and Hobby

Radio-controllers, model motor driving, lights.

• For Trickle or Float Charge Use

Memory Backup

Electronic cash registers, computers, sequences, memory chips.

Emergency Devices

Lights, fire and burglar alarms, communication systems, fire shutters.

Charging Methods

Standard Charge

Panasonic Ni-Cd cells are charged using constant current or semi-constant current charges. The rate of charge is dependent on the size and type of cell. Standard cells, sub C and smaller, can be charged at rates from C/3 ~ C/4 to C/20.

Rapid-charge Type

The rapid charge type Panasonic Ni-Cd cell can be rapidly charged in 1 ~ 1.5 hours using recommended charging circuits and controls. The cell is normally charged at the 1C rate for 1 ~ 1.5 hours, at which time charging current is reduced to C/10 (or less) to complete the charge.

Temperature Conditions

Charge

Charging temperature ranges are:

• Standard charge:	0° ~ 45°C (32° ~ 113°F)
• C/3 quick charge:	10° ~ 45°C (50° ~ 113°F)
• Trickle (float) charge:	0° ~ 65°C (32° ~ 149°F)
• Rapid Charge (−∇V method):	10° ~ 40°C (50° ~ 104°F)
• Temperature sensing system:	10° ~ 40°C (50° ~ 104°F)

Discharge

Discharge temperature ranges are −20° to +65° (−4° to +140°F).

Storage

Panasonic cell can withstand very long storage time under typical conditions at a storage temperature range of −20° to +45°C (−4° ~ 113°F). If the cell must provide full capacity after storage, completely charge the cell before use. In addition, after prolonged storage, completely normal capacity can be returned within 1 ~ 3 charge/discharge cycles.

Memory Backup Type

Panasonic has PC mount memory backup batteries. These are 110 MAH 2.4v and 3.6v "L" type stacks and "F" type side by side. Please consult Panasonic Regional Office for additional information.

PRIMARY LITHIUM BATTERIES

Cylindrical Type Lithium Batteries

Features

The common characteristics of (CF)n/Li and MnO_2/Li batteries are as follows:

- High voltage
- Long shelf life
- High rate discharge
- Strong leakage resistance
- UL component recognized (most models) File #MH12210(N)
- High energy density
- Stable operation
- Wide operating temperatures
- Excellent durability

(CF)n/Li batteries also offer the following:

- Flat discharge voltage and stable internal impedance.
- Excellent safety

MnO_2/Li batteries add the following characteristics:

- High rate discharge
- High voltage

(CF)n/Li Batteries

Model No.	Electrical Characteristics (20°C)					Dimensions (Max.)		Approx. Weight (g)
	Nominal Voltage (V)	*Nominal Capacity (mAh)	Standard Drain (mA)	Continuous Maximum Drain (mA)	Max. Pulse (mA)	Diameter (mm)	Height (mm)

User Replaceable Packs

Features

- Consumer replaceable (Recognized by UL)
- High safety and reliability
- Rapid discharge for strobes is possible at 6 V.
- Superior shelf life with minimal self-discharge
- High-current pulse discharge is possible.
- Application is possible over a wide temperature range.
- Light weight
- High energy density

Panasonic LITHIUM PRIMARY BATTERIES

Coin Type Lithium Batteries

Features
- High voltage of 3 volts, about twice that of conventional batteries.
- Extremely small self-discharge for a long service and shelf life.
- A wide operational temperature range.
- Compact and lightweight, with extremely high energy density per unit weight.
- Extremely safe (poly-carbonmonofluoride lithium batteries)
- Extremely strong load pulse characteristics (manganese dioxide lithium batteries).

Applications
- Electronic watches (digital and analogue)
- Calculators
- Cameras
- Electronic translators
- For memory backup in all types of devices (with tab terminals)
- Other compact, low power consuming cordless appliances

(CF)n/Li batteries: Poly-carbon monofluoride

VL1220	3.0	7	12.5	2.0	0.8	< 20

Charge/ discharge	About 1000 times with a 10% discharge depth
Charge	20 to 30h to fully charge at a fixed voltage of 3.4 ± 0.15V *2
Operating temperature	−20°C(−4°F) ~ 60°C(140°F)

*CYLINDRICAL ALKALINE BATTERIES

Features
- High current and large capacity for excellent performance
- Stable voltage and current
- Excellent storage life
- Unsurpassed resistance leakage

Applications
- Headphone stereo, radio-cassette recorders, strobes, cameras, electronic calculators, 8mm cameras, electric shavers, tape recorders, high-power flashlights, toys and other cordless products.

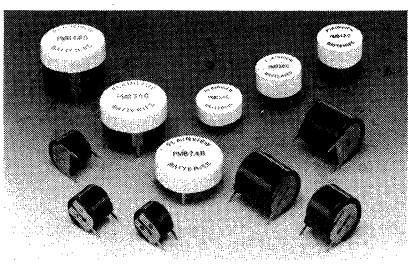
Plainview Batteries nickel-cadmium button cells

Nickel-Cadmium ZA, Z2A, and Z3A Button Cells

The ZA series offers the most complete line of nickel-cadmium cells combining maximum capacity and low internal resistance with economy. All conventional NC cells have a nominal voltage of 1.2 V. Plainvew uses special processing to also offer twin and triple cells with 2.4 and 3.6 V output in hermetically sealed single housings which are smaller and more reliable than other methods. Single, dual and triple cells may then be combined to form batteries of similar capacity. Battery pack assemblies can be supplied to your requirements in assemblies up to 12 volts. ZA cells are mass plate designs with low self dissipation and retain over 50% of original capacity after a year at room temperature.



NICKEL-CADMIUM BATTERIES—ZA, Z2A & Z3A. Oper. Temp. –40°C to +55°C except ZA65T –40°C to +65°C.

PMB Series Rechargeable Memory Back-Up Batteries

Whenever current drains approach or exceed 0.1 mA, the PMB series of miniature, PC board mounting batteries are the power source of choice. Selected specially for volatile computer and clock/calendar memory protection, Plainview PMB series nicad batteries are *standardized* versions of the ZA series with printed circuit board mounting pins. The PMB series combines long life with small size and PCB mounts. They retain over 50% of original capacity after one year at room temperature. Design life is 5 to 7 years at a constant trickle charge rate.

PB SERIES 9 VOLT RECHARGEABLE "TRANSISTOR" BATTERIES

The Plainview 9 Volt Rechargeable Transistor Batteries are the answer to standard packaging of Ni-Cads for new designs as well as replacing primary 9V batteries economically. The PB1600 Series is available as 7.2, 8.4, and 9.6 volts at 110mAh nominal, 120mAh typical capacity. With low internal impedance, low self discharge and rechargeable cycle life of over 500 times, the Plainview 9V rechargeable is the power source of choice.

Dimensions and Weight (approx.)

Length: 26.0 mm Width: 16.3 mm Height: 48.5 mm

	PB1604	PB1605	PB1606
Nom. V	7.2	8.4	9.6
# Cells	6	7	8

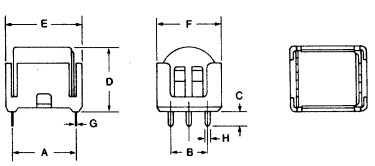
Typ. mAh	120	120	120
Max. Continuous mA	165	165	165
Max. Surge A	1	1	1

ASSEMBLY MODULE

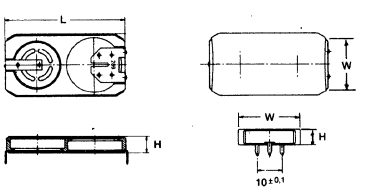
The Plainview Assembly Module/Battery Holder is a unique concept that allows using the PMB back-up Ni-Cad button cell batteries with unusual flexibility.The module may be installed on a PC board during the normal manufacturing process using either through hole or SMT surface mount technology. The battery may then be inserted into the module at any time and of course is then **FIELD REPLACEABLE** without soldering, a "GREEN" consideration.



Type	Voltage V	Capacity mAh	Dimensions A	B	C	D	E	F	G	H
PMB-AM 2.4/65	2.4	65	12.1	10.0	4	17.5	16	18	0.25	1.2
PMB-AM 3.6/65	3.6	65	17.8	10.0	4	17.5	21	18	0.25	1.2

FLAT PAKS —PMBF

Plainview has recently introduced a new low profile flat series of its PMB batteries for applications where the battery height of PCB mounted batteries is critical. Although all of our ZA button cells can be assembled into flat packs, those listed below are now standard additions to the PMB Series—the new PMBF Series.



P/N	Voltage V	Capacity mAh	Dimensions mm L	W	H
PMBF 2.4/33	2.4	33	27.9	14	6.8
PMBF 2.4/35	2.4	35	35.5	18	5.2

Plainview Batteries NiCd cylindrical cells/flat cells/paks

Plainview's range of NiCd cylindrical and flat cells offers an extremely wide range of the best quality rechargeables available. With our wide offering of sizes, capacities, and features, Plainview has the cell you require. Furthermore, we have the skill and experience to put together the Plainview Application Specific Battery (PASB) pack or assembly to meet your electrical mechanical and interconnect requirements. Give us your technical requirements and Plainview will give you a timely competitive price and technical quotation.

Plainview Batteries lithium cylindrical cell batteries

Lithium cylindrical cell batteries are real powerhouses. They have voltages ranging from 2.8-3.6 volts in single cells, and capacities to 35Ah. Plainview offers four lithium cylindrical cell chemistries. Lithium sulphur dioxide, manganese dioxide, thionyl chloride and carbon monofluoride. Each chemistry has unique attributes. Your Plainview application engineer can help to select the proper cell for *your* application. Plainview will manufacture battery pack assemblies to meet your voltage and capacity requirements.

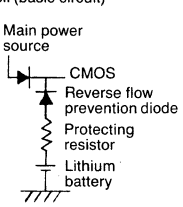
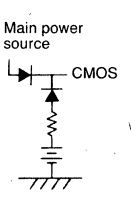
Memory backup circuit sample

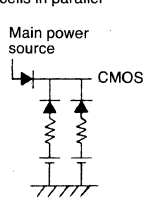
1. Using a single 3V cell (basic circuit)



2. Using two 3V cells in series



3. Using two 3V cells in parallel



Handling precautions

Items prohibited in order to ensure safe handling

Lithium batteries incorporate inflammable materials such as lithium and organic solvent. If lithium batteries are mistreated or handled incorrectly, they may burst open and ignite, possibly resulting in injury and/or fire.

When dealing with lithium batteries, carefully follow the precautions listed below in order to prevent accidents.

- Do not short circuit.
- Do not heat or incinerate.
- Do not apply solder directly.
- Do not charge.
- Do not disassemble, deform, or apply excessive pressure.
- Do not use different models or new and old batteries together.
- Always check proper polarity.

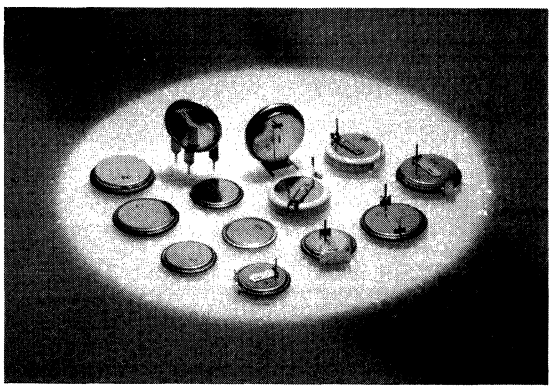
Plainview Batteries lithium coin cell batteries



Lithium coin cells are flat lithium primary batteries. They provide remarkable energy capacity in their small size and exhibit stable voltge discharge levels. LiBat coin cells can be used as a small source of internal power or, more commonly as power failure back-up energy sources.

Coin cell part numbers usually define the size. The first two digits give the diameter and the second two the cell height, both in mm.

Coin cell temperature ranges are $-20°C$ to $+70°C$.

Battery self dissipation is $\leq 1\%$ per year at room temperature. Cells can be used individually, in battery holders, or soldered directly to pc boards with several standard pinouts, (diagram below), and pinouts on request.

All Plainview lithium coin cells are UL recognized.

In general, pin spacing between positive and negative pins (Dimension C) on horizontal mount cells is 15.2, 17.8, or 20.3mm.

All cells can be made available with tabs. Battery holders are available for most common sizes.

ETERNACELL®

LITHIUM-SDX

Why a Lithium Battery

Quite simply,—Today's lithium batteries—in one system or another —exceed all the parameters normally used to evaluate primary battery performance—they are:

- Voltage
- Energy Density
- Reliability
- Shelf Life
- Discharge Rate Capability
- High and low temp performance

LITHIUM BATTERIES ARE THE TOP STATE OF THE ART IN PRIMARY BATTERIES—

Of the various lithium systems, Eternacell® SDX (Li/SO_2) offers the best performance when all these features are taken into account and is the ideal choice for severe environmental or high rate applications. For long term, low rate drains the hermetic glass to metal seals and corrosion resistance packaging also make it an excellent choice.

The SDX—Sulphur Dioxide System has the greatest all-round performance coupled with the most reliable packaging at competitive pricing. It is the only lithium battery system in use by the U.S. Government for portable military applications. It is approved under MIL spec. MIL-B-49430 (ER)—Dec. '81, and its balanced chemistry makes it an extremely safe battery system. For these reasons, it is the best choice for a wide range of commercial and industrial applications.

General Specifications of SDX ETERNACELL® Lithium Sulfur-Dioxide Batteries

The Eternacell® SDX is offered in a complete line ranging in capacity from 0.5 ampere hours to 35 ampere hours. The following features are standard:

- Every cell bearing the SDX description is a balanced cell; that is, the lithium to sulfur-dioxide ratio does not exceed 1.1.
- Every cell incorporates a safety vent in the cell case.
- Every cell is hermetically sealed.
- Every cell is 100% voltage checked, and 100% high temperature stored prior to shipment.

Operating Voltage Considerations:

The operating voltage of all cells is affected by Load—(current or drain rate), ambient temperature and to a certain extent the capacity remaining in a cell or battery when it comes into use. Here are typical voltage curves for design considerations: Cell voltage as a function of load: (D size cell typical)

Total Performance:

Eternacell® SDX cells by Power Conversion can be used in the widest range of application conditions and the most stringent product and storage environments. They meet or exceed the most rigid military, industrial and commercial specifications. They offer: • Excellent high rate performance • The best low temperature performance • Long term storage and operation at temperatures up to 85°C • Forced discharge of 200% of capacity • Shelf life of 10 years • True hermetic seals • The flexibility of high voltage, high energy, lightweight cells

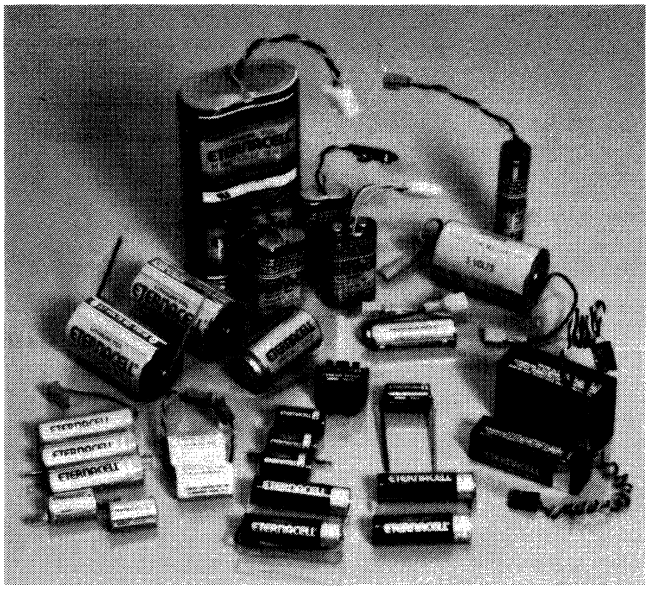
ETERNACELL®

LITHIUM-TCL



HIGH ENERGY—HIGH VOLTAGE IDEALLY SUITED FOR MEMORY SUPPORT

The TCL system allows operation of many electronic functions in addition to volatile memory support—with just a single cell. Today's Lithium batteries exceed all the previously accepted operating parameters for primary batteries and allow design freedom from virtually all shelf life and operating temperature constraints. While not intended for high rate applications, **Eternacell TCL batteries offer a combination of features unmatched by any other lithium battery system.**

Committed to Continuing Development

Formed in 1970 specifically to develop and apply high energy battery systems, Power Conversion introduced the first commercial lithium systems and today is the leading manufacturer of lithium batteries in the world, supplying both high and low rate requirements for commercial, industrial and government applications. Today Power Conversion markets four lithium battery systems to cover all types of applications from low rate miniaturization to large size, high rate cells capable of meeting extreme environmental requirements.

These systems are:
TCL — Lithium Thionyl Chloride ($Li/SOCl_2$)
SDX — Lithium Sulphur Dioxide (Li/SO_2)
MDX — Lithium Manganese Dioxide (Li/MNO_2)
CFX — Lithium Carbon Monofluoride (Li/CFX)

General Specifications of TCL Eternacell® Lithium Thionyl Chloride Batteries

The Eternacell® TCL is offered in a complete line ranging in capacity from 0.8 ampere hours to 11 ampere hours.
The following features are standard:

- Every cell is a power limited cell designed for safe operation.
- Every cell incorporates a safety vent in the cell case.
- Every cell is hermetically sealed.
- Every cell is 100% voltage checked, and 100% high temperature stored prior to shipment.

MODEL B9591T

The PCI Lithium Eternacell Computer Clock Battery Model No. B9591T contains the highest energy of any original equipment or replacement computer clock battery. This results in the longest service life in the industry, up to two (2) years longer than other battery systems. The Model B9591T contains two (2) high energy 3.65 volt AA size cells, a protective diode and current limiting resistor in a plastic case with wire leads to a connector and a velcro mount. This rugged design is Underwriters Laboratory, Inc. component recognized ( ) and has a shelf life in excess of ten (10) years.

SPECIFICATIONS:

Voltage: Open Circuit 7.3
Nominal Operating 4.5
Capacity: 1.8 AH
Shelf Life (Minimum): 10 yrs.
Temp. Rnage: – 40°C to 85°C
Dimension-Length: 2¼ in.
Width: 1½ in.
Height: ⅞ in.
Lead Length: 8½ in.
Mount: Velcro Strip
Terminals: 4 pin Connector with key

LITHIUM BATTERIES
Packaged to fit
If your design needs a lithium battery, we can provide the right battery system that will fit your requirements exactly, even for the most hostile environments. Power Conversion is the largest U.S. producer of lithium cells and batteries, from miniature cells to large complex multicell battery designs.
• Lithium Sulfur Dioxide 2.9V/cell
• Lithium Thionyl Chloride 3.7V/cell
• Lithium Manganese Dioxide 3.4V/cell
• Lithium Carbon Monofluoride 3.3V/cell
We have designed, qualified, and produced a broad range of hi-rel lithium batteries to satisfy virtually any application over the past twenty years.
Count on our experience to develop the high-rate, low-rate, or reserve system for your project. Call us today.

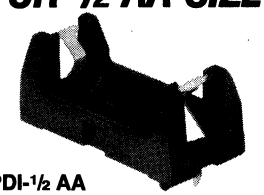
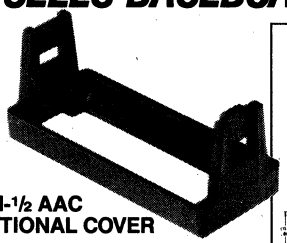
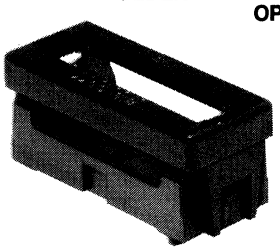
FOR ½ AA SIZE CELLS BASEBOARD MOUNTING



PDI-½ AA BATTERY HOLDER

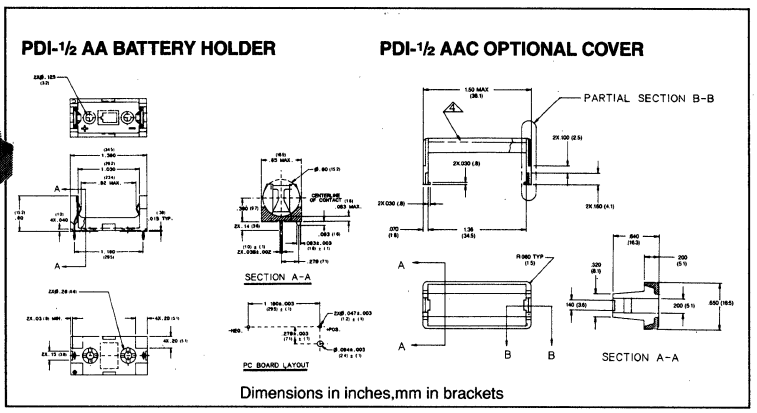


PDI-½ AAC OPTIONAL COVER

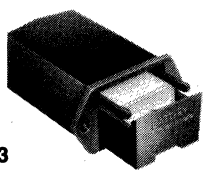


PDI-½ AAC. A PCB Baseboard mounting battery holder for half AA cells (max. dimensions 25.1mm x 14.9mm dia.). It has dual connections either by PC tag or .110″ series tabs/solder tags and two fixing holes to lock holder into the PCB or baseboard.

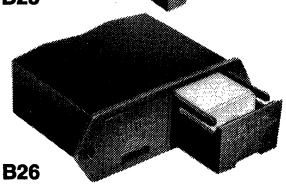
PDI-½ AAC is an optional cover with positive locking clips to hold it firmly in place on the above holder.



FOR PP3 SIZE CELLS PANEL MOUNTING



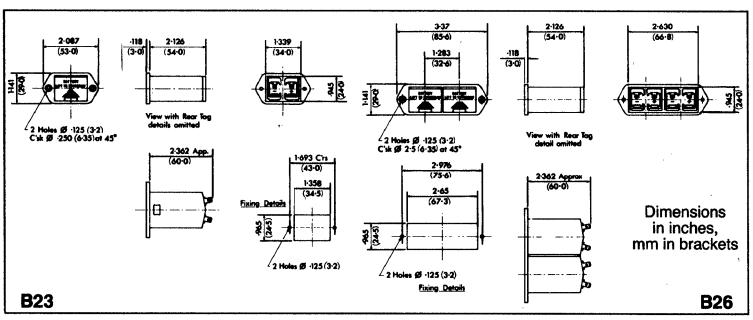
B23



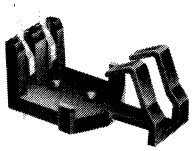
B26

B23, B26. Two panel mounting battery holders accepting **PP3** size cells (BS397, max. dimensions- W26.5 x D17.5 x H48.5mm).

- Removable loading magazines marked with polarity.
- Positive 'snap-in' location at full insertion & easy 'finger-lift' withdrawal.
- Direct self-contacting on insertion, with rear solder tag terminations.
- Contacts are self-compensating, allowing for battery terminal tolerances and variants.
- Spring compensation, allowing for battery case tolerances.

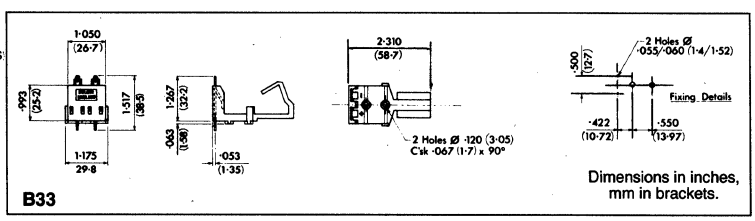


FOR PP3 SIZE CELLS BASEBOARD MOUNTING

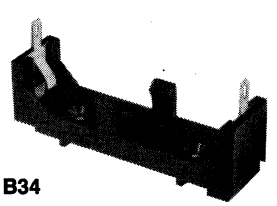


B33

B33. A PCB/Baseboard mounting battery holder accepting a single **PP3** size cell (BS397, max.dimensions W26.5 x D17.5 x H48.5mm). It has dual connections either by PC tag or .110″ series tabs/solder tags and two fixing holes to lock holder onto the PCB or base-board. Polarity is clearly marked. PC pin may be trimmed for base mounting only.

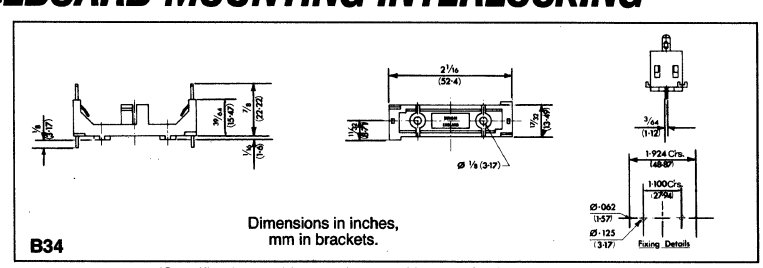


FOR AAA SIZE CELLS PCB/BASEBOARD MOUNTING-INTERLOCKING



B34

B34. A PCB/Baseboard mounting battery holder accepting a single **AAA** size cell (BS397, max. dimensions ϕ10.5mm x 44.5mm). However, this unit has an interlocking device allowing multiple assemblies to be constructed. It has dual connections either by PC tag or .110″ series tabs/solder tags and two fixing holes to lock holder onto the PCB or baseboard. Polarity is clearly marked. PC pin may be trimmed for base mounting only.



(Specifications subject to change without notice.)

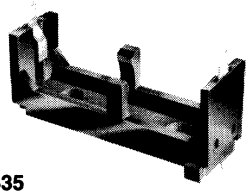
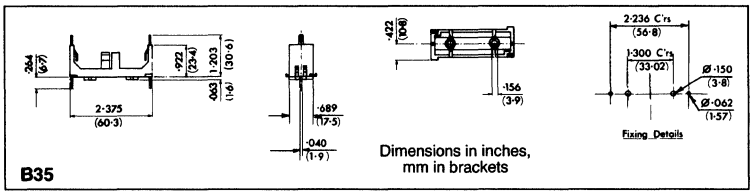
P.O. Box 539•59 Lakeside Avenue, West Orange, NJ 07052 (201) 736-5722•Fax (201) 736-8930

FOR AA SIZE CELLS BASEBOARD MOUNTING INTERLOCKING



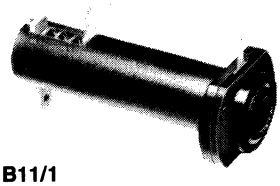
B35

B35 A PCB/Baseboard mounting battery holder accepting a single **AA** size cell (BS397, max. dimensions ϕ 14.5mm x 50.5mm). However, this unit has an interlocking device allowing multiple assemblies to be constructed. It has dual connections either by PC tag or .110" series tabs/ solder tags and two fixing holes to lock holder onto the PCB or baseboard. Polarity is clearly marked. PC pin may be trimmed for base mounting only.



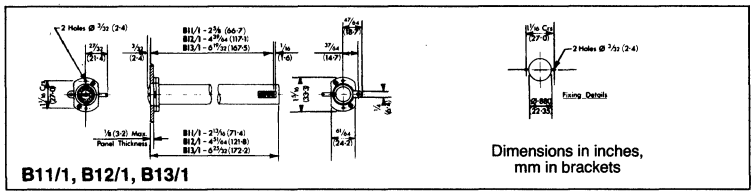
B35

FOR AA SIZE CELLS PANEL MOUNTING



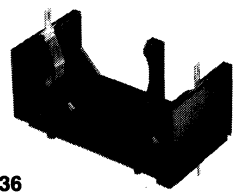
B11/1

B11/1, B12/1, B13/1. Panel mounting battery holders accepting 1, 2 or 3 **AA** size cell (BS397, max. dimensions ϕ14.5mm x 50.5mm). Flush fitting bayonet cap with coin slot is clearly marked 'Battery'. Mounting is from rear of panel, fixing by screws through front flange and supplementary rear bracket. Connection by .110" series tabs/ solder tags.



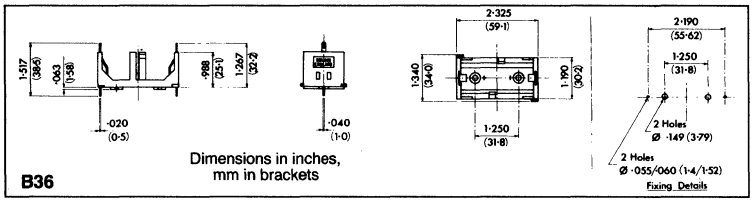
B11/1, B12/1, B13/1

FOR C SIZE CELLS PCB/BASEBOARD MOUNTING INTERLOCKING



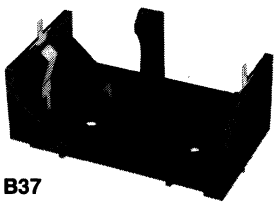
B36

B36. A PCB/Baseboard mounting battery holder accepting a single **C** size cell (BS397, max. dimensions ϕ 26.2mm x 50mm). However, this unit has an interlocking device allowing multiple assemblies to be constructed. It has dual connections either by PC tag or .110" series tabs/ solder tags and two fixing holes to lock holder onto the PCB or baseboard. Polarity is clearly marked. PC pin may be trimmed for base mounting only.



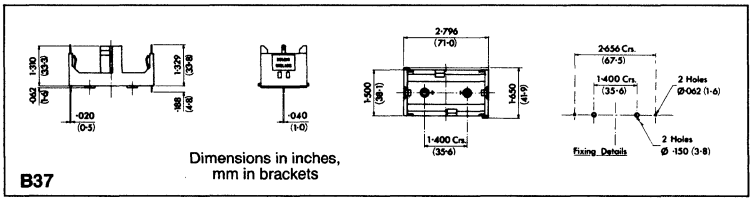
B36

FOR D SIZE CELLS PCB/BASEBOARD MOUNTING INTERLOCKING



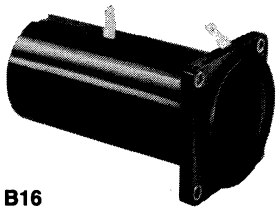
B37

B37 A PCB/Baseboard mounting battery holder accepting a single **D** size cell (BS397, max. dimensions ϕ 34.2mm x 61.5mm). However, this unit has an interlocking device allowing multiple assemblies to be constructed. It has dual connections either by PC tag or .110" series tabs/ solder tags and two fixing holes to lock holder onto the PCB or baseboard. Polarity is clearly marked. PC pin may be trimmed for base mounting only.



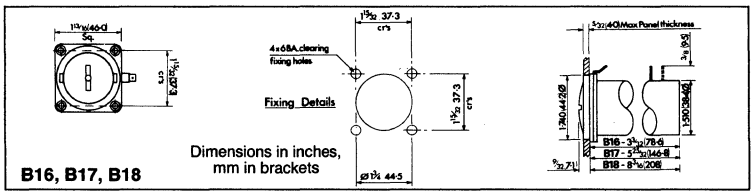
B37

FOR D SIZE CELLS PANEL MOUNTING



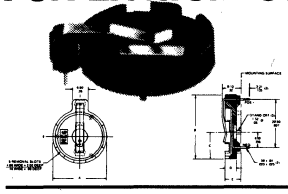
B16

B16, B17, B18. Panel mounting battery holders accepting 1, 2 or 3 **D** size cells (BS397, max. dimensions ϕ 34.2mm x 61.5mm). Flush fitting bayonet cap with coin slot is clearly marked 'Battery'. Mounting is from rear of panel, fixing by screws through front flange and supplementary rear bracket. Connection by .187" series tabs.



B16, B17, B18

FOR LITHIUM COIN CELLS NEW BERYLLIUM COPPER CONTACTOR



Use of fully heat-treated beryllium copper for the positive contact provides several benefits: Excellent electrical conductivity, totally non-magnetic - an important design consideration when near sensitive chips. Also permits high contact force with low stress-relaxation.

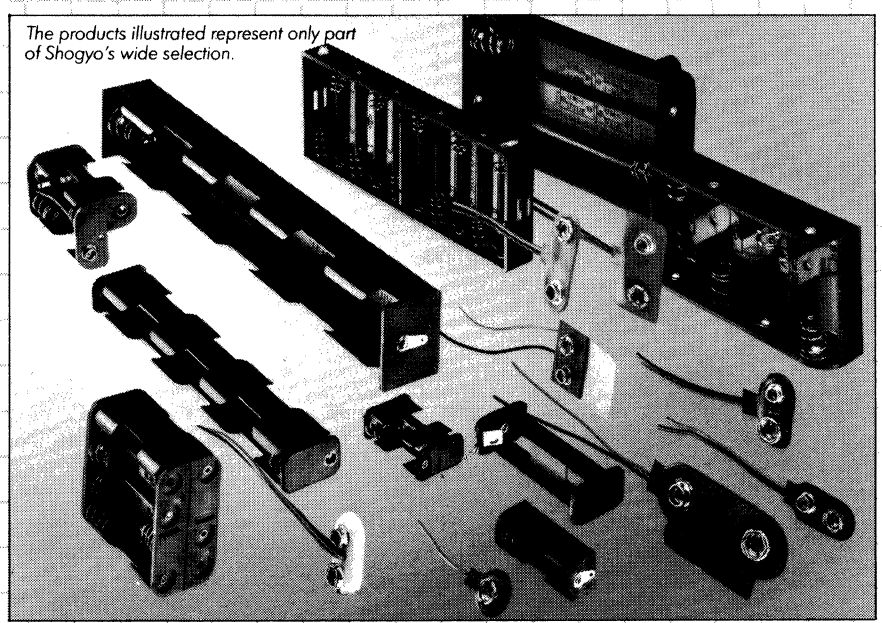
SHOGYO BATTERY HOLDERS & SNAPS

Your design deserves Shogyo quality and reliability.
You deserve...
Shogyo Service... comprehensive, responsive and fast
Shogyo Professionalism... the helpful experience you need
Shogyo Prices... always competitive, usually better
and...
Shogyo Selection... with complete custom design capabilities

Including a diverse offering of:
- *D, C, A, AA, AAA holders.*
- *1, 2, 3, 4, 6, 8, 10 cell holders.*
- *Specialty holders (eg. two C cell/one 9V holders).*
- *Standard and high-retention holders.*
- *Holders and snaps with PC mountable pins.*
- *Holders with pre-fitted mounting holes; battery snaps, lead wires, or solder terminals; black, white or metal finishes; and polyethylene, UL 94 VO or stainless steel construction.*
- *Snaps in your choice of mountings, or unmounted.*
- *Snaps made from stainless steel or extra high-retention phosphorous-bronze.*
- *Hand straps in nylon, vinyl and cloth, your choice of lengths and attachment devices.*
- *And much more.*



The products illustrated represent only part of Shogyo's wide selection.

For immediate assistance and specific information on the product(s) you require:
Dial 516-466-0911 or
FAX 516-466-0922

For complete product listings and specifications, request our free catalog.

SHOGYO

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

TADIRAN LITHIUM BATTERIES

NO OTHER PRIMARY BATTERY OFFERS YOUR PRODUCT DESIGNS ALL THESE ADVANTAGES:

- **HIGHEST CELL VOLTAGE.** More than twice the voltage of other batteries (3.6V)
- **HIGHEST ENERGY DENSITY.** 4 times as great as other batteries. Up to 420 Wh/kg and 800 mWh/cm³.
- **LONG SHELF LIFE.** More than 10 years at room temp., due to their extremely low self-discharge characteristics, and hermetically-sealed construction.
- **WIDE OPERATING TEMP. RANGE.** —55C to +85C. Applications outside this range also possible.
- **SAFE.** Hermetically-sealed, UL-recognized.
- **OPTIMUM COST-EFFICIENCY.** With a voltage more than twice that of other batteries, and a capacity that is four times as great, these batteries offer optimum cost-efficiency, while saving space and reducing weight. Lowest cost per unit of energy.

NO OTHER MANUFACTURER OFFERS BUYERS ALL THESE ADVANTAGES:

- Immediate availability, off-the-shelf from these national distributors:

SHELLEY-RAGON, INC.

Pioneer

Bell Industries

NEWARK ELECTRONICS

- Complete range of ratings & configurations, plus custom designs!
- Aggressively competitive pricing!
- Liberal sampling program for prototyping and evaluation!
- Proven performance! Tadiran is one of very few lithium battery manufacturers in the world with over ten years in the marketplace.

The strength of Tamura's AC and DC power conversion families lies in providing consistently dependable products. All Tamura power and magnetic devices are designed and manufactured to deliver lower AQL levels, guaranteeing you the lowest incoming rejection rates you've ever experienced. For example, last year we shipped over **100 million transformers**– most to customers using a **ship–to–stock** acceptance program.

At Tamura, we're already life testing (not just designing) tomorrow's products– today. Over 100 design engineers at our technology center are dedicated to this task, assuring you of having the most up–to–date technology in your products. Today we are already designing the robotics to build these quality products, in high volume and at low cost. Over 150 product support engineers at 16 Tamura factories see to it.

Satisfy your AC and DC requirements for today and tomorrow. Contact Tamura for your specific requirements.

Tamura quality circles the electron world.

TAMURA BATTERY CHARGERS

Wall Plug-In, 120VAC, 60Hz.

file no. E82180 file no. LR38236

Tamura battery chargers are particularly suited for charging NiCd, lead acid and Gel-Cell batteries. They are UL 1310 listed for battery charger circuits. Contact the battery manufacturer for recommended voltage and current. For additional UL/CSA/VDE models see DC Power Supplies section for DC regulated and unregulated models and Transformers section for AC to AC models.

FEATURES

- UL Listed For Battery Charger Ckts.
- UL 544 Medical Capability.
- Thermal Overload Protection.
- 100% Testing.
- Transformer: 3 flange bobbin.
- US 3-Blade Ground Plug Available.
- Temp Range: 0 to +40°C.
- Case Temp Rise: ≤35°C.
- Oper Humidity: 10-90% RH.
- Material: Black ABS resin/UL 94-V0.
- No Audible Noise.

"WE SHAPE THE POWER THAT LETS YOU SHAPE THE FUTURE!"

— Bob Tauber, Pres.

When you need dependable battery power configured to your exact specs, you need Tauber. We work with all cell types to meet the increasingly sophisticated demands of today's OEMs.

Tauber puts innovative engineering and design assistance, quality controlled craftsmanship and value into every job.

Call today for our FREE brochure and learn how we can shape the power that will help you shape the future.

Tauber's extensive off-the-shelf offerings include:

Primary Cells: Alkaline, Carbon-Zinc, Lithium, Mercury Silver Oxide, Zinc-Chloride andZinc-Air, from Duracell, Panasonic, Electrochem, Kodak, Varta, Tadiran and Rayovac.

Rechargeable Cells: Sealed Lead-Acid, Gelled and Starved Electrolyte, Nickel-Cadmium Cylindrical or Button Cells, Silver-Zinc Button Cells and Lead-Calcium Maintenance-Free Wet Cells from Altus/El-Power, Gates-G.E., Moli, Mule, Panasonic, Sonnenschein, Tadiran, Varta, Yuasa, Powersonics and Power Conversion.

Battery Chargers: Constant Voltage/ Constant Current, Cyclic and Float Duty from Xenotronix, Sonnenschein and Ault.

Battery Holders: All varieties, from Bogen/ MPD.

Switching Power Supplies.

TAUBER ELECTRONICS INC.

CALL TOLL FREE: 1-800-829-4747

A sampling from industry's most complete battery source.

For every battery application Varta focuses on meeting *your* performance goals with batteries of unmatched reliability. Result: consistent, long-lived performance for your products in your customer's hands.

To achieve this result, Varta and its Value-Added Distributors specialize in helping you define battery requirements for new products and in configuring battery packs for cost-effective manufacture. Varta, as an OEM supplier, not only maximizes your application, but provides greatest value as well.

Rechargeable NiCds with Varta mass-plate construction
Varta VR mass-plate cell design provides far longer standby life with faster trickle charging and better overcharge protection. Most versatile configurations.

- **Single Cells:** 1.2 V, 4-1000 mAh. Built into any battery configuration.
- **Mempacs:** For memory protection, pins for board mounting.
- **Saftronic:** Special pin compatability in board mounting.
- **Flat Packs:** The thinnest packs...just one cell thick in batteries to 12V.
- **High-Temperature "T's":** For "hotter-than-normal" applications.
- **Stacks and Packs:** Standard or customized to fit virtually any application.

Cylindrical NiCd Rechargeables: For the higher-capacity applications: fast charging, capacities .1 to 7 Ah in standard N to D sizes and heavy-duty battery packs to 12 volts.

Lithium Primary Cells: The most reliable lithium construction along with up to 10-year standby life.

Alkaline Primary Cells: The longer lasting alkalines with improved performance, capacity and leakage resistance.

Primary Coin Cells: All types—silver, lithium, mercury, zinc air—for every application.

High-temperature Silver Oxide and New Silver Cadmium which operates up to 200°C. C-size only.

For technical service and/or information, call Varta today:
1-800-431-2504; In N.Y., 914-592-2500; FAX, 914-592-2667.

Hydrazine[c]	N_2H_4	Air	1.5	2,100	0.7	800[b]	[l]
Methanol[c]	CH_2OH	Air	1.3	1,400	0.9	175[b]	185[m]

a Delivered capacity when discharged at normal temperatures (20°C) at normal discharge rates.
b Based on fuel consumption only.
c Weight of air not considered in computation of watt hours.
d Water-activated
e Automatically activated; high rate discharge; 2- to 10-min rate.
f Fused salt; heat-activated; high rate discharge; 2- to 10-min rate.
g Four-minute discharge rate.
h β-alumina electrolyte, 300°C operation.
i Fused salt; 350°C operation.
j Solid $RbAg_4I_5$ electrolyte.
k Several different cathode materials used.
l Fuel consumption is based on source of H_2.
m Based on methanol battery-fuel supply in situ.

The Yuasa sealed lead acid battery—the heart of back-up energy—quite simply defines the industry standard. It has a long standing reputation of being the finest, most dependable sealed lead acid battery anywhere. All our batteries are maintenance and position free. Mount them in any position. Long life in either float or cyclic. Our product capacity ranges from 0.8AH up to 3,000AH nominal. To meet your specific requirements, call our Co-engineering Hotline at 800-423-4667.

Applications include: • Aerospace • Alarm Panels • Audio-video Equipment • Cellular Telephones • Communications • Computers • Emergency Devices • Emergency Lighting • Geophysical Equipment • Instruments • Medical • Point of Sale Backup • Portable Appliances • Portable Lights • Power Tools • Security • Switching Systems • Telecommunications • Test Equipment • Toys/Hobbies • UPS

YOUR POWER SUPPLY ANSWER STARTS ON PAGE 1661

Since 1969, Computer Products has been meeting the demands of the marketplace. In computers. Telecommunications. Process control. Automated systems. Wherever there are requirements for AC/DC power supplies or DC/DC converters, Computer Products is there with the latest technology and cost-effective pricing. Step up to a true global capability in manufacturing, distribution and service.

Computer Products. Giving you the power to win. And the products to get you there.

THINK OF IT AS THE 911 OF THE POWER SUPPLY INDUSTRY.

Need power supply help in a hurry? Call the TODD Power-Phone. Our engineers are trained to help you solve virtually any OEM power supply problem, from the earliest stages of design to last minute system trouble-shooting.

Need standard, modified, or custom switching power supplies? Just call the TODD Power-Phone. We'll get them to you on time, every time. Guaranteed.

Want general information? One call to the TODD Power-Phone can get you catalogs, spec sheets, prices, or anything else you need for your company's immediate or long-term power supply requirements.

The TODD Power-Phone.
Immediate response, immediate solutions.
It's a real life-saver.

For instant information on the complete line of TODD switching power supplies, see our catalog on pages 2077-2106 of this volume of EEM.

EEM MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

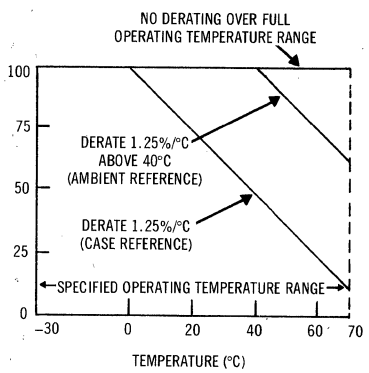

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

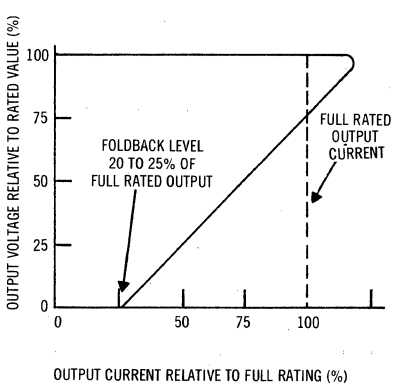

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

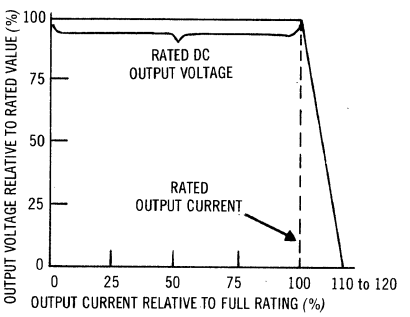

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

uP MULTI-OUTPUT POWER SUPPLIES

New higher power triple MT series and T series are perfect for uP's process controllers, shift registers, RAM and ROM arrays. The common outputs are floating when complete isolation is required. Both plug-in for PC Board applications and chassis mounts on 7 terminal pin modules are available.

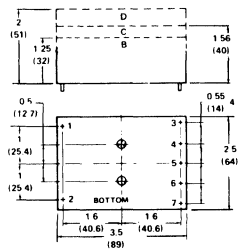
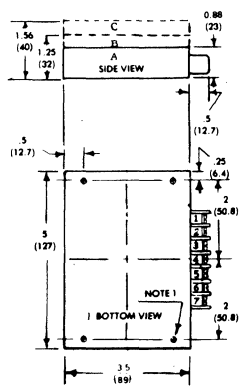
Four mount inserts 4.40×0.1 (2.5) dp. min. Seven pins, 0.040 (1.0) dia.×0.2 (5.1) lg. min. 5V Common A isolated from ±V Common B.

All Dimensions are in inches and (mm).





GENERAL SPECIFICATIONS	
Input Voltage	105 to 125 VAC @ 50-400HZ
Output Voltage Accuracy	1% Fixed
Operating Temp.	−25°C to 71°C
Temp. Coefficient	0.015% per °C
Storage Temp.	−25°C to 85°C
Input Isolation	50 Megohms

MINIATURIZED PC MOUNT POWER SUPPLIES

The mini-sized modules conserve PC board space with a small 2"×2" area. Pins may be inserted from the side to obtain a smaller 2"×.88" PC board area at no extra charge. M series are priced below all competitors with equivalent specifications.'

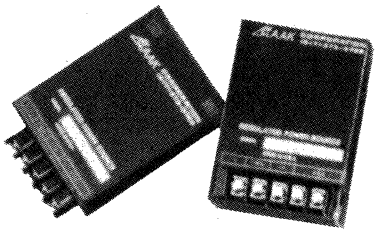
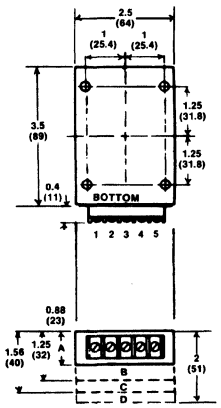
NOTE: Insert the exact voltage required in place of the bracketed voltage ranges in MODEL SERIES column.
For top mounted barrier strip, add suffix—T.
For ±1 Volt Variable, add suffix—V.

The Chassis (C) series uses a low profile front mounted or Top (T suffix) mounted, 5-terminal barrier strip.

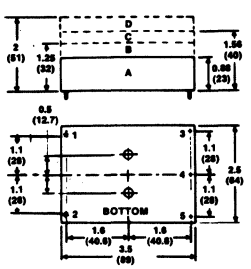




PC BOARD MOUNT POWER SUPPLIES

NOTE: PC Board Mount (S) series identical to Chassis Mount (C) series. To order replace C with S and subtract with $2.00 from C series pricing.

ACOPIAN, COMPUTER PRODUCTS, DATEL, MIL, LAMBDA, WALL, etc. configurations and mounting available at lower pricing.



GENERAL SPECIFICATIONS	
Input Voltage	105 to 132 VAC @ 47-420Hz
Output Voltage Accuracy	1% Fixed
Operating Temp.	−25°C to 71°C
Temp. Coefficient	0.015% per °C
Storage Temp.	−55°C to 85°C
Input Isolation	50 Megohms

100% current fold-back on all 1 amp or greater single output models current limiting on all dual output models from ±V to common.

Abbott TECHNOLOGIES, INC

Power Supplies

Abbott TECHNOLOGIES, INC.

THE POWERHOUSE OF QUALITY.

Abbott Technologies specializes in providing exceptionally high quality electronic power conversion products. Our power supply designs normally are based on an "industry-standard" form factor, and we make every effort to provide our customers with standard and modified-standard units which provide just the right fit for their application. We can modify our units to provide features and capabilities normally available only on custom power supplies, usually at a fraction of the engineering cost that a "custom" vendor would charge. This allows us to offer very competitive pricing even in small quantity orders of our modified as well as our standard units.

Our design philosophy is based on three fundamental principles:

1. Our standard products are designed in advance and offered for sale after they have proven their reliability.
2. Conservative design margins are used to provide added reliability to our products.
3. Published specifications are always more conservative than actual values.

Our quality system is in accordance with Mil-I-45208. Our normal warranty on all products is two years; a five year warranty is also available.

We believe Abbott can provide you with real value and service at a reasonable price.

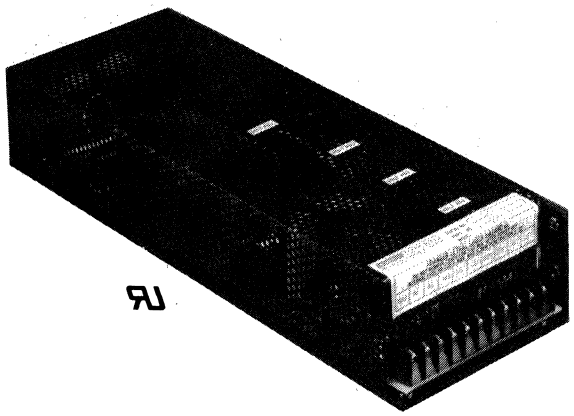
MODEL ESA

150-WATT MULTIPLE OUTPUT AC-DC POWER SUPPLY



Abbott's "ESA" model line of triple and quadruple output power supplies provides 150 watts of power with a tightly regulated 5VDC main output and fully regulated auxiliary outputs. The "ESA" model offers the OEM system designer many standard features which are usually only available as costly options. These features include overvoltage protection and foldback overcurrent protection on all outputs, input undervoltage protection, remote sense, remote inhibit, soft start circuitry, EMI filter, steel cover, and Abbott reliability. These convection cooled units have efficiencies typically greater than 75% and are situated in the popular industry standard form factor of 2.5″×4.8″×13.5″. All "ESA" models comply with the radiated and conducted portions of FCC 20780, level B, and VDE 0871, level A. The standard units are designed to UL 478, and CSA 22.2 safety standards. Standard mounting holes are present to allow for easy replacement of existing models from Kepco, Deltron, Powertec, and Boschert.

- **TIGHTER REGULATION**—0.2% on all outputs
- **EFFICIENCY**—typically 75% or greater
- **COMPETITIVELY PRICED**
- **LOW EMI**—meets FCC 20780 Class B, VDE 0871 Class A
- **UL 478 and UL 1012** recognized
- **CSA 22.2, VDE 0806, IEC Safety**
- **CONVECTION COOLING**
- **STANDARD FEATURES** include:
  - — input undervoltage protection
  - — overvoltage protection on all outputs
  - — foldback overcurrent protection
  - — remote sense
  - — remote inhibit
  - — 115/230 VAC, 50/60 Hz operation (user selectable)
  - soft start
  - cover
- **OPTIONAL** power fail warning
- **SIXTEEN HOUR** burn-in
- **TWO-YEAR WARRANTY**

AC-DC Switchers

MODEL ESA

SPECIFICATIONS

AC INPUT: 90-132/180-264 VAC, 47 to 400 Hz, user selectable.

EFFICIENCY: Typically 75% or greater.

LINE REGULATION: All outputs within 0.2% over full input range.

LOAD REGULATION: All outputs within 0.2%, from 20% to 100% rated load. For proper operation of auxiliary outputs, main output must be loaded a minimum of 10% of rated load.

CROSS REGULATION: 0.1% on all outputs. Cross regulation is measured with 50% on output under test, and any other output varied 50% to 100% of rated load.

RIPPLE: Main: 25 mV peak to peak typical using a 25 MHz bandwidth, 50 mV peak to peak maximum. Auxiliary: 1% peak to peak maximum using a 25 MHz bandwidth.

STABILITY: Output voltages change less than ±0.05% for 24 hours following initial warm-up period.

LOAD TRANSIENT RESPONSE: Recovery to within 0.5% of nominal voltage set-point within 0.5 msec after 50% load change.

HOLD-UP TIME: 20 msec minimum after nominal input voltage is lost at full load.

TEMPERATURE RANGE: Operating: −0°C to70°C (Full power up to 50°, derate linearly to 50% power at 70°C) Storage −20°C to 85°C.

TEMPERATURE COEFFICIENT: 0.2%/degree centigrade for fully regulated outputs, 0.05%/degree centigrade for semi-regulated outputs.

ISOLATION VOLTAGE (STANDARD): 1500 VDC input to case, input to output, 500 VDC output to case.

ISOLATION VOLTAGE (OPTIONAL): 3500 VDC input to case, 2100 input to output, 750 output to case. (To specify this feature please place a "-1" after model number.)

SHORT CIRCUIT PROTECTION: Foldback overcurrent protection is standard on all outputs. All outputs automatically reset after short circuit is removed. Foldback will also occur when total power of unit exceeds 110% of rated power.

OVERVOLTAGE PROTECTION: Crowbar and non-crowbar overvoltage protection are standard on all outputs.

REMOTE ERROR SENSING: Standard on main output.

INPUT PROTECTION: Internal fuse.

LOGIC INHIBIT: Standard. All outputs shut off upon application of a TTL compatible low signal to "inhibit" terminal.

POWER FAIL WARNING (OPTIONAL): A TTL compatible "low" signal will occur at least 2 ms before the loss of main output after the loss of AC input power. (To specify this option, please place a "-2" after last digit in model number.)

WEIGHT: 4.5 lbs.

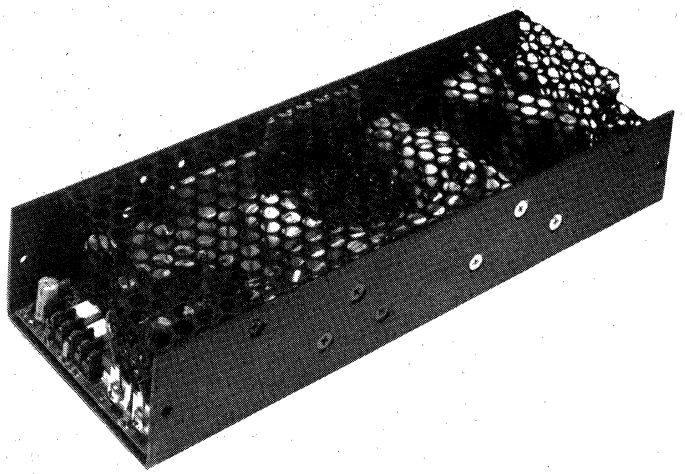
AC-DC Switchers

MODEL CF

250 WATT MULTIPLE OUTPUT AC-DC POWER SUPPLY



The "CF" model of high-quality triple and quadruple output power supplies provide 250 watts of output power in an industry standard 13.6 × 5.0 × 2.5 case. The unit features a reliable, half-bridge design with flexible current ratings that offer the system designer versatility in powering his loads. The fully-regulated auxiliary outputs (± 12/15 VDC), and the semi-regulated 24 VDC output provides a nominal rating of 5 Amps with a surge capability of 7 Amps. The unit is designed to the safety standards of UL1950, VDE EN60950, IEC 950, and to the EMI standards of FCC 20780A, (with optional filter). These models are competitively priced, and come with many premium features as standard, including: OVP, short-circuit protection, user-selectable input voltage, remote-error sensing, and logic inhibit.

Abbott's twenty years of experience in power design, along with our conservative design philosophy and exclusive use of premium materials make the "CF" model the reliable choice for your mid-power system.

- **FULL OR SEMI-REGULATED OUTPUTS AVAILABLE**
- **UL1950, VDE EN60940 AND IEC 950**
- **EFFICIENCY TYPICALLY 70% OR GREATER**
- **FLEXIBLE CURRENT RATINGS**
- **OVERVOLTAGE PROTECTION**
- **SHORT-CIRCUIT PROTECTION**
- **STEEL COVER**
- **LOGIC INHIBIT**
- **OPTIONAL POWER-FAIL WARNING**

AC-DC Switchers

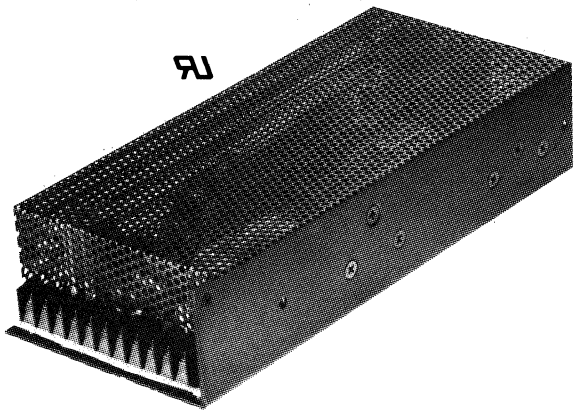
MODEL ND

180-WATT SINGLE OUTPUT AC-DC SWITCHING POWER SUPPLY



NEW!

Abbott's "ND" model line of single output switching power supplies provide 180 watts of DC power with tight regulation and low ripple. These competitively priced units have an industry standard case size of 2.5" x 5.0" x 11.0", which allow for easy replacement of existing models from Kepco, ACDC, Boschert, Deltron, and Sierracin. The "ND" model offers the system designer many features which are normally available from our competitors as costly options. These features include: overvoltage protection, input undervoltage protection, foldback overcurrent protection, remote sense, remote inhibit, aluminum chassis and steel cover, dual AC input (user selectable), and an MTBF of 189,000 hours, (per MIL-HDBK-217D). These convection cooled power supplies comply with the radiated and conducted specifications of FCC 20780, level A, and VDE 0871, level A. The models are also designed to UL 478, UL 1012, CSA 22.2 safety standards. Typical efficiencies are greater than 75%. The "ND" line is the reliable choice for your medium power requirements when failures cannot be tolerated.

- **INDUSTRY STANDARD CASE SIZE** (2.5" x 5.0" x 11.0") Allows for easy replacement of existing models from Sierracin, Kepco, ACDC, Boschert, and Deltron.
- **UL 478, UL 1012, CSA 22.2,** (testing underway).
- **COMPETITIVELY PRICED**
- **LOW EMI** — meets FCC 20780 Class A, VDE 0871 Class A.
- **STANDARD OUTPUT VOLTAGES AVAILABLE** from 5VDC to 28VDC.
- **TIGHT REGULATION ON OUTPUT** (better than .15%).
- **LOW RIPPLE** (typically 50 mV Peak-to-Peak).
- **CONVECTION COOLED** — full power up to 50 degrees C.
- **HIGH RELIABILITY** — MTBF of 189,000 hrs per MIL HDBK 217D.
- **STANDARD FEATURES INCLUDE:**
  input undervoltage protection
  overvoltage protection
  foldback overcurrent protection
  remote sense
  remote inhibit
  115/230 VAC, user selected, 50/60/400 Hz
- **OPTIONAL** Power fail warning
- **SIXTEEN HOUR** burn-in
- **TWO-YEAR WARRANTY**

AC-DC Switchers

MODEL **LG**

750-1000-WATT FAN-COOLED AC-DC POWER SUPPLIES

- **TIGHT REGULATION** — 0.2%
- **LOW RIPPLE** — 0.1% rms, 0.5% peak to peak
- **EFFICIENCY** — typically 75% or greater
- **COMPETITIVELY PRICED**
- **UL/CSA/VDE ISOLATION**
- **FCC/VDE EMI FILTERS**
- **STANDARD FEATURES** include:
  - — input undervoltage protection
  - — parallel operation
  - — short circuit protection
  - — output overvoltage protection
  - — remote sense
  - — logic inhibit
  - — power fail warning
  - — margining
  - — output indicator
  - — 30 msec hold-up time
- **OPTIONAL FEATURES** include:
  - — electronic soft start circuitry
  - — crowbar type output overvoltage protection
- **SIXTEEN HOUR** burn-in
- **TWO-YEAR WARRANTY**

Abbott's "LG" model line of high power, fan-cooled switchers provide 750-1000 watts of DC power with extremely tight regulation and low ripple. These current-mode controlled units are priced competitively and provide the system designer with a high performance alternative in an industry standard 5″ × 8″ × 11″ case. Other standard features include UL 478 isolation, input undervoltage protection, short circuit protection, output overvoltage protection, remote sense, logic inhibit, voltage margining, power fail warning, parallel operation, heavy-duty ball-bearing fan, output indicator, and a two year warranty. Options include VDE 0806 isolation, FCC 20780A and VDE 0871A EMI filtering, electronic soft start, and crowbar type output overvoltage protection. Abbott's long history of providing power supplies that successfully perform on some of the most demanding applications make the "LG models the reliable choice for superior systems where failures cannot be tolerated.

Abbott TECHNOLOGIES, INC.

AC-DC Switchers

MODEL LG

SPECIFICATIONS

AC INPUT: 92 to 132/184-264 VAC, single phase, 47 to 63 Hz.

UNDERVOLTAGE PROTECTION: Standard. Protects unit during input undervoltage.

INRUSH CURRENT (OPTIONAL): Electronic soft start limits inrush current to maximum operating current under all conditions. To specify this feature, please place a "-2" after model number.

INRUSH CURRENT (STANDARD): Inrush current is limited to four times the maximum operating input current on turn-on, providing unit has been off for thirty minutes.

INPUT PROTECTION: Internal fuse.

EFFICIENCY: Typically greater than 75%.

LINE REGULATION: 0.2% maximum over full input range.

LOAD REGULATION: 0.2% maximum from no load to full load.

OUTPUT VOLTAGE ADJUSTMENT: ±10%.

OUTPUT INDICATOR: An LED provides a green light when output is within set limits.

RIPPLE AND NOISE: 0.1% rms maximum, 0.5% peak to peak maximum measured with a 20 MHz bandwidth.

LOAD TRANSIENT RESPONSE: Recovery to within 0.1% of nominal voltage set-point within 400 msec after a 50% load change.

HOLD-UP TIME: 30 msec minimum at full load and nominal line.

ISOLATION VOLTAGE (STANDARD): 1500 VDC input to case, input to output, 500 VDC output to case.

ISOLATION VOLTAGE (OPTIONAL): 3500 VDC input to output, 2100 VDC input to case, 750 VDC output to case. To specify this feature, please place a "-5" after model number.

SHORT CIRCUIT PROTECTION: Foldback overcurrent protection is standard. Output automatically recovers upon removal of short circuit. Current limiting occurs when load exceeds 110% of rated load.

OVERVOLTAGE PROTECTION (STANDARD): Non-crowbar type overvoltage protection turns off unit when output voltage exceeds set point. Unit input power must be recycled to restore output.

OVERVOLTAGE PROTECTION (OPTIONAL): Crowbar type overvoltage protection reduces output voltage to less than 1 volt when output voltage exceeds set point. Unit input power must be recycled to restore output. To specify this feature, please place a "-1" after model number.

OVERSHOOT: No turn-on/off overshoot.

REMOTE ERROR SENSING: Standard. Sense terminals provided on J1-1 (+sense) and J1-4 (−sense) will adjust for up to 0.5 VDC drop in load cables.

LOGIC INHIBIT: Standard. Output shuts off upon application of TTL compatible "high" signal to inhibit terminal (J1-5).

TEMPERATURE RANGE: Operating −0°C to 70°C (Full power up to 50°C, derate linearly to 50% power at 70°C). Storage −20°C to 80°C.

PARALLEL OPERATION: Standard.

MARGINING: Standard. Allows adjustment of ±10% of the output voltage (not available on 2V).

POWER FAIL WARNING: Standard. A TTL compatible "low" signal will occur at least 2 msec before loss of output after loss of AC power.

FCC EMI FILTER (OPTIONAL): Internal filter permits compliance with FCC 20780 level A. To specify this feature, please place a "-3" after model number.

VDE EMI FILTER (OPTIONAL): Internal filter permits compliance with VDE 0871 level A. To specify this feature, please place a "-4" after model number.

WEIGHT: LG 750 — 11.0 pounds.
LG 1000 — 11.5 pounds.

AC to DC Single & Multiple Output Switchers

MODELS ZB ZBT ZBQ

SPECIFICATIONS

AC INPUT RANGE: 90 to 132 and 180 to 265 VRMS, 47 to 440 Hz, single phase. Dual input selectable.

EFFICIENCY: 75% typical on single output models, 65% typical on others.

LINE REGULATION: 0.12% for full input change on singles, 0.2% on multiples.

LOAD REGULATION: 0.2% for main outputs, 1% on other outputs.

RIPPLE: 50 mV typical on single output models (100 mV max) 200 mV max on other outputs.

STABILITY: Output voltages change less than ±.05% for 24 hours following an initial warmup period.

TEMPERATURE RANGE: Operating: 0°C to +85°C 100% rated power at 75°C conduction cooling. Storage: −40°C to +85°C. Units may be operated with convection cooling, operating temperature: −20°C to +85°C at extra cost. Consult factory for cooling curves.

TEMPERATURE COEFFICIENT: 0.01% per degree centigrade typical, 0.03% per degree centigrade maximum.

OUTPUT VOLTAGE ADJUSTMENT: Voltages are continuously adjustable ±5% by means of an externally accessible screwdriver adjustment potentiometer.

ISOLATION VOLTAGE: 1000 VDC input to output and input to case, 500 VDC output to case. (1750 VDC optional at additional cost).

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 VDC.

LOAD TRANSIENT RESPONSE: On regulated outputs, recovery to within 1% of nominal within 0.5 msecs for 50% load change. On semi-regulated outputs, recovery occurs within 1.5 msecs.

LOAD TRANSIENT OVERSHOOT: Maximum voltage deviation: 5% from nominal voltage set point.

HOLD-UP TIME: 20 milliseconds minimum on single output units, 16 milliseconds on multiple output units.

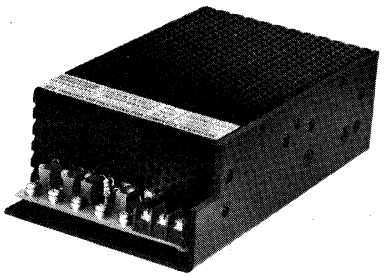
SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal when the short is removed.

OVER VOLTAGE PROTECTION: Standard. Non Crowbar OVP.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.3 volts in the load leads.

INPUT POWER PROTECTION: Internal fuse standard on single output units, external fuse recommended on multiple output units.

WEIGHT: 2 lbs., (0.9 Kgs.)



FEATURES

- High power density, up to 2 watts per cu. in.
- High reliability MTBF of 135,540 hrs. per MIL-HDBK-217 (Model Z5820).
- High efficiency. Up to 80%. 65% Minimum.
- Dual input 90 to 132 and 180 to 265 VRMS standard.
- Conduction or convection cooled.
- 100% power at 75°C with conduction cooling.
- Meets FCC 20780 Class A for EMI emissions.
- UL Recognition applied for on selected models.
- Special models can meet MIL-STD 810.
- 2-year warranty.

SINGLE OUTPUT

Model Number	*Voltage	Maximum Load	
		Current	Power
Z5B20	5	20A	100W
Z6B18	6	18A	108W
Z10B12	10	12A	120W

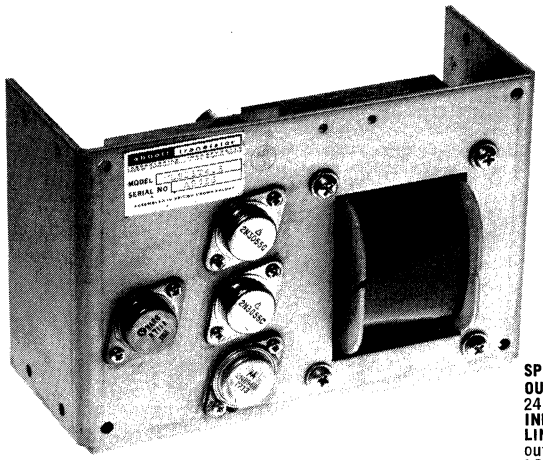
Abbott TECHNOLOGIES, INC. 60 Hz to DC Power Modules

MODELS NL, RN



MODEL NL

SINGLE, DUAL AND TRIPLE OUTPUTS 5 to 28 VDC, ±12 and ±15 VDC

- Low cost
- Non-standard voltages available
- 2-year warranty

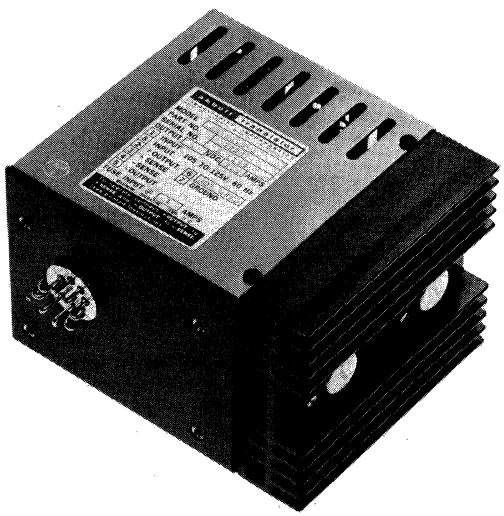
SPECIFICATIONS
OUTPUTS: Single output models: 5 through 28 VDC, 15 to 168 watts. Dual output models: ±12 and ±15, 24 to 80 watts. Triple output models 5, ±12 and 5, ±15, 22 watts to 105 watts
INPUT: 105-125, 210-250 VRMS, 47-440 Hz
LINE REGULATION: 0.02% for 10% input change single output, 0.1% for 10% input change multiple output
LOAD REGULATION: 0.1% for no load to full load change with line constant single output, 0.2% for no load to full load change with line constant multiple output
RIPPLE: 1.0 mv RMS maximum, 1.5 mv peak-to-peak typical. 5 mv peak-to-peak maximum
LOAD TRANSIENT RECOVERY TIME: 50 μSec typical after a 50% step change in load current
SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. The output voltage automatically restores to normal in approximately 5 mSec after removal of the short
REVERSE VOLTAGE PROTECTION: Provided on output and on pass element
REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra sensing leads. The resulting circuit action compensates for a DC voltage drop of up to 0.5 VDC in the load leads. Open sense lead protection is built in. Not included on units in case size "A".
STABILITY: Typically, ±0.05% for 24 hours after warm-up (single output), and ±0.3% for 24 hours after warm-up (dual and triple output).
TEMPERATURE: Operating: 0°C to +50°C, derated to 40% at +71°C. Storage: −40°C to +85°C
TEMPERATURE COEFFICIENT: ±0.04% per degree Celsius maximum, ±0.002% per degree Celsius typical
EFFICIENCY: Typically 45% to 60%
OVERVOLTAGE PROTECTION: Additional circuitry will reduce the output voltage to approximately 1 VDC within 25 μSec typ. If the output voltage rises to 10% or 2 VDC (whichever is greater) above nominal. Available as an optional feature by adding **"-1"** to the model number

For dimensions, see our catalog or call factory.

MODEL RN

HIGH QUALITY LINEAR POWER SUPPLY SINGLE OUTPUT: 5 to 30 VDC, 1.5 to 150 WATTS DUAL OUTPUT: ±12, ±15, 28 to 150 WATTS

- 5-year warranty
- Full power at 71°C operating temperature
- Extreme ruggedness and high reliability
- Non-standard voltages available



SPECIFICATIONS
OUTPUT: Single output models 5 through 30 VDC, 1.5 to 150 watts. Dual output models ±12, ±15, 28 to 150 watts
INPUT: 105-125, 210-250 VRMS 50-420 Hz
LINE REGULATION: 0.1% or 10 mv (whichever is greater) for input change of 105-125 VRMS
LOAD REGULATION: 0.1% or 10 mv (whichever is greater) for change from no load to full load
RIPPLE: 0.02% or 5 mv RMS (whichever is greater)
OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in table by means of an externally accessible screwdriver adjustment potentiometer
ADJUSTMENT RESOLUTION: 30 mv max.
ISOLATION VOLTAGE: 300 VDC between output terminals and chassis ground
INSULATION RESISTANCE: 50 megohms between output terminals and chassis ground when measured at 50 VDC
POLARITY: Inputs and outputs are isolated; either positive or negative side may be grounded
TEMPERATURE: Operating: −4°F (−20°C) to +160°F (+71°C) without derating, forced air, or heat-sinking. Storage: −40°F (−40°C) to +185°F (+85°C)
TEMPERATURE COEFFICIENT: 0.03% per degree Celsius
ALTITUDE: 10,000 feet above sea level
LOAD TRANSIENT RECOVERY TIME: Output voltage typically returns to regulation limits within 75 microseconds after a 50% step change in load current
REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The resulting circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads
TURN ON/TURN OFF OVERSHOOT: The output voltage overshoot during "turn on" or "turn off" typically will not exceed 0.1% of the output voltage, or 20 mv, (whichever is greater)
MOUNTING: Threaded inserts are provided for mounting of cases

For dimensions, see our catalog or call factory.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

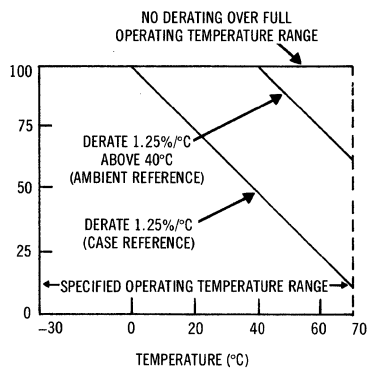

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

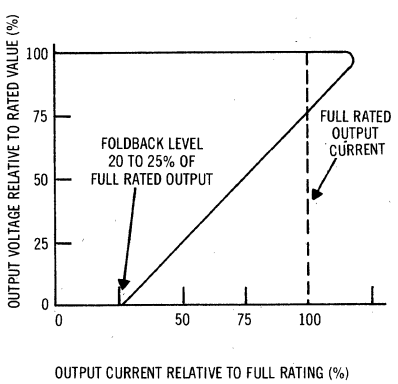

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

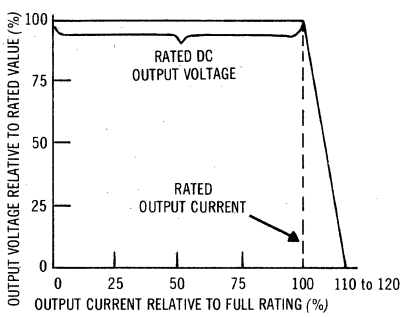

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

WHEN RELIABILITY IS IMPERATIVE.®

For MIL SPEC and critical industrial applications where reliability is the prime consideration, Abbot Power Supplies have been the predominant choice for the past 30 years. This enduring acceptance has been earned through sound design, dependable components, meticulous workmanship, exhaustive quality control and proven performance in the field under severe operating conditions. Whatever your demanding requirements, you will find the correct Abbott Power Supply module in the next 19 pages.

A member of the ADWEST Group.

Military Power Supplies

FUNCTION	DESCRIPTION	MODEL	PAGE

MILITARY POWER SUPPLIES

New MIL/PAC Series 20/35/50 Watt DC-DC Converters

MODEL AB 20/35/50

SPECIFICATIONS & FEATURES

Input: 14-32 Vdc.

Input Transient Protection: Unit will withstand 50 Vdc for 0.1 second in accordance with MIL-STD-704D.

Efficiency: Typically (nominal input, full load, room ambient) 71-80%.

Line Regulation: Input change of 14 to 32 Vdc with constant load. 0.1% or 10mV, whichever is greater.

Load Regulation: No load to full load with constant line: 10mV or 0.1%, whichever is greater.

Load Transient Recovery: Output voltage returns to regulation limits within 0.5 milliseconds after a 50% change in load current.

Load Transient Overshoot: 0.5V from nominal voltage set point.

Pard (Noise and Ripple): 25mV rms, 100mV P-P at 25 MHz bandwidth, measured at room ambient.

Temperature Range: Operating: −55° C to 100° C maximum, at center of baseplate. Storage, −65° C to 125° C, ambient.

Temperature Coefficient: 0.01%° C maximum over entire temperature range.

Isolation Voltage: 500 Vdc, input to output; 400 Vdc, input to case; 100 Vdc, output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case, when measured at 50 Vdc.

Remote Sensing: Compensates for up to 0.5 volt drop in leads.

Short Circuit Protection: Competely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

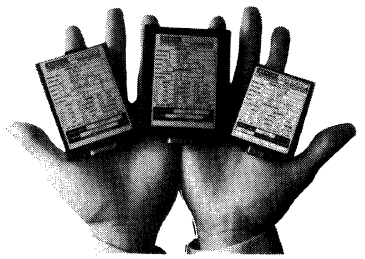
EMI: Meets MIL-STD-461C (Test report available upon request.)

Reliability: All MTBF's per MIL-HDBK-217E, 50° C baseplate, high line and full load.

Environment: Units meet MIL-STD-810C, altitude, shock, acceleration, vibration and MIL-S-901C, high-impact shock conformance. Hermetically sealed units available. Please consult factory.

Hook Up: Via D-Subminiature connectors.

Remote Inhibit: Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the output.



- All New Wireless Submodular Construction
- Extra Wide Input Range
- Current Mode Control
- MIL-STD-2000 Version Available
- Standard Current Limiting
- Inherent Over Voltage Control
- Qualified by rigorous Environmental Stress Screening

RELIABILITY DATA — MTBF (Hours)

	Product	Ground Benign	Naval Sheltered	Cargo Air Inhabited	Ground Mobile
MIL/PAC STD	AB20S	428,000	80,000	118,000	45,000
	AB35S	353,000	67,000	96,000	37,000

MILITARY POWER SUPPLIES

New MIL/PAC Series DC/AC to DC Converters

MODEL AM

SPECIFICATIONS

Input: 90 to 130 V ac, 47 to 440 Hz, 1 phase, 3 phase (Delta, Wye); 180 to 260 V ac, 47 to 440 Hz, 1 phase, 3 phase (Delta); 100 to 300 V dc.

Efficiency: 65% minimum.

Line Regulation: 90 to 130 V ac, 180 to 260 V ac and 100 V dc to 300 V dc. Single and Main: .1% or 10 mV, whichever is greater. Triple ±15 V: 100 mV or .5% maximum; 12 V: 60 mV or .5% maximum.

Load Regulation: Single and Triple: 10 mV or 0.1%, whichever is greater. Auxiliary Outputs: 150 mV over the temperature range.

Pard (Noise and Ripple): 25 mV rms, 100 mV P-P at 25 MHz bandwidth for 5 V outputs and 200 mV for other voltages; measured over temperature range.

Isolation Voltage: 1000 V dc, input to output; 1000 V dc, input to case; 200 V dc, output to case.

Insulation Resistance: 50 megohms minimum between input and outputs, input and case, outputs and case, when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum, at center of the baseplate. Storage: −55°C to +125°C, ambient.

Temperature Coefficient: 0.01% °C maximum over entire temperature range.

Input Transient Protection: Unit will not be damaged or exhibit degradation of performance when subjected to input transients in accordance with MIL-STD-704A, MIL-STD-704D and MIL-STD-1399, as applicable to corresponding input configurations. Consult your nearest sales office if further details are needed.

Load Transient Recovery: Main output voltage returns to regulation limits within 0.5 milleseconds after 50% change in load current.

Load Transient Overshoot: 0.5 V from nominal voltage set point, single and triple outputs.

Short Circuit Protection: All outputs are completely protected against a short circuit of any duration. Outputs automatically restore to normal when overload is removed.

Remote Sensing: Compensates for up to 0.5 volt drop in output leads. (Single and main output only.)

Remote Inhibit: Provides for remote turn on/off with TTL logic signal. Application of TTL Signal (logic 1) will inhibit the outputs.

Electromagnetic Interference: Units, when tested in accordance with MIL-STD-462, meet the majority of the requirements of MIL-STD-461C for conducted and rediated, emission and susceptibility, for Part 2, Class A1B equipment, for input power leads. For further details regarding levels and extent of compliance in each class, input configuration, or requirement, consult your nearest sales office.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HBDK-217E calculated for standard model AM50S under operating conditions of 50°C baseplate, maximum operating input voltage and maximum rated output power, is 160,300 hours for a ground benign environment and 20,200 hours for a naval sheltered environment. With "-ER" option MTBF was calculated to be 240,000 hours for a ground benign environment and 25,000 for naval sheltered environment. Please consult factory for additional environments and models.

Environment: Units meet MIL-STD-810D, altitude, shock, acceleration, vibration and MIL-S-901C, high-impact shock conformance. Hermetically sealed units available. Please consult factory.

Hook Up: Via D—Subminiature Connectors.

- Customer Selectable, Multi-inputs.
- Wireless Submodular Construction for High Reliability
- Current Mode Control
- Standard Current Limiting

PRODUCT SELECTION GUIDE

Single Output Standard Models

Nominal Output Voltage	Output Current (Amps)	Weight[1] (Oz.)	Weight[1] (Grams)	Model Number
5.0	10.0	12	340	AM50S/5-A
12.0	4.2	12	340	AM50S/12-A
15.0	3.34	12	340	AM50S/15-A
24.0	2.1	12	340	AM50S/24-A
28.0	1.8	12	340	AM50S/28-A

1. Maximum weight, not including options.

Triple Output Standard Models

Output Voltage (Main)	Output Current Main	Output Voltage (Aux)	Output Current (Aux)	Weight[1] (Oz.)	Weight[1] (Grams)	Model Number
5	7.0	±12	0.64	14.5	410	AM50T/5/12-A
	7.0	±15	0.5	14.5	410	AM50T/5/15-A

1. Maximum weight, not including options.

HOW TO ORDER

AM 50 T/5/12-A-ER

- AM — Model Series
- 50 — Total Output Power
- T — Number of Outputs
- 5 — Main Output Voltage
- 12 — Auxiliary Output Voltage
- A — Header Type
- ER — Options

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL **MH**

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 440 Hz, single phase. For 207 to 253 V rms input, add "(230)" to model number, i.e., MH500S/15-DE(230). Other inputs available (Option H and Option -3).

Efficiency: 65% minimum.

Line Regulation: Within 0.2% or 25 mV (whichever is greater) for input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: Within 0.2% or 25 mV (whichever is greater) for change from no load to full load with line constant.

Pard (Noise and Ripple): 50 mV rms, 100 mV peak-to-peak maximum at 25 MHz bandwidth.

Isolation Voltage: 500 V dc input to output and input to case, 100 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Polarity: Inputs and outputs are isolated. Either positive or negative side of output may be grounded.

Temperature Range: Operating: 0°C to +71°C maximum at center of mounting base. Storage: −55°C to +85°C.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Input Transient Protection: Unit will withstand 180 V ac for 0.1 second in accordance with MIL-STD-704.

Load Transient Recovery Time: Output voltage returns to regulation limits within 300 microseconds after a 50% change in load current.

Holdup Time: 20 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against an overload or short circuit of any duration. Output automatically restores to normal when the overload is removed. (Foldback to 60%.)

Output Overvoltage Protection: A non-crowbar type OVP. Input must be recycled to restore output.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.3 volt in the load leads.

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 54,530 hrs. for a ground benign environment.

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C, MIL-S-901C and MIL-E-5400P, Class 2, including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Maintainability: Units are repairable at depot level.

Connectors: Standard unit is provided with an input solder pin header and an output "hermetic seal" stud-type connector.

FEATURES

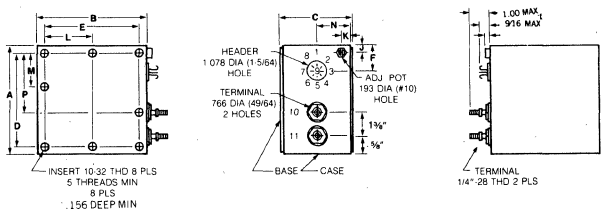
- 500-Watt Switching 100 kHz Power Supply
- High Efficiency, 65% Minimum
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C
- Standard Soft-start and Short Circuit Protection

Output Voltage Range[1]	Output Current (amps)	Weight[2] (Lbs.)	Model Number
4.75—5.25	100	15	MH500S/5-DE
11.40—12.60	41.67*	15	MH500S/12-DE
14.25—15.75	33.33*	15	MH500S/15-DE
22.80—25.20	20.83*	15	MH500S/24-DE
26.60—29.40	17.86*	15	MH500S/28-DE

* Rounded figures. Total watts equal 500.

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 50 mV for nominal output voltages 5 to 15 V dc and 60 mV for outputs 24 to 28 V dc.
2. Weights are ±5%.

MECHANICAL DIMENSIONS



A	B	C	D	E	F	J	K	L	M	N	P
7	10	3½	6.46	9.45	2 3/32	¼	⅜	4.73	2.14	1 11/16	4.32

Tolerances: If a fraction, ±1/32 in, a decimal, ±.015 in.

Material: Base—Aluminum 6061-T6, Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard input header. (To order, replace the "D" in the model number with "A", i.e., MH500S/5-AE.)

Wide Input Voltage: With **Option H,** the units operate either from 115 V ac ±15% or 230 V ac ±15%. (To order, add an "H" after the "E" in the model number, i.e., MH500S/5-DEH or MH500S/5-DEH (230).)

Remote Turn On/Off: Option L provides isolated terminals to turn output(s) on/off with TTL logic signal. (To order, add "L" after "E" in model number, i.e., MH500S/5-DEL.)

Remote Output Adjustment: With **Option R,** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "E" in model number, i.e., MH500S/5-DER.)

Wider Operating Temperature: −20°C to +71°C is available with **Option T.** (To order, add "T" after "E" in model number, i.e., MH500S/5-DET.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e., MH500S/5-DE-ER.)

WYE Input: Option -3 changes input to 3-phase, 4-wire "WYE". (To order, add "-3" to the end of the model number, i.e., MH500S/5-DE-3.)

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL **M300**

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 440 Hz, single phase. Other inputs available (Options H and -3).

Efficiency: 60% minimum at full load.

Line Regulation: Within 0.2% or 25 mV (whichever is greater) for change from low line to high line with load constant.

Load Regulation: Within 0.2% or 25 mV (whichever is greater) for change from no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 200 mV for all rated conditions. (M300T).

Pard (Noise and Ripple) for Main and Auxiliary Outputs: 30 mV rms, 100 mV peak to peak (maximum) at 25 MHz bandwidth, over the entire temperature range.

Isolation Voltage: 500 V dc input to output. 500 V dc input to case. 100 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: 0°C to +71°C maximum at center of baseplate. Storage: −55°C to +85°C ambient.

Temperature Coefficient: 0.1%/°C maximum for main and auxiliary outputs over the entire temperature range.

Input Transient Protection: Unit will withstand 143.8 V ac to 0.3 second in accordance with MIL-STD-1399.

Load Transient Recovery Time: Output voltage returns to regulation limits within 1.5 millisecond for main and 100 microseconds for auxiliary outputs after a 50% change in load current.

Holdup Time: 10 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. All outputs will foldback for overload.

Current Limiting: Output current is limited to 120% on main and auxiliary outputs (±10%) under overload conditions.

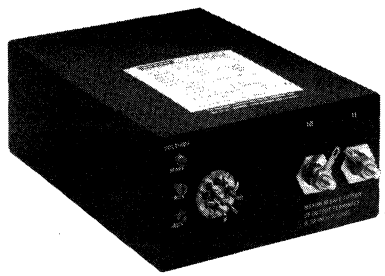
Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads.

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to conducted interference (meets CE03, CS01, CS02 and CS06).

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 77,455 hours for a ground benign environment and 11,642 hours for a naval sheltered environment. With Enhanced Reliability Option -ER ground benign is 119,771 hours; naval sheltered is 16,233 hours. (M300T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901 including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-pin input header and a hermetic seal, stud-type, output connector.



FEATURES

- 300-Watt Single and Triple Output, Switching Power Supply
- High Efficiency, 60% Minimum
- Short Circuit Protection Standard
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C

Output Voltage Range[1] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Main)	Output Current[2] (Aux)	Wt.[3] (Lbs.)	Model Number

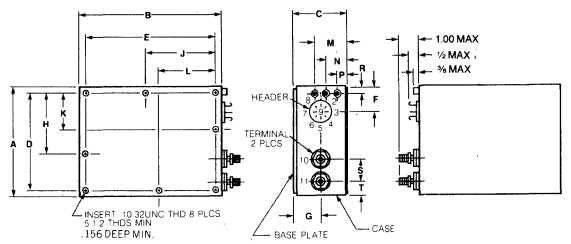
4.8 - 5.3	±14.3-±15.8	48	2.0	8.2	M300T/5/15-D

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 300 Watts.
3. Weights are ±5%.

MECHANICAL DIMENSIONS (M300T)



A	B	C	D	E	F	G	H	J
6	8	3	5.50	7.50	1 13/32	1½	3.411	4.113

K	L	M	N	P	R	S	T
2.089	3.387	1 11/16	1 3/32	½	⅜	1¼	¾

Tolerances: If a fraction, ±1/32 inch, a decimal, ±.015 inch.

Material: Base—Aluminum 6061-T6, Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A," i.e., M300T/5/15-A or M300S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E,** enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., M300T/5/15-DE or M300S/5-DE.)

Wide Input Voltage: With **Option H** the units will operate from 90 to 126.5 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., M300T/5/15-DH or M300S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., M300T/5/15-DL or M300S/5-DL.)

Remote Output Adjustment: With **Option R** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., M300T/5/15-DR or M300S/5-DR.)

Wider Operating Temperature: −20°C to +71°C is available with **Option T. Pard** (noise and ripple) specification increases to 200 mV peak-to-peak. (To order, add a "T" after "D" in model number, i.e., M300T/5/15-DT or M300S/5-DT.)

WYE Input: Option -3 changes input to 3-phase, 4 wire "WYE". (To order, add **"-3"** to the end of the model number, i.e., M300T/5/15-3 or M300S/5-D-3).

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military grade components. (To order, add "-ER" after model number, i.e., M300T/5/15-ER or M300S/5-ER.)

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL
MB100

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 47 to 65 Hz, single phase. Other inputs available (Option H).

Efficiency: 65% minimum at full load.

Line Regulation: 10 mV input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: 10 mV for main output, 0.5% for auxiliary outputs for change from no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions.

Pard (Noise and Ripple) for Triple Output: 100 mV p-p (Max.); Single Output 5 V: 100 mV p-p; 28 V: 200 mV p-p (Max.).

Isolation Voltage: 700 V dc input to output. 500 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −20°C to +71°C maximum at center of baseplate. Storage: −55°C to +85°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over the entire temperature range.

Input Transient Protection: Unit will withstand 143.8 V ac for 0.3 second in accordance with MIL-STD-1399, Sec. 103.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% change in load current.

Load Transient Over/Undershoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (±10%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 97,930 hours for a ground benign environment and 17,632 hours for naval sheltered (MB100T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901 including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-type, single-pin input terminals and a solder-type, multiple-pin output header.

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A," i.e., MB100T/5-12-A or MB100S/5-A.)

Severe Shock, Acceleation and Vibration: Special encapsulation, **Option E,** enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., MB100T/5/12-DE or MB100S/5-DE.)

Wide Input Voltage: With **Option H,** the units will operate from 90 to 130 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., MB100T/5/12-DH or MB100S/5-DH.)

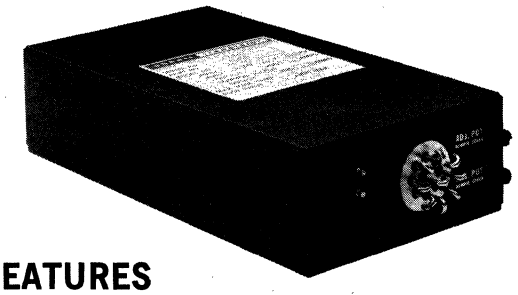
Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., MB-100T/5/12-DL or MB100S/5-DL.)

Remote Output Adjustment: With **Option R,** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., MB100T/5/12-DR or MB100S/5-DR.)

Internal Overvoltage Protection: Option -1 provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" afer "D" in model number, i.e., MB100T/5/12-D-1 or MB100S/5-D-1.)

50/50 Distributed Power: Option -7 distributes 50 watts to the main and 50 watts to the auxiliaries. (To order, add "-7" to the end of the model number, i.e., MB100T/5/12-D-7.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e., MB100T/5/12-D-ER or MB100S/5-D-ER.)



FEATURES

- 100-Watt Single and Triple Output, 200 kHz Switching Power Supply
- High Efficiency, 65% Minimum
- −20°C to +71°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901C
- Low Profile

Output Voltage Range[1] (Main)	Output Current[2] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Aux)	Wgt.[3] (Lbs.)	Wgt.[3] (Kgs.)	Model Number
4.75- 5.25	20.0			3.0	1.5	MB100S/ 5-D

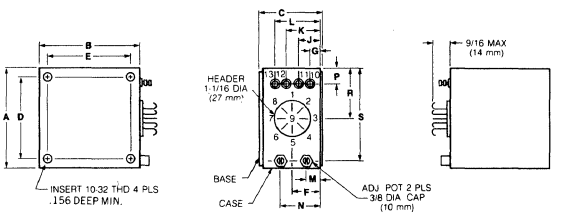
22.80-25.20	4.2			3.0	1.5	MB100S/24-D
26.60-29.40	3.6			3.0	1.5	MB100S/28-D
4.8 - 5.8	15	±14.5-±15.5	0.8	3.5	1.6	MB100T/5/15-D
4.8 - 5.8	15	±11.5-±12.5	1	3.5	1.6	MB100T/5/12-D

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 100 Watts.
3. Weights are ±5%.

MECHANICAL DIMENSIONS (MB100T)



A	B	C	D	E	F	G	J

MILITARY POWER SUPPLIES

60 Hz/400 Hz to DC

MODEL MB60 WM60

SPECIFICATIONS:

Input: 103.5 to 126.5 V rms standard, MB: 47-440 Hz, single phase; WM: 320 to 480 Hz, single phase.

Input Transient Protection: Unit will withstand 180 Vac for 0.1 second in accordance with MIL-STD-704A, Category B.

Efficiency: Minimum at full load: 65%.

Line Regulation: Input change of 103.5 to 126.5 V rms, with load held constant.
Single: 0.1% or 10mV, whichever is greater.
Triple: 0.1%, all outputs.

Load Regulation: No load to full load, with line held constant.
Single: 10 mV or 0.1%, whichever is greater.
Triple: Main output, 0.2%; Auxiliaries, 0.5%.

Load Transient Recovery: Output voltage returns to regulation limits within 0.5 mS after a 50% change in load current.

Load Transient Overshoot: 0.8V or 3% (whichever is greater) from nominal voltage set point.

Pard (Noise and Ripple): Measured at 25 MHz bandwidth. Single Output Unit: 30mV rms; P-P: 5V – 2.0%, 12 or 15V – 1.0%, 24 or 28V – 0.7%. Triple Output Unit: 30mV rms; 100mV P-P for main and auxiliary outputs. Note: Turn on at low temperature extreme can result in increased PARD measurements prior to unit warm up (1-3) minutes. Consult nearest sales office for applications details.

Temperature Range: MB (single and triple): Operating, –20°C to +85°C maximum, at center of baseplate. Storage, –55°C to +105°C ambient.
WM (single and triple): Operating, –55°C to –100°C maximum, at center of baseplate. Storage, –65°C to +125°C ambient.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Auxiliary Output Tracking: Negative output tracks positive within 100 mV for all rated conditions of line and load at ambient conditions, with positive set at nominal, ±50 mV (250 mV for all rated conditions of line, load, temperature or set point).

Isolation Voltage: 700 VDC, input to output; 500 VDC, input to case; 200 VDC, output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case, when measured at 50 VDC.

Overvoltage Protection: Electronic overvoltage protection standard for singles and main output of triples.

Short Circuit Protection: Completely protected against a short circuit of any duration. Output automatically restores to normal when overload is removed.

Current Limiting: Foldback current limiting standard for all outputs, 120%, ±10% limit for singles and main, 160% for auxiliary outputs, ±30% under overload conditions.

Remote Sensing: On single output units, main output on triple. Compensates for up to 0.5 V drop in load leads.

EMI: Units meet MIL-STD-461C for select curves, please consult factory for detailed information.

Environment: Encapsulated and hermetically sealed units meet MIL-STD-810C altitude, shock and acceleration.

Hook Up: Standard unit is provided with a solder-type multiple-pin output header, and solder turrets.

OPTIONS

"A" – Hermetic Connectors: Replaces solder header/turret with military connectors:
Input: MS3113H10-6P
Output: MS3113H14-12P
Other hermetic, MIL connectors available on special order.

"E" – Severe Shock, Vibration, Acceleration: Extra encapsulent to meet 60g shock, 30g vibration, 50g acceleration and MIL-S-901C, High Impact Shock.

"L" – Remote Enable/Inhibit: Provides for remote turn on/off with TTL logic signal. (Logic 1 will enable).

"ER" – Enhanced Reliability: Provides increased reliability via higher level MIL grade components.

PRODUCT SELECTION GUIDE

Model MB	Main Output/ Current[1]	Output #2[1]	Output #3[1]	Weight[2] (lbs) (kgs)	Model WM
MB60S/5-D	5V@12A			2.10 0.95	WM60S/5-D
MB60S/12-D	12V@5A			2.10 0.95	WM60S/12-D
MB60S/15-D	15V@4A			2.10 0.95	WM60S15-D
MB60S/24-D	24V@2.5A			2.10 0.95	WM60S/24-D
MB60S/28-D	28V@2.14A			2.10 0.95	WM60S/28-D
MB60T/5/12-D	5V@6A	+12V@1.25A	–12V@1.25A	2.16 0.98	WM60T/5/12-D
MB60T/5/15-D	5V@6A	+15V@1A	–15V@1A	2.16 0.98	WM60T/5/15-D

1. Single/Main Output adjust range ±5%, 35 mV resolution. Auxiliary Output adjust ±0.5V.
2. Typical, not including options, weight ±5%.

FEATURES

- Sub-modular internal construction, wireless board to board connections.
- Field proven, 200 kHz, MOS-FET, forward converter topology.
- Input transient protection per MIL-STD-704A, Category B.
- Short circuit protection, foldback current limiting and OVP.
- Meets comprehensive MIL-STD-810C environmental conditions.
- Built in EMI filter to MIL-STD-461C.

RELIABILITY DATA – MTBF

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL **M** 50 & 100

SPECIFICATIONS

INPUT VOLTAGE: 103.5 to 126.5 Vac, (Vrms) single phase, 47 to 440 Hz. Wide input option is available.
INPUT TRANSIENT PROTECTION: Unit will withstand 143.8 Vac for 0.3 seconds in accordance with MIL-STD-1399. Sec. 103.

INRUSH CURRENT:

MAXIMUM:
(M-50) 16 times the peak input current at low line, full load output, and nominal output voltage, with source impedance of no less than 0.25 ohm.
(M-100) 8 times the peak input current at low line, full load output, and nominal output voltage, with source impedance of no less than 0.25 ohm.

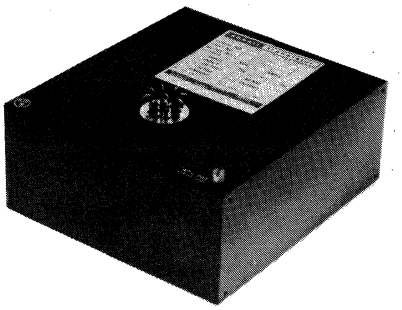
TYPICAL:
(M-50) 8 times the peak input current under the same conditions.
(M-100) 4 times the peak input current under the same conditions.

EFFICIENCY: Minimum 65% @ FL, 25°C baseplate temperature and nominal output. Typical efficiency is 75-81% under same conditions.
LINE REGULATION: Within 0.2% or 25mV, whichever is greater for input change of 103.5 to 126.5 Vac, (Vrms) with load constant.
LOAD REGULATION: Within 0.2% or 25mV, whichever is greater for load change of NL to FL with line constant.
RIPPLE & NOISE: 30mVrms, 100mV, whichever is greater for load change of NL to FL with line constant.
LOAD TRANSIENT RECOVERY TIME: Output Voltage returns to regulation limits within 3 msec after a 50% change in load current. Maximum over/under shoot is less than 0.4 Vdc or 3% of the output voltage, whichever is greater.
BROWNOUT HOLDUP-TIME: 15 msec. minimum at low line and maximum output current, 30 msec. typical at nominal line and maximum output current.
OPERATING TEMPERATURE RANGE: 0°C to 71°C. Wider temperature range is available.

STORAGE TEMPERATURE: −55°C to +85°C.
TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum.
ISOLATION: 500 Vdc input to output and input to case. 100 Vdc output to case.
INSULATION RESISTANCE: 50 megohms minimum between input and output, input to case, and output to case when measured at 50 Vdc (Input pins tied together, Output pins tied together).
POLARITY: Input and outputs are isolated, either positive or negative side may be grounded.
OUTPUT VOLTAGE ADJUSTMENT: Output continuously adjustable between the limits shown by means of an externally accessible adjustment potentiometer.

ADJUSTMENT RESOLUTION:	NOMINAL OUTPUT VOLTAGE	RESOLUTION
	5, 12, 15 Vdc units	35 millivolts
	24, 24 Vdc units	60 millivolts

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "Sensing" leads. The resulting circuit action compensates for a dc voltage drop up to 0.3 volts in the load leads.
OUTPUT IMPEDANCE: dc to 1 KHz; .03 R_L* or 0.5 ohm, whichever is greater. 1 KHz to 10 KHz; 0.5 R_L or 0.1 ohm, whichever is greater. 10 KHz to .100 KHz: 0.7 R_L to 0.3 ohm, whichever is greater. * Rate loaded.
SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. Unit automatically recovers to normal when short circuit is removed.
ENVIRONMENT: Unit is hermetically sealed to meet MIL-STD-810C. Unit meets MIL-S-901 (5 foot hammer drop). Certified test reports are available.
EMI: Units meet MIL-STD-461A, CE01, CE03 with optional filter.
JUNCTION TEMPERATURE: Maximum Junction Temperature of the power transistors is 85°C. Complies with NAVMAT NOTE 3080.



103.5-126.5 VAC to 4.7-29.7 VDC 47 to 440 Hz. 1 ∅

- Tight line and load regulation.
- Wide temperature range.
- High reliability.
- Encapsulated and hermetically sealed Meets MIL-STD-810C and MIL-S-901C.
- Low EMI. Meets MIL-STD-461A, (Radiated C.E. and C.S. specs) with F option.
- High efficiency. 75% to 81% typical.
- Internal OVP available.
- Remote programming optional.
- TTL compatibility available.

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn on and turn off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "I", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number. EXAMPLE: M100DL-5A, M50DL-5A
OVER-VOLTAGE PROTECTION: (-1 Option) An internal non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set point. Unit input power must be recycled to restore output. To specify this feature, please add a "-1" after the "A" in the model number, EXAMPLE: M100DT-5A-1, M50D-5A-1
WIDER OPERATING TEMPERATURE RANGE: (T Option) −20°C to +71°C peak to peak output ripple spec increases to 200mV. To specify this option, please add a "T" to the character preceding the dash of the model number. EXAMPLE: M100DT-5A, M50DT-5A
SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the M Series. Please consult your nearest Abbott Sales Office for details.
WIDER INPUT VOLTAGE RANGE: (H Option) The standard input voltage range of the "M" line is 103.5 to 126.5 Vac. For the wider input voltage range of 90-126.5 Vac; output current is derated by 20%. To specify this feature, please add an "H" to the character preceding the first dash in the model number. EXAMPLE: M100DH-5A, M50DH-5A
REMOTE PROGRAM OPTION: (R Option) Units can be modified so that their output voltage can be adjusted from a remote location. This is accomplished by adding an additional pin to the header on the unit. To specify this option, please add an "R" after the character preceding the first dash of the model number. EXAMPLE: M100DR-5A, M50DR-5A
EMI FILTER: (F option) An internal EMI filter is available to reduce conducted interference on the input leads. With these filters the model M's will comply with MIL-STD-461A notice 3, CE01 an CE03 on the input leads. The addition of this filter alters the isolation of the input to case to 200 Vdc. To specify this feature, please add an "F" after the "D" in the model number. EXAMPLE: M100DF-5A, M50DF-5A

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using higher levels of Mil. grade components. This feature allows the power supply to meet customer specific requirements as to "Hi Rel" components, environmental testing and extended Thermal Cycling. Please consult your nearest Abbott Sales Office for details.
SPECIAL ENCAPSULATION: (E Option) All of our hermetically sealed power modules are encapsulated to meet or exceed the shock, acceleration, and vibration requirements of MIL-STD-810C. Special encapsulation to enable these modules to withstand higher shock levels of 60g's, acceleration levels of 50g's, and vibration levels of 30g's, is available. To specify this feature, please add an "E" after the character preceding the first dash in the model number. EXAMPLE: M100DE-5A, M50DE-5A

MECHANICAL DIMENSIONS

RELIABILITY

RELIABILITY: MTBF for the Standard version calculated per MIL-HDBK-217D (50°C baseplate temperature, maximum operating input voltage, and maximum rated output power) is shown below.

Model Number	Baseline Temp.	Environment	MTBF
M50D-5A-1(STD)	50°C	Ground Benign	100,659 hrs.
M50D-5A-1(STD)	50°C	Naval Sheltered	16,819 hrs.
M100D-5A-1(STD)	50°C	Ground Benign	71,126 hrs.
M100D-5A-1(STD)	50°C	Naval Sheltered	11,214 hrs.

ENHANCED RELIABILITY: Abbott offers a higher MTBF unit, as shown below. (see optional features)

Model Number	Baseplate Temp.	Environment	MTBF
M50D-5A-1(ER)	50°C	Ground Benign	187,251 hrs.
M50D-5A-1(ER)	50°C	Naval Sheltered	29,261 hrs.
M100D-5A-1(ER)	50°C	Ground Benign	119,095 hrs.
M100D-5A-1(ER)	50°C	Naval Sheltered	18,350 hrs.

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL **M25**

SPECIFICATIONS

Input: 103.5 to 126.5 V rms, 47 to 440 Hz, single phase. Other inputs available.

Efficiency: 75 to 81% typical. 70% minimum.

Line Regulation: 10 mV for input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: Within 0.2% or 25 mV (whichever is greater) for change of no load to full load with line constant.

Pard (Noise and Ripple): 20 mV rms, 100 mV peak-to-peak measured with scope at 25 MHz bandwidth.

Isolation Voltage: 500 V dc input to output and input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input to case, and output to case when measured at 50 V dc.

Polarity: Inputs and outputs are isolated. Either positive or negative side of output may be grounded.

Temperature Range: Operating: −20°C to +71°C baseplate temperature; storage temperature −55°C to +85°C.

Temperature Coefficient: 0.01%/°C maximum over entire temperature range.

Input Transient Protection: In accordance with MIL-STD 1399. Section 103 (143.8 V ac for 0.3 second.)

Load Transient Response: Output voltage returns to regulation limits within 3 ms after a 50% step change in load current.

Load Transient Overshoot: ±3% or 0.4 V, whichever is greater, maximum from nominal voltage set point.

Holdup Time: 16 ms after nominal input voltage is lost at full load.

Short Circuit Protection: Completely protected against a short circuit of any duration. Output automatically restores to normal after removal of fault (constant current).

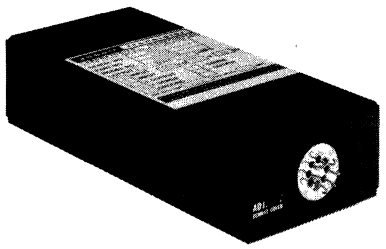
Overvoltage Protection: See Option-1.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.3 volt in the load leads.

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The MTBF per MIL-HDBK-217D for Model M25D-5A, under operating conditions of 50°C baseplate temperature, maximum operating input voltage and full rated output power is 176,236 hours for ground benign and 32,699 hours for naval sheltered environments. With Enhanced Reliability (Option -ER) ground benign is 758,754 hours, naval sheltered is 124,505 hours for M25D-5A-1-(ER).

Environment: Units are encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD 810C. Units meet MIL-S-901C (5 foot hammer drop).



FEATURES

- High Efficiency, 70% minimum
- 100 kHz Switching Power Supply
- 25 Watt, Single Output
- Low profile
- Meets MIL-STD-461B, MIL-STD-810C and MIL-S-901
- Short Circuit Protection Standard

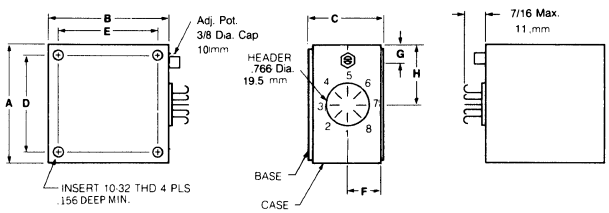
5 STANDARD MODELS

Output Voltage Range[1]	Output Current (Amps)	Weight[2] (Lbs.)	Model Number
4.75-5.3	5	1.8	M25D-5A
11.25-12.75	2.1	1.8	M25D-12A
14.1-15.9	1.7	1.8	M25D-15A
22.5-25.5	1.1	1.8	M25D 24A
26.3-29.7	0.9	1.8	M25D-28A

1 Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 millivolts for nominal output voltages of 5 to 15 V dc and 60 millivolts for nominal outputs of 24 to 28 V dc.

2 Weights are 5%.

MECHANICAL DIMENSIONS



Model M25

A	B	C	D	E	F	G	H
2¾	6¼	1½	2.25	5.75	11/16	½	1⅜

Tolerances: If English unit is a fraction, ±1/32 inch, (0.8 mm); if English unit is a decimal, ±.015 inch, (0.4 mm).

Material: Base — Aluminum 6061-T6. Case — Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 3/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

OPTIONAL FEATURES

The following standard options are available on the M25 Series power supplies.

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace "D" in model number with "A," i.e., M25A-5A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E,** enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., M25DE-5A.)

Wide Input Voltage: Option H input range is 90 to 126.5 V rms. Output current is derated by 20%. (To order, add "H" after "D" in model number, i.e., M25DH-5A.)

Remote Output Adjustment: With **Option R** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., M25DR-5A.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" to character preceding first dash in model number, i.e., M25DL-5A.)

Internal Overvoltage Protection: Option -1 provides non-crowbar electronic internal OVP. Input must be recycled to restore output. (To order, add "-1" after "A" in model number, i.e., M25D-5A-1.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after "A" in model number, i.e., M25D-5A-ER.)

MILITARY POWER SUPPLIES

60 Hz to DC

MODEL LV

SPECIFICATIONS

INPUT: 105 to 125 VRMS, 55 to 65 Hz or 380 to 420 Hz single phase. May be operated down to 47 Hz with 20% derating.

EFFICIENCY: 35% typical for 5V; 65% for 28V.

LINE REGULATION: 0.05% (±1 VC for LLV model).

LOAD REGULATION: 0.10%.

PARD (NOISE & RIPPLE): 1 mVRMS or 5 mV p-p.

OUTPUT ADJUSTMENT RANGE: ±5% of nominal at output terminals.

ISOLATION VOLTAGE: 500 VDC input to output, input to case and output to case.

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative output may be grounded.

TEMPERATURE RANGE: Operating −20°C to +71°C baseplate temperature; −40°C to +85°C (Option T); storage: −55°C to +85°C.

TEMPERATURE EFFECT COEFFICIENT: 0.015% per degree Celsius maximum.

ENVIRONMENT: Hermetically sealed to meet envimental requirements of MIL-STD-810C. Meet MIL-S-901C 5-ft. hammer drop.

ADJUSTMENT RANGE: Equipped with internal potentiometer. External adjustment potentiometer available.

SHORT CIRCUIT PROTECTION: Completely protected against short circuit of any duration. Output automatically restores to normal after removal of short.

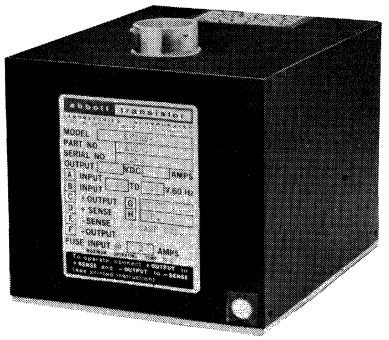
INPUT TRANSIENT PROTECTION: 143.8 VRMS, for 0.3 seconds.

REMOTE ERROR SENSING: (LV series only). Regulator monitors output voltage directly at the load using extra "sensing" leads and compensates for dc voltage drop up to 0.4 volt in load leads.

LOAD TRANSIENT: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current.

ELECTROMAGNETIC INTERFERENCE: Meets MIL-STD-461A, methods CE01 and CE03 for conducted emissions.

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of +50°C baseplate temperature, maximum rated output power for LV5DE20-1 was calculated to be 68,987 hrs. for ground benign environment and 10,384 hrs. for naval sheltered environment. MTBF for LLV12-DE0.5-1 was calculated to be 186,947 hrs. for a ground benign environment and 30,081 for naval sheltered environment. With Enhanced Reliability Option (ER) MTBF for LV5DE20-1 (ER) was calculated to be 236,033 hrs. for ground benign environment and 35,585 hrs. for naval sheltered environment. For LLV12DE0.5-1 (ER) MTBF was calculated to be 330,349 hrs. for ground benign environment and 50,682 hrs. for a naval sheltered environment.



FEATURES

- Up to 65% efficiency
- Low Output Ripple, 5 mV peak-to-peak
- 0.1% Regulation
- Single and Dual Outputs

SINGLE OUTPUT: LV SERIES				
Output Voltage Range (VDC)	**Output Current (Amps)**	**Size (see Dwg.)**	**Weight (Lbs.)**	**Model Number**

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character after the character "E" in the model number. (EXAMPLE: LV5DE6 to LV5DEL5)

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the LV series (as shown in picture). Please consult your nearest Abbott Sales Office for details.

WIDER OPERATING TEMPERATURE RANGE: (T Option) −40°C to +85°C operating temperature range available. Please consult your nearest Abbott Sales Office for details.

OVER TEMPERATURE PROTECTION: (OT Option) Removes input power when conduction surfaces exceed safe limits. Please consult your nearest Abbott Sales Office for details.

OVERVOLTAGE PROTECTION: (-1 Option) An internal crowbar type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point. Unit input power must be recycled to restore unit. To specify this feature, please add a "-1" after the last number in the model number. (EXAMPLE: LV5DE6 to LV5DE6-1)

WIDER INPUT VOLTAGE RANGE: (H Option) Available at a voltage range 210 to 250 VAC. Please consult your nearest Abbott Sales Office for details.

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using enhanced military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components.

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL
WM100

SPECIFICATIONS

Input: 103.5 to 126.5 V rms standard, 320 to 480 Hz, single phase. Other inputs available (See Options H and -3).

Efficiency: 65% minimum at full load.

Line Regulation: 10 mV for input change of 103.5 to 126.5 V ac with load constant.

Load Regulation: 10 mV on main output. 0.5% on auxiliary outputs for change of no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions. (WM100T).

Pard (Noise and Ripple) for Triple Output: 100 mV p-p (Max.); Single Output 5 V: 100 mV p-p; 28 V: 200 mV p-p (Max.).

Isolation Voltage: 700 V dc input to output. 500 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum at center of baseplate. Storage: −65°C to +125°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over entire temperature range.

Input Transient Protection: Unit will withstand 180 V ac for 0.1 second in accordance with MIL-STD-704A category B.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% change in load current.

Load Transient Over/Undershoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Holdup Time: 2.0 ms after nominal input is lost at full load.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when the overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (± 5%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volt in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 99,468 hours for a ground benign environment and 14,985 hours for Air Inhabited (WM100T).

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C and MIL-S-901C including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with solder-type, single-pin input terminals and a solder-type multiple-pin, output header.

Output Voltage Range[1] (Main)	Output Current[2] (Main)	Output-Voltage Range[1] (Aux)	Output Current[2] (Aux)	Wgt.[3] (Lbs.)	Wgt.[3] (Kgs.)	Model Number

4.8-5.8	15.0	±14.5-±15.5	0.8	3.5	1.6	WM100T/5/15-D

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 100 Watts.
3. Weights are ±5%.

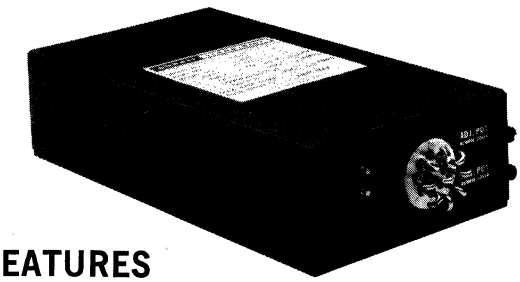
OPTIONAL FEATURES

Special Connectors: Military-type hermetically sealed connectors are provided as **Option A** in place of our standard header and the input terminals. (To order, replace the "D" in the Model number with "A," i.e., WM100T/5/12-A or WM100S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E,** enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration, (To order, add "E" after "D" in model number, i.e., WM100T/5/12-DE orWM100S/5-DE.)

Wide Input Voltage: With **Option H,** the units will operate from 90 to 130 V ac, with 20% derating in output power. (To order, add an "H" after the "D" in the model number i.e., WM100T/5/12-DH or WM100S/5-DH.)

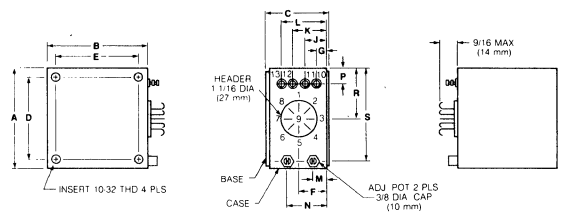
Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number i.e., WM-100T/5/12-DL or WM100S/5-DL.)



FEATURES

- 100-Watt Single and Triple Output, 200 kHz Switching Power Supply
- High Efficiency, 65% Minimum
- −55°C to +100°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-STD-704A
- Low Profile

MECHANICAL DIMENSIONS (WM100T)



A	B	C	D	E	F	G	J

13. Not Used

Remote Output Adjustment: With **Option R,** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number i.e., WM100T/5/12-DR or WM100S/5-DR.)

Internal Overvoltage Protection: Option -1 provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" after "D" in model number, i.e., WM100T/5/12-D-1 or WM100S/5-D-1.)

WYE Input: Option -3 changes input to 3-phase, 4 wire "WYE." (To order, add "-3" to the end of the model number, i.e., WM100T/5/12-3 or WM100S/5-D-3.)

50/50 Distributed Power: Option -7 distributes 50 watts to the main and 50 watts to the auxiliaries. (To order, add "-7" to the end of the model number, i.e., WM100T/5/12-D-7.)

Enhanced Reliability: -ER Option provides increased reliability by using enhanced military-grade components. (To order, add "-ER" after model number, i.e., WM100T/5/12-D-ER or WM100S/5-D-ER.)

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL **W** and WW

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105 to 125 VRMS

INPUT FREQUENCY RANGE: 380 to 420 Hertz, 1 phase

INPUT POWER: Per MIL-STD-704A for category B equipment

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 105 to 125 VRMS with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 25 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 750 vdc input to output and input to case • 200 vdc output to case

INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 vdc.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A Figure 3, Limit 1 (180 VAC for 0.1 seconds)

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

ELECTROMAGNETIC INTERFERENCE: Built to meet the requirements of MIL-STD-461 for generation of and susceptibility to radiated and conducted interference

High Performance

- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Tight line and load regulation.
- High reliability. Up to 214,600 hrs. MTBF per MIL-HDBK-217C.
- Compact. Power density up to 2 watts per cu. in.
- Low EMI.

RELIABILITY: MTBF per MIL-HDBK-217C up to 214.600 Hrs.

OVER-VOLTAGE PROTECTION*: An internal, non-crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.

MILITARY POWER SUPPLIES

400 Hz to DC

MODEL WL AND WWL

SPECIFICATIONS

INPUT VOLTAGE RANGE: 105-125 VRMS 3ϕ delta.

INPUT FREQUENCY RANGE: 380-420 Hz.

INPUT TRANSIENT PROTECTION: 180 VRMS for 0.1 seconds per MIL-STD-704, Figure 3, Limit 1.

LINE REGULATION: 0.1% or 20 mV, whichever is greater.

ELECTROMAGNETIC INTERFERENCES: Meets MIL-STD-461A, methods CE and CS for conducted emissions.

TURN-ON/TURN-OFF OVERSHOOT: 0.2% or 20 mV, whichever is greater.

LOAD REGULATION: 0.1% or 20 mV, whichever is greater. For load change of no load to full load.

RIPPLE: 0.02% or 5 mVRMS (whichever is greater) 25 mV peak-to-peak.

TRACKING ACCURACY: (WWL models only) The negative output will track the positive output to within 100 mV for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment.

POLARITY: Outputs are isolated. Either positive or negative may be grounded.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output voltage automatically restores to normal when the overload is removed.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing" leads. The regulator circuit action compensates for a DC voltage drop up to 0.5 volts in the load leads.

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limit within 100 microseconds after 50% step change in load current for units outputting 10A or less.

ISOLATION VOLTAGE: 750 VDC between input and output, input and case, and 200 VDC between output and case.

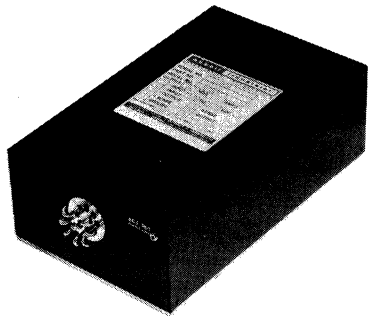
INSULATION RESISTANCE: 50 megohms minimum between input and output, input and case when measured at 50 VDC.

TEMPERATURE RANGE: −55°C to +80°C baseplate temperature. 80% rated power at −55°C to +100°C. Storage: −65°C to +125°C.

RELIABILITY: MTBF per MIL-HBK-217D under operating conditions of 50°C baseplate temperature, maximum rated output power for standard model was calculated to be 164,406 hrs. for ground benign environment and 25,633 hrs. for air inhabited transport. With Enhanced Reliability Option (ER) MTBF was calculated to be 883,580 hrs. for ground benign environment and 94,956 hrs. for air inhabited transport.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling.

EFFICIENCY: Typical 55%.



SINGLE OUTPUT: WL SERIES

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Model Number
4.8 to 5.8	20	12R	WL5.3D-20
5.8 to 6.8	20	12R	WL6.3D-20

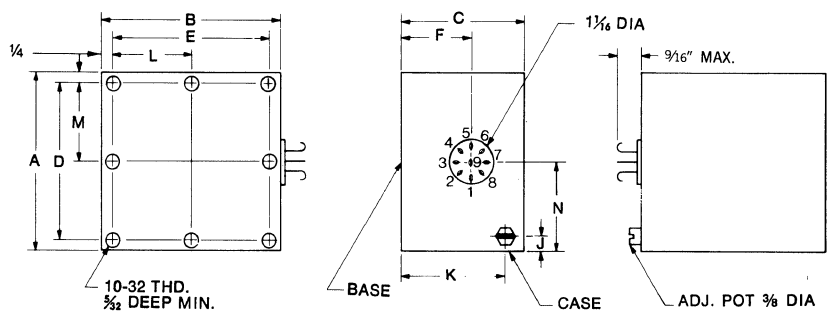
±11 to 13	2	11S	WWL12D-2
±14 to 16	2	11S	WWL15D-2

MECHANICAL DIMENSIONS



OPTIONAL FEATURES

OVERVOLTAGE PROTECTION: (−1 Option) An internal crowbar-type OVP is available. Unit will crowbar output when output voltage exceeds adjustable set point, to 10% or 2V above maximum rated output. To specify option, add "−1" to model number.

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using a higher level of military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components. Please consult your nearest Abbott Sales Office for details.

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1" and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number.

3ϕ WYE: (−3 Option) This input voltage is also available as an option. To specify, add "−3" to the end of the model number.

SIZE	A	B	C	D	E	F	J	K	L	M	N

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL **BC200**

SPECIFICATIONS

Input: 22 to 32 V dc standard, 18 to 32 V dc optional (see Option H).

Efficiency: 60% minimum at full load.

Line Regulation: 10 mV for input change of 22 to 32 V dc with load constant.

Load Regulation: 10 mV main output. 0.5% on auxiliary outputs for change of no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions (BC200T).

Pard (Noise and Ripple) for Main and Auxiliary Outputs: 20 mV rms; 100 mV peak to peak (maximum), at 25 MHz scope bandwidth, over the entire temperature range.

Isolation Voltage: 400 V dc input to output, 200 V dc input to case, 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum at center of baseplate. Storage: −65°C to +125°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over entire temperature range.

Input Transient Protection: Unit will withstand 50 V dc for 0.1 second in accordance with MIL-STD-704D.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 millisecond for main and auxiliary outputs after a 50% charge in load current.

Load Transient Overshoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (±10%) under overload conditions.

Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volts in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output was calculated to be 75,274 hours for a ground benign environment and 27,522 hours for an air inhabited environment. With -ER option MTBF was calculated to be 560,669 hours for a ground benign environment and 175,234 hours for an air inhabited environment.

Environment: Encapsulated and hermetically sealed to meet environmental requirements of MIL-STD-810C including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with an input and main output "hermetic seal" stud connector, for the auxiliary outputs a solder-type multiple-pin, output header.

Output Voltage Range[1] (Main)	Output Current[1] (Main)	Output Voltage Range[1] (Aux)	Output Current[2] (Aux)	Weight[3] (Lbs.)	Model Number
4.75-5.25	40.0			5.5	BC200S/5-D

14.25-15.75	13.5			5.5	BC200S/15-D
22.80-25.20	8.5			5.5	BC200S/24-D
26.60-29.40	7.5			5.5	BC200S/28-D
4.8-5.8	30	±11.5-±12.5	2.1	5.5	BC200T/5/12
4.8-5.8	30	±14.5-±15.5	1.7	5.5	BC200T/5/15

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer. Adjustment resolution is 35 mV.
2. Maximum output power equals 200 Watts.
3. Weights are ±5%.

OPTIONAL FEATURES

All options apply to both single and triple output units unless otherwise specified.

Special Connectors: Military-type hermetically sealed connectors are provided as **Option A** in place of our standard header and studs. (To order, replace the "D" in the model number with "A," i.e., BC200S/5/12-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., BC200T/5/12-DE.)

Wide Input Voltage: With **Option H**, the units will operate from 18 to 32 V dc, with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., BC200S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., BC200T/5/12-DL.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., BC200S/5-DR.)

Flexible Current Feature: Option -5 assigns 10 watts from the 2nd and 3rd auxiliary outputs to main output. (To order, add "-5" after model number, i.e., BC200T/5/12-D-5.)

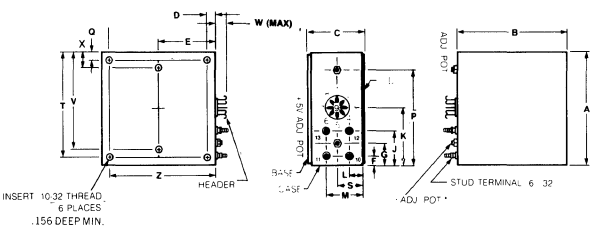
Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e. BC200T/5/12-D-ER.)

Internal Over Voltage Protection: Option -1 provides a non-crowbar internal OVP on single output and 5 V main on triple outputs. (To order, add "-1" after the D in model number, i.e., BC200S/5-D-1.)

FEATURES

- 200-Watt Single and Triple Output, 100 kHz Switching DC/DC Converter
- High Efficiency, 60% Minimum
- −55°C to +100°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-STD-704D for Input Transient Protection

MECHANICAL DIMENSIONS



* This adjustment pot used only on triple output model.

All pins appear on both models. Pins 1, 2, 8 and 9 are used for triple output.

A	B	C	D	E	F	G	J	K	L
5¾	8	1⅞	.280	3.749	½	1 1/16	1 21/32	2⅞	9/16

Tolerances: If a fraction, ±1/32 inch, a decimal, ±.015 inch.

Material: Base—Aluminum 6061-T6. Case—Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

28 VDC to DC

MODEL **BC100**

SPECIFICATIONS

Input: 22 to 32 V dc standard, 18 to 32 V dc optional (see option H).

Efficiency: 65% minimum at full load.

Line Regulation: 10 mV for input change of 22 to 32 V dc with load constant.

Load Regulation: 10 mV main output, 0.5% on auxiliary outputs for change of no load to full load with line constant.

Auxiliary Output Tracking Accuracy: The negative output will track the positive output within 100 mV for all rated conditions. (BC100T)

Pard (Noise and Ripple) For Main and Auxiliary Outputs: 20 mV rms; 100 mV peak to peak (maximum), at 25 MHz bandwdith, over the entire temperature range.

Isolation Voltage: 400 V dc input to output. 200 V dc input to case. 200 V dc output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, and output and case when measured at 50 V dc.

Temperature Range: Operating: −55°C to +100°C maximum at center of baseplate. Storage: −65°C to +125°C ambient.

Temperature Coefficient: 0.01%/°C maximum for main and auxiliary outputs over entire temperature range.

Input Transient Protection: Unit will withstand 50 V dc for 0.1 second in accordance with MIL-STD-704D.

Load Transient Recovery Time: Output voltage returns to regulation limits within 0.5 milliseconds for main and auxiliary outputs after a 50% change in load current.

Load Transient Overshoot: 0.8 V or 3% (whichever is greater) from nominal voltage set point.

Short Circuit Protection: Completely protected against a short circuit of any duration. Outputs automatically restore to normal when overload is removed. Auxiliary outputs will fold back for overload.

Current Limiting: Output current is limited to 120% on main, 150% on auxiliary outputs (±10%) under overload conditions.

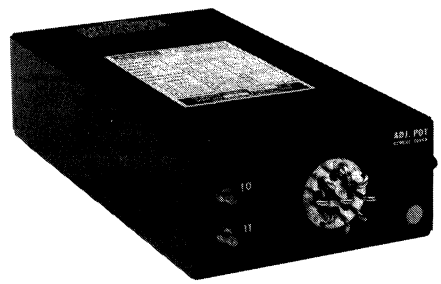
Remote Error Sensing: Regulator monitors voltage directly at the load using extra "sensing" leads and compensates for a dc voltage drop up to 0.5 volts in the load leads (on 5 V main output).

Electromagnetic Interference: Meets the requirements of MIL-STD-461B for generation of and susceptibility to radiated and conducted interference.

Reliability: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of 50°C baseplate temperature, maximum operating input voltage and maximum rated output power was calculated to be 81,690 hours for a ground benign environment and 29,771 for an air inhabited environment. With -ER option MTBF was calculated to 608,380 hours for a ground benign environment and 185,471 hours for an air inhabited environment. (BC100T)

Environment: Encapsulated and hermetically sealed to meet the environmental requirements of MIL-STD-810C including altitude (to 70,000 ft.), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

Connectors: Standard unit is provided with an input "hermetic seal" stud connector, for auxiliary and main outputs a solder-type, multiple-pin, output header.



FEATURES

- 100-Watt Single and Triple Output, 200 kHz Switching DC to DC Converter
- High Efficiency, 65% Minimum
- −55°C to +100°C Temperature Range
- Meets MIL-STD-461B, MIL-STD-810C and MIL-STD-704D for Input Transient Protection

1 5/32	2 9/32	3¾	7/16	½

OPTIONAL FEATURES

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header. (To order, replace the "D" in the model number with "A" i.e., BC100T/5/12-A or BC100S/5-A.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E,** enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., BC100T/5/12-DE or BC100S/5-DE.)

Wide Input Voltage: With **Option H,** the units will operate from 18 to 32 V dc with 20% derating in output power. (To order, add an "H" after the "D" in the model number, i.e., BC100T/5/12-DH or BC100S/5-DH.)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" after "D" in model number, i.e., BC100T/5/12-DL or BC100S/5-DL.)

Remote Output Adjustment: With **Option R,** an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., BC100T/5/12-DR or BC100S/5-DR.)

Internal Overvoltage Protection: Option -1 provides a non-crowbar internal OVP on the main output (Output 1). Input must be recycled to restore output. (To order, add "-1" after the"D" in model number, i.e., BC100T/5/12-D-1 or BC100S/5-D-1.)

50-50 Distributed Power: Option -7 distributes 50 watts to the main and 50 watts to the auxiliaries. (To order add "-7" to the end of the model number, i.e., BC100T/5/12-D-7.)

Flexible Current Feature: Option -5 assigns 10 watts from 2nd and 3rd auxiliary outputs to main output. (To order, add "-5" after model number, i.e., BC100T/5/12-D-5.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" after model number, i.e., BC100T/5/12-D-ER or BC100S/5-D-ER.)

Tolerances: If English unit is a fraction, ±1/32 inch, (0.8 mm); if English unit is a decimal, ±0.15 inch, (0.4 mm).

Material: Base — Aluminum 6061-T6. Case — Steel.

Finish: Black flat lacquer per FED-STD-595. Color 37038.

Mounting: 10-32 THD inserts 5/32" minimum depth are provided in baseplate. Steel 10-32 bolts American Standard, unified national fine series, slotted studs are supplied with each unit. Metric hardware and inserts available as a special order.

MILITARY POWER SUPPLIES

New BC-60 Series 60 Watt DC-DC Converters

MODEL BC 60

SPECIFICATIONS:

Input: 18-36 Vdc (28 Vdc nominal)

Input Transient Protection: 50 Vdc for 0.1 second per MIL-STD-704D

Efficiency: Typical (nominal input, full load, room ambient). Single output: 72 to 79%. Triple output: 70%.

Line Regulation: Input change of 18-36Vdc, constant load. Single: 0.1% or 10mV, whichever is greater. Triple: 0.1%, all outputs.

Load Regulation: No load to full load, constant line. For singles and main output (triples): 0.1% or 10mV, whichever is greater; auxiliaries, 0.5%.

Load Transient Recovery: Output voltage returns to regulation envelope within 0.5 mS for 50% load charge.

Load Transient Overshoot: 0.5V or 3%, whichever is greater, from nominal set point at full load, for 50% load charge.

Pard (Noise and Ripple): Measured at 25 MHz bandwidth. Single Output Unit: 30mV rms; P-P: 5V-2.0%, 12 or 15V - 1.0%, 24 or 28V - 0.7%. Triple Output Unit: 30mV rms; 100mV P-P for main and auxiliary outputs.

Temperature Range: Operating, −55° C to 100° C maximum at center of baseplate. Storage, −65° C to 125° C ambient. Note: Turn on at low temperature extreme can result in increased PARD measurements prior to unit warm up (1-3 minutes). Consult nearest sales office for application details.

Temperature Coefficient: 0.03%/°C maximum over entire temperature range.

Auxiliary Output Tracking: Negative output tracks positive within 100mV for all rated conditions, with auxiliaries set at nominal output voltage (±200mV).

Isolation Voltage: 400Vdc, input to output; 200Vdc, input to case; 200Vdc, output to case.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case when measured at 50Vdc.

Overvoltage Protection: Electronic overvoltage protection standard; 120% limit ± 10%, non-crowbar. Requires recycling of input for recovery.

Short Circuit Protection: Protected against short circuit of any duration. Automatic recovery when overload is removed.

Current Limiting: Foldback current limiting standard for all outputs, 120% (± 10%) limit for single output and main output on triples; 150% (± 10%) for auxiliary output on triples.

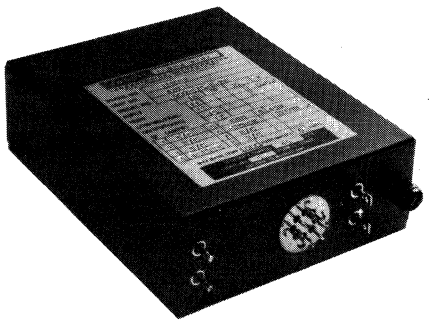
Remote Sensing: Standard on all single output units and main output of triple output units. Compensates for up to 0.5V drop in load leads.

EMI: Units qualified to MIL-STD-461C part 2; CE01, CE03*, CS01, CS02, RE02*, CE07, RS02, RS03 and CS06, for input leads. *Consult nearest sales office for additional data.

Reliability: All MTBF's per MIL-HDBK-217E, 50° C baseplate, highline and full load. See MTBF chart for your requirement.

Environment: Encapsulated and hermetically sealed units meet MIL-STD-810C, altitude, shock, acceleration, and MIL-S-901C, high impact shock conformance.

Hook Up: Via hermetic, solder-type multiple pin header and solder turrets for I/O.



FEATURES

- 60-Watt Single and Triple Output
- High Efficiency, 65% Minimum
- −55° C to +100° C Temperature Range
- Meets MIL-STD-461C, MIL-STD-810C and MIL-STD-704D for Input Transient Protection

Model	Main Output/ Current[1]	Output #2[1]	Output #3[1]	Weight (lbs)	(kgs)
BC60S/5-D	5V@12A			2.10	0.95
BC60S/12-D	12V@5A			2.10	0.95
BC60S/15-D	15V@4A			2.10	0.95
BC60S/24-D	24V@2.5A			2.10	0.95
BC60S/28-D	28V@2.14A			2.10	0.95

BC60T/5/12D	5V@6A	+15V@1A	−15V@1A	2.16	0.98

1. Single/Main Outputs adjust ±5%, 35 mV resolution
   Auxiliary Output adjust ±0.5V
2. Weight ±5%

OPTIONAL FEATURES

"A" Hermetic Connectors
Replaces solder header/turrets with military connectors:
Input: MS3113H10-6P (Mate Inc.)
Output: MS3113H14-12P (Mate Inc.)
Other hermetic, MIL connectors available on special order.

"E" Severe Shock, Vibration, Acceleration
Extra encapsulent to meet 60g shock, 30g vibration and 50g acceleration.

"L" Remote Enable/Inhibit
Provides for remote turn on/off with TTL logic signal.

"ER" Enhanced Reliability
Provides increased reliability via higher level MIL grade components.

RELIABILITY DATA – MTBF

Environment	Ground Benign	Naval Sheltered	Air Inhabited (Attack)	Ground Mobile

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL **BA**

SPECIFICATIONS

INPUT VOLTAGE: 24-30 VDC (20-32 VDC with option)

EFFICIENCY: Typical efficiency 55-75% for 5V units, 65-85% for 12, 15, and 18V units.

IN RUSH CURRENT: Less than 8 times the peak input current at low line, full out load and nominal output voltage.

LINE REGULATION: 0.1% (or 20 mV whichever is greater)

LOAD REGULATION: 0.1% (or 20 mV whichever is greater).

PARD (NOISE & RIPPLE): 100 mV peak-to-peak, 20 mVRMS from +25°C to +100°C; 130 mV peak-to-peak, 40 mVRMS from −55°C to +25°C.

ADJUSTMENT RANGE: Output is continuously adjustable between the limits shown by means of externally accessible adjustment potentiometer.

RESOLUTION:	Nominal Output Voltage	Resolution
	5, 12, 15	35 mV
	24, 28	60 mV

INSULATION VOLTAGE: 100 VDC between input and output, and input and case; 50 VDC between output and case.

INSULATION RESISTANCE: 50 megohms between input and output, input and case when measured at 50 VDC.

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating −55°C to +100°C baseplate temperature. Derated maximum output current linearly above +85°C baseplate temperature to 80% of full load rating at +100°C baseplate temperature. Storage: −65°C to +125°C.

TEMPERATURE EFFECT (COEFFICIENT): Less than 0.01% per degree Celsius.

ENVIRONMENT: Hermetically sealed and encapsulated to meet MIL-STD-810C, including altitude (to 1.3 inches of Hg), acceleration, vibration, shock and temperature altitude cycling.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against a short circuit of any duration. Unit automatically recovers to normal when fault is removed.

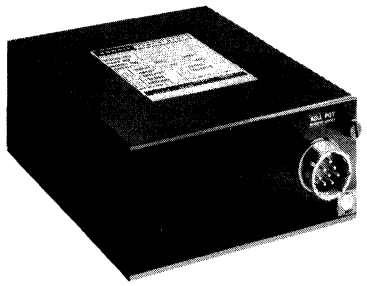
INPUT TRANSIENT PROTECTION: Unit will shut off at input voltage of 37V. Maximum voltage is 80V for one second.

REMOTE ERROR SENSING: Each unit contains a means by which the regulator circuit monitors the voltage directly at the load using extra "sensing leads." The resulting circuit action compensates for a DC voltage drop up to 0.3V in the load leads.

LOAD TRANSIENT RESPONSE: Output voltage returns to regulation limits within 2 milliseconds after 50% step change in load current. Maximum overshoot is less than 0.8V.

ELECTROMAGNETIC INTERFERENCE: Meets MIL-STD-461A, Methods CE01 and CE03 for conducting emissions (available with "F" option).

RELIABILITY: The Mean Time Between Failure (MTBF) per MIL-HDBK-217D under operating conditions of +50°C baseplate temperature, maximum rated output power for BA100D-5A-1 was calculated to be 139,899 hrs. for a ground benign environment and 16,866 hrs. for an air inhabited transport environment. With Enhanced Reliability Option (ER) MTBF was calculated to be 378,759 hrs. for ground benign environment and 51,131 hrs. for air inhabited transport environment.



FEATURES

- Up to 85% efficiency
- Meets MIL-STD-810C
- Wide DC input range available (20-32 VDC)
- Tight Regulation within 0.1%

Output Voltage Range (VDC)	Output Current (Amps)	Size (see Dwg.)	Weight (Lbs.)	Model Number
4.7 to 5.3	20.0	12F	4.7	BA100D-5A
11.25 to 12.75	8.33	12F	4.7	BA100D-12A
14.1 to 15.9	6.67	12F	4.7	BA100D-15A
22.5 to 25.5	4.17	12F	4.7	BA100D-24A
26.3 to 29.7	3.57	12F	4.7	BA100D-28A

OPTIONAL FEATURES

TTL: (L Option) Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off. The power supply will turn-on with TTL logic "1", and turn-off with TTL logic "0". To specify this feature, please add an "L" to the character preceding the first dash of the model number. (EXAMPLE: BA100D-5A to BA100DL-5A)

SPECIAL CONNECTORS: A hermetically sealed military-type connector is available for the BA series (as shown in picture). Please consult your nearest Abbott Sales Office for details.

EMI FILTER: (F Option) An internal EMI filter is available to reduce conducted interference on the input leads. With these filters the Model BA will comply with MIL-STD-461A Notice 3, CE01 and CE03 on the input leads. To specify this feature, please add an "F" after "D" in the model number. (EXAMPLE: BA100D-5A to BA100DF-5A)

REMOTE PROGRAM OPTION: (R Option) Units can be modified so that their output voltage can be adjusted from a remote location. This is accomplished by adding an additional pin to the header on the unit. To specify this option, please add an "R" after this character "D" in the model number. (EXAMPLE: BA100D-5A to BA100DR-5A).

OVERVOLTAGE PROTECTION: (-1 Option) An internal non-crowbar type OVP, power supply turns off when output voltage exceeds set point (available as option by adding "-1" to model number)

WIDER INPUT VOLTAGE RANGE: (H Option) The standard model BA operates from an input voltage range of 24 to 30 VDC. The units can be modified to operate from 20 to 32 VDC (with 20% derating). To have this feature included add an "H" after the "D" in the model number and specify the desired input voltage range in parentheses after the entire model number. (EXAMPLE: BA100D-5A to BA100DH-5A (20-26).)

ENHANCED RELIABILITY: (ER Option) This option provides increased reliability by using higher levels of military grade components. This feature allows the power supply to meet customer specific requirements as to "Hi-Rel" components, environmental testing and extended Thermal Cycling. Please consult your nearest Abbott Sales Office for details.

SPECIAL ENCAPSULATION: (E Option) All of our hermetically sealed power modules are encapsulated to meet or exceed the shock, acceleration and vibration requirements of MIL-STD-810C. Special encapsulation to enable these modules to withstand higher shock levels of 60g's, acceleration levels of 50g's and vibration levels of 30g's is available. To specify this feature, please add an "E" after the character "D" in the model number. (EXAMPLE: BA100D-5A to BA100DE-5A)

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL **C** and CC

SPECIFICATIONS

INPUT VOLTAGE RANGE: 24 to 30 VDC. Other input ranges available

LINE REGULATION: 0.1% (0.2% for duals) or 10 mv (whichever is greater) for input change of 24 to 30 VDC with load constant

LOAD REGULATION: 0.1% (0.2% for duals) or 20 mv (whichever is greater) for change from no load to full load with line constant

RIPPLE: 0.02% or 5 mv RMS (whichever is greater) 50 mv peak-to-peak maximum, each output, measured with scope having 25 MHz bandwidth

OUTPUT VOLTAGE ADJUSTMENT: Voltage is continuously adjustable between the limits shown in the table by means of an externally accessible screwdriver adjustment potentiometer

TRACKING ACCURACY: The negative output will track the positive output to within 1.0% or 100 mv (whichever is greater) for all rated conditions of input voltage, output current, operating temperature, and output voltage adjustment

ISOLATION VOLTAGE: 200 volts DC between input and output, input and case, and output and case

INSULATION RESISTANCE: 50 megohms minimum at 50 volts DC between input and output, input and case, and output and case

POLARITY: Inputs and outputs are isolated, either positive or negative side may be grounded.

TEMPERATURE RANGE: Operating: −55°C to +100°C maximum at center of mounting base
Storage: −65°C to +125°C

TEMPERATURE COEFFICIENT: 0.03% per degree Celsius maximum

ENVIRONMENT: Encapsulated to meet the environmental requirements of MIL-STD-810C and MIL-E-5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, salt spray, fungus, explosion, etc.

SHORT CIRCUIT PROTECTION: Each unit is completely protected against an overload or short circuit of any duration. The output automatically restores to normal when the overload is removed

INPUT TRANSIENT PROTECTION: MIL-STD-704A, Fig. 9, Limt 1 (80 VDC for 0.1 sec.).

LOAD TRANSIENT RECOVERY TIME: Output voltage returns to regulation limits within 100 microseconds (200 microseconds for duals) after 50% step change in load current

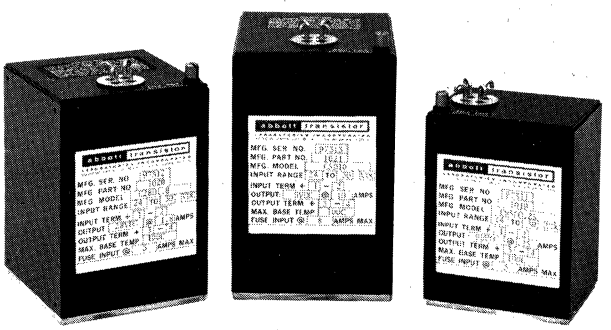
RELIABILITY: MTBF per MIL-HDBK-217D up to 277,200 hrs.

ELECTROMAGNETIC INTERFERENCE: Units meet EMI requirements of MIL-STD 461 conducted and radiated.

OVER-VOLTAGE PROTECTION*: An internal, crowbar type OVP is available. Power supply turns off when output voltage exceeds set-point.

TTL*: Abbott provides an isolated pair of terminals used to turn-on and turn-off the regulator portion of the power supply. The unit remains in an idling state while the output is off.

* Inclusion of these optional features on these models will most likely require that the case size increases slightly. Please consult nearest Abbott sales office for further details.



High Performance

- Operating temperature range: −55°C to +100°C.
- Low Peak-to-Peak Ripple.
- Compact. Power density up to 2 watts per cu. in.
- High reliability. Up to 277,200 hrs. MTBF per MIL-HDBK-217D
- Low EMI. To MIL-STD-461.
- Encapsulated and hermetically sealed to meet MIL-STD-810C and MIL-E-5400P, Class 2.
- 0.1% Line and Load regulation.
- TTL compatibility available.
- Internal OVP optional.

MILITARY POWER SUPPLIES

28 VDC to DC

MODEL **B**

SPECIFICATIONS

Input Voltage Range
24 to 30 volts DC Other ranges available

Line Regulation
Within 0.4% for input 24 to 30 VDC

Combined Line and Load Regulation
Within 3.0% for input 24 to 30 VDC and from ½ load to full load on Model B's
Within 5.0% for input 24 to 30 VDC and from ½ load to full load on Model BL's

Ripple
0.5 RMS — Model B's
1.0% RMS — Model BL's

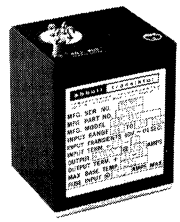
Voltage Adjustment Range
12% by screwdriver adjustment

Input Transient Protection
In accordance with MIL-STD-704A, Fig. 9, Limit 1, (80 VDC for 0.1 sec.)

Environment
+212°F max. at mounting base using adequate heat sink
−65°F min. at mounting surface
Altitude: To vacuum (true hermetic seal). Vibration, shock, sand, dust, humidity, salt-spray, fungus, sunshine, rain, and explosion to MIL-STD-810C and MIL-E-5400P, Class 2

Output Voltage and Current
See specific models listed
(Outputs and inputs are isolated)

Reliability: MTBF per MIL-HDBK-217C up to 626,400 hrs.



High Reliability

- Operating temperature range −55°C to +100°C.
- Small size.
- High reliability. Up to 626,400 hrs. MTBF per MIL-HDBK-217C.
- Encapsulated and hermetically sealed. Meets MIL-STD-810C and MIL-E-5400P, Class 2.

MILITARY POWER SUPPLIES

28 VDC to AC Sine Wave

MODEL **S**

SPECIFICATIONS

Input Voltage Range: 24 to 30 volts DC. Other input ranges are available.
Load Regulation: ±1.0% from ½ to full load.
Frequency Stability: ±1.0%
Voltage Adjustment Range: 12% by screwdriver adjustment.
Reliability: Up to 340,600 Hrs. MTBF per MIL-HDBK-217C.
Input Transient Protection: In accordance with MIL-STD-704A, Limit 1, Fig. 9 (80 volts for 0.1 seconds).
Environment: +212°F max. at mtg. base using adequate heat sink. −65°F min. at mounting base. Encapsulated to meet the environmental requirements of MIL-STD 810C and MIL-E 5400P, Class 2, including: altitude (to a vacuum), vibration, shock, acceleration, sand, dust, humidity, saltspray, fungus, explosion, etc.

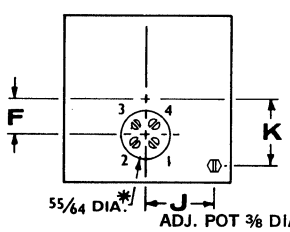
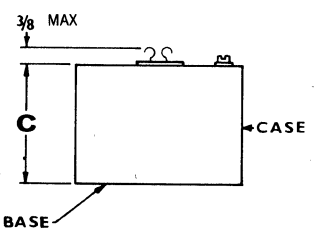
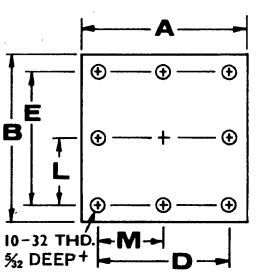
Sine Wave — 1 Ø 400 to 1600 Hz

- Operating temperature range: −55°C to +100°C.
- High reliability. Up to 340,600 hrs. MTBF per MIL-HDBK-217C.
- Encapsulated and hermetically sealed per MIL-STD-810C and MIL-E-5400P.

CASE DIMENSIONS FOR ABBOTT MODELS W, WW, C, CC, B AND S







* Models CC and WW use special 8 pin header. Size of special headers is 1 1/16 dia. by 3/16 high.
† 6-32 Thd, 3/16 deep on case size 1B.

MILITARY POWER SUPPLIES

28 VDC to AC Sine Wave

SN

SPECIFICATIONS:

Input: 24 to 30 V dc. Other inputs available. (See Option H.)

Efficiency: 55% minimum at 27 V dc input and full load.

Line Regulation: Within 0.5% for full input change 24 V dc to 30 V dc with load constant.

Load Regulation: Within 1.0% for load change of one half to full load with line constant.

Wave Form: Sinusoidal with a maximum harmonic distortion into a resistive load of 4%.

Frequency Stability: ± 1% drift with time (within 8 hours after 30 seconds warm-up).

Frequency Accuracy: ± 0.5% is initial setting tolerance.

Load Power Factor: Derate linearly from 100% rated power at unity to 70% rated power at 0.7 power factor lagging or leading.

Isolation Voltage: 200 V dc input to case, 750 V dc output to case and input to output.

Insulation Resistance: 50 megohms minimum between input and output, input and case, output and case when measured at 50 V dc.

Temperature Range: Operating – 55°C to + 100°C baseplate temperature; storage temeprature – 65°C to + 125°C ambient.

Temperature Coefficient: 0.06% / °C from – 55°C to + 100°C, voltage change, frequency change, 1% maximum.

Input Transient Protection: In accordance with MIL-STD-704A, Figure 9, Limit 1 (80 V dc for 0.1 second).

Load Transient Response: Output voltage returns to regulation limits within 5 cycles for a load change of no load to full load.

Load Transient Overshoot: 10% maximum from nominal voltage set point.

Short Circuit Protection: Completely protected against short circuit of any duration. Unit must be recycled to restore output to normal.

Reliability: The MTBF calculated per MIL HDBK-217D, under operating conditions of 50°C baseplate temperature, maximum operating input voltage and full rated output power is 156,366 hours for ground benign and 15,722 hours for air inhabited transport environments. With Enhanced Reliability Option (-ER) ground benign is 907,070 hours; air inhabited transport is 93,030 hours.

Environment: Hermetically sealed and encapsulated to meet the environmental requirements of MIL-STD-810C.

Maintainability: Units are repairable at depot level.

OPTIONAL FEATURES

The following standard options are available on the SN Series inverters. Please refer to option section of this catalog for detailed information.

Special Connectors: A military-type hermetically sealed connector is provided as **Option A** in place of our standard header to extend out the top surface. (To order, replace "D" in model number with "A", i.e., SN180A-27A-400.)

Severe Shock, Acceleration and Vibration: Special encapsulation, **Option E**, enables all units to withstand 60 g's shock, 50 g's acceleration and 30 g's vibration. (To order, add "E" after "D" in model number, i.e., SN180DE-27A-400).

Wide Input Voltage: Option H recenters the input voltage to provide alternate inputs from 18 V dc to 32 V dc. Call an Abbott Sales Office for output current derating. (To order, add "H" after the "D" in model number and specify input voltage range in parentheses after the entire model number, i.e., SN180DH-27A-400 (18-30).)

Remote Turn On/Off: Option L provides isolated terminals to turn outputs on/off with TTL logic signal. (To order, add "L" to character preceding first dash in model number, i.e. SN180DL-27A-400.)

Remote Output Adjustment: With **Option R**, an adjustment potentiometer can be remotely located to adjust the output voltage. (To order, add "R" after "D" in model number, i.e., SN180DR-27A-400.)

Frequency Adjustment: Option -4 enables output frequency to be adjusted ± 5% by means of an external potentiometer. (To order, add "-4" at the end of the entire model number, i.e., SN180D-27A-400-4.)

Enhanced Reliability: -ER Option provides increased reliability by using higher levels of military-grade components. (To order, add "-ER" at the end of the entire model number, i.e., SN180D-27A-400-ER.)

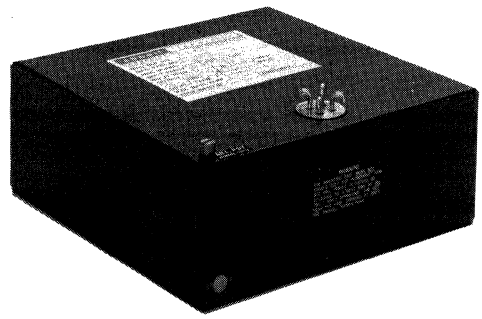
6 Standard Models

Output Frequency (Hertz)	Output[1] Voltage Range	Output Amps (Resistive Load) Continuous	Harmonic Distortion (%)	Size (See Dwg.)	Weight[2] lbs.)	Weight[2] (Kgs.)	Model Number
400	25.4-28.6	6.667	4.0	14H	5.5	2.5	SN180D-27A-400
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-400
800	25.4-28.6	6.667	4.0	14H	5.5	2.5	SN180D-27A-800
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-800
1600	25.4-28.6	6.667	4.0	14H	5.5	2.5	SN180D-27A-1600
	108-122	1.565	4.0	14H	5.5	2.5	SN180D-115A-1600

1. Output voltage is continuously adjustable between the limits shown by means of an externally accessible screwdriver adjustment potentiometer.
2. Weights are ± 5%.

Model Numbering System

Product Line Series	Output Power Watts	Header Type	Options	Dash	Output Voltage AC	A	Dash	Frequency Hz
SN	180	D		–	27	A	–	400



Sine Wave - 1ϕ 400 to 1600 Hz

- High Density 2 w/in³ 180-Watt Inverter
- Operating temperature range: – 55°C to + 100°C.
- High reliability. Up to 907,070 hrs. MTBF per MIL-HDBK-217D.
- Encapsulated and hermetically sealed per MIL-STD-810C and MIL-E-5400P.

STANDARD POWER™ Power Supplies

Acme Electric's nationwide network of electronic distributors stock catalog Standard Power linear and switch-mode power supplies.

Standard Power is a trademark of Acme Electric Corporation that identifies all of Acme's catalog power supplies.

Acme Electric is proud to offer a new series of switch-mode power supplies with power factor corrections and a high reliability 400 watt switcher with automatic input voltage range.

A leader in power products since 1917, Acme Electric offers standard, modified and custom DC power supplies - all-made in the USA.

Rely on Standard Power for your off-the-shelf catalog requirements or call 1-800-247-7507 with your modified or custom requirements.

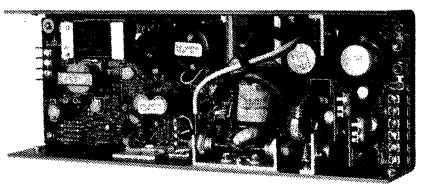
SWS Series High-Efficiency Switcher

1, 3 or 4 outputs give you a total of 150 watts of switch-mode power.



- ***Low component count for low cost and optimum efficiency.***
- ***Soft start and logic inhibit standard.***
- ***Remote sense and built-in OVP on output 1.***
- ***All outputs adjustable, minimum 10%.***
- ***All outputs floating and current limited.***
- ***Field-switchable input 90-132/180-264 Vac.***
- ***In-rush current limiting.***

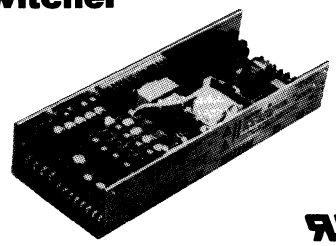
Switch-Mode Power Supplies — STANDARD POWER™

400 A "Spectrum Series" Output Adjustable Switcher

- **4-Wide Band Adjustable Outputs Plus 5V Primary**
- **Perfect for R & D Work and Product Use!**
- **120 Power Supplies In One**



- ► *All auxiliaries wide band adjustable*
- ► *AC Power fail/remote inhibit*
- ► *Compact size 2.5" x 5.0" x 13.0"*
- ► *All outputs current limited and floating*
- ► *Worldwide input capability 95-132/190-264 Vac, 47-63 Hz*
- ► *300 Vdc operation - consult factory*
- ► *Field selectable for 115/230 Vac input*
- ► *High temperature burn-in*
- ► *20 millisecond minimum hold-up time at low line, full load*
- ► *In-rush current limiting*
- ► *Remote sense and built-in OVP on main 5V output*
- ► *Meets UL 478; CSA 22.2, Nos. 143 and 154, TUV licensed to IEC 380 and 435; VDE 0805 and 0806*

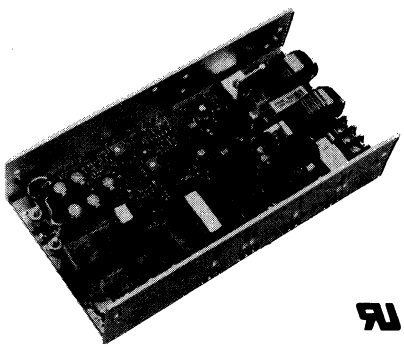
Note: 400W air-cooled maximum output (derate 25% for convection). Outputs factory set a 5/24/12/12/5 for above manufacturers type

"Hi-Rel" Series 400 Watt Switcher



- ► *MTBF 150,000 hours calculated per MIL-217E*
- ► *Compact Size - 2.5" x 5.0" x 10.5"*
- ► *Meets FCC and VDE Level A emissions standards*
- ► *Meets UL 478, 1459 and 1950, CSA 22.2-950, IEC 380, 435, and 950, EN60950 licensed, VDE 0805 and 0806*
- ► *Optional automatic input voltage range selection (90-132/180-264)*
- ► *Fully regulated output*
- ► *Remote sense on main 5V output*
- ► *Power fail/remote inhibit*
- ► *Output current limited and floating*
- ► *High temperature burn-in*
- ► *20 millisecond minimum hold-up time at low line, full load*
- ► *Available in Fall 1991*

Custom Power Supplies STANDARD POWER™

When Standard Power product offerings do not meet your particular requirements, contact with confidence, the leader in custom power supplies since 1917...Acme Electric Corporation.

Today's electronic equipment has specialized power requirements. AC/DC switch-mode power supplies, DC to DC converters and customer linear power supplies, all need focused engineered solutions to provide power factor correction, hot pluggability, N + 1 redundancy, stress screening, automatic input voltage selection and world-wide agency approvals when required.

A recognized power supply expert, Acme Electric is a BABT certified manufacturer, has an in-house self-certified category program for CSA, and a UL client's test data program.

Acme Electric designs and manufactures high power (250 watts and above) switch-mode power supplies to meet your OEM requirements. Acme Electric has developed strong working relationships with its customers - aiding in maximizing cost-effective product throughput, timely deliveries and overall program efficiencies.

We welcome the opportunity to serve your power supply needs. In order to help you with your custom power supply requirements, fill out the questionnaire below and mail to:

/ES and /HB devices have optional military screening. 1. Specifications are typical values. Input-to-output isolation @500VDC is 100MΩ minimum. This Series has an industry standard pinout. A cross reference to other manufacturers is available upon request. The /HB devices are a higher temperature device with military screening.

1. Up to 90% of full power is available from either output provided the total output does not exceed 30 watts.

Package

A. Standard - 2.12 x 1.12 x 0.495
B. Flange - 2.89 x 1.12 x 0.495
C. 1.345 x 2.700 x 0.500
D. standard - 1.950 x 1.345 x 0.500
E. flange - 2.700 x 1.345 x 0.500

An optional EMI filter will reduce the input ripple current to levels below the limits imposed by Condition CEO3 of MIL-STD-461B. The AF461 Series has 1.75 or 3.8 amp max. input current.

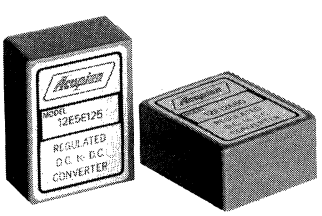
WE SHIP POWER SUPPLIES IN 3 DAYS

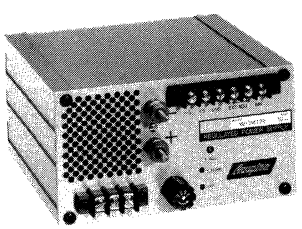
Any time you order Acopian power modules selected from the thousands of models described on the following pages, shipment will be made within 3 days after your purchase order is received. To save more time, telephone your order. We'll ship within 3 days after you've put down the phone.

Miniaturized Single Output	2	Dual Output for Op Amps	18
Miniaturized Dual Output	4	Triple Output	19
Miniaturized Chassis Mounting	6	Series U Unregulated	20
Series A High Performance, Series B General Purpose	8	Rack Mounting	22
Narrow Profile	12	Multiple Output Power Systems	24
Broad Adjustment Range	14	Redundant Output Power Systems	25
Dual Output General Purpose	16	High Voltage	28

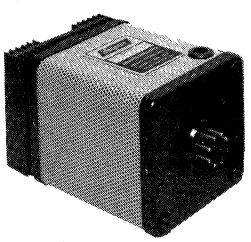
OTHER ACOPIAN PRODUCTS INCLUDE:



DC-DC Converters
For mounting on printed circuit boards. Single and dual output.



Switching Power Supplies
Outputs to 48 Vdc, to 150 A. Small size, low noise.



Plug-in Power Supplies
Single, dual and triple output. Regulated and unregulated.

CONTACT FACTORY FOR DETAILED INFORMATION.

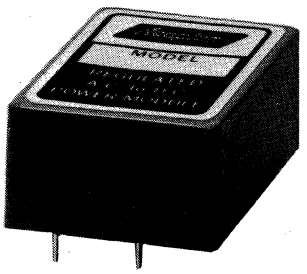
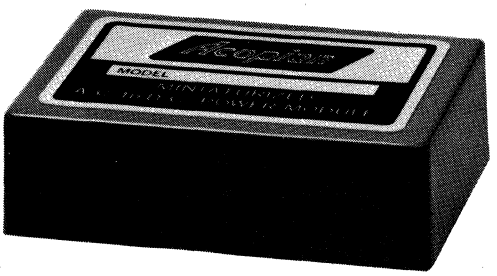
MINIATURIZED REGULATED SINGLE OUTPUT





SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Conserve space with mini-modules as small as 2.3" x 1.8" x 1.0". Models with outputs ranging from 1 to 75 volts, and from 30 ma to 2.5 amps are available. All feature excellent regulation and ripple parameters, and are short circuit protected.

Rugged encapsulated construction and generously derated components insure years of reliable operation. Mini-modules are also available with multiple outputs—see pages 4 and 5.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Trim Adjustment: Output is factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Output may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Output is floating. Either positive or negative terminal may be grounded.

Ambient Operating Temperature: −20 to +71°C. (Model 5E150, 0 to +71°C.) No derating required.

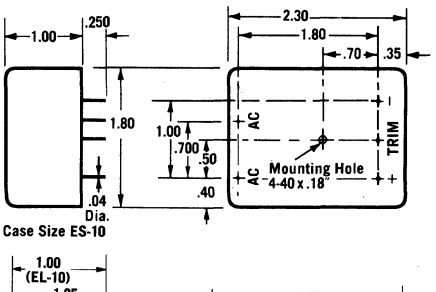
Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

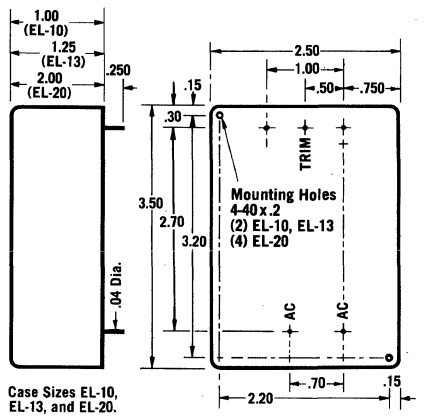
Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.



Case Size ES-10



Case Sizes EL-10, EL-13, and EL-20.

High voltage displays such as NIXIE* indicators may be powered with the Model NX-25A or NX-50. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

3-DAY SHIPMENT GUARANTEED

Placement of a mini-module on a printed circuit assembly eliminates the need for an outboard power supply, as well as all the associated wiring, connectors and hardware. Layout and construction are simplified, equipment size can be reduced, and system reliability is improved. The assembly shown is used in a control system manufactured by JB Systems Inc.

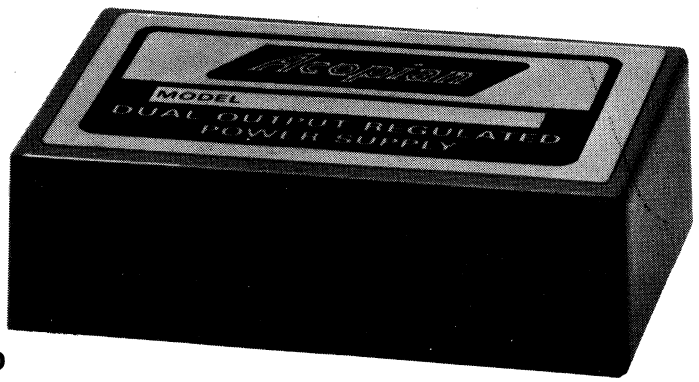
MINIATURIZED REGULATED MULTIPLE OUTPUT



SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

These dual and triple output mini-modules are compact and convenient sources of the voltages required to power operational amplifiers and related circuits. They may be mounted directly on printed circuit board assemblies, simplifying system layout and minimizing the connectors and wiring required.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Compact, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See table.

Output Voltage Setting: Each output is factory preset to ±2% (1 to 9 volt outputs) or ±1% (10 to 28 volt outputs) of the nominal output voltage. Outputs of Case Size END modules, except those marked (*), may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Single output sections may be used in either polarity. Dual output sections, marked (*), are provided with a plus/common/minus output connection configuration.

Ambient Operating Temperature: −20 to +71°C. No derating required.

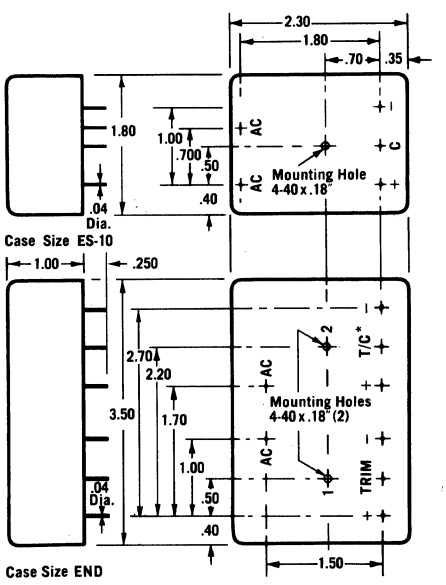
Storage Temperature: −55 to +85°C.

Temperature Coefficient: From 9 to 28 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Weight: 7 oz. (Case size ES-10.)
13 oz. (Case size END.)
1 lb. (Case size EL-10.)
1 lb. 3 oz. (Case size EL-13.)
2 lb. (Case size EL-20.)

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.



*TRIM or COMMON, depending upon model

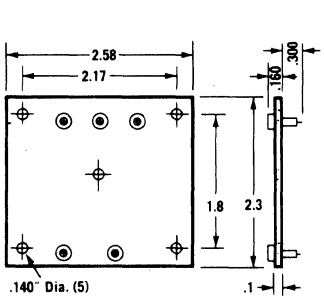
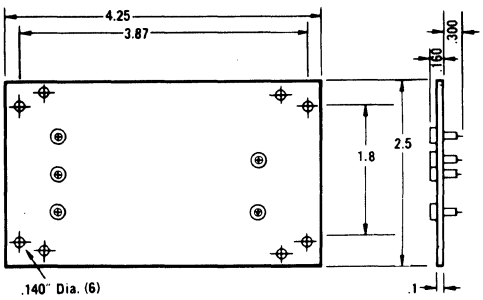
ACCESSORY SOCKETS

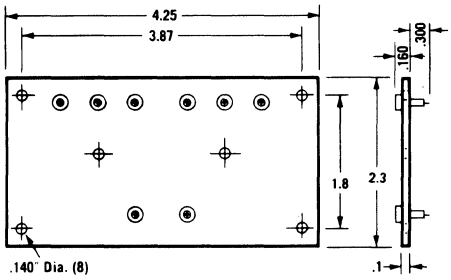
Each of these sockets has a sturdy phenolic base with gold plated teflon-insulated contacts.



Model ES-1 (for case size ES-10).....$15.00 ea.



Model EL-1 (for case sizes EL-10, EL-13 and EL-20).....$15.00 ea.



Model END-1 (for case size END).....$15.00 ea.

HOW TO ORDER:

Any two of the sections listed below, or two of the same section, can be combined into a multiple-output module. The complete model number is the combination of the two section numbers selected. Note that some sections provide two outputs; combination with a single output section results in a triple-output module.

Example: The combination of sections 6E20D and 15E10D is the Model 6E20D-15E10D. Always assign the lower voltage section first. For pricing purposes, add the costs of the sections selected. Example: The price of the Model 6E20D-15E10D is $52.00 plus $45.00, or $97.00 total.

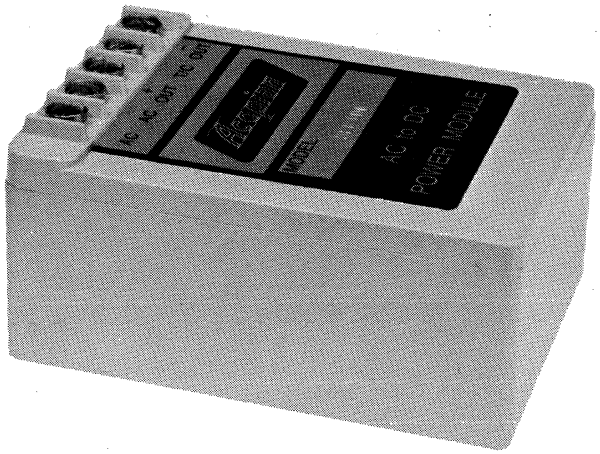
MINIATURIZED REGULATED

Terminal Strip Connections

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED



Although small in size, these mini-modules offer high performance at modest prices. All models, with series regulated outputs ranging from 1 to 75 volts and as high as 2.5 amps, may be mounted in an area only 3.5″ x 2.5″. Dual output models are available with the ratings commonly required for driving op amps and other balanced loads. Terminal strip input/output connections eliminate all need for sockets or soldering. Short circuit protection, encapsulated construction, and conservative design assure long term reliability.

STANDARD FEATURES

- May be used in series
- No derating or heat sinking required
- Short circuit protected
- Small, lightweight

SPECIFICATIONS

Input Voltage: 105–125 VAC, 47 to 420 Hz, single phase.

Output Specifications: See tables.

Output Voltage Trim Adjustment: Outputs factory preset to ±2% (1 to 9 volt models) or ±1% (10 to 75 volt models) of nominal output voltage. Single output models may be trimmed to the nominal voltage rating with an external trim resistor.

Polarity: Either positive or negative terminal of a single output module may be grounded. Dual output modules have a positive/common/negative output terminal configuration.

Ambient Operating Temperature: −20 to +71°C. (Model 5EB150, 0 to +71°C.) No derating required.

Storage Temperature: −55 to +85°C.

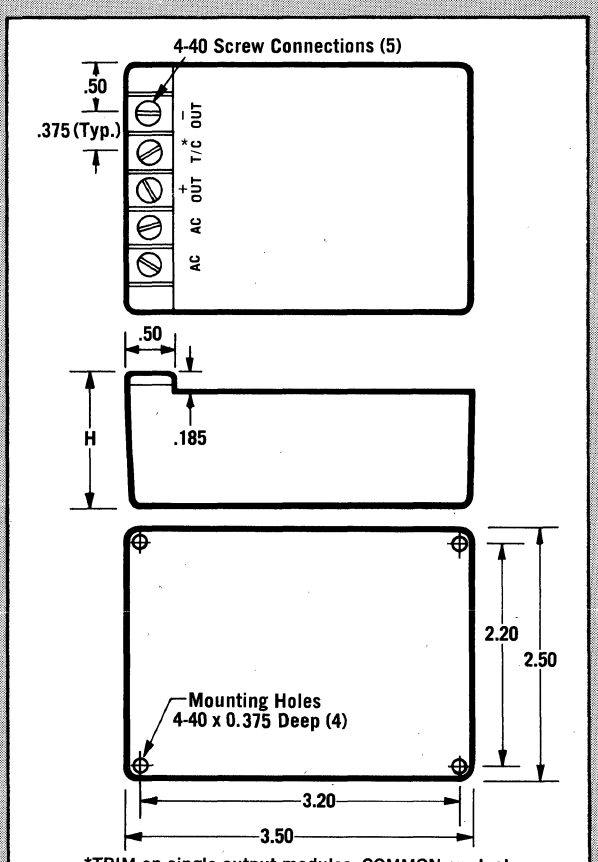
Temperature Coefficient: From 9 to 75 volts, approximate TC is .015%/°C; 1 to 8 volts, .03%/°C.

Impedance: 0.07 ohms at 1 kHz and 0.2 ohms at 10 kHz (approx.).

Optional 230 Volt Input: All models can be alternately furnished for operation on an input of 210 to 250 VAC, 47-420 Hz. To order, add suffix "–230" to model number and $10.00 to price.

High voltage displays such as NIXIE* indicators may be powered with the Model NX-25B or NX-50B. With an input of 115 VAC 47-420 Hz, they provide nominal (unregulated) outputs of 185 VDC.

*Registered trademark of Burroughs Corp.



*TRIM on single output modules; COMMON on duals

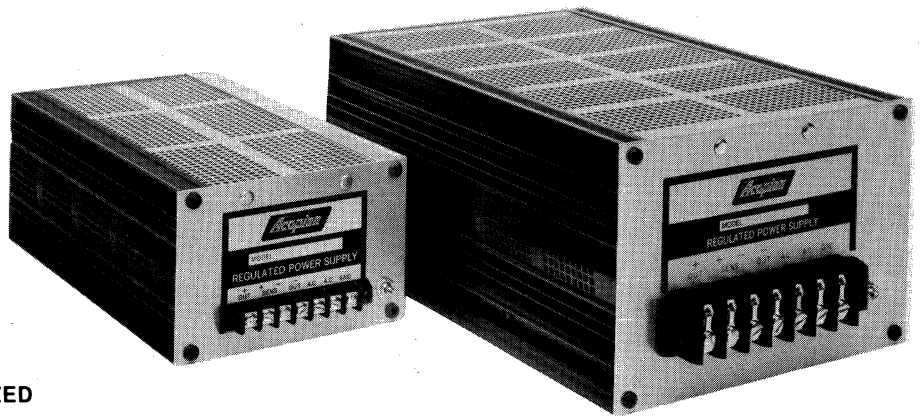
SERIES A REGULATED HIGH PERFORMANCE

SERIES B REGULATED GENERAL PURPOSE

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED



A broad selection of power supplies offering unusually high performance – many models have regulation of ±0.005%. Electronic current limiting and provision for remote voltage sensing are standard features; overvoltage protection is available as a built-in option. Rugged extruded aluminum cases include threaded mounting holes on bottom, back, and side, permitting mounting in any position.

SERIES A HIGH PERFORMANCE POWER SUPPLIES

STANDARD FEATURES

- Provision for remote sensing and/or external output adjustment
- Short circuit proof with automatic recovery (electronic current limiting)
- Can be mounted on any of three surfaces (case sizes H8, H11 and H16, two surfaces)

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 12 and 13. Series A supplies have model numbers beginning with the letter A.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load line are compensated, is a standard feature.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −20 to +71°C.

Storage Temperature: −55 to +85°C.

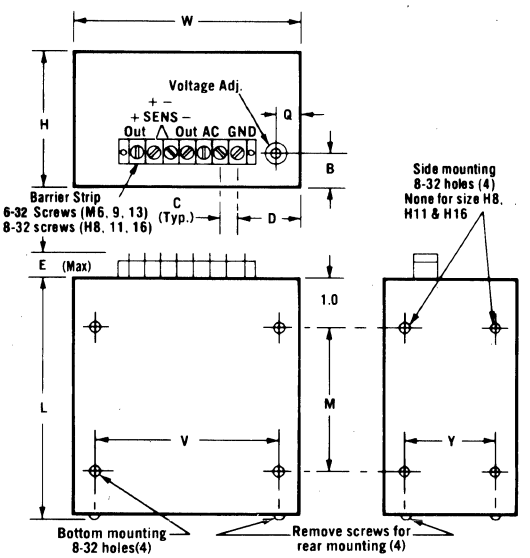
Response Time: Less than 20 microseconds.

OPTIONS

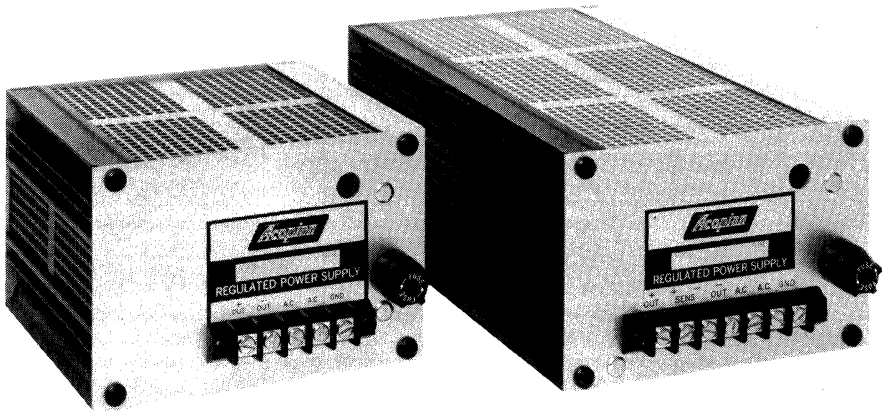
Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number, and increase standard price as follows:

For all case sizes except H16: $25.00
Case size H16 ..... 75.00

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price. (For models in case sizes H8, H11 and H16, add $40.00.)



Size	L	W	H	M	V	Y	E	Q	B	C	D	Approx. Weight
M6	6.59	5.12	3.44	4.0	4.5	3.0	.58	.5	.75	.375	1.44	4lb 4oz
M9	9.25	5.12	3.44	6.0	4.5	3.0	.58	.5	.75	.375	1.44	7lb 4oz
M13	13.25	5.12	3.44	10.0	4.5	3.0	.58	.5	.75	.375	1.44	11lb
H8	8.75	7.37	5.12	6.0	6.75	4.56	.78	1.12	1.25	.562	2.25	15lb 8oz
H11	11.25	7.37	5.12	8.0	6.75	4.56	.78	1.12	1.25	.562	2.25	18lb 4oz
H16	16.00	7.37	5.12	11.0	6.75	4.56	.78	1.12	1.25	.562	2.25	26 lb



These versatile supplies are ideal for powering digital circuitry, test sets, instrument bridges, and process control transmitters. Many models have regulation of ±0.1% or better. All components are generously derated to insure a long and trouble-free life. And they use the same rugged construction as the Series A line. Overvoltage protection and other options are available.

SERIES B GENERAL PURPOSE POWER SUPPLIES

STANDARD FEATURES

- Short circuit proof (electronic current limiting)
- May be mounted on any of three surfaces
- Completely serviceable

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See pages 12 and 13. Series B supplies have model numbers beginning with the letter B.

Remote Voltage Adjustment/Sensing: Available as an option. See below.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: 0 to +71°C.
Storage Temperature: −55 to +85°C.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 volts. To order, add prefix "V" to the model number and add $25.00 to the standard price.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, so that drops in the load lines are compensated, is available on all models. (This option also permits the use of an externally located potentiometer to adjust output voltage.) To order, add prefix "R" to the model number. No increase in price.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price.

Acopian

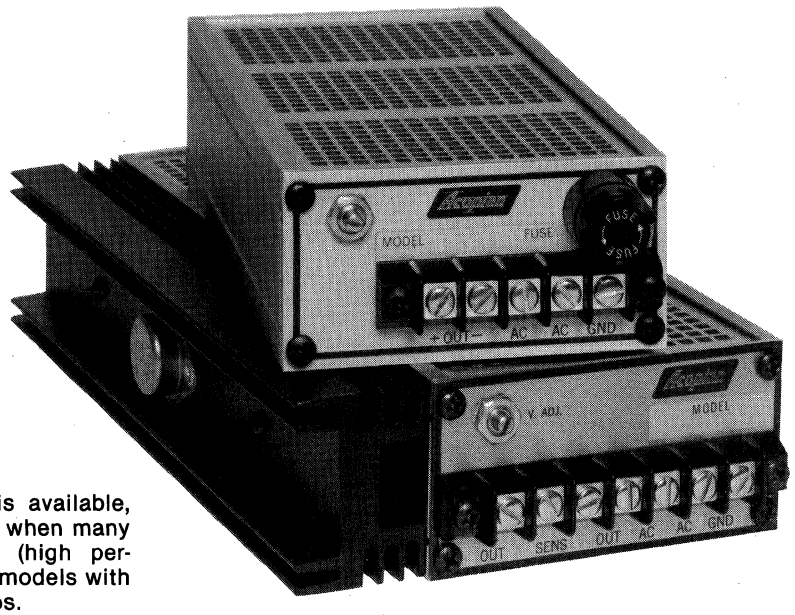
NARROW PROFILE REGULATED



SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Where only a narrow mounting space is available, Acopian narrow profile power supplies fit when many others cannot. Choose from Series A (high performance) and Series B (general purpose) models with output ratings up to 150 volts, up to 3.5 amps.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Specifications: See table. Series A supplies have model numbers beginning with the letter A; Series B, with the letter B.

Remote Voltage Adjustment/Sensing: Standard in Series A, not available in Series B.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: Series A, −20 to +71°C; Series B, 0 to 71°C.

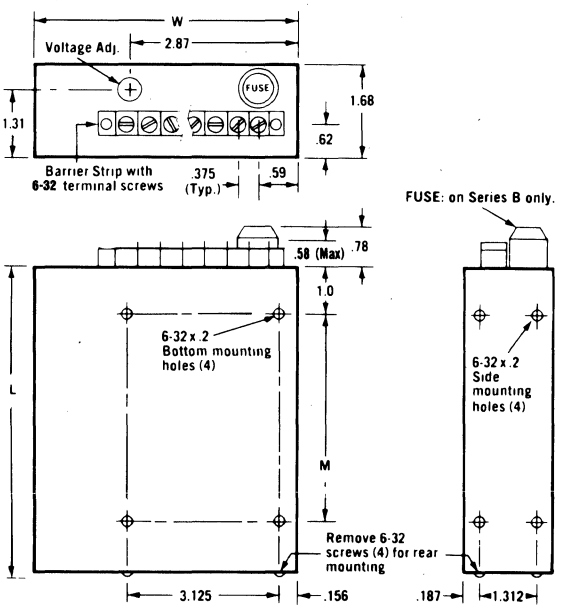
Storage Temperature: −55 to +85°C.

Short Circuit and Overload Protection: Series A, electronic current limiting with automatic recovery; Series B, fused—delivers current surges without damage.

OPTIONS

Overvoltage Protection: An internal preset overvoltage protector is available on all models with outputs of 3 to 70 V. To order, add prefix "V" to the model number and add $25.00 to the standard price.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price.



Size	L	W	M	Approx. Weight

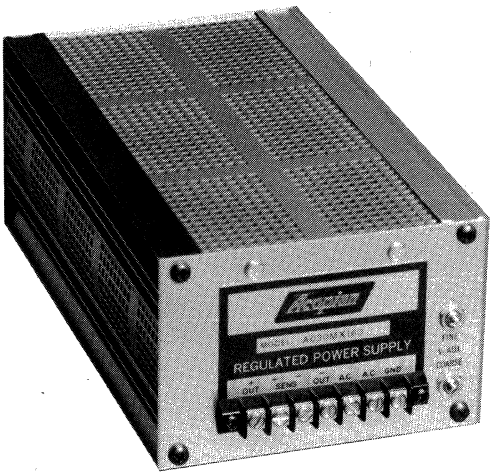
BROAD ADJUSTMENT RANGE

Adjustable Current Limiting

SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED



Power supplies with the broad adjustment capability required for analog instrumentation and circuitry, electronic system development; basic research, and similar applications.

For applications requiring a constant current or adjustable current limiting, a power supply with a true constant current characteristic, such as those with model numbers beginning with the letter P, should be used.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Regulation, Ripple (constant voltage operation):
Line Regulation: ±0.005% or 2 mv, whichever is greater.
Load Regulation: ±0.005% or 2 mv, whichever is greater.
Ripple: 0.25 mv rms.

Regulation, Ripple (constant current operation):
Line Regulation: ±0.1% or 2 ma.
Load Regulation: ±0.2% or 5 ma.
Ripple: 0.1% rms.

Remote Voltage Sensing: Provision for sensing the output voltage across the load, to compensate voltage drops in output wiring, is a standard feature.

Remote Voltage Programming: The output voltage of all models may be controlled by means of external resistance connected in series with the −S lead.

Voltage Programming Coefficient: See table. Calibration tolerance, ±2%.

Current Limiting: Models with fixed current limiting have a foldback-type characteristic with automatic recovery. All others have current limiting with a constant-voltage/constant-current crossover characteristic.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature Range: −20 to +71°C.
Storage Temperature Range: −55 to +85°C.

OPTIONS

Remote Current Limiting Adjustment: All models having numbers beginning with the letter P have a built in (front panel) current limit control. Provision for control of the current limit setting by adjustment of an external resistance is available as an option. To order, add the prefix letter "E" to the model number, and add $10.00 to the standard price.

The current limit setting is inversely related to resistance. Use a 200 ohm ½ W potentiometer.

Overvoltage Protection: An internally mounted overvoltage protection circuit, fixed set approximately 20% above the maximum output voltage rating of the supply, is available on all models with maximum outputs of 60 volts or less. To order, add prefix "V" to the model number, and increase standard price by $25.00. (For models in case size H16, add $75.00.)

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to model number and $25.00 to price. (For models in case sizes H11 and H16, add $40.00.)

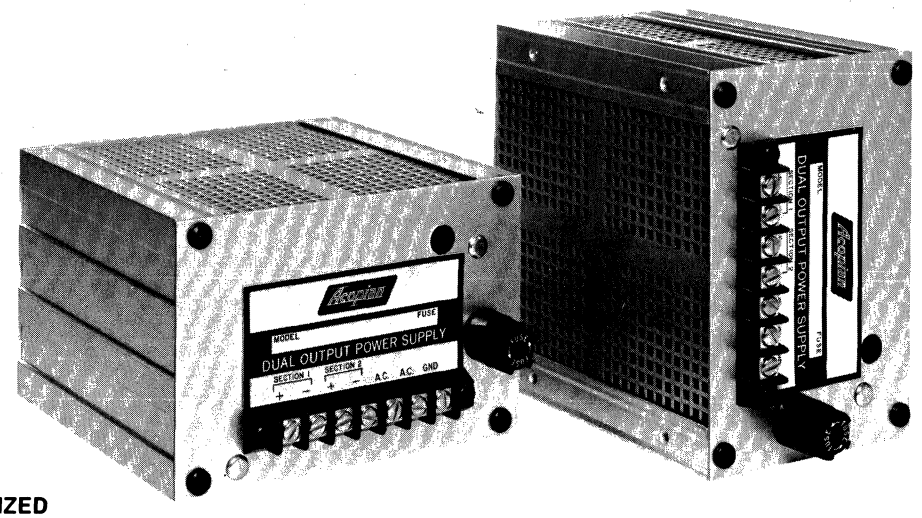
DUAL OUTPUT General Purpose



SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Acopian general purpose duals furnish two completely independent outputs, either identical or different, in less space and at less cost than two equivalent single output supplies. Thousands of output voltage/current rating combinations are available. Mounting and system wiring are simplified. Quality components, generously derated, insure long-term reliability.

HOW TO ORDER: Select two sections from one of the three tables on page 17. The complete model number is the combination of the two sections selected. Example: The combination of section 5GT20D and section 8GT50D is Model 5GT20D-8GT50D. Always assign the lower voltage section first. For pricing purposes, add the cost of the individual sections selected.

SPECIFICATIONS

Input Voltage: 105—125 VAC, 50—400 Hz, single phase.

Output Specifications: See page 17. No derating required through ambient temperature range of −10 to +71°C.

Short Circuit Protection: Delivers current surges without damage—built-in fuse protects supply against prolonged overloads and shorts.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

Ambient Operating Temperature: — 10 to + 71°C.

Storage Temperature: —55 to + 85°C.

Dimensions and Weight: Case size G5D.

OPTIONS

Overvoltage Protection: Two separate, preset overvoltage protection circuits, one for each output. To order, add prefix "V" to model number and add $30.00 to the standard price. Not available for outputs over 70 V.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210-250 VAC, 50-400 Hz. To order, add suffix "-230" to the model number and $25.00 to the standard price.

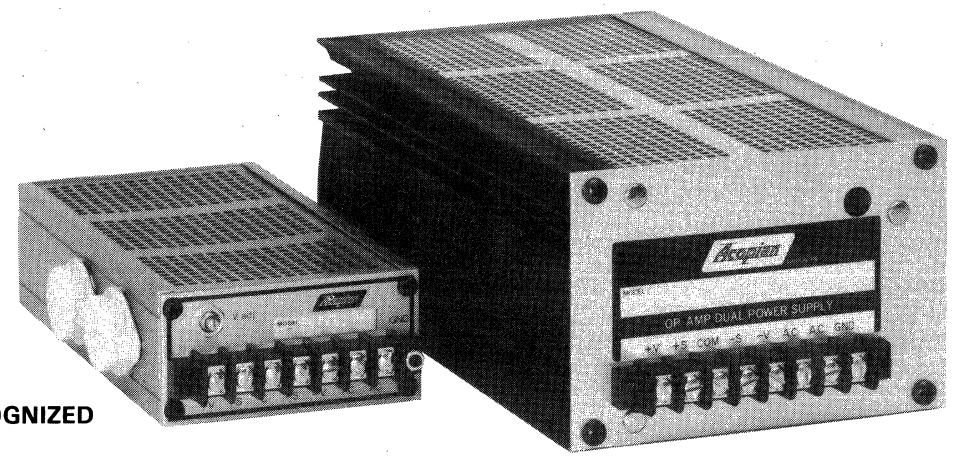
DUAL OUTPUT For Op Amps



SHIPPED IN 3 DAYS

ALL MODELS U.L. RECOGNIZED

Series D dual output power supplies are a convenient source of the tracking voltages required for powering operational amplifiers and related circuits. Their positive/common/negative output terminal configuration minimizes system wiring. Provision for remote sensing permits compensation of load line effects. Although moderately priced, they are sturdily constructed and conservatively rated.

SPECIFICATIONS

Input Voltage: 105–125 VAC, 50–400 Hz, single phase.

Output Voltages: Tracking within 1%. } See tables. Outputs are short circuit protected.

Output Currents: }

Output Voltage Adjustment Ranges: }

Load Regulation: ±0.1%.

Line Regulation: ±0.1%.

Ripple: 1.5 mv RMS.

Polarity: Positive output, common, and negative output.

Remote Voltage Sensing: Standard.

Ambient Operating Temperature: −10 to +71°C.

Storage Temperature: −55 to +85°C.

Size and Weight: See drawing on page 16.

OPTIONS

Overvoltage Protection: A built-in preset overvoltage protection circuit is available on all models. If either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and increase standard price by $30.00.

230 Volt Input: All models can be alternately furnished for operation on inputs of 210–250 VAC, 50–400 Hz. To order, add suffix "-230" to model number and $25.00 to price.

***Connections:** (Supplies for Op Amps)

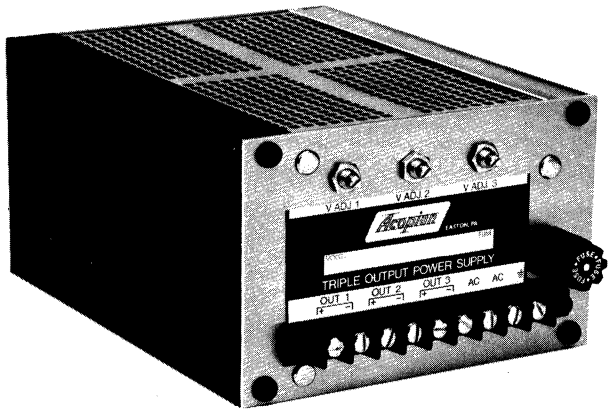
TRIPLE OUTPUT For Microprocessors Isolated Outputs



SHIPPED IN 3 DAYS

Triple isolated output power supplies provide the features and characteristics of three supplies in one compact, easy-to-use package. They are available in the voltage combinations most frequently required for driving microprocessors and associated circuitry.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Output Specifications: No derating required through ambient temperature range of −10 to +60°C.

Polarity: Outputs are floating. Each output may be independently connected to provide any combination of positive and negative voltages. Outputs may be floated up to 300 V above ground.

Ambient Operating Temperature: −10 to +60°C.

Storage Temperature: −55 to +85°C.

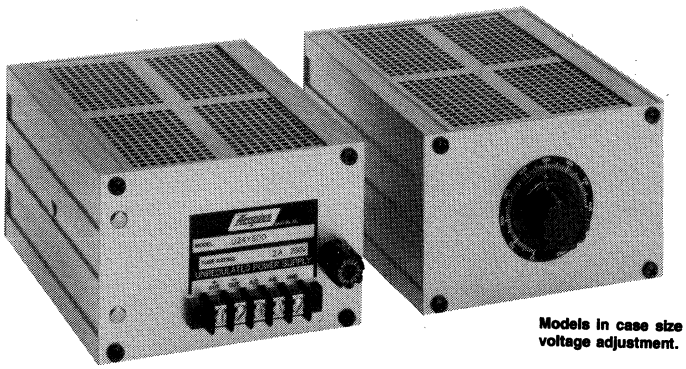
SERIES U UNREGULATED

SHIPPED IN 3 DAYS

U.L. RECOGNIZED



Models in case size YA have output voltage adjustment.

Low-cost DC power suitable for driving loads such as lamps, relays, and small motors is provided by Series U unregulated power supplies. All components are generously derated, insuring a long and trouble-free life; built-in fusing prevents damage due to prolonged overloading or short circuits. Mechanically similar to the regulated supplies shown on pages 8 and 9, they are housed in extruded aluminum cases which can be mounted in any position. Many models are U.L. Recognized.

STANDARD FEATURES

- Capacitive filtering
- Fused input
- May be used in series or parallel
- No derating or heat sinking required
- Completely serviceable

SPECIFICATIONS

Input Voltage: 0-125 VAC, 50-400 Hz, single phase.

Output Voltage:
Output Current: } See table
Ripple:

Output Voltage Adjustment: Adjustable voltage models are provided with a built-in continuously adjustable autotransformer.

Load Regulation: The nominal output voltages of fixed output models, and the maximum rated output voltages for models with adjustable outputs, are based on 115 VAC input with approximately one-half load. At no load, they will increase by approximately 10%. At full load, they will be reduced by approximately 10%.

Line Regulation: Output voltage change due to line change directly proportional to input change.

Polarity: Output is floating; either positive or negative terminal may be grounded or floated up to 300 V above ground.

Ambient Operating Temperature: −10 to 65°C. No derating required.

Storage Temperature: −55 to +85°C.

Optional 230 Volt Input
Provision for inputs of 0-250 VAC, 50-400 Hz, replacing the standard of 0-125 VAC input voltage range, is available on most models. Contact factory for information.

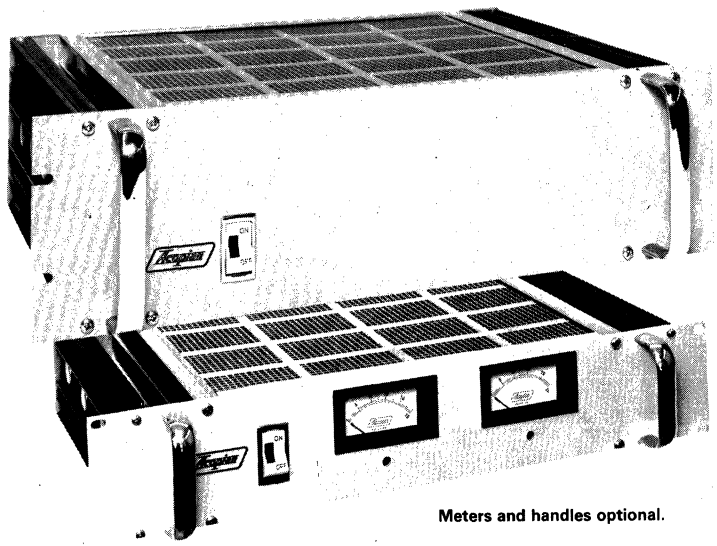
RACK MOUNTING GENERAL PURPOSE

SHIPPED IN 9 DAYS

ALL MODELS U.L. RECOGNIZED



Meters and handles optional.

Acopian rack-mounting power supplies feature excellent regulation and ripple specifications in 102 models with outputs up to 150 volts and 60 amps. Metering and overvoltage protection are available as options. These power supplies are constructed in sturdy extruded aluminum assemblies designed expressly for mounting in standard 19" wide RETMA cabinet racks. The front panels are finished in light gray enamel; sides are black; the remaining casework is finished in gold alodyne.

SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Remote Voltage Sensing: Provision for sensing the output voltage across the load is a standard feature.

Output Voltage/Current:
Line Regulation:
Load Regulation:
Ripple:
Output Voltage Adjustment Range:
} See tables

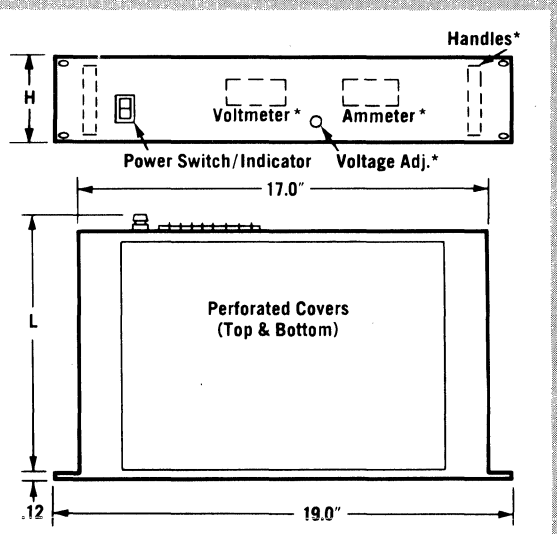
Polarity—Single Output Models: Output is floating; either positive or negative terminal may be grounded or floated up to 300V above ground.

Polarity—Dual Output Models: Positive output, common, negative output.

Storage Temperature: −55 to +85°C.

Ambient Operating Temperature—
Single Output Models: −20 to +55°C.
Dual Output Models: −10 to +55°C.

Short Circuit and Overload Protection: Electronic current limiting with automatic recovery.



*Optional (Option positions shown are for single output models.)

OPTIONS

EXAMPLE: The Model 5PT20 equipped with all options is designated as the Model V5PT20AFHP-230. (List suffix letters in alphabetical sequence.)

Overvoltage Protection: An internally installed and preset overvoltage protector is available for models with outputs of 3 to 70 volts. On dual output models, if either output fails, both outputs are "crowbarred." To order, add prefix "V" to the model number, and $25.00 to the price of models in case size 3P11; $75.00 to the price of models in case sizes 5P12, 3P17 and 5P17.

Metering (Single Output Models):
Ammeter: Add suffix "A" to model number and $35.00 to price.
Voltmeter: Add suffix "F" to model number and $35.00 to price.

Metering (Dual Output Models):
Ammeters: One for each output. Add suffix "A" to model number and $70.00 to price. "A" and "F" options cannot be combined in one power supply.
Voltmeters: One for each output. Add suffix "F" to model number and $70.00 to price. "A" and "F" options cannot be combined in one power supply.
Voltmeter and Ammeter: Each with switch for selecting output to be monitored. Add suffix "G" to model number and $120.00 to price.

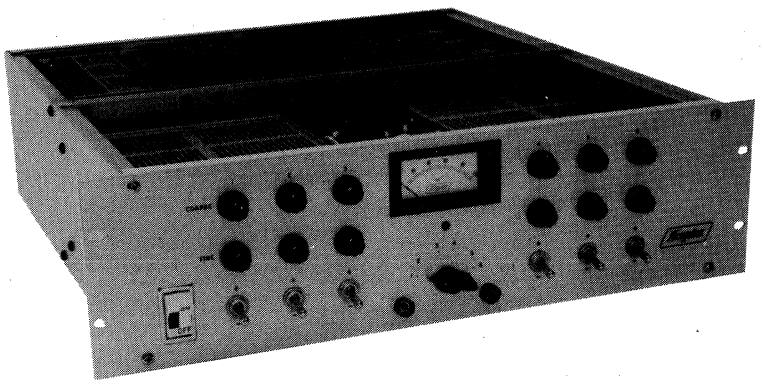
Handles: Add suffix "H" to model number and $25.00 to price.

Front Panel Voltage Adjustment: Standard models have a voltage adjustment located at the rear. A voltage control mounted on the front panel is available as an option. To order, add suffix "P" to the model number and $10.00 to price.

230 Volt Input: For operation on inputs of 210 to 250 VAC, 50-400 Hz. Add suffix "-230" to model number and $40.00 to price.

Acopian

MULTIPLE-OUTPUT POWER SUPPLY SYSTEMS



SHIPPED IN 9 DAYS

Now you can fill your requirements for completely wired multiple-output rack-mounting power supply systems, without any need to search through a catalog and prepare time-consuming mechanical layouts, item-by-item pricing and detailed purchase requisitions. Instead, simply call Acopian and specify the output voltages and currents that you require.

Each system is designed and constructed to provide an optimum mechanical and wiring configuration for the complement of power modules necessary to deliver the outputs specified. Acopian production expertise assures shipment of each system, completely wired and 100% tested, within 9 days after your order is received.

Ordering an Acopian power system is this easy: List the DC outputs that you require. (Or, select the power modules that you wish to be included.) Note the system features which you consider necessary. Then, call Acopian toll-free at (800) 523-9478 and ask for the POWER SYSTEM DEPARTMENT.

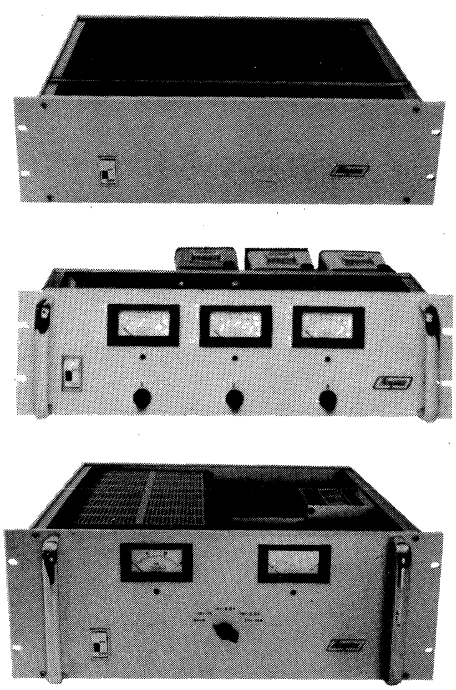
An Acopian Applications Engineer will answer—on the phone—any questions which you may have. A distinctive system model number will be assigned, and a firm price will be quoted. Your completely-wired power supply system will be shipped within 9 days.

System Description

Any of the power modules listed in this catalog can be included in a power system. Commonly required features such as voltmeters, ammeters, front panel controls, handles, and chassis slides can also be provided. The rack assembly will be designed and wired in a manner optimum for the complement of modules and operating features to be included.

Each assembly is constructed from 1/8-inch thick aluminum extrusions. The front panel is finished in oven baked light gray enamel. The rear portion is finished in gold alodyne. Input and output connections are on a screw terminal strip at the rear.

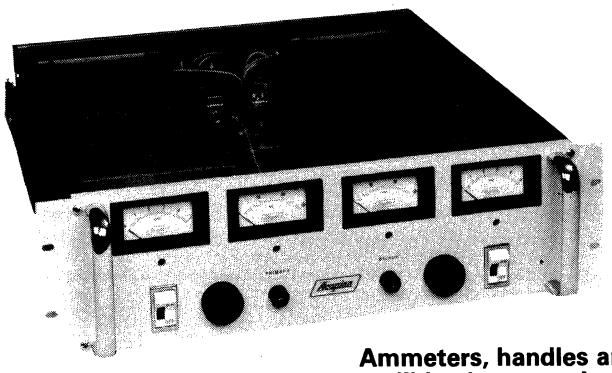
TYPICAL BUILT-TO-ORDER POWER SUPPLY SYSTEMS



Acopian

REDUNDANT OUTPUT POWER SYSTEMS

SHIPPED IN 9 DAYS



Ammeters, handles and audible alarms optional.

A redundant output power system, as its name implies, delivers output power without interruption as long as either power module of the redundant pair is functional. A "backup" supply continues to operate the system while a defective "primary" supply is removed and repaired or replaced.

FEATURES

- Specifically designed to safely permit the rapid replacement of a power supply while the system continues to furnish uninterrupted power to the load.
- Separate ac input power circuit for each power supply, permitting the use of two separate sources of input power.
- Overvoltage protection.
- Provision for control of external failure alarms or indicators (standard), or built-in audible alarms (optional).
- Foldback current limiting with automatic reset.
- Remote voltage sensing.

Redundant output power systems should be considered for any equipment where high reliability is essential and an unexpected loss of power would be disastrous. Such applications include communications systems (both voice and data types); computer systems (volatile memory systems in particular); process controls; utility, transit and municipal systems; and security/safety alarm systems.

Two identical power supplies are interconnected so that the required output is delivered to the load even when one power supply is not functioning. This is accomplished with a diode switching arrangement that senses an abnormal output, isolates it from the load being driven, and substitutes the output of the backup supply. There is no interruption of output power during the transition, or while a power supply is being removed or replaced.

The output voltage of the primary supply is set approximately 0.2V higher than that of the backup supply. Under this condition, the backup supply's diode is not forward biased; only the primary supply delivers current to the load. If the output voltage of the primary supply decreases by more than 0.2V, the situation is reversed and only the backup supply delivers load current.

Each system consists of two modular power supplies in a rack-mounting assembly. Thumbscrew mounting, and insulated connectors in the wiring to each power supply, facilitate the rapid and safe installation or removal of a module from the system without the need for tools. All input/output/alarm-contact connections are at the rear of the assembly. The chassis slide and handle options are recommended for applications where it is desired to service the system without removing it from the rack.

Each power supply contains an overvoltage protection circuit, to assure that the output will not significantly exceed the nominal output voltage rating under any condition, including incorrect application and misadjustment. Each supply also has a voltage monitor circuit that operates a relay, the contacts of which are available to control external failure alarms or other circuitry. The contact wiring of the two relays is connected in cascade, to simulate a single set of Form C contacts which switches if the output voltage of either power supply decreases by more than 2.0V (3.0V for outputs over 48V) from the nominal rating.

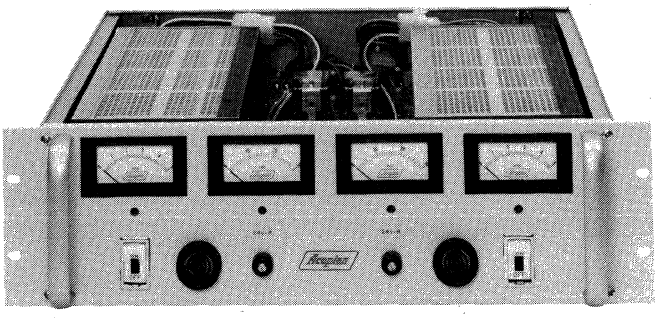
REDUNDANT OUTPUT POWER SYSTEMS



SHIPPED IN 9 DAYS

Ammeters, handles and audible alarms optional.

SPECIFICATIONS

Input Voltage: 105-125 Vac, 50-400 Hz, single phase. A separate set of ac input terminals is provided for each power supply, so that if two sources of ac input power are available, one may be used for each supply and so reduce the possibility of output dropout due to loss of input power.

Output Voltage:
Normal mode — Nominal voltage shown in table.
Backup mode — 0.2V less than nominal voltage shown in table.

Output Regulation:
Line — ±0.05%.
Load — ±0.05%. (Dynamic regulation — does not include 0.2V shift which occurs during switchover to lower-set backup supply.)

Output Ripple: 1 mV rms.

Load Protection: Foldback current limiting with automatic reset, and overvoltage protection.

Polarity: Output is floating; either positive or negative output terminal may be grounded or floated up to 300V above ground.

Voltage Monitor Circuits: One for each power supply. Relay contacts switch when output voltage decreases by more than 2.0V from the nominal rating (3.0V for outputs over 48V), and may be used to control an external failure alarm.

Output Metering: Two voltmeters (standard). Ammeters available; see Options.

Ambient Operating Temperature Range: −20 to +71°C.

Storage Temperature Range: −55 to +85°C.

Assembly Size:

3R14	3½″ x 19″ panel, 14⅛″ deep. (15 lbs.)
5R14	5¼″ x 19″ panel, 14⅛″ deep. (23 lbs.)
5R18	5¼″ x 19″ panel, 17¾″ deep. (29 lbs.)
7R18	7″ x 19″ panel, 18½″ deep. (50 lbs.)
7R20	7″ x 19″ panel, 20½″ deep. (64 lbs.)

Assembly Finish: Front panel finished in light gray baked enamel. Remainder finished in gold alodyne.

OPTIONS

Add option suffixes in alphabetical order. Example: R5H16AH-230.

Ammeters: One for each output. (For models in case size 3R14, two volt/ammeters, each with switch, are substituted for the standard voltmeters.) Add suffix letter "A" to model number and $70.00 to system price.

Audible Alarms: Piercing whistle alerts personnel to a voltage lower than normal. Front panel mounted, one for each power supply. Systems with this option do not have provision for control of an external alarm. To order, add suffix "K" to model number and $70.00 to system price.

Handles: Add suffix "H" to model number and $25.00 to price.

Slides: For racks having rear mounting rails spaced 20″ to 22″ behind the front panel. To order, add suffix "S" to model number and $75.00 to price.

230 Volt Input: For operation on inputs of 210-250 Vac, 50-400 Hz. To order, add suffix "-230" to model number and $75.00 to system price.

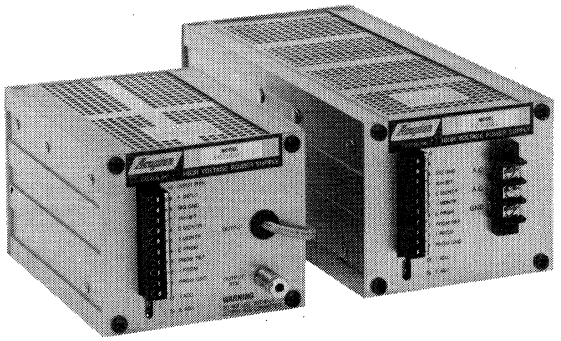
HIGH VOLTAGE To 0-30 kV AC and DC Input

SHIPPED IN 9 DAYS



These modular high voltage supplies may be used as constant voltage or constant current sources. They may be remotely programmed by means of either voltage or resistance, and have provisions for remote monitoring and output inhibiting. All control and monitoring connections are on a pluggable terminal block that functions as a connector, providing wiring convenience and permitting easy and rapid connect/disconnect. Outputs are arc/short circuit protected.

GENERAL SPECIFICATIONS

Output Polarity: Positive output is standard. For negative output, change first letter of model number from P to N.

Regulation (constant voltage operation):
Line: ±0.05%
Load: ±0.05%

Regulation (constant current operation):
Line: ±0.1%
Load: ±0.1% plus 50 μA.

Ripple: 0.05%, peak-to-peak.

Output Controls: Voltage and current may be controlled by means of two 20-turn front panel adjustments, or by using remotely located 1000 ohm potentiometers.

Output Programming: Output voltage and current may be programmed from 0 to full rating by means of control voltage inputs of 0 to +5.1 Vdc.

Voltage Monitor Terminal: Permits monitoring output voltage, stepped down by ratio shown. Accuracy, 2%.

Current Monitor Terminal: Permits monitoring output current at mV-per-mA ratio shown. Accuracy, 2%.

Inhibit Terminal: Grounding inhibits output.

Input Protection: "Soft start" circuit minimizes startup power stresses.

Output Protection: Current regulation circuit protects power supply from short circuits, overload, and arcing.

Efficiency: Greater than 70% at full load.

Response Time: Less than 5 mS for 100 μA load step change.

Stability: 0.05% over eight hours, after 30 minute warmup.

Temperature Coefficient: 0.02%/°C (Typical).

Ambient Operating Temperature: −10 to +60°C. No derating required.

Storage Temperature: −20 to +85°C.

Humidity: Maximum of 90% relative, non-condensing.

AC INPUT MODELS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.

Input Current:
Case Size HA349: 0.6A.
Case Size HA359: 1.2A.

Connections: 24″ flying lead for high side of output and 5-way binding post for return (ground) are at the rear. Ac input connections on separate terminal strip. All other connections on pluggable terminal block.

Optional 230 Volt Input: For operation on inputs of 210-250 VAC, 50-400 Hz, single phase. To order, add suffix "-230" to model number and $40.00 to price.

DC INPUT MODELS

Input Voltage: +21.6-32.0 VDC.

Input Current:
Case Size HD345: 1.9A @ 21.6V, 1.3A @ 32.0 VDC.
Case Size HD355: 3.7A @ 21.6V, 2.6A @ 32.0 VDC.

Connections: 24″ flying lead for high side of output and 5-way binding post for return (ground). All other connections on pluggable terminal block.

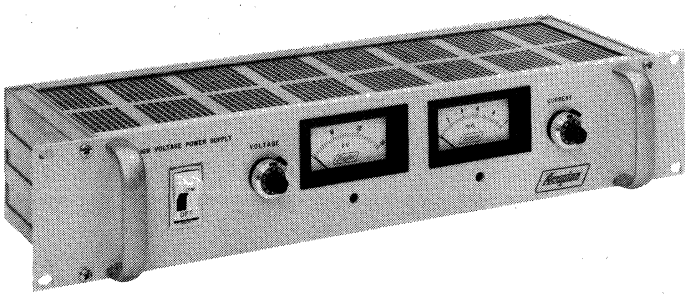
HIGH VOLTAGE Rack Mounting



SHIPPED IN 9 DAYS

Ideal for laboratory and instrumentation applications, these rack mounting supplies have the same output ratings and specifications as the modular supplies shown on pages 28 and 29, but additionally feature calibrated ten-turn controls (with locking vernier dials) for precisely setting voltage and current. Voltmeter and ammeter are standard. An 8' long shielded output cable is included.

GENERAL SPECIFICATIONS

Input Voltage: 105-125 VAC, 50-400 Hz, single phase.
Input Current:
30 watt output ratings: 0.6A
60 watt output ratings: 1.2A
Output Polarity: Positive output is standard. For negative output, change first letter of model number from P to N.
Regulation (constant voltage operation):
Line: ±0.05%
Load: ±0.05%
Regulation (constant current operation):
Line: ±0.1%
Load: ±0.1% plus 50 µA.
Ripple: 0.05%, peak-to-peak.
Output Controls: Voltage and current may be controlled by means of two 10-turn front panel adjustments with locking vernier dials. Control linearity, 1% of full rated output. Calibration accuracy, 1% of rated output plus 1% of setting. (Remotely located 1000 ohm potentiometers may alternately be used for output control.)
Output Programming: Output voltage and current may be programmed from 0 to full rating by means of control voltage inputs of 0 to +5.1 Vdc, ±2%.
Metering: Voltmeter and ammeter are standard. Accuracy, 2%.
Voltage Monitor Terminal: Permits remote monitoring of output voltage, stepped down by ratio shown. Accuracy, 2%.
Current Monitor Terminal: Permits remote monitoring of output current, at mV-per-mA ratio shown. Accuracy, 2%.
Inhibit Terminal: Grounding inhibits output.
Output Protection: Current regulation circuit protects power supply from short circuits, overload, and arcing.
Response Time: Less than 5mS for 100 µA load step change.
Stability: 0.05% over eight hours, after 30 minute warmup.
Temperature Coefficient: 0.02%/°C (Typical).
Ambient Operating Temperature: −10 to +60°C. No derating required.
Storage Temperature: −20 to +85°C.
Humidity: Maximum of 90% relative, non-condensing.
Connections:
Input, Control and Monitoring: Screw terminals.
Output: High voltage connector (Type varies with model number). An 8' shielded output cable, with mating connector installed, is provided.
Optional 230 Volt Input: For operation on inputs of 210-250 VAC, 50-400 Hz, single phase. To order, add suffix "-230" to model number and $40.00 to price.

E_{OUT} Nom. kV	I_{OUT} Max. mA	Model No.	Features, Specifications and Options
200V	15.0	DRF 325	Miniature, fully regulated DC to DC converter with 0.05% line and load regulation. Has remote programming capability. 3 watts output. Shielded, RFI decoupled. **Input:** 28 VDC. **Output Adjustment Range:** -30% to +10%. **Ripple:** 0.1% P-P. **TC:** 100 ppm. **Operating Temperature:** -10°C to +65°C. **Dimensions:** 3.0" x 1.5" x 0.6" (Flange length is 3.625".) **Weight:** 4 oz.
400V	7.5	DRF 335	
600V	5.0	DRF 345	
800V	3.7	DRF 355	
1.1	3.0	DRF 365	
1.5	2.0	DRF 375	
2.0	1.5	DRF 385	
3.0	1.0	DRF 405	
200V	30.0	ARM 016	Line operated, 6 watt supply for photomultiplier and similar applications. Units are shielded, serviceable, short circuit proof and light weight. Input and output are RFI decoupled. Standard adjustment range is -30% to +10%. **Input:** 117 VAC, 50 to 400 Hz. **Regulation (L/L):** 0.02%, (better with less than 0 to full load changes). **Ripple and Noise:** 0.02%. **Operating Temperature:** -10°C to +65°C. **Size:** 3.04" x 2.60" x 4.23". **Weight:** 32 oz. **Options:** Negative output (-01), wide adjustment range (-04), remote program (-05).

300V	50.0	DRM 1291	Fully regulated High Voltage Module, 15 or 30 watts output. Output adjustment +10%, -30%. Short-circuit proof. HV return may be floated to 500 volts from chassis. Magnetically shielded. Serviceable. **Input:** 28 VDC. **Regulation (L/L):** 0.1%. **Ripple:** 0.1% P-P. **TC:** 100 ppm. **Operating Temperature:** -20°C to +65°C. **Size** 2.34 x 2.7 x 3.77 (to 5 KV), 3.04 x 3.54 x 4.84 (over 5 KV). **Options:** Negative output (-01), wider adjustment range (-04), remote program (-05), 30 watts output power (-19), 15 volts input (-33). Units also available with other voltages from 2.2 volts (filament supplies) to 24 KV. Other options.

18	0.8	DRM 205	
22	0.6	DRM 215	
1.0	15.0	DUM 054	28 VDC operated High Voltage Modules similar to DRM series above, except HV output is not in the regulation loop. This allows floating HV option with only 30 to 40 pf capacitance to input. More economical than DRM series where the higher internal impedance can be tolerated. Input regulation, ripple and other data per DRM series. Also available with other output voltages, from 2.2 volts (filament supplies) to 22 KV.

1.0	80.0	NRL 602	Medium power DC to DC High Voltage Converter, 80 or 160 watts. **Input:** 24 to 32 VDC. **Outputs:** to 30 KV. Adjustable constant voltage/constant current operation. Units can be paralleled for higher power. Remote program of voltage and current. **Standard Adjustment Range:** +10%, -30% of rated output voltage. Efficiency better than 70%. Optional buffered metering outputs, voltage and current. **Operating Temperature:** -20°C to +65°C **Ripple:** 0.1% P-P. **Regulation (L/L):** 0.1%. **Size:** 4.75 x 4.75 x 5.0 inches. **Weight:** approx. 6 lbs. 160 watts output, option (-19). Other options, see next block.

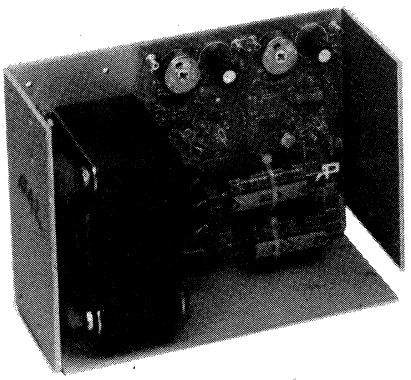
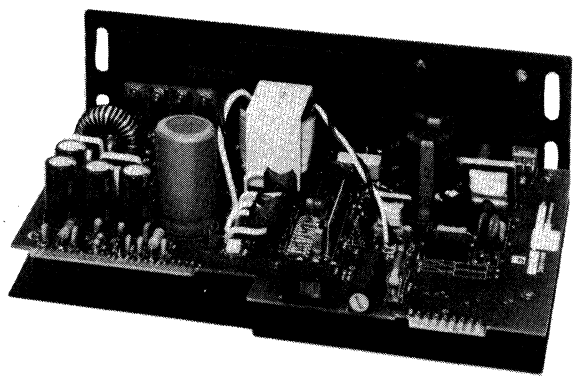
Adtech Power Incorporated

STANDARD AND CUSTOM LINEAR POWER SUPPLIES UP TO 300 WATTS



STANDARD & CUSTOM SWITCH MODE POWER SUPPLIES 50 TO 1500 WATTS



Products manufactured by Adtech Power include; AC to DC single and multiple output switch mode supplies up to 1500 watts, both voltage and current mode, for current sharing and N + 1 redundancy; DC to DC switch mode supplies up to 300 watts output; linear supplies for low noise applications and a series of Battery back-up power supplies.

Besides the standard power supplies in the Adtech Catalog, Adtech Power would be pleased to quote a custom design to meet your exact requirements.

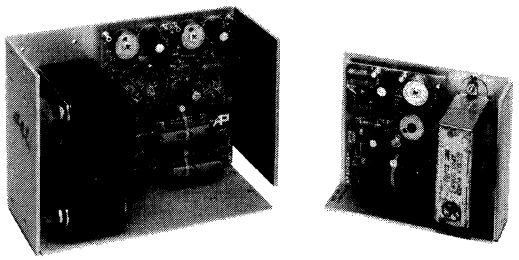
ADTECH POWER

Adtech Power Incorporated

Single, Dual and Triple Output Industry Standard Linear Power Supplies



- ☐ Industry Standard Package Sizes
- ☐ 2 Year Warranty
- ☐ Approx. 20% more heat sink area than competition

Specifications

AC Input: 115/230 VAC ± 10% 47-63HZ no derating required for 50 Hz input.
DC Output: See tables
Regulation: 0.1% for ± 10% line change 0.1% no load to full load
Ripple: 3mV p.p. 5 to 15 V models, 5mV pp 24 to 48V. models, 0.02% pp 60-250V models
Stability ± 0.2% for 24 hrs after 30 min warm up
Transient Response: Output recovers to the regulation band width in 50µS. after an instantaneous 50% load change.
Operating Temperature range: 0 to 65°C (Derate 2%/°C above 50°C) (above 40°C for 60V and greater)
Storage Temperature Range: −20°C to +80°C.

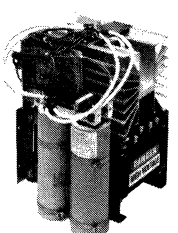
High Power • 300, 600 & 1200 watts • SCR Regulated Power Supplies • Brute Series

- ☐ Greater than 75% efficiency
- ☐ Remote Sensing.
- ☐ Constant Voltage/Constant Current/ Automatic Crossover
- ☐ 2-25 VDC or 5-50VDC. Adjustable
- ☐ ALL MODELS
  Built in inductance/capacitor filter provides low noise.



Mechanical Specifications

DIM.& Wt. Model	Length ins	Width ins	Height ins	Weight lbs
Brute I	11.00	7.66	6.75	20
Brute II	12.00	7.66	6.75	30
Brute III	14.00	11.12	10.00	70

Specifications:

AC Input: 105-130/210-260 VAC 47-63 Hz
DC Output: Brute I, II & III 2-25VDC OR 5-50VDC at 12A/6A, 24A/12A, 50A/25A respectively
Regulation: Line & Load ± 0.1% or 50mV
Ripple: 1% or 500mV rms max
Operating Temperature range: 0 to 55°C Convection cooled. Derate 25% at 65°C

Options:

Ten turn fine volt adjust.
50% Ripple reduction kit
OVP
Circuit Breaker

Adtech Power Incorporated

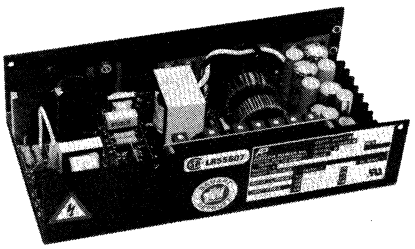
Single and Multiple Output 250 to 400 Watt Switch Mode Power Supplies

- Customized Standards 5-24VDC/5-48VDC Outputs Customer Selects Adtech Builds
- Soft-Start Circuitry
- High Efficiency/High Reliability Mag Amp Outputs
- Protection against overvoltage, overloads, reverse voltage, short circuits, over temperature and high or low line conditions.



- High Power Density
- International Safety Standards. UL1950, CSA 22.2 No. 154-1983, Bulletin 1402, VDE 0806/IEC 380-Class 1 SELV
- Hybrid Control Circuit
- Built-In FCC/VDE E.M.I. filter
- International Power Inputs (External Field Selectable): 90VAC-132VAC or 180VAC-264VAC

Output Voltage/Current Ratings

MODEL PREFIX[1]	OUTPUTS	OUTPUT 1	OUTPUT 2	OUTPUT 3	OUTPUT 4	OUTPUT 5	TOTAL POWER[2]
CS2401	1	5 TO 48V UP TO 50A					250 W
CS2404	4	5 TO 48V UP TO 50A	5 TO 48V UP TO 15A	+5 TO 24V UP TO 5A	−5 to 24V UP TO 5A		250 W
CS2405	5	5 TO 48V UP TO 50A	5 TO 48V UP TO 15A	+5 TO 48V UP TO 15A	+5 TO 24V UP TO 5A	−5 TO 24V UP TO 5A	400 W

NOTES:
1. Consult factory for specific model number according to output voltages selected.
2. Total Power with 300 LF/M Air. Derate 20% for convection cooling.

Specifications:

AC Input Range:
90-132 or 180-264VAC 47-440Hz Single Phase.
Inrush Current:
Less than 50A peak thermistor limited for units that have been off for at least 30 minutes.
Undervoltage Protection:
Protected against malfunction due to AC undervoltage operation.
Efficiency:
Typically 75% at nominal line, full load.
Turn-On Time:
400 mS Max.
Hold-Up Time:
20 mS. Typical at nominal line, full load.
DC Outputs:
All outputs are adjustable, ±5% min. Output 2 is floating.
Output Regulation:
Line ±0.2% over input range, 90-132 or 180-264VAC. at 100% rated load.
Load ±0.5% all outputs
Cross regulation:
Each output independently regulated and effects do not apply.
Dynamic Response:
All outputs will settle to 1% of output within 400µs after a 25% load step change and will deviate no more than ±2%.
Thermal Regulation: ±0. 2%/°C
Ripple and Noise:
True differential measurement with a 20MHz scope and a ×1 probe 1% or 100mV peak to peak, whichever is greater.
Overvoltage protection:
Standard. Preset at 6.0—6.5V on 5V main output.
Consult factory for other voltages.
Overload Short Circuit Protection:
CS2401 Output 1, CS2404 Outputs 1 & 2, CS2505 Outputs 1,2, & 3 will shut down power supply in short circuit condition. CS2404 Outputs 3 & 4, CS2405 outputs 4 & 5 will go into current fold back under short circuit condition.
Remote Sense:
On Output 1 - compensates for up to 0.5V lead drop.
Operating Temperature Range:
0—50°C ambient with min. of 300LFM of air directed through power supply lengthwise. Derate linearly to 50% at 70°C
Derate 20% for convection cooling.
Power Fail:
A TTL compatible signal flag raises a minimum of 5mS prior to outputs dropping out of regulation; adjustable to 10mS. minimum at full load, nom. line. TTL low or high is selectable on P.C. board, consult factory.

NOTES:
1. Consult factory for specific model number according to output voltages selected.
2. Total Power with 300 LFM Air. Derate 20% for convection cooling.
3. Output floating. Either side may be grounded.
4. For voltage and current combinations not listed above. Consult factory.

Specifications:

AC Input Range: 90-130 or 180-260 VAC 47-63Hz single phase, contact factory for 400Hz input.

Inrush Current: Less than 30A peak incorporating triac independent of temperature.

Undervoltage Protection: Protected against malfunction due to AC undervoltage operations.

Efficiency: Typically 72% at nominal line, full load.

Turn On Time: 200mS max

Hold Up Time: 25mS min at nominal line, full load.

DC Outputs: Main loop and switch mode outputs are adjustable ±5%.

Output Regulation: Line ±0.2% over input range 90-130 or 180-260 VAC at 100% rated load. Load ±0.2% all outputs.

Dynamic Response: Output returns to within 1% in less than 500µS for a 50% load change.

Thermal Protection: Power supply shuts down if overtemperature condition is reached.

Temperature Coefficient: 0.2%/°C.

Ripple & Noise: True differential measurement with a 20MHz scope and a ×1 probe. 1% or 50mVpp whichever is greater.

Overvoltage Protection: Standard preset on main output only.

Overload Short Circuit Protection: All outputs will fold back in overload or short circuit.

Remote Sense: On main output compensates for up to 0.25V per lead drop.

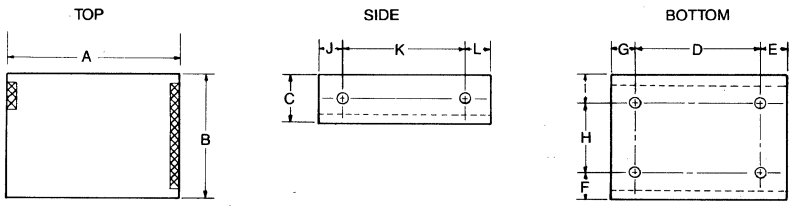
Operating Temperature Range: 0-50°C Full load output with min of 300 LFM of air directed through the power supply lengthwise, derate 20% for convection cooling.

Options:
Power Fail: A TTL compatible signal flag raises a minimum of 5mS prior to outputs dropping out of regulation, adjustable to 10mS min at full load, nom line. TTL hi or lo consult factory.

Remote On/Off: Consult factory.

Cover: Consult factory.

Outline Drawing & Mounting



Input/output connectors are 6/32" screws on terminal blocks.
For Model CS1401 and CS1406, use 6/32" screws on mounting holes.
For Model CS1402, CS1403 use 8/32" screws on mounting holes.

STANDARD CHASSIS DIMENSIONS (inches)

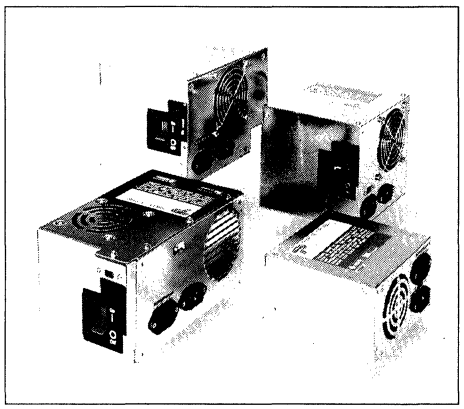
POWER TRONIC



Introducing . . . Power Tronic!

Multi-Output, AC/DC Switch Mode Power Supplies 100-270 Watts

Fully Enclosed • Fan-Cooled • Affordable

The U.S. headquarters of Aslan Computer Corporation, located in Southern California serves the North American OEM market. Our standard and modified-standard products are offered to the market only after they have proven their reliability in hundreds of applications. If you desire a "custom" unit, our in-house application and design engineers are able to provide special features and capabilities that will fit your exact requirements.

Reliability is our No. 1 priority.

Reliability is the single most critical factor in power supplies. It starts with conservative design and temperature cycled life tests. Then we conduct a minimum 24-hour fully loaded temperature cycling burn-in on all units. And we don't stop there. Automated test equipment measures all important parameters in our final ATP. This emphasis on reliability assures you the highest MTBFs in the industry. So if you've been feeling powerless when searching for reliable PC compatible power sources, stop looking. Power Tronic will bring you the power of proven reliability, technological innovation, state-of-the-art design, and all the features you'll find in supplies costing many times more.

Integrated SPC manufacturing capability.

Our automated manufacturing facility is capable of high-volume, low-cost production to meet any customer needs. It assures you of a close adherence to industry standards and current technology, design-through-delivery quality, and a rapid turn-around on customizing. A fully implemented statistical process control (SPC) program is your assurance of continuing process improvement and a company-wide commitment to Total Quality Management.

Total program support.

We maintain engineering and test functions at our California office. That gives us the capability of supporting your program through prototype production. Additional offshore manufacturing capability includes the professional management and equipment necessary for reliable production. Magnetics and coil winding are performed by skilled operators using the latest automatic equipment. Stress screening of components and assemblies is accomplished in-house, including burn-in, vibration, shock and temperature cycling.

We're a partner you can depend on.

If you need a partner to supply you with Hi-Rel, affordable power supplies — or if you want power units built to your exact specifications — please CALL US TODAY. We'll speed you technical data, prices, samples, and design assistance.

We want our customers to keep coming back, not our power supplies.

POWER TRONIC

For PC Compatibles . . . Provides Additional Power For Add-On Cards

All Your Power Supply Needs in One Small, Low-Cost, Reliable Package

Features . . .

- High efficiency
- 90-132/180-264 VAC selectable input
- Low noise and ripple
- Short circuit, overvoltage protection
- Resettable as power shutdown
- Built-in EMI filter
- Line input fused protection
- 100% burn-in full load @ 50° C ambient
- Approved by UL, CSA, and TUV
- Vacuum impregnated transformer
- Active input surge protection (selected models)
- Internal 12 VDC fan
- 100% hi-pot test
- Complies with FCC part 15 subpart J, class B & VDE class B

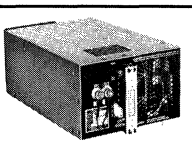
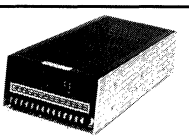
UNINTERRUPTIBLE SWITCHING POWER SUPPLIES UNITS WITH BATTERY BACKUP—DC OUTPUTS

Newly Announced, Most Advanced Design TDS & TDM Off Line Switchers are Available with Battery Backup Feature. Dual Input of 115/230V & 24 VDC or 36 VDC Unit Provide Glitch Free Transfer. Up to 1000W. Up to 3 Outputs. Eliminates the Need for UPS Inverters. Model: **TDS-UPS**

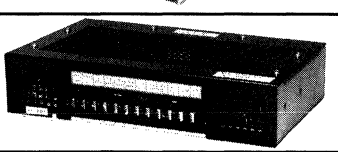


DC-DC CONVERTERS & SWITCHING REGULATORS

DC-DC Converter. UP to 5 Outputs, up to 200W. Available in Extended Military Temp Range. Inputs: 24, 36, 48 & 120 VDC. Outputs: 5V, ±12V & ±15V. Model: **TDC-200**



DC-DC with 24V, 36V, 48V or 120 VDC Inputs, up to 4 Outputs. Slim LIne 5.5″ × 9.5″ × 2.2″. Up to 150 Watt. Standard Outputs: 5V, +12V, −12V & 24V. Powerful yet very compact unit. Model: **TDC-150**



MIL APPROVED AND MILITARIZED POWER SUPPLIES

Full MIL and Militarized power supplies
single and multiple outputs
up to 800 watts
High reliability full output to +70°C

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

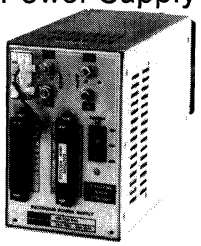
CUSTOM DESIGNS: COMMERCIAL & MILITARY

PROTOTYPES IN 10 WEEKS

Shown below are samples of our custom design capability. All standard units can be modified to suit unique customer requirements. New custom designs are accomplished at a record speed of 10 weeks. NRE charges are nominal, and for large quantity orders no NRE is charged. Call or send your specification to get our quick and responsive quotation.

COMMERCIAL PRODUCTS

800W Single Output Uninterruptable Power Supply



Input: 115/230 VAC 50/60 Hz and +12 VDC battery

Output: 13.5 VDC @ 55A

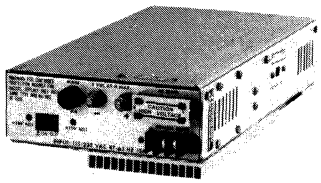
Regulation: ±1.0% line and load combined for a 20-100% load change

Features:
1) Battery charging circuit
2) Very low switching noise
3) OV and OL protection
4) Input RFI filter

Dimensions: 11.5″ x 8.0″ x 5.0″

Outputs Available: 24V, 48V, 56V

400W Slim Line Multiple Output



Input: 115/230 VAC 50/60 Hz

Output: +5 VDC @ 65A
±15 VDC @ 1.5A

Line Regulation: ±0.5%

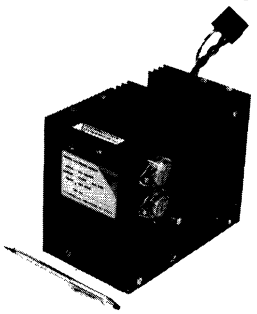
Load Regulation: ±1.0% for 10-100% load change

Features:
1) Designed to meet U.L. 544
2) Overvoltage protection
3) Overload protection
4) Remote sensing of +5V output
5) Input RFI filter

Dimensions: 13.5″ x 6.75″ x 3.0″

Other output voltages may be provided upon request.

300W High Power Converters and Battery Chargers



Input: 105-160 VDC (or 55-80 VDC) (AC input option available)

Output: 15 VDC @ 20A

Line Regulation: ±1% max.

Load Regulation: ±1% from 15%-full load

Ripple and Noise: Less than 1% pp

Dimensions: 4 13/16″ x 5 1/4″ x 6 5/16″

Note: Other output voltages available upon request.

Military to Mil-E-5400
(AIRBORNE)

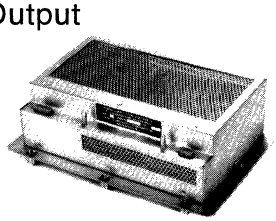
150W Full Mil, Multiple Output

Input: 108-118 VAC 50-425 Hz

Outputs: +15 VDC @ 6.0A ±2%
−15 VDC @ 1.7A ±2%
±10 VDC @ 0.2A ±5%
+24 VDC @ 1.1A ±3%
−5.3 VDC @ 0.15A ±5%
+5.3 VDC @ 2.2A ±5%

Dimensions: 12.15″ x 7.875″ x 3.38″
Wt.: 8.6 lbs.

Built in accordance with Mil-E-5400



150W Full-Mil DC/DC Converter

Input: 28 VDC nominal per Mil-Std-704C

Outputs: +5 VDC @ 14A
−5 VDC % 0.75A
±12 VDC @ 1.5A

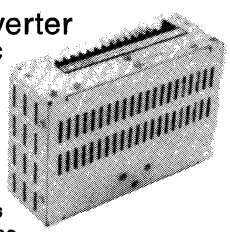
Line Regulation: ±0.5%, all outputs

Load Regulation: ±1.0% for +5V, ±5.0% all others

Ripple and Noise: 100 mVpp, all outputs

Dimensions: 3.0″ x 6.0″ x 8.75″. Wt.: 4 lbs.

Built in accordance with Mil-E-5400



Militarized Units

800W Multiple Output, Enclosed
(AIRBORNE)

Input: 104-132 VAC 47-440 Hz

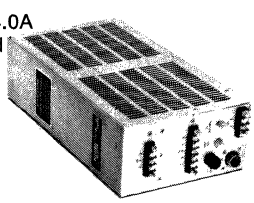
Outputs: +5 VDC @ 140A/±15 VDC @ 4.0A

Regulation: ±1% line and load combined

Ripple and Noise: ±1% peak-to-peak

Features:
- Militarized for high reliability
- Remote sensing of 5V output
- O.V. protection on all outputs
- Overload protection on all outputs

Dimensions: 14″ x 7.5″ x 4.0″



800W Multiple Output, Open-Frame
(SHIPBOARD)

Input: 704-132 VAC 47-440 Hz

Outputs: +5 VDC @ 140A/±15 VDC @ 4.0A

Regulation: ±1% line and load combined

Ripple and Noise: ±1% peak to peak

Dimensions: 15.0″ x 13.5″ x 2.0″

Features:
1) OV and OL protection on all outputs
2) Remote sensing of 5V output
3) Militarized for high reliability-operating temp to 70°C with no derating

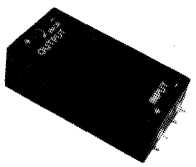
HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

TDC/SERIES DC-DC CONVERTERS

COMMERICAL • MILITARIZED • FULL MIL
CUSTOM & STANDARD UNITS 3W TO 1000W

MODEL TDC3-X — 2.5 WATT Single Regulated Output

Encapsulated, small size unit for local conversion. Regulated output. Short circuit protected. Available for −30°C to +60°C operation.



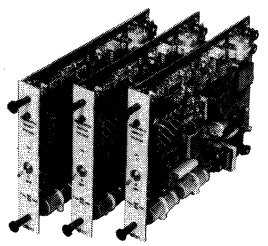
SIZE: 3″ x 1.5″ x 1″

MODEL	INPUT	OUTPUT	REG	RIPPLE
TDC3-1	24V	5V	±1%	50mVpp
TDC3-2	24V	12V	±1%	75mVpp
TDC3-3	48V	5V	±1%	50mVpp
TDC3-4	48V	12V	±1%	75mVpp

Input-Output Isolation: 500VDC

MODEL TDC50-X — 50 WATT Four Outputs

Plug-in card with a panel. Intended for utility control and monitoring systems. 0°C to +60°C operation.



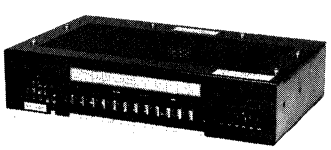
SIZE: 8″ x 6.25″ x .8″

MODEL	INPUT	OUTPUTS	
TDC50-1	48V	1. +12V 1A	4. +24V .2A
TDC50-2	110V	2. −12V 1A	1, 2, 3 are common
TDC50-3	220V	3. +24V 1A	4, isolated

Input/Output Isolation: 3500VAC
100KHz conversion frequency

MODEL TDC150-X — 75-150 WATT 1-5 Outputs

Slim line very compact and powerful unit intended primarily for data processing equip. All outputs are highly regulated and overload protected. The main output is O.V. protected. Operation range 0-50°C.

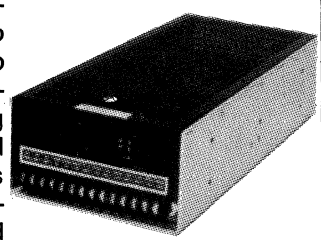


SIZE: 9.5″ x 5.5″ x 2.2″

MODEL	INPUT	OUTPUTS
TDC150-1	−48V	5V 10A, ±12V 2.5A, ±15V 1A
TDC150-2	−48V	5V 10A, ±12V 2A, ±18V 1A
TDC150-3	+24V	5V 10A, ±12V 2.5A, ±15V 1A
TDC150-4	+24V	5V 10A, ±12V 2A, ±18V 1A

MODEL TDC200-X — 100-200 WATT 1-5 Outputs

Designed as a universal DC-DC converter capable of providing up to 5 outputs and up to 200W. Specifically capable of withstanding high transients and noise at the input as present in utility stations. The unit is sold with a cover.



SIZE: 10.8″ x 5.5″ x 2.75″

MODEL	INPUT	OUTPUTS	
TDC200-1	12V	12V 8A	
TDC200-2	24V	5V 6A	12V 10A
TDC200-3	24V	5V 20A	
TDC200-4	24V	5V 3A, ±12V 1A, ±15V 1A	
TDC200-5	120V	5V 10A	12V 12A

CUSTOM DESIGNS Single & multi output commercial and military ground support or vehicular applications. Battery or generator input. Designs to MIL-STD-704. Plug in units Switching frequency 25KHz or 100KHz.

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

MULTIPLE OUTPUT HIGH POWER SWITCHER

NTDM Series

(with optional features)

Battery Backup, Power Factor Corrector, Universal Input, 3 Phase Input and (N + 1) Configuration

500W-2000W

APPLICATIONS: This universal power supply is suitable for uses in data processing, communications, telecom, instrumentation, automation equipment and robotics.

- Rugged construction for high shock and vibration
- Up to 4 powerful outputs
- MTBF exceeding 100,000 hours
- Full overload, overvoltage and overtemperature protection
- Can be supplied with battery backup feature
- Can be supplied with "power factor correction" feature
- Universal input option
- Can be supplied on 19" rack with (N + 1) configuration
- Available in militarized version

HIGH RELIABILITY STANDARD & CUSTOM POWER SYSTEMS

NTDM Series

Electrical Specifications

Input Volt. Range	90-132/180-264VAC user selected
Input Frequency	47-63Hz. 400 Hz optional
Efficiency	75-85% typical at full load depending on specific model
Line Regulation	±.2% thru entire range
Load Regulation	±.5% from min. load to max. load. ±1% N.L. to F.L.
Min. Load	10% of full load current on each output
Temp. Coeff.	.02% per °C
Output Ripple	1% of output or 200mvpp, whichever is smaller
Hold-Up Time	20ms from nominal line and full load
Dynamic Responses	400 microseconds for 25% load step applied from 50% load
Voltage Adj. Range	±10% for outputs up to 24V, +5/-20% for higher outputs
Op. Temp. Range	0-55°C ambient for full output power
Output Power @ 70°C	Commercial units 50%. Militarized units 100%
Warranty	1 year standard. 2-5 years optional
Overload	Shorted ouput & O.L. protection. Foldback w/auto recovery
Overvoltage	Adjustable O.V. shut-down on main output
Overtemperature	O.T. shut-down standard feature on all units
Safety Regulatory	All units are designed to meet UL 1012 & CSA 22.2 standards. VDE compliance to 0871 or TUV equivalent.
EMI/RFI	Designed to meet FCC Part 15 EMI spec. Meets VDE 0871B for radiated noise. Meets VDE 0871B conducted with external filter.

	VOLT	Io	SUFFIX	VOLT	Io	SUFFIX
MULTIPLE OUTPUTS	-5 -12 -15 -24	5A 3A 3A 2A None	A1 A2 A3 A4 —	+5 +12 +15 +24 None	10A 10A 6A 4A None	B1 B2 B3 B4 — None
	Example: NTDM-12-45-A1 For +12 @ 45A & -5V @ 5A			Example: NTDM-28-18-A2-B2 For 28V @ 18A, -12V @ 3A & +12V @ 10A		

Second and Third Outputs Are Regulated to ±2% And Overload Protected

Applicable only to units with total output power of 1000W or less.				
HIGH POWER FOURTH OUTPUT	5V	50A	C1	The fourth output is insulated and hence it may be use as a positive or negative output.
	12V or 15V	20A	C2	
	24V	10A	C3	
Note: The Fourth Output option may be implemented only if the option for power factor corrector or uninterruptible (battery backup) are not exercised.				

UPS BATTERY BACKUP 48VDC	Applicable to all units: 1-3 outputs, up to 1000W and having no power factor correction option.
	Once placed in the unit, the battery backup module makes this switcher an uninterruptible system. Transfer to battery occur automatically and "glitchlessly." Accepts 48VDC input, and can support up to 1000W of total output. Charges the battery when AC is present.
	For battery backup option, add UPS as a suffix to the part number. Example: NTDM28-18A2B2-UPS.

POWER FACTOR CORRECTION (Accepts input of 90-264V)	Applicable to all units: 1-3 outputs, up to 1000W and having 4th output or UPS options.
	The power factor correction module reshapes the input current to a nearly perfect sinusoidal waveshape which has a power factor of .95-.98.
	For this feature add PF as a suffix to the part number. Example: NTDM5-100A28B2-PF.

REDUNDANCY	Applicable to all units. Consult factory.
(N+1) CONFIGURATION HOT PLUGGABLE	The NTDM units may be optionally equipped with "ORing" diodes on the outputs, thus enabling these units to be connected in parallel for (N + 1) applications. A standard 19" rack mount is available to accomodate up to 3 units in one tray.The units may be removed or plugged into location without power removal.

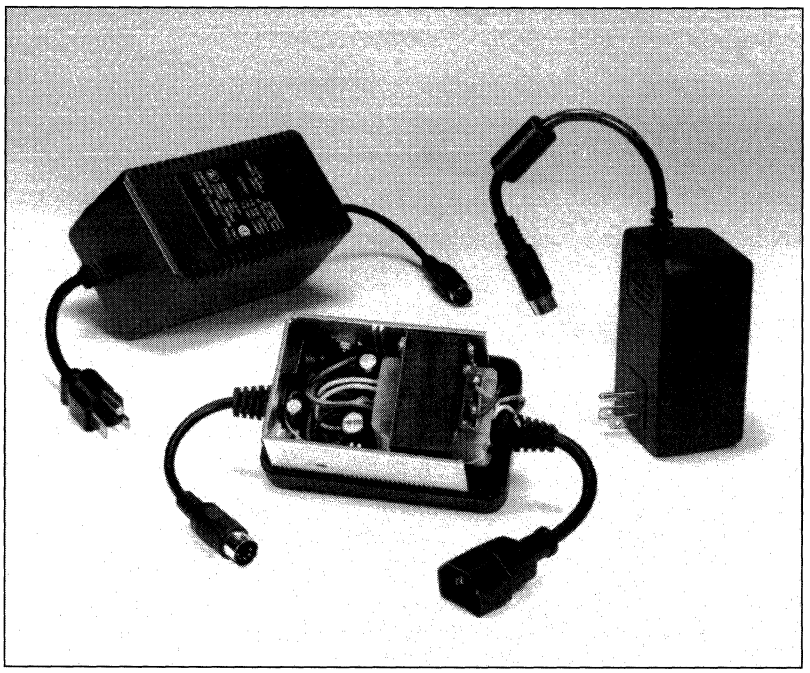
apx ARSTAN PRODUCTS

REGULATED LINEAR EXTERNAL POWER SUPPLIES

Our products are manufactured in the **FAR EAST** and are competitively priced. We can cross reference to standard designs or our engineers will help you select the features which will best fit your application.



Specifications and Available Options:

- Typical Input Voltage Range: 105 To 132 VAC @ 60 Hz
- NEMA 5-15 P Plug with Ground Pin Available
- Single and Multiple Outputs
- Any Combination of Voltages and Currents
- Ripple and Noise: 10 mV P-P Typical
- Output Accuracy: ±5%
- Overvoltage Crowbar Protection Circuits Optional
- RFI/EMI and Transient Protection
- Switchable Input Available
- European IEC/VDE and U.K. BABT Equivalent Designs Available for Certification
- Typical Operating Temperature Range: 0°C—40°C
- Custom Colors: Plastics and Cables
- Custom Tooling and Molding of Enclosures
- All APX Enclosures Are Made of High Impact Plastics Meeting UL 1310/1012 and CSA 22.2-223
- Custom Tooling and Molding of Cables and Connectors
- Typical Breakdown Voltage: 1500 VAC
- Warranty: 1 Year

apx ARSTAN PRODUCTS

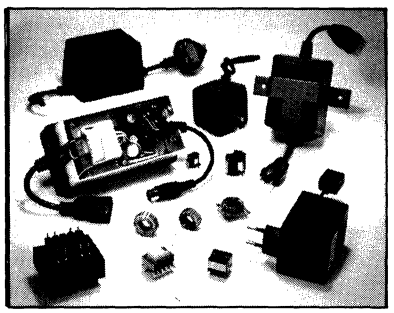
We are a manufacturer of **POWER SUPPLIES** and **MAGNETIC PRODUCTS** with engineering/sales offices in the **U.S.** and manufacturing in the **Far East.**

Our Products Include:

- AC and DC External Power Supplies
- Regulated Linear Power Supplies
- Custom Made Specialized Power Supplies
- Battery Chargers
- Power, Pulse and Telecommunication Transformers
- Inductors and Specialized Magnetic Products



Typical Applications:

- Computers
- Telecommunications
- Modems
- Medical Equipment
- Computer Peripherals
- Bar Scanning Equipment
- Microprocessor Control Systems
- ATE and Security Systems

QUALITY— RELIABILITY— SERVICE — RESPONSE — WARRANTY and COMPETITIVE PRICING

Established in 1978 we have successfully worked with engineers, buyers and program managers supporting products and programs with 12 years of:

- **Product Analysis**
- **Design Engineering Support**
- **Custom Tooling and Packaging**
- **Custom Molding**
- **Domestic and International Agency Certifications**
- **BABT Approved Manufacturing Facility**

Battery Chargers:

- Standard and Custom Designs for Nickel Cadmium and Lead Acid Batteries
- Single and Dual Stage Charging Systems
- Standard and Regulated Outputs
- Designs are available to UL/CSA as well as European IEC/VDE Standards
- Designs to Medical/Dental UL544 Standards
- Wall Mount Plug- in and Desk Top Configurations Available
- Custom Enclosures

DC-DC CONVERTERS

APEX MICROTECHNOLOGY CORPORATION • TUCSON, ARIZONA • APPLICATIONS HOTLINE (800) 421-1865

APEX DB2800 SERIES

The DB2800 Series marks the debut of APEX Microtechnology into power conversion, and capitalizes on our expertise in power hybrids.

Reliable operation over the full military temperature range is assured via our use of power dip technology, a technology proven for its inherent low temperature gradients, wave solderability and ruggedness.

Ideally suited to low voltage, high power applications, the DB2800 Series is hermetic with no derating over the full military temperature range. Indeed, if power at temperature is important, the DB2800 Series is the only choice, offering 33% more power than the nearest competition at 125°C case temperature.

APPLICATIONS

In addition to 28 volt 704D designs, some applications the DB2800 Series can be used in are: digital circuit power supplies, high current, low voltage analog circuits, parallel redundant operations and isolated instrumentation.

OTHER PRODUCTS

In addition to DC/DC converters, APEX is recognized as a world leader in high voltage, high current and high speed operational amplifiers designed to drive resistive, inductive and capacitive loads.

TOLL-FREE TECHNICAL ASSISTANCE

The APEX Applications Hotline is the quickest way to get answers about your specific circuit needs. We can assist you in product selection, design suggestions, schematic review and circuit debugging. In the United States & Canada call 1-800-421-1865, Monday through Thursday, 7 a.m. to 5 p.m. MST, Fridays 7 a.m. to 1 p.m. MST.

HI-REL DESIGN

- WELDED HERMETIC PACKAGE
- LOW INTERNAL TEMPERATURE GRADIENTS
- LOW COMPONENT COUNT
- ALL CERAMIC CAPACITORS
- WAVE SOLDERABLE PACKAGE

PATENT PENDING

OTHER FEATURES

- NO DERATING – -55 to +85°C and -55 to +125°C
- WIDE SUPPLY RANGE – 15 to 50V
- HIGH POWER DENSITY – 20W/IN³
- HIGH ISOLATION – 500V

DESCRIPTION

The DB2805S(A) has been created to provide a reliable DC/DC Converter specified over the military temperature range. This has been achieved using a new package, rather than pushing the envelope on existing DC/DC Converter packages. A 12 pin Power Dip™, pioneered by Apex for Power Amplifiers up to 500W, provides very low thermal gradients, rugged hermeticity and high voltage isolation.

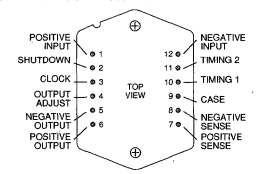
To further enhance reliability, the internal component count has been kept low. What is more, no tantalum or electrolytic capacitors are used in this design, a major cause of low MTBF in DC/DC Converters.

The sophisticated DB 2805S(A) features remote shutdown, kelvin sense, slaveability, and indefinite short circuit protection. It uses a push-pull topology operated in the feed forward, current mode. The typical switching frequency is 500 KHz. A π type input filter is included in order to reduce the peak to peak input ripple current.

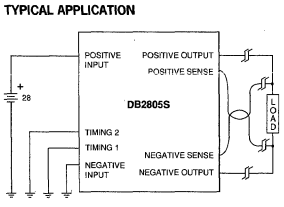
This hybrid converter utilizes thick film (cermet) resistors, ceramic capacitors, miniature magnetics and semiconductor chips to maximize reliability, minimize size and give top performance. Ultrasonically bonded aluminum wires provide reliable interconnections at all operating temperatures.

The PD12/60H 12-pin Power Dip™ package (see Package Outlines) is hermetically sealed and isolated from the internal circuits. Do not use thermally conductive electrically insulators between package and heatsink.

EXTERNAL CONNECTIONS



TYPICAL APPLICATION



The above diagram shows the remote sense feature which reduces V_O errors due to resistive drops in long power supply lines. This diagram also shows the connection for non-synchronized operation.

ISOLATION TEST CIRCUIT

NOTES:
* The specification of DB2805SA is identical to the specification for DB2805S in applicable column to the left.
1. Long term operation at the maximum junction temperature will result in reduced product life. Derate internal power dissipation to achieve high MTBF. For guidance, refer to the heatsink data sheet.
2. Unless otherwise stated T_C = 25°, $V_{IN} = V_{PIN12} - V_{PIN1}$ = 28V, I_{OUT} = 4 Amps.

CAUTION The internal substrate contains beryllia (BeO). Do not break the seal. If broken, do not crush, machine, or subject to temperatures in excess of 850°C to avoid generating toxic fumes.

ARNOLD MAGNETICS

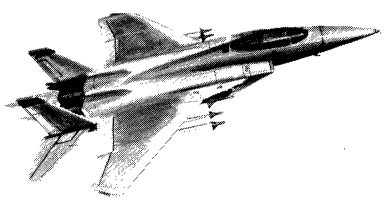
AC-DC/DC-DC MODULAR MINIATURIZED
SWITCHING POWER SUPPLIES

WHY CHOOSE ARNOLD MAGNETICS?

SAVE SPACE... MINIATURIZED PACKAGES

Arnold's complete AC-DC and DC-DC Multi Output Systems are 50% to 75% smaller than previous generation power

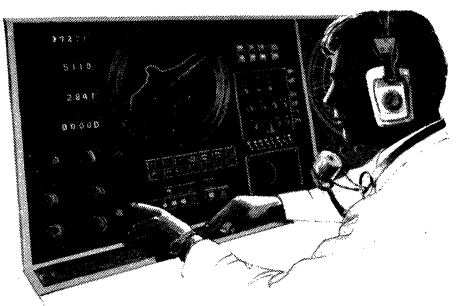


supplies, achieving densities of 5 to 8 watts per cubic inch. Our miniaturized packages, with their unique narrow footprints, provide more power in less space.

SAVE TIME... QUICK DELIVERIES

Arnold's unique design concept allows you to choose inputs and outputs from predesigned standard modules.

You configure your own "custom" multi-output power supply system and get delivery in weeks...even with non-standard voltage combinations.



SAVE MONEY... LOWER PROGRAM COSTS

With Arnold, there is no additional charge for unique output voltage combinations. Non-recurring engineering and qualification expenses of custom designs are avoided. In addition, our standard modules provide lower cost for production quantities.

REDUCE RISK... HIGH RELIABILITY DESIGNS

Arnold's standard modules are proven thru thousands of hours of failure-free qualification before ever being shipped to our customers. NAVMAT derating and testing methods, along with standardized modular designs, ensure reliability and reduce the risk of failure inherent in new custom circuits or thermal and mechanical package designs.

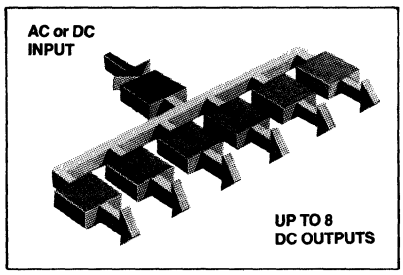
FROM STANDARD MODULES!

EL 2000 SERIES



1 OUTPUT SELECTION

Every standard output module may be specified to the exact nominal voltage and maximum current you require. The table of output regulators describes the range of voltages and currents available as standards. Please select the nominal voltage required for each output. All outputs are adjustable ±5% from nominal by means of an externally accessible potentiometer. Outputs are isolated and may be connected for positive or negative polarity. Ensure your required load is within the maximum current specified. You may have up to eight outputs per power supply.

OPERATING SPECIFICATIONS

- **TEMPERATURE COEFFICIENT:** 0.01%/°C. −55°C to +85°C.
- **OPERATING TEMPERATURE** (Baseplate): −40°C to +85°C (optional −55°C to +85°C)
- **STORAGE TEMPERATURE:** −65°C to +100°C.
- **SHORT CIRCUIT PROTECTION:** All outputs are short circuit protected and feature foldback current limiting. (ERP, ERY straight current limiting).
- **OUTPUT ADJUSTMENT RANGE:** All outputs are adjustable over a plus or minus 5% range.
- **SEMICONDUCTOR JUNCTION TEMPERATURE:** Maximum of 100°C at operating baseplate temperature of +85°C (derating per Navmat P4855-1 and Mil-Std-454J).
- **ISOLATION:** The inputs, case and outputs are isolated (floating) from each other. Output to case isolation test voltage is the greater of 50VDC or 1.3 x E out. Input to case 500VDC on 115VAC units, 50VDC on DC input units (to 30V). Input to output 250VDC on all units.

NOTES

1. M—Denotes Master Channel (max. of one per power supply); —10% minimum load (to 5 amps max.) required.
2. DW—Denotes Double Width design only.
3. Line/Load Regulation Band consists of high line to low line and 1/2 load to full load change.
4. Consult Factory.
5. No additional space required for Inrush/Transient Protection.
6. No additional space required for E & T options.
7. Use with EDC, EDD or EDM Input Sections only.
8. @ −55°C; 8.7 DW.
   For 187-265 V operation only; 7.7DW

2 INPUT SELECTION

Select the input section, AC or DC, with sufficient power to drive the output modules. This is determined from your worksheet calculations. We have provided conservative data for your analysis. The efficiencies shown in the Output Regulators table may vary with options such as wide input or extended temperature. Our factory applications engineers will be happy to assist you in evaluating various alternative configurations.

AC-DC/DC-DC MODULAR MINIATURIZED SWITCHING POWER SUPPLIES

3 CASE SELECTION

You have a variety of choices when selecting the package that best fits your space. Just add up your modules (Input Section, Regulators and Options) and pick the case that best fits your system needs.

Case Size	Total of Module Lengths (inches)	Base-plate Area	Maximum Case Dimensions (inches) Length (L)	Width (W)	Height (H)	Mounting Holes (inches) M	N	Quan.	Final Unit Weight (oz.)	Figure No.
ECAA	3.2	4.8 in^2	3.5	1.63	3.63	1.125	2.750	4	25	1
ECBA	4.7	7.1 in^2	5.0	1.63	3.63	1.125	4.250	4	35	1
ECCA	6.7	10.1 in^2	7.0	1.63	3.63	1.125	2.750	6	45	1
ECFA	8.2	12.4 in^2	8.5	1.63	3.63	1.125	3.500	6	60	1
ECDA	10.2	15.4 in^2	10.5	1.63	3.63	1.125	4.500	6	70	1
"DOUBLE WIDE" Packages below allow modules to be mounted side by side.										
ECAB	2 x 3.2	9.7 in^2	3.5	3.13	3.63	2.625	2.750	4	45	2
ECBB	2 x 4.7	14.2 in^2	5.0	3.13	3.63	2.625	4.250	4	66	2
ECCB	2 x 6.7	20.2 in^2	7.0	3.13	3.63	2.625	2.750	6	82	2
ECFB	2 x 8.2	24.8 in^2	8.5	3.13	3.63	2.625	3.500	6	110	2
ECDB	2 x 10.2	30.8 in^2	10.5	3.13	3.63	2.625	4.500	6	130	2
"TRIPLE WIDE" Packages below allow modules to be mounted three across.										
ECAC	3 x 3.2	14.4 in^2	3.5	4.62	3.63	4.126	2.750	4	63	2
ECBC	3 x 4.7	21.3 in^2	5.0	4.62	3.63	4.126	4.250	4	90	2
ECCC	3 x 6.7	30.3 in^2	7.0	4.62	3.63	4.126	2.750	6	123	2
ECFC	3 x 8.2	37.2 in^2	8.5	4.62	3.63	4.126	3.500	6	150	2
ECDC	3 x 10.2	46.2 in^2	10.5	4.62	3.63	4.126	4.500	6	186	2

NOTE: All cases are gold anodized aluminum with turret-style solder terminals and Teflon insulation, 7/16 maximum height, except for ERP and ERY which has 1/4-28 threaded studs with a maximum height of 7/16 standard or 11/16 optional, (select).

Optional Threaded Terminals have maximum height of 1/2 or 5/8, (select).

FIGURE 1

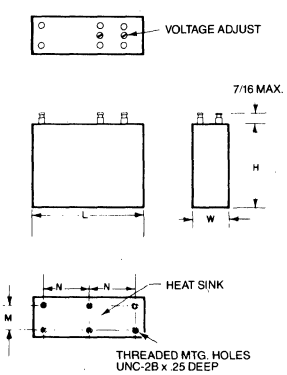

FIGURE 2

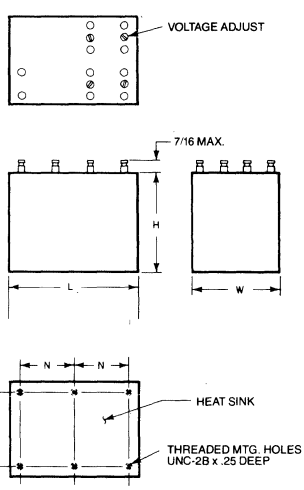
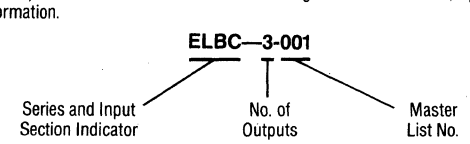


4 Contact Factory for assignment of final model number.

(For example ELBC-3001). This Model Number includes all voltage and current levels, options and package size information.



OPTIONS

OPTION LETTER	DESCRIPTION
EA-V	**Output Over-Voltage Protection**—SCR type to 20A. All ERP and ERY use electronic control. 120% ±10% of nominal Eo, available on all Regulators except ERB and ERK. No additional length required for ERP and ERY. For others, please add 0.6" to length of Regulator.
EA-T	**Extended Temperature Operation**—−55°C to +85°C. Contact Factory for other requirements. Temp. range may affect Case Size and maximum output current.
EA-E	**Extended Input Voltage**—92-138 VAC and 18-36 VDC. For other ranges please contact Factory with your requirements. Input range may affect unit efficiency, case size and maximum output current.
EA-TP	**Input Transient Protection**—Conforms to the transient provision of MIL-STD 704A-D as well as MIL-STD 1275 and MIL-STD 1399. For undershoot and dropout contact Factory with specific requirements. Add 0.6" to Input Section length.
EA-R	**Remote Sense**—Maintains specified output voltage at remote load. Compensates for a voltage drop of .25V maximum. Available above 10A. Standard on master channels. Add 0.6" to Regulators, except ERP and ERY.
EA-A	**Remote Voltage Adjustment**—Terminals are provided for external potentiometer. Add 0.6" to Regulators.
EA-TS	**Over-Temperature Shutdown**—Unit will shut off during over-temp and automatically reset within specified range. Add 1.2" to Input Section length.
EA-ST	**Stud-Terminals**—8-32 threaded studs are provided for input and output terminations (maximum height of 5/8"). ERP and ERY regulators come standard with 1/4-28 stud terminals. Maximum torque of retaining nut: 15 inch-pound for 8-32 stud; 25 inch-pound for 1/4-28 stud.
EA-H	**Helicoil Mounting Inserts**—Locking or free running helicoil inserts are provided. Specify 6-32 or 8-32.
EA-LC	**TTL On/Off Control**—Logic signal will turn unit On or Off. Add 0.6" to Input Section length.
EA-D	**Power-Down Signal**—TTL signal warns of input power loss prior to outputs falling out of regulation. Add 0.6" to Input Section length.
EA-I	**Inrush Soft Start**—Unit inrush limited to 2 times steady state current at turn-on (AC only). Add 0.6" to Input Section length.

ENVIRONMENTAL SPECIFICATIONS

- **Temperature Range:** Operating Temperature: −40°C to +85°C Baseplate Temperature. Optional −55°C to +85°C range. Non-Operating Storage Temperature: −65°C to +100°C.
- **High Temperature:** Per MIL-STD-810, Method 501, Procedure II.
- **Low Temperature:** Per MIL-STD-810, Method 502, Procedure I.
- **Temperature-Altitude:** Per MIL-STD-810, Method 504, Procedure I; the following details apply: −40°C to +85°C (and −55°C to +85°C) at Altitude: Sea level to 70,000 ft.
- **Humidity:** Per MIL-STD-810, Method 507, Procedure I.
- **Acceleration:** Per MIL-STD-810, Method 513, Procedure I and II, at a test level of 14 G.
- **Vibration:** Per MIL-STD-810, Method 514, Procedure I, at a test level of 15 G.
- **Shock:** Per MIL-STD-810, Method 516, Procedures I, II, III, V, and VI at a test level of 40 G.

THERMAL INTERFACE

Arnold Magnetics Power Supplies are cooled by conduction. Always use thermal compound during installation. To assure reliability the thermal interface must be designed to maintain specified Baseplate Temperature under worst-case conditions. Heat transfer via forced air or natural convection will be minimal.

Please consult the Factory to discuss heat-sinking considerations.

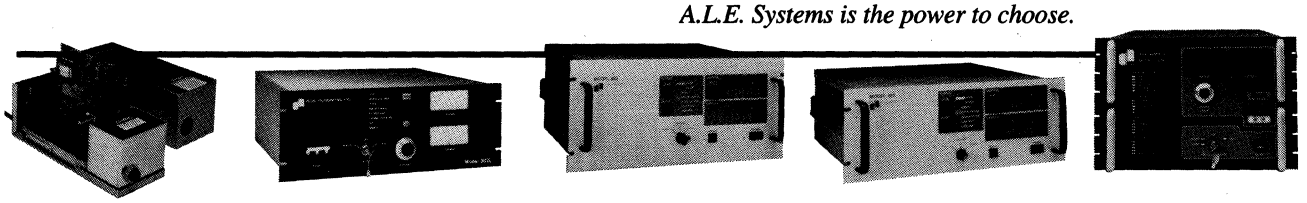
HIGH VOLTAGE POWER SUPPLIES

a.l.e. systems, inc.
150 Homer Ave., Ashland, MA 01721
Telephone: 508-881-5252 Fax: 617-235-6588

Since its incorporation, A.L.E. Systems has been a leader in advanced switchmode power conversion systems for laser and other high power, high voltage applications. Our broad experience solving complex high voltage applications assures successful integration of our power supplies to your specific requirements. With thousands of units operating world wide in both OEM and laboratory applications, A.L.E. Systems is the power to choose.



Model	Average Power J/sec	Peak Charge Rate J/sec	Size	Input Voltage
500	500	650	6 x 5.5 x 14	110-220
102	1000	1200	6 x 5.5 x 14	110-220
152	1500	2000	*7 x 17 x 17	190-260
202	2000	2500	*7 x 17 x 17	190-260
302	3000	4000	*7 x 17 x 17	190-260
402	4000	5000	*7 x 17 x 17	190-260 380-415
802	8000	9000	*8.75 x 17 x 17	190-260 380-415
153	15000	20000	*12.25 x 17 x 22	190-260 380-530

All units are available with full scale output voltages of 1, 2, 4, 5, 10, 20, 30, 40, 50kV. Other voltages are available on request.

* Rack Mount

Capacitor Charging Power Supplies

500 J/S to 15KJ/S

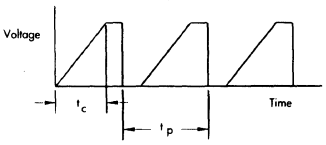
Advanced high voltage current sources specifically designed to charge capacitors in discharge driven applications.

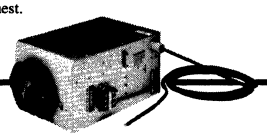
Capacitor charging supplies are rated in Joules per second. To determine the required supply capacity, multiply the energy storage ($CV^2/2$) by the pulse repetition frequency. For example a 90nF capacitor operating at 40kV and a 50Hz rate would require a 3600J/sec. supply.

All A.L.E. capacitor charging supplies are rated in both average and peak charge rate. The peak rating assures that the full average power of the unit is available when the requirement for transfer switch recovery time is taken into account.

$$\text{Peak charge rate} = \frac{1/2\,CV^2}{t_c}$$

$$\text{Average charge rate} = \frac{1/2\,CV^2}{t_p}$$



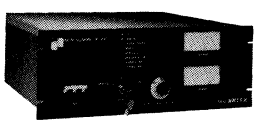


CW Arc Lamp Supplies

4kW to 10kW

Rack mount and OEM versions

Active power factor correction available to 6kW level.

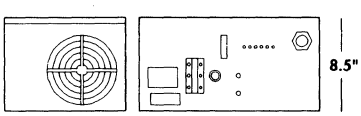


The YAG Drive Series of switching power supplies are designed for Nd: YAG and other solid-state laser systems. Advanced semi-conductor technology combined with high quality construction yield an exceptionally small and reliable power supply. With integral igniter and boost circuitry, the YAG Drive provides a complete power system for krypton arc lamps used in laboratory and OEM applications

Output Power
YD-4 30A, 200V, 4kW max.
YD-6 40A, 200V, 6kW max.
YD-8 45A, 200V, 8kW max.
YD-10 50A, 200V, 10kW max.

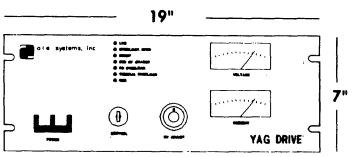
Regulation
0.1% max. over full line and load range.
Ripple
0.1% rms max.

YD-4-SC, YD-6-SC
Small chassis, remote operation only. Used in low cost, high volume OEM applications.



Small Chassis Configuration

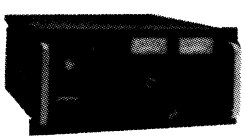
YD-6, YD-8 , YD-10
19" standard rack mount with full front panel instrumentation for use in laboratory, prototype or OEM applications. Includes voltage and current meters, current adjust and AC contactor.



Rack Mount Configuration

Precision High Power HVDC

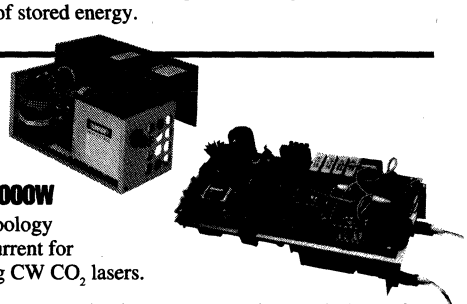
Custom supplies from 2kW to 30kW



Highly regulated supplies for ion implantation, X-ray and other demanding high power applications. Basic voltage transformation to 40kV allows for a minimal number of multiplication stages and hence extremely low levels of stored energy.

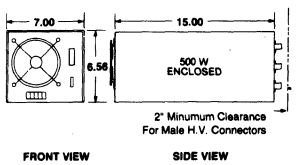
CO_2

Ballastless CO2 Supplies 250W to 1000W



Patented converter topology provides controlled current for striking and sustaining CW CO_2 lasers.

The CO2 Series high voltage switching power supplies are designed for medical and industrial CO2 laser systems. The advanced "ballastless" design can increase laser system efficiency by 20%. Configured as either open-frame or enclosed chassis, the CO2 power supply is compact enough to be designed right into the laser head. Designed for continuous use, these air-cooled power supplies provide an average power of 250 Watts or 500 Watts, and status monitoring are easily accomplished with thestandard remote interface.



Ascent
POWER TECHNOLOGY INC.

Power Supplies

Ascent Power Technology is a new name in power electronics with over 18 years of experience as a producer of high quality, custom power supply products. Ascent Power Technology is currently a supplier to many major *commercial, industrial, medical,* and *military* power supply users. Our organizational strengths are characterized as follows:

■ ENGINEERING

We offer a full range of engineering design capabilities, including SPICE simulation and analysis of all circuits, **C**omputer **A**ided **D**esign, and extensive qualification to a wide range of commercial and military requirements.

■ MANUFACTURING

We are capable of both leaded component and SMD assembly, high voltage encapsulation, in-house magnetic production, and both high voltage and low voltage automated testing. Our facility can manufacture to military and commercial requirements.

■ QUALITY

At the development level we specialize in detailed worst case analysis, stringent component derating and extensive life testing. Our experienced manufacturing staff participates in yearly training courses and our processes are monitored through **S**tatistical **P**rocess **C**ontrol. Our order control and factory scheduling is done on one of the most advanced computer scheduling systems available to enable us to meet your **J**ust **I**n **T**ime delivery requirements.

■ CUSTOM POWER SUPPLIES

Low Voltage

AC/DC – 250W to 2kW, power factor correction optional
DC/DC – 50W to 200W industry standard package
– 100W to 2kW custom package

High Voltage

Up to 100kV Applications • CRT • Medical
• Laser Printer • Military (ground and airborne)

HIGH VOLTAGE

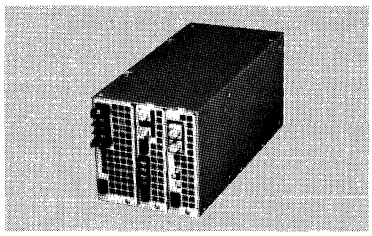
HIGH POWER

SPECTRUM SERIES
500 to 2000 WATTS MULTIPLE OUTPUTS

NEW



Spectrum is the first full-featured high power product with a built-in PFC front end. It is available in both single and multiple output versions and offers a very compact footprint. The 1200 watt package, measuring 5″×5″×11″, and the 2000 watt package, measuring 5″×8″×11″, achieve more value per watt of power than any other high power design.

FEATURES

- IEC 555-2 compliant
- Power factor correction (standard)
- Current share on all outputs (standard)
- Remote sense on all outputs
- Overload protect on all outputs
- Voltage adjustment all outs ±10%
- Margining on all outputs ±5%
- Power fail signal
- Global DC output good
- Power Good signal and status indicator LED on all outputs
- Inhibit (enable) signal (outputs > 10 amps)
- Level A EMI filtering (standard)
- Full output ratings to −10° to 50°C ambient

Model Selection

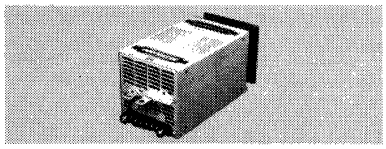
HIGH POWER

POWERTEC 600 TO 1000 WATTS
Single output
2 to 48 VDC
switch mode power supplies
9 A/B/C



FEATURES
- Ultra compact 5″×5″×10″
- Field Selectable Inputs
- Single wire parallel
- Automatic current sharing of paralleled units
- Fault Tolerant (N+1) redundancy adaptable
- Soft start
- Input power fail signal
- Logic Inhibit
- Overvoltage protection
- Automatic thermal shutdown protection

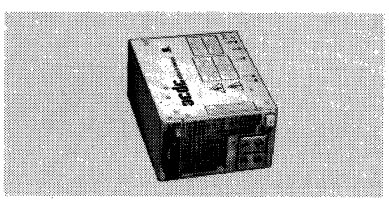
ACDC 2000 WATTS
Single output
2 to 48 VDC
Switchmode power supplies
JF201



FEATURES
- Smallest 2000 Watt switcher on market
- Three phase power factor correction to .9
- Three input models: three phase, single phase, DC
- Single wire paralleling
- Current monitor
- Internal EMI filter available: FCC and VDE "A"
- Phase loss protection
- Superior DC output connection
- UL/CSA/VDE

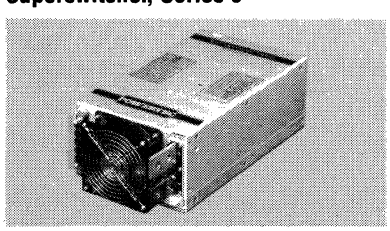
POWERTEC 3000 WATTS
Single output 2V to 48VDC
Switchmode power supplies
Superswitcher, Series 9



FEATURES
- Smallest 3000 Watt switcher
- Field selectable inputs
- EMI filter, FCC and FDE "A"
- IL/CSA/VDE
- Margining +/– 10%
- Soft start
- Full power outputs at 50°C

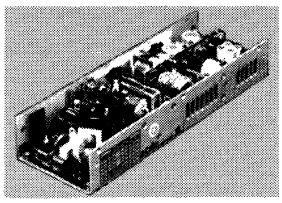
LOW/MEDIUM POWER

ACDC 100 TO 400 WATTS
RH/RMV/RMC/RMF Series



FEATURES
- Optional universal input some models
- Electronic soft start
- AC input nominal 115/230 VAC field selectable
- EMI filter (except RH) • Remote sense
- Overload/short circuit protection • Overvoltage/overtemperature protection
- Reverse voltage protection • UL, CSA IEC 380/VDE 0806 Certification
- No minimum load required on main output for full output on auxiliaries
- Remote inhibit (main output)

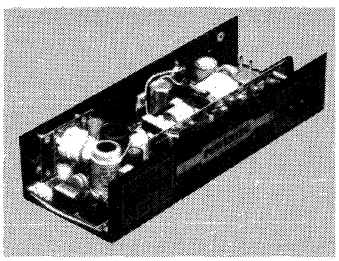
Output #1 is main output

POWERTEC 200 TO 300 WATTS
Series 29D



FEATURES
Series 29D
- 5 to 24 VDC outputs
- VDE, IEC, CSA, UL Safety Specs
- Isolated and Floating Outputs
- Automatic Current-Sharing*
- Internal Isolation Diodes* (option)
- Field Switchable 115/230 VAC
- Over Voltage Protection*
- Remote Sense*
- Five D.C. Outputs
- Automatic Thermal Shut-Down
- Remote Inhibit* – Logic High or Low
- Alarm Circuitry for "Input Power Fail" and "Output Good" Signals
- N+1 Redundancy
- Automatic Pre-Load (option)
- 100% Dynamic Burn-in: AC Cycled On and Off, Full Load to No Load to Short Circuit Cycling

*Provided on fully regulated outputs #1-#4

PowerSystems Enclosures
- Hot Plug-In/Replacement
- Holds up to Six 29D supplies
- Up to 1800 Watts
- User Configurable Backplane

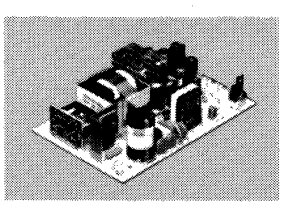
ACDC 15 TO 220 WATTS
RB Series



FEATURES
- 0° to 50°C full power operation (convection cooled)
- 1 year warranty
- 100% computer final tested. Test data sheet furnished with each unit
- Installation and specification data included with each unit
- AC input nominal 115/230VAC field selectable
- EMI filter
- Remote sense
- Short circuit protection
- Overvoltage protection
- UL, CSA, IEC 380/VDE 0806 certification
- Some models Universal input

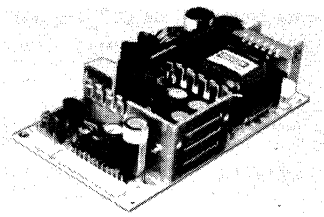
LOW/MEDIUM POWER

ASTEC 30 TO 130 WATTS
Multiple output
Switch mode power supplies
SA Series



FEATURES

SAXX-1XXX-open PCB
SAXX-2XXX-L-bracket
SAXX-3XXX-fully cased

- High efficiency
- Built-in EMI filter
- Dual Input voltage – 115/230VAC, Field Selectable
- Universal Input on some models
- Adjustable 5V output on some models
- Overvoltage protection
- Overload protection (Power limit)
- Short circuit protection
- 100% factory burn-in
- Low ripple and noise
- PCB and bracket, fully enclosed units available
- UL, CSA, VE safety specifications
- MTBF minimum 50,000 hours

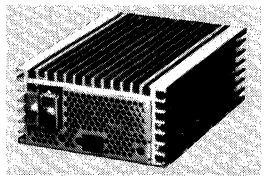
NEW ASTEC 300-350 WATTS
Single/multiple output
Switch mode power supplies
"Lightning" ALS Series



FEATURES

- Universal input
- >75% efficiency
- 3.3 Watts per inch³
- 200% self-protecting peak loading on two aux channels
- 20 ms full load holdover storage
- All outputs fully floating
- Overvoltage protection
- Overload protection
- Remote sensing
- Inhibit function
- Power fail signal
- Margining on main output
- Automatic thermal overload protection
- Soft start circuitry

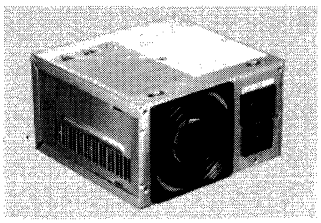
PC SUPPLIES/RACKS/LOADS

ASTEC PC SERIES 85 TO 300 WATTS
MULTIPLE OUTPUT SWITCH MODE POWER SUPPLIES



FEATURES
- High efficiency
- Built-in EMI filter
- UL, CSA, VDE approvals
- 100% burn-in
- Vacuum impregnated transformers
- Overvoltage protection
- Short circuit protection
- Dual input voltage (115/230 VAC)
- Compatible with PC applications
- Built-in fan, power switch, voltage select switch, cable harness or edge connector, AC receptacle, and convenience outlet
- Universal input on some models

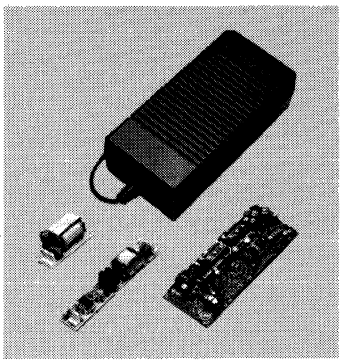
LAPTOP SERIES
MULTIPLE OUTPUT SWITCH MODE POWER SUPPLIES



FEATURES
- High efficiency
- Class B EMI filter (SA-55)
- UL, CSA, VDE approvals
- 4 battery status signals
- Battery temperature sense
- Fully protected
- Wide range AC input
- EL & CCFT backlight modules

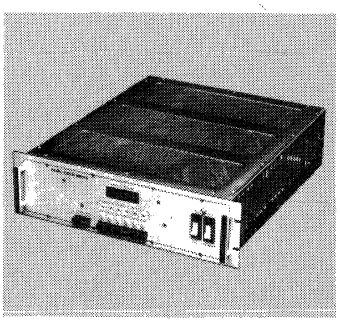
OPTIONS
Bench top case
Four-position rack
Blank dress panels
Ribbon cable
12″ line cord
Slides
Power strip
Load cables

RACKS
RPS SERIES



The RPS (Rack Power System) Series offers a broad line of 19″ wide power systems.

Three standard RETMA configurations available:
5¼″ × 19″ × 21″
5¼″ × 19″ × 14″
7″ × 19″ × 21″

Each RPS can provide up to twelve individual outputs from Astec's broad line of linear and switching power supplies. Your specific connectors and termination can be incorporated into a custom rack design.

Basic Rack Assembly...
RPS1-P3-115-XXX (1) 5¼″ × 19″ × 14″ Rack
(1) Front panel with a lighted circuit breaker and handles

Note: The suffix "XXX" denotes the power supplies in the RPS

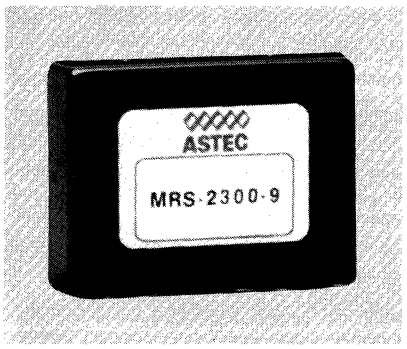
DC–DC CONVERTERS

ASTEC 1.5 TO 4.5 WATTS
SINGLE/DUAL OUTPUT
DC/DC POWER CONVERTERS



FEATURES

MV Series—1.5 to 2.4 Watt Single/Dual output
- Regulated outputs • LC input filter

MB/MH Series—2.4 Watt Single/Dual output
- Unregulated outputs • LC input filter
- COntinuous short circuit protection
- MOSFET design
- Efficiency to 80% • MTBF 1,000,000 hours

MQ Series—3 Watts single/dual outputs
- Ultra low noise Pi input filter
- Continuous short circuit
- Regulated output

MX Series—3.0 to 3.6 Watt Single/Dual output
- Unregulated outputs
- LC input filter
- Efficiency to 80%
- Continuous short circuit protection
- MOSFET design
- MTBF >1,000,000 hours
- 500 VDC I/O isolation

MK/MW Series—3.5 to 12 Watt Single/Dual output
- Unregulated outputs
- Pi input filter
- Efficiency to 80%
- Continuous short circuit protection
- MOSFET design
- 500VDC I/O isolation
- MTBF 1,000,000 hours
- Alternative pin configuration

MA Series—4.5 Watt Single/Dual output
- Regulated outputs
- SMT-surface mount technology
- Continuous short circuit protection
- MOSFET design
- 4:1 Ultra-wide input range

DC–DC CONVERTERS

ASTEC 5 TO 40 WATTS
SINGLE/MULTIPLE OUTPUT DC/DC CONVERTERS

FEATURES

MP/MF Series—5 to 7.5 Watt Single/Dual output
- Regulated outputs • Pi input filter
- Continuous short circuit protection
- MOSFET Design • 500 VDC I/O isolation
- SMT—surface mount technology
- 4:1 Ultra-wide input range

ML Series—6 Watts Single/Dual outputs
- MOSFET Design
- Surface Mount Technology
- 4:1 Ultra-wide Input Range
- Continuous Foldback Short Circuit Protection
- Regulated Outputs
- 500 Vdc I/O Isolation
- Efficiency 80% (typ)

MR Series—15 Watts Single/Dual outputs
- MOSFET Design
- Surface Mount Technology
- 4:1 Wide Input Range
- Continuous Foldback Short Circuit Protection
- Regulated Outputs • 500 V Isolation
- Six-sided Shielding

MC Series—15 to 25 Watt single output
- Regulated outputs
- Six sided shielding
- Low profile package
- Efficiency to 85% • Non isolated

MD Series—15-40 Watts Single/Dual outputs
- MOSFET Design • Surface Mount Technology
- 4:1 Wide Input Range
- Continuous Foldback Short Circuit Protection
- Regulated Outputs • Six-sided Shielding

MG/MI Series—18 Watt Single output
- Regulated outputs
- Remote shutdown
- Continuous short circuit protection
- 200kHz switching frequency

MJ Series—18 Watt Single/Dual/Triple output
- Regulated outputs
- Six-sided shielding
- Continuous short circuit protection
- Remote shutdown

AA Series—25-40 Watt Single/Multi output
- Low profile
- 400 KHz switching frequency
- High efficiency
- Parallelable • Adjustable output

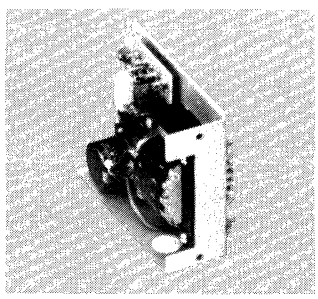
* Special build

ACDC 15 TO 150 WATTS SINGLE/MULTIPLE OUTPUT LINEAR POWER SUPPLIES ECV/ETV SERIES



FEATURES

- 100% Vacuum varnish impregnated transformers.
- Cross references with all manufacturers.
- Installation instructions/specifiction sheet with each unit.
- World wide voltage taps. AC input nominal, 100/117/220/230/240VAC field selectable.
- Remote sense.
- Overload protection.
- Overvoltage protection.
- 0° to 50°C operating temperature.
- Cooling—natural convection.
- UL, CSA certification.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

Argentina (IRAM) Instituto Argentino de Racionalization de Materiales

Australia (SAA) Standards Association of Australia

Austria (ÖVE) Österreichischer Verband für Elektrotechnik

Belgium (CEB) Comité Electrotechnique Belge

Brazil (ABNT) Associação Brasileira de Normas Teonicas

Canada (CSA) Canadian Standards Association

AT&T Microelectronics

POWER SUPPLIES dc

Board-Mounted Power Modules

AT&T's FE Series Board-Mounted Power Modules are a new and fast-growing family of dc-dc converters manufactured at AT&T's one million-square-foot facility in Dallas, Texas.

AT&T Power Range 0.5 W to 150 W

AT&T board-mounted power modules offer low-profile, high-power-density, off-the-shelf, dc-dc power conversion in module sizes of 0.5 W to 150 W. Known for reliability, AT&T board-mounted power modules feature a variety of design options with typical power efficiencies in excess of 80%.

Distributed Power Architecture for the '90s

Developed by AT&T Bell Laboratories to reduce the high first-cost of providing power and ensuring system reliability, distributed power architecture allows you to partition your system load into separate and distinct service groups, each with its own power conversion unit. Power modules are placed precisely where power conversion is needed. Distributed power architecture eliminates the need for both a large, multi-output power supply and power supply redundancy to gain system reliability. AT&T board-mounted power modules allow your computer and telecommunications applications to keep pace with power conversion trends throughout the '90s.

Features

- Electronic on/off
- Remote sensing
- Overcurrent protection
- Overvoltage protection
- Isolated and non-isolated models
- Input/output filtering
- External synchronization
- Well-regulated output voltage
- Wide operating temperature ranges
- Three-year warranty

Applications

- Telecommunications
- Data processing systems
- Industrial electronics
- Test and measurement systems
- Uninterruptible power systems
- Aeronautics
- Robotics

Data Sheets Fast!

Full technical details on all products are available in data sheet and catalog form via mail or fax.

AT&T Microelectronics

POWER SUPPLIES dc

Board-Mounted Power Modules

High Power Product Matrix (50 W to 150 W)

Features

- UL recognized (some models in submittal stage)
- Meets FCC Class A
- Operating case temperature up to 90 °C
- Calculated MTBF of over 1 million hours
- Parallel for load sharing or true N+1 redundancy
- Hot insertion/extraction
- 25 watts per cubic inch
- Remote sense
- Remote ON/OFF
- Current limit, overvoltage protection

AT&T Built-in Quality

AT&T has built a reputation for technical excellence and a commitment to quality and reliability. We back our board-mounted power modules with our three-year warranty and quality commitment, a commitment for reliability and on-time delivery of the finished product.

Input: 90-130 VAC/47 to 63 Hz or 90-264 VAC/47 to 63 Hz
Operating Temperature: 0° to +50°C
Transient Response: 500 microseconds for 50% load change typical.
Protection: Overcurrent and short circuit protected, 5V overvoltage crowbar, automatic resetting from overcurrent.
EMI: Meets FCC Docket 20780 Class B and VDE 0871 Class B.
Enclosure: High impact resistant molded lexan plastic.
Weight: 13–20 oz.
Hold-up Time: 20–120 MS
Storage Temperature: −30 to +85°C
Safety Agencies: UL, CSA, TUV, B.S.I., IEC950
Warranty: 1 or 2 years
Short Circuit Protection: Indefinite at 50°C
Relative Humidity: 5% to 80% non-condensing

External transformers, battery chargers, linear and switching power supplies provide several advantages over conventional built in power sources as listed below:

FEATURES

- Wall plug-in and desktop styles
- Single and multiple output models available
- UL Listed safety agency approved
- Impact resistant Lexan thermoplastic enclosure
- AC blades zinc plated solid brass with tapered tip
- Available with input and/or output cord(s) and connector
- One or two year Warranty
- Sealed construction
- Private label hot stamping available
- Some available with 230V/50 Hz input for European use

BENEFITS

- Eliminate UL considerations because hazardous voltages are kept out of your product
- Increase space for other components in your product
- Increase aesthetic appearance and portability by reducing the size and weight of your product
- Keep power source heat out of your product for increased life
- Tamperproof power source
- Reduce design time for your product
- International uniformity of your product

BATTERY CHARGERS

Battery chargers for Gel-Cel and Sealed Lead Acid batteries are available in 6, 12 and 24 volt charge models for fixed voltage (float) and automatic fast charge applications. NiCd chargers also available.

FLOAT STYLE

BATTERY VOLTAGE	MAXIMUM FAST CHARGE	VOLTAGE AT END OF CHARGE	RATED CURRENTS AVAILABLE		CASE SIZE** (SAME ORDER)

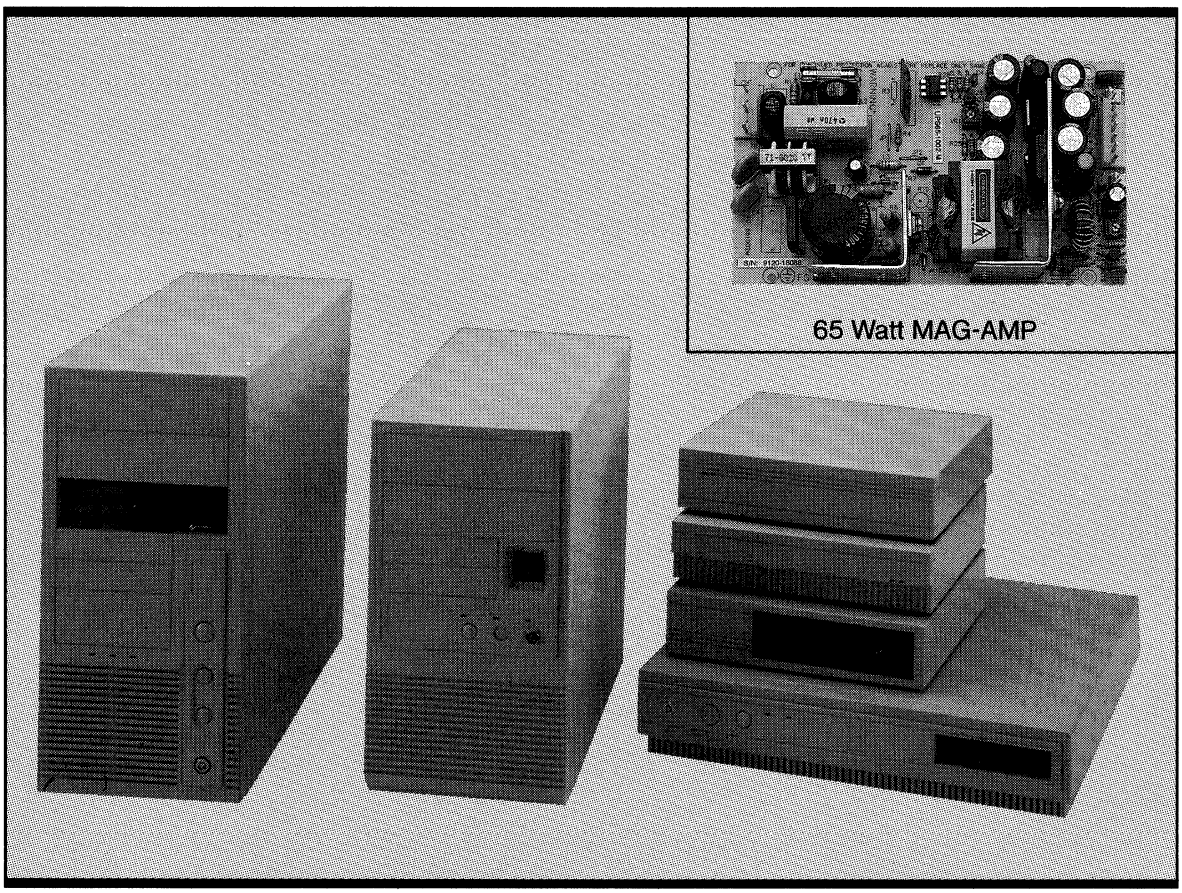
AUTEC'S ENCLOSURE PRODUCTS

- ZERO FOOT-PRINT EXTERNAL MAC DRIVES
- SCSI EXTERNAL DRIVE ENCLOSURES PC & MAC
- PC ENCLOSURES
- TOWER ENCLOSURES



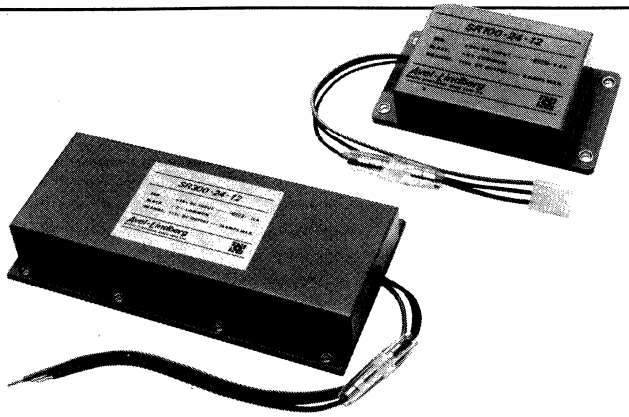
65 Watt MAG-AMP

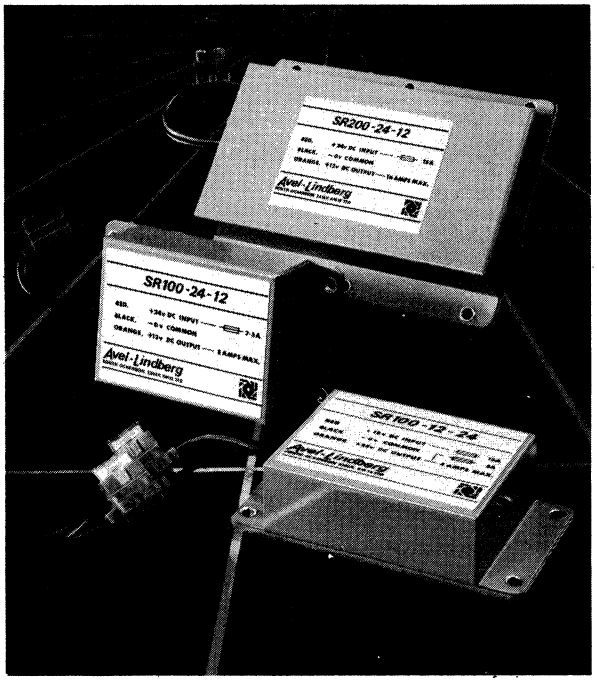
AUTEC manufactures a wide assortment of external drive enclosures and microcomputer cases. Our popular external drive enclosures come complete with all internal cabling (*AC, DC, SCSI cables*), On/Off switch, SCSI ID switch universal input power supply, LED'S and mounting hardware.

In addition, AUTEC is able to provide numerous optional external SCSI cables (*25:50, 50:50, 25:25 & SCSI II*). Power supply options range from 25 watts for a CD-ROM or DAT tape drive to a 65 watt Mag-Amp regulated power supply for high performance full height disk drives and erasable optical drives. Both open Bezel (*for tape drives*) and closed Bezel enclosures are available. The PC and Tower Enclosures can be ordered with either a 150W, 200W or 250W power supply installed.

Custom Metal and Plastic Drive Enclosures, Bezels and Cables are available, consult an Applications Engineer for details.

DC to DC Switching Regulators...Ask AVEL





Voltages: The Avel range of switching regulators offers the following combination of input to output voltage 12/12, 12/24, 24/12. From unstable input source varying as much as ± 25% an output voltage regulated to better than ± 1% is obtained no load to full load.

Protection: Output over-voltage and current limiting circuits fully protect the load on 24 to 12 volt types which are additionally protected by an input fuse. Types with 12 to 12 or 12 to 24 volt configuration are protected by an output line fuse.

Package: To ensure high reliability in hostile environments the SR series switching regulator is resin encapsulated in an all steel case. This form of construction gives complete protection from water, oil and other deleterious substances. Large easy to locate fixing holes allow fitting to vehicle chassis or body members and in marine application on bulkheads or panels. Connection is made easy via non-reversible plug.

Application: Where equipment designed for 12V d.c. operation is fitted to 24V d.c. systems on buses, trucks, marine craft. The equipment can be cellular telephones, TV monitors, video players, electronic ticket machines, route information systems.

GENERAL PURPOSE DC POWER SUPPLIES

Model 1630 $315.00
Model 1611 $295.00
Model 1610 $215.00

Model 1635 $380.00

Designed to run continuously at maximum output

Durable, lab quality supplies are fully protected
- Reverse Polarity Protection
- Overload Protection
- Thermal Protection
- Short Circuit Protection
- Current Limiting

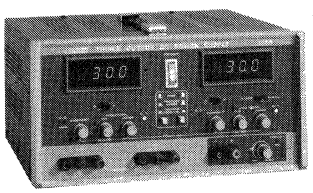
Excellent specifications
- Tight regulation
- Low ripple
- Conservatively rated for continuous operation at maximum power output without overheating

Very versatile
- Connect two supplies in parallel to double the current output
- Connect two in series to double the voltage output
- Constant current or constant voltage operation

MODEL	VOLTAGE	CURRENT
1610	0-30VDC	1A MAX.
1611	0-50	2A
1630/1635*	0-30	3A

*Model 1635 has digital LED display

TRIPLE OUTPUT DC POWER SUPPLIES



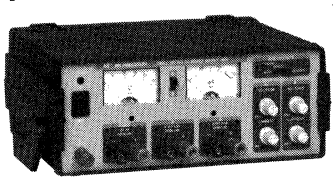
Model 1660 $629.00

- Two 0-30 VDC, 2 A sections capable of independent or tracking operation (Master & Slave)
- One 4-6.5 VDC, 5 A section
- Switchable series/parallel operation—30 V sections
- Adjustable current limit controls—30 V sections
- Two 3½ digit LED displays—one reads volts or amps of "slave" supply—one reads volts or amps of "master" supply or 4V-6.5 V supply.
- Constant current and constant voltage indicators—30 V sections

SPECIFICATIONS

Output Voltage Rage: 0V (+0/–30mV) to 30V + (3% to 7%) (Master & Slave)
Output Current Limit Range: 0A (+0/–30mA) to 2A + (3% to 7%) (Master & Slave)
Ripple: RMS (c.v.) ≤1mV (Master & Slave)
Load Regulation: (Constant Current) ≤0.2% + 3mA (Master & Slave)
Power Requirements: 110/120/220/240 VAC ≤10%, 50/60 Hz
Power Consumptin: Fully loaded approx. 320W
Protection: Reverse polarity and current limiting
Dimensions: (H x W x D): 12.4 x 15 x 6.5" (315 x 381 x 165 mm)
Weight: 22 lbs (10 kg)

NEW



Model 1651 $395.00

- Two 0 to 24 VDC outputs (0.5A)
- One fixed 5V output (4A)
- Independent or tracking operation
- Adjustable current limiting
- Designed to operate continuously at rated output
- Short circuit protection, overload protection, reverse polarity protection
- Connect outputs in series for higher voltage output or in parallel for higher current output (switch selectable)

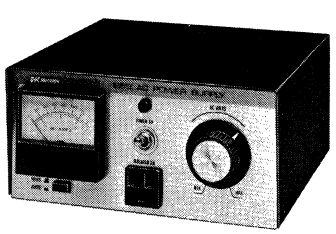
SPECIFICATIONS

MAIN SUPPLIES (TWO)
Output Voltagea: 0 to 24 VDC (both supplies continuously variable)
Output Current: 0 to 500mA (variable)
Line Regulation: 0.01% + 3mV for line voltage variation of ± 10%
Load Regulation: 0.01% + 3mV
Ripple: 2mV rms

FIXED SUPPLY (ONE)
Output Voltage: 5 VDC ± 100mV
Output Current: 4 ADC Maximum
Line Regulatin: 0.1% ± 5mV for line voltage variation of ± 10%
Load Regulation: 0.1% ± 5mV
Ripple: 2mV rms

GENERAL
Power Source: 100/120/220/240 VAC ± 10%, 50/60 Hz
Dimensions: 10 x 24 x 19 cm (3.9 x 9.4 x 7/5")
Weight: 10.5 lb (4.8 kg)

ISOLATED-VARIABLE AC POWER SUPPLIES



Model 1653 $260.00

SPECIFICATIONS

Voltage Adjustment Range: 0-150 VAC, with input at 120 VAC.
Output Isolation: leakage less than 0.1 mA (25°C, 50% relative humidity).
Current Range: 0-2A
Maximum Current (Isolated): 2 A continuous
Voltage/Current Sensing: Sine wave average, calibrated in RMS.
Meter: 3½" overrange protected.
Meter Accuracy: ± 5% of full scale.
Power Requirement: 120 VAC ± 10%, 60 Hz 300 VA.
Dimensions: 21.6 x 9.5 x 20.3 cm (8.5" x 3.75" x 8")
Weight: 5.5 kg (12 lbs)

Model 1655 $459.00

SPECIFICATIONS

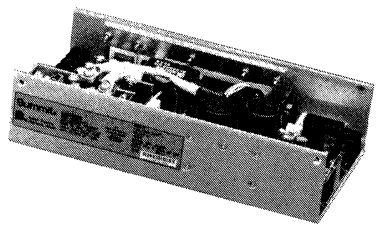
Voltage Adjustment Range: 0-150 VAC, with input at 120 VAC. **Output Isolation:** leakage less than 0.1 mA (25°C, 50% relative humidity). **Current Ranges:** 0-2 A, 0-4 A. **Maximum Current (Isolated):** 3 A continuous, 4 A intermittent (0-130 V). **Peak Current (Inrush):** 30 A max. (inrush limited to one cycle at 30 A). **Voltage Current Sensing:** Sine wave average, calibrated in RMS. **Volt-Amp Ranges:** 0-240 VA, 0-480 VA (voltage set at 120) **Leakage Range:** 0 to 5,000 microamps (expanded in 100-500 microamp portion, compressed to 5 mA full scale). **Meter:** 4½" multicolor scales, overrange protected. **Meter Accuracy:** ± 5% full scale (volts and current) ± 5% at 500 microamps (leakage) **Solder Iron Temperature Control:** 70%-99% of power line (100 W max.) **Power Requirements:** 120 VAC ± 10%, 60 Hz, 600 VA at maximum output. **Dimensions: (H x W x D):** 30.5 x 15.2 x 28.0 cm (12" x 6" x 11") **Weight:** 10 kg (22 lbs)

Summit SWITCHING POWER SUPPLIES

FROM Basler Electric

NEW 400 WATT POWER SUPPLY

- UNIVERSAL INPUT
- REMOTE INHIBIT
- RUGGEDIZED CONSTRUCTION
- FCC/VDE CLASS B FILTER



400 WATTS

Summit power supplies offer the maximum customizing capability and eliminate the need for stocking many different custom units with similar output voltage requirements—250, 300, 400, 500, and 750 watts and custom packaging.

FEATURES

- High package density
- UL/CSA/IEC/VDE/TUV Approvals
- Three to five outputs
- Adjustable auxiliary outputs
- Parallel operation
- FCC/VDE/EMI Filters

BELOW IS INFORMATION ON OUR FULL RANGE OF SWITCHING POWER SUPPLIES

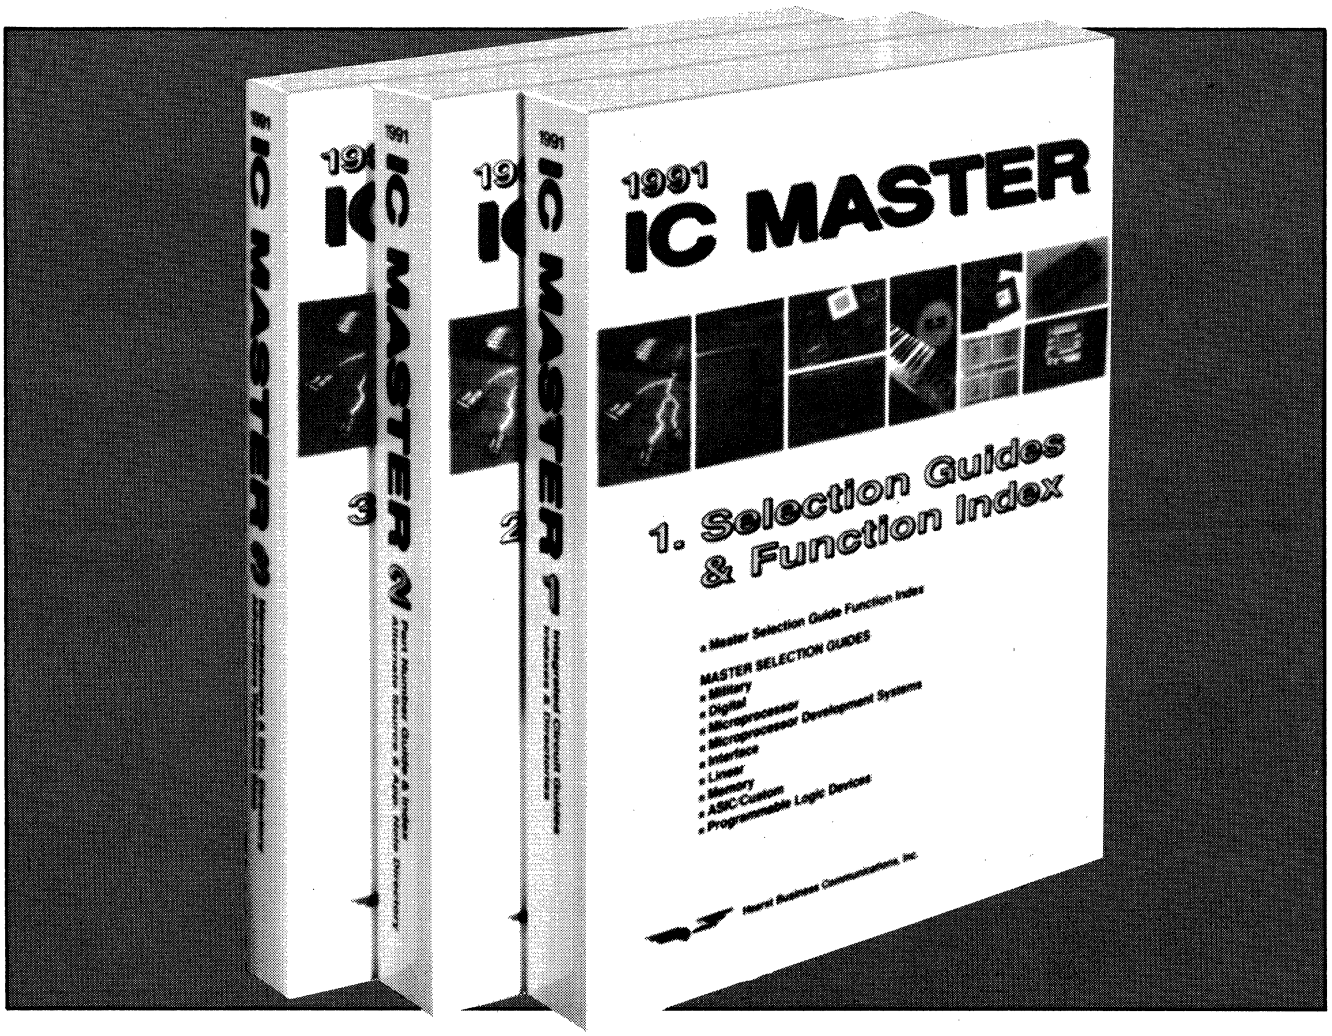
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

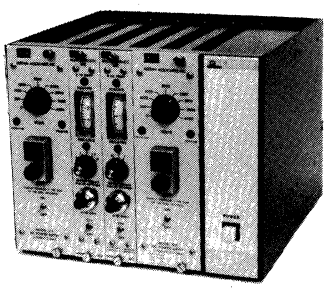
- Models for all Detector Types
- Single and Dual Output Units
- Reversible Polarity
- High Stability
- ac Line Powered & dc Bin Powered

Bertan offers a complete line of high voltage power supplies in NIM configuration. Modules are available in single or dual width, single or dual output, and with ac or dc input. All models have reversible polarity (except 10 kV units), remote programming, arc and short circuit protection.

The Series MWPC supplies are designed specifically for multiwire proportional counter



applications and include sensitive monitors, precision voltage control, fast and slow overcurrent detection.

Bertan also provides NIM mini-bin enclosures for convenient benchtop mounting of single or dual width NIM modules requiring ac or dc power.

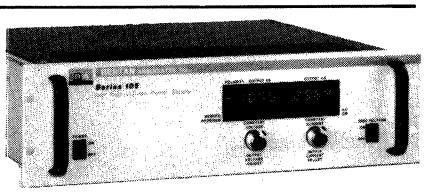
- **Constant Voltage/Constant Current**
- **Auto Crossover**
- **Reversible Polarity**
- **IEEE-488 Interface**

These precision switch mode power supplies with output voltages ranging from 1 to 75 kv. They feature constant voltage and constant current with automatic crossover. For safety and reliability, all models include remote interlock, slow start and power interrupt as well as arc, short and open circuit protection. Remote programming of the power supply



output voltage and output current can be accomplished with a remote analog voltage, remote resistance or with an optional IEEE-488 interface (Model 100-C488).

For dedicated remote applications, units are available without front panel controls, digital metering and operating mode indicator lights.

Input: 115/230 Vac, 50-60, Hz • **Voltage Regulation:** ±0.02% for ±10% line change, ±0.04% for NL/FL or FL/NL • **Ripple:** 0.1% of setting +0.1% of max. peak to peak • **Current Regulation:** ±0.1% for ±10% line change, ±0.2% for NL/FL or FL/NL • **Temperature Coefficient:** ±100 ppm for constant voltage, ±200 ppm for constant current • **Size:** 19" x 5.2" x 17" (483 x 133 x 432mm) • **Weight:** 45.1 lbs. (20kg)

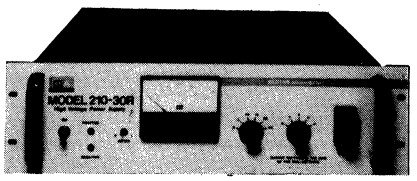
- **Reversible Polarity**
- **Voltage and Current Metering**
- **Remote Programming and Monitoring**
- **IEEE-488 Interface Available**

The Series 210 is a family of fully enclosed, precision regulated, linear power supplies. They feature an analog meter for current and voltage, remote analog programming and monitoring, reversible polarity (up to 50kV), and direct reading calibrated front panel voltage control.

All models provide arc and short circuit protection for safe, reliable operation. Any model may be ordered with an optional 16 bit binary remote programming. An IEEE-488 interface is also available (Model 200-C488).



Input: 115/230 Vac, 50-60 Hz, **Line Regulation:** ±0.001% for ±10% line change • **Load Regulation:** ±0.005 for NL/FL or FL/NL • **Temperature Coefficient:** 50ppm per °C • **Remote Programming and Monitoring:** 0 to +5V • **Size:** up to 5kV - 19″ x 5.2″ x 11″ (483 x 133 x 279mm); 10kV-100kV - 19″ x 5.2″ x 16″ (483 x 133 x 406mm)

**Measured peak to peak at maximum output.*

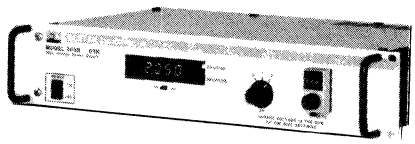
- **Reversible Polarity**
- **Digital Voltage and Current Metering**
- **Remote Programming and Monitoring**
- **IEEE-488 Interface***

The Series 205B/225 are a family of fully enclosed, precision regulated, linear power supplies. They feature a digital LED meter for current and voltage, remote analog programming and monitoring, reversible polarity, and direct reading calibrated front panel voltage control.

The Series 206B/226 offers identical performance specifications but omits the front panel controls and meter of the Series 205B/225.

All models provide arc and short circuit protection for safe, reliable operation. *An IEEE-488 interface is standard on the 225/226 (Model 200-C488).

Input: 115/230 Vac, 50-60 Hz • **Line Regulation:** ±0.001% for ±10% line change • **Load Regulation:** ±0.005% for NL/FL or FL/NL • **Temperature Coefficient:** 50ppm per °C



•**Remote Programming and Monitoring:** 0 to +5 V • **Size:** up to 20 kV - 19″ x 3.5″ x 9.6″ (483 x 89 x 244mm) • **Weight:** 20.1 lbs (9.1kg); 30 kV, 50 kV 19″ x 5.25″ x 16″ (483 x 133 x 406mm)

SERIES 230; 15W

Model	OUTPUT		
	Voltage	Current	Ripple*
230-01R	0 to ±1kV	0 to 15mA	10mV
230-03R	0 to ±3kV	0 to 5mA	30mV
230-05R	0 to ±5kV	0 to 3mA	50mV
230-10R	0 to ±10kV	0 to 1.5mA	500mV
230-20R	0 to ±20kV	0 to 600μA	2V
230-30R	0 to ±30kV	0 to 400μA	5V

**Measured peak to peak at maximum output*

- **Reversible Polarity**
- **Digital Voltage and Current Meter**
- **Compact, Benchtop**
- **Low Ripple and Noise**

The Series 230 is a family of regulated, compact, precision high voltage power supplies, available with outputs up to 30 kV. Output polarity of all models is reversible. A 3½ digit LCD meter displays voltage or current (switch selectable). Automatic current limiting and arc protection assure safe, reliable operation.

REM option provides remote output voltage and current monitoring, remote interlock, and increased current limit sensitivity (25% of maximum rated output).

Input: 115/230 Vac, 50-60 Hz • **Line Regulation:** ±0.002% for ±10% line change • **Load Regulation:** ±0.01% for NL/FL or FL/NL • **Temperature Coefficient:** 100ppm per °C. • **Size:** 7.6″ x 7.5″ x 5.2″ (194 x 191 x 128mm) • **Weight:** 10.1 lbs. (4.5kg)

- **Compact high performance models up to 75 kV**
- **Constant voltage/constant current-auto crossover**
- **High efficiency switch-mode technology**
- **Remote programming and monitoring**
- **Custom designs available**

The Series 810 and Series 830 are two families of regulated, fixed output polarity, modular, switch mode, high voltage power supplies. Output voltages from 1 to 75 kV are available at up to 100 Watts for the Series 810 and up to 300 Watts for the Series 830.

The user may configure the power supply for internal control or remote operation. Remote features include voltage and current programming, voltage and current monitoring, enable/trip control and operating mode indicator.

All models require 115/230 Vac, 50-60 Hz line power input. Appropriate mating connectors for line power, remote control, remote monitor and the high voltage output are provided.

Line Regulation: 0.02% • **Temperature Coefficient:** less than 100ppm/deg C. • **Ripple:** 0.05% pk-pk for the Series 810 and 0.2% pk-pk for the Series 835. • **Size:** 5 x 5½ x 11″ (127 x 140 x 280mm) for the Series 810 and 5 x 17 x 15″ (127 x 432 x 381mm) for the Series 830.

- Remote Voltage Programming
- Remote Voltage Monitoring
- Low Ripple and Noise
- Economical Small Size Unit
- Direct PC Board Mounting

The PMT Series is a family of high performance regulated dc to dc modular power supplies suitable for OEM or laboratory applications. They feature exceptionally low ripple and noise, local or remote voltage control, remote voltage monitoring (except for PMT-1500/2500), arc and short circuit protection.

- Low Ripple and Noise
- ac or dc Powered
- Internal Control/Remote Programming
- Voltage and Current Monitoring

The Series 602C, 603C, 605C and 606C are four families of regulated, fixed output polarity modular high voltage power supplies.

The Series 602C and 603C require a standard line input of 115/230Vac (switch selectable), 50-60Hz. The Series 605C and 606C require a +24Vdc input (+28Vdc optionally-available). The units are fully enclosed and designed to satisfy system or bench top operation.

The output voltage is controlled internally by a multi-turn potentiometer. Remote analog voltage or resistance programming is included in all models. Analog monitor outputs are also included for remote monitoring of both the high voltage output and the output current. Remote control capability includes a remote ON/OFF logic input.

Line Regulation: ±0.001% for ±10% input line change. • **Load Regulation:** ±0.002% for 0 to maximum rated output current change. • **Temperature Coefficient (0 to 50°C):** 50ppm of maximum per °C. • **Stability (after ½ hr warm-up):** 0.01% per hour; 0.02% per 8 hours. • **Local Control:** Internal multi-turn potentiometer for 0 to maximum output voltage (±0.2%). • **Remote Programming:** 0 to +5 Volt dc analog input signal. • **Voltage Monitor:** 0 to +5 Volts proportional to 0 maximum output high voltage. • **Current Monitor:** 0 to +5 Volts proportional to 0 to maximum output current. • **Current Limit:** Short circuit current limiting to less than 110% of the maximum rated output current. • **Protection:** Arc and short circuit protected, self-restoring. The input ac line is fused.

MODEL	SIZE	WEIGHTS
602C	5″ x 3.1″ x 8.7″ (127 x 79 x 221mm)	6.75 lbs (3.1kg)
603C	5″ x 5.5″ x 8.5″ (127 x 140 x 216mm)	8.0 lbs (3.64kg)
605C	5″ x 2.75″ x 4.75″ (127 x 70 x 121mm)	3.2 lbs (1.45kg)
606C	5″ x 5.2″ x 4.5″ (127 x 140 x 114mm)	3.5 lbs (1.6kg)

PRECISION HIGH VOLTAGE POWER SUPPLY MODULES

SERIES 612; 20W

Model	OUTPUT		
	Voltage	Current	Ripple*
612A-200P,N	0 to 20kV	0 to 1mA	200mV
612A-300P,N	0 to 30kV	0 to 0.5mA	300mV
612A-500P,N	0 to 50kV	0 to 0.3mA	800mV

Measured peak to peak at maximum output.

- **High Stability**
- **Low Ripple and Noise**
- **Internal and Remote Control**
- **Voltage and Current Monitoring**

The Series 612A is a family of regulated, fixed output polarity, modular high voltage power supplies. They provide exceptional performance and are ideally suited to many specialized requirements such as CRTs, imaging, ion beam and electron beam applications.

The Series 612A require a standard line voltage of 115/230 Vac (internally selectable), 50-60Hz. The units are fully enclosed and designed for system or bench top operation. Models are available from 20kV up to 50kV.

The output voltage is controlled locally by an internal multi-turn potentiometer. Provision for remote analog voltage or resistance programming is included in all models. Analog monitor outputs are also included for remote monitoring of both the high voltage and current outputs. All units are short circuit current limited and arc protected.

Input: 115 Vac ±10% @ 1A, 50-60 Hz., 230 Vac ±10% @ 0.5A, 50-60 Hz. • **Line Regulation:** ±0.001% of max. for ±10% line change • **Load Regulation:** ±0.002% of max. for 0 to max. rated output current change • **Temperature Coefficient:** 50 ppm of max. per °C • **Stability:** 0.01% per hour; 0.02% per 8 hours • **Local Control:** Internal multi-turn potentiometer for 0 to 102% of max. output voltage • **Remote Programming:** 0 to -5 Vdc

analog input signal proportional to 0 to 102% of max. rated output. The programming input impedance is greater than 10 megohms • **Size:** 4.88″ x 8.38″ x 9.75″ (124 x 213 x 248mm) • **Weight:** 9 lbs. (4.1kg)

BERTAN HIGH VOLTAGE POWER SUPPLY SOLUTIONS

E-BEAM, I-BEAM, X-RAY, CRT AND OEM/CUSTOM POWER SUPPLIES

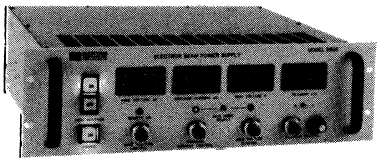
SERIES EB/IB

Model	Beam Power Supply		*Bias Power Supply	
	Voltage	Current	Voltage	Current
EB-30A	0 to −30kV	0 to 500μA	0 to −1000V	0 to 50μA
EB-50A	0 to −50kV	0 to 250μA	0 to −2000V	0 to 50μA
EB-100A	0 to −100kV	0 to 100μA	0 to −2000V	0 to 50μA
IB-30A	0 to +30kV	0 to 500μA	0 to +2000V	0 to 50μA
IB-50A	0 to +50kV	0 to 250μA	0 to +2000V	0 to 50μA
IB-100A	0 to +100kV	0 to 100μA	0 to +2000V	0 to 50μA

Series EB and Series IB are triple output high voltage power supply systems specifically developed for precision electron beam and ion beam applications. Each model contains three independently adjustable power supplies for beam acceleration, bias, and filament. The isolated bias and filament power outputs "float" on the high voltage acceleration output.

In addition to the standard models, custom designed units are available to meet specific requirements.

An IEEE-488 interface is available to provide full control and monitoring capability.



GENERAL SPECIFICATIONS	
*Filament	Voltage: 0 to 5Vdc Current: 0 to 5Adc
Input	115/230V ± 10%, 2A, 50-60Hz
Size	19″ x 5.25″ x 17″ (483 x 133 x 432mm)
Weight	55 lbs. (25kg)

Bias and Filament "float" at Beam high voltage.

SERIES XR

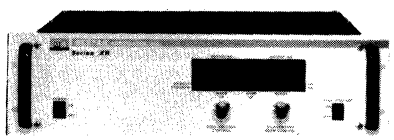
Model	TARGET	
	Voltage	Current
XR-20B	0 to 20kV	0 to 15mA
XR-30B	0 to 30kV	0 to 10mA
XR-50B	0 to 50kV	0 to 6 mA
XR-75B	0 to 75kV	0 to 4 mA

Specify target output voltage polarity when ordering.

- **Target Voltage/Current Control**
- **Front Panel/Remote Control**
- **IEEE-488 Interface Available**

The BERTAN Series XR is designed for the operation and control of filamentary X-RAY sources. All units include a regulated high voltage target power supply, an appropriately isolated filament power supply and the intelligent control circuitry to provide adjustable constant target current operation.

Custom designed units can be provided to meet specialized system, test or laboratory applications.



Input: 115/230V ± 10%, 8/4A, 50/60Hz • **Filament:** 0 to 3V @ 0 to 3A • **Size:** 19″ x 5.25″ x 18″ (483 x 133 x 457mm) • **Weight:** 48 lbs (22kg)

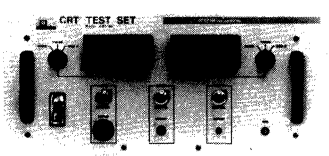
SERIES CRT 30/50

Model	OUTPUT		
	Voltage	Current	Ripple* pk-pk
Anode CRT-30 CRT-50	 0 to +30kV 0 to +50kV	 0 to 2mA 0 to 1.5mA	 3V 5V
Focus	0 to +10kV	0 to 1mA	1V
G2	0 to +1kV	0 to 1mA	100mV

Measured peak to peak at maximum output.

- **CRT Test System**
- **IEEE-488 Interface Available**

The BERTAN CRT-30 and CRT-50 are three output high voltage power supply systems configured for versatile laboratory, CRT test, or system applications. Calibrated controls and digital displays provide independent control and monitoring of the anode, focus, and G2 voltages and currents. A wide range of options are available, including auxiliary outputs, dynamic focus, digital programming, and a comprehensive IEEE-488 Talker/Listener interface. Custom units can be provided to meet individualized system applications.



GENERAL SPECIFICATIONS	
Input	115/230V ± 10% 50-60 Hz
Regulation	.01% line, .01% load
Temp. Coeff.	100ppm/ºC, 0 to +50ºC
Accuracy	.25% +.2% of maximum
Size:	19″ x 8.75″ x 15″ (483 x 222 x 381mm)

SERIES OEM

- **Outputs up to 100kV, 1kW**
- **ac to dc, dc to dc**
- **Single or Multiple Output**
- **Microprocessor Control**
- **Analog and Digital Programming including IEEE-488**
- **Custom Interfacing**
- **UL/CSA/VDE APPROVALS**

BERTAN specializes in designing and producing custom and OEM systems with unique electrical and mechanical features. Our experienced engineering staff, equipped with the most advanced design and analytical tools, including CAD/CAM, enables us to provide cost effective, timely solutions to your particular power supply problems. Our modern 40,000 sq. ft. manufacturing facility is staffed and organized to satisfy both large and small quantity production requirements.

Complete in-house quality control accompanies each custom product. From the determination of specifications and configurations through full production and delivery, the utmost attention is given to optimizing quality and reliability while minimizing cost. Each power supply is fully burned in and tested to ensure that it meets or exceeds all performance requirements.

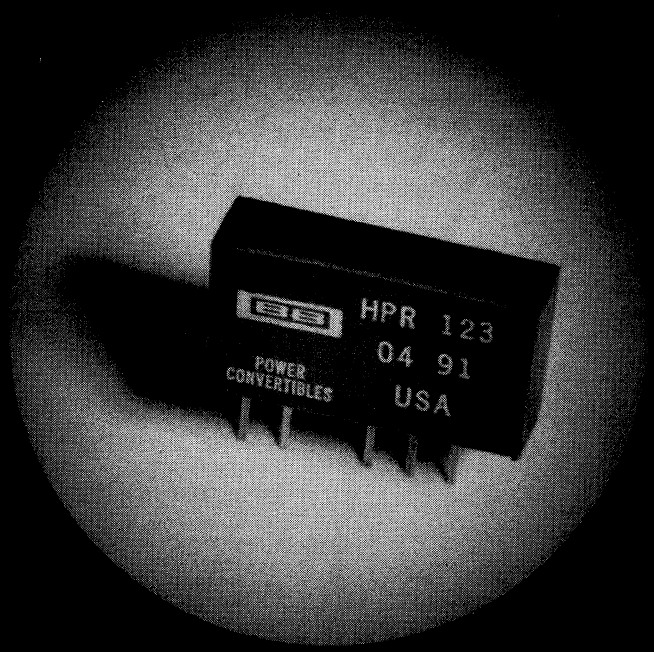
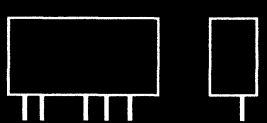
Announcing the *New* Ultimate in Driving



Power Convertibles ™

The premiere vehicle in power conversion. These DC/DC Converters allow you to maintain a unique balance between price and performance.

The hottest economy model on the road is the HPR1XX. It is compact and affordably priced to drive your system. The Single-In-Line body styling conserves board level parking, taking up less than 0.2 inch^2 board space. A low profile is achieved through Surface Mount Manufacturing.



actual size

Precision performance comes with the HPR1XX's 750mW of output power. This Power Convertible has exceptional roadhandling with a high efficiency rating of 80%. You can "rev" up your designs with our isolation voltage of 750VDC.

Now drive your designs to the limit. Give it a test run; at less than $5.00 in OEM quantities you'll be glad you're driving with a Power Convertible.

For the dealer near you:

BURR-BROWN®

Your Partner in Quality

POWER CONVERTIBLES™

With over 500 DC/DC Converters Burr-Brown offers one of the largest selections in the power conversion industry.

- Input voltages from 5 to 72V
- Output voltage from 5 to 120V
- Output wattages from .45 to 15W
- Regulated & unregulated outputs
- Single, dual, and triple outputs
- Up to four isolated channels
- Isolation up to 8000V
- Packages include SIP and DIP
- Surface Mount Manufacturing
- High Reliability - Life Testing
- Pin-For-Pin Compatibility with Competitor's Devices
- Low-cost total solutions - starting at $6.85

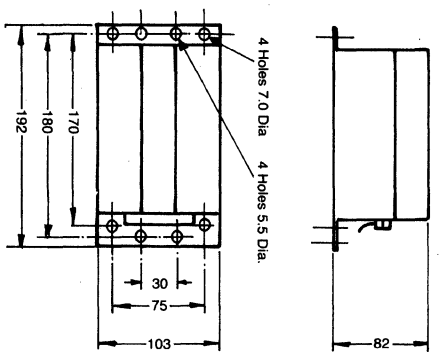
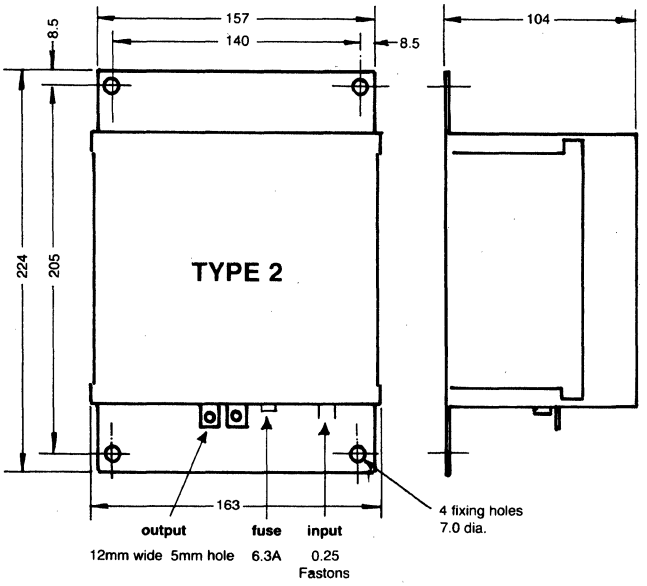
DC/DC CONVERTERS

All dimmensions in millimeters

TYPE 1





Features

- Regulated output voltage
- Fully isolated output
- Output current limit
- Short circuit protection
- High efficiency
- Start up on full load
- Supply reversal protection
- Range of output voltages
- Range of supply voltages
- Rugged construction
- Easy installation
- Competitive unit cost

Regulated Output Voltage
The range of DC/DC converters provide a means of obtaining a stable, high current low voltage supply from a range of higher DC voltage sources.

Fully Isolated Output
The converters are arranged to give complete isolation between input and output providing complete versatility of circuitry arrangements.

Output Current Limit
Output current is continuously monitored protecting the converter and output load circuitry.

Short Circuit Protection
Provision is made to provide complete protection against output short circuit conditions. Under these conditions the output current is limited to a maximum set limit within the rating of the converter.

High Efficiency
Careful design gives the converter high efficiency providing the user with a very low loss unit to be included in his total system.

Start up on Full Load
This standard feature enables the user to incorporate the converter into his system with minimum complication.

Supply Reversal Protection
To protect against inadvertent misconnection of the input supply, the converter is designed to rupture the input fuse link in the event of reverse polarity connection, thus protecting the converter and installation.

Output Voltage Range
Converters are available in either 12 Volt or 24 Volt (nominal) output. Other output voltages available to special order.

Input Voltage Range
A family of converters have been designed to cover a wide range of input voltages.

Rugged Construction
Each type of converter is self contained, enclosed in a rugged steel enclosure with its own cooling heatsink. The small physical size allows ease of installation using the fixing facilitites provided.

TECHNICAL SPECIFICATION

Output		**Nominal Output Voltage**	
		12	**24**
*Voltage (Volts)		12.25	24.5
Variation over load range (Volts)		±0.2	±0.25
Ripple at Full Load (constant input) (Volts)		±0.2	±0.2
Continuous current	Type 1	15	10
Tamb =20°C (amps)	Type 2	30	20
Intermittant Current	Type 1	20	12
limit (amps)	Type 2	35	25
Short circuit current	Type 1	22	14
(amps)	Type 2	40	30

Input

*Voltage Range	Type 1 24,36,48,60,72-80,96
(Volts) ±20%	Type 2 48,60,72-80,96,120
Operating temp (°C)	−25+40
Storage temp (°C)	−40+50
Overall efficiency (%)	Better than 85

*Other ratings are available on request.

Notes
1 Maximum ratings only achieved with converter when heatsink fins are vertically oriented in free air.
2 Order writing data as follows:—Type/input voltage/output voltage/continuous current eg. T1/72-80/12/15 or T2/60/24/20.
3 Input Supply to be connected as close as possible to source.

DC/DC CONVERTERS

Specializing in DC/DC Converters

CALEX DC/DC converters are designed for use in telecommunications applications, medical instruments field portable and battery operated equipment. They are also used in a variety of industrial applications, instrumentation and computer systems.

CALEX manufactures 114 DC/DC converters with input voltages from 5 Volts to 72 Volts that range from 1.8 Watts to 57 Watts output power. We specialize in low noise, high efficiency and high reliability power conversion modules.

Most CALEX converters are encapsulated and are housed in six-sided, shielded copper cases. They are 100% tested and burned-in during manufacture to ensure the highest quality. All CALEX DC/DC converters are covered by a 5 year limited warranty.

Call **800-542-3355** or **415-932-3911** for individual assistance on price and delivery or to request a copy of our 120 page Design Guide and Catalog. After September 2, 1991 call 510-932-3911 or FAX us at 510-932-6017.

CALEX 3 & 6 Watt Single and Dual DC/DC Converters are ideal for use in industrial applications and systems that require direct PCB mounting.

These units are designed with low profile six-sided shielded copper cases to significantly reduce radiated noise.

Also available is your choice of two convenient mounting kits for the 3 & 6 Watt units: the model MS15 and the model MS6.

DC/DC CONVERTERS

3355 Vincent Road, Pleasant Hill,CA 94523-4389 800-542-3355 Telephone: (415)932-3911 FAX: (415)932-6017

- Low Noise, Highly Regulated Triple Outputs
- Efficiency 75% for All Line Conditions
- Six-Sided Shielded Low Thermal Gradient Copper Case
- 500 VDC Minimum Input to Output Isolation
- Covered Under the CALEX 5 Year Warranty

The CALEX 8.5 Watt Triple Output DC/DC Converters are designed with a high accuracy feedback control circuit and are ideal for wide (4:1) input ranges. Under specified ranges, these triple output units achieve outstanding line and load regulation.

The converters have both a logic shutdown pin and thermal overload protection circuitry. The three outputs are protected from overvoltage transients by transient voltage suppressor diodes.

For more information or to place an order call our toll free number **800-542-3355.**

Originally designed for the telecommunications industry, the CALEX 10 Watt DC/DC Converters are also used in industrial and instrument applications with wide input and low noise requirements.

The series operates from 48 Volt input power. Total power consumption is minimized with a logic shut down pin controlled by open collector TTL/CMOS circuits.

8.5 WATT TRIPLE OUTPUTS

DC/DC CONVERTERS

CALEX 3355 Vincent Road, Pleasant Hill,CA 94523-4389 800-542-3355 Telephone (415)932-3911 FAX: (415)932-6017

- High Efficiency Operation
- Six-Sided Shielded Steel Case
- LC Type Input Filter
- Wide Input Voltage Ranges

The CALEX 10 & 12 Watt Single and Dual DC/DC Converters are used in a variety of industrial and instrument applications. The extra wide input range (3:1) is ideal for battery or unregulated input applications.

These units feature state of the art MOSFET technology, an isolation transformer and a high regulation linear post regulator.

Call toll free **800-542-3355** for additional information.

- PCB Mounting With Optional Heat Sink Or Chassis Mount Versions
- 2:1 Wide Input Voltage Range (9-18, 18-36, 36-72)
- Efficiencies to 90%
- Common and Differential Mode Input Filtering
- Remote Sense On +5 Volt Output
- Single and Dual Outputs Are Isolated From Each Other
- No Derating To 80°C Case Temperature

The K Triple Output Series is designed with separate power sections for the single and dual outputs. Each power section operates in anti-phase to the other, thereby reducing the ripple current stress on the input components and the reflected input ripple. An order of magnitude regulation improvement is achieved over competitive designs. There is no cross regulation between the +5 output and the dual outputs.

Excellent noise performance is achieved by the use of a 0.040 inch thick aluminum case, pot core and toroidal magnetics, double shielded transformers and both normal mode and common mode filtering.

The input and outputs are protected from overvoltage by transient voltage suppressor diodes. The outputs are protected from faults with pulse by pulse digital current limiting.

CALEX produces the highest quality power supplies available. Each power supply employs industry standard pin configurations that make the units ideal for use with operational amplifiers, function modules, and data conversion circuits.

COMMON SPECIFICATIONS

Input Voltage

100 ±10VAC (add "-100" to model number)
115 ±10VAC (add "-115" to model number)
220 ±20VAC (add "-220" to model number)
230 ±20VAC (add "-230" to model number)
240 ±20VAC (add "-240" to model number)

Input frequency range: 50 to 60 Hz
Input to Output Isolation: 1000-2500 VRMS, contact factory
Input to Output Resistance: 50 Megohms minimum
Capacitance: 50-250pF, contact factory
Over voltage protection: standard on all 5 Volt singles except 21-30 and 7009
Temperature coefficient: +0.01%/°C typical
Storage temperature: -25°C to +85°C
Case operating temperature range no derating: -25°C to +50°C
Short circuit protection: foldback current limiting on all except models 21-12, 21-30 and 22-40 which have constant current limiting

Mounting kits are available for the PC board mounting cases.
Call factory direct for large quantity pricing.
OEM pricing available.

QUALITY PRODUCTS SINCE 1962

FEATURES

- 5 Year Warranty
- Convenient Barrier Strip Design
- Molded-in Threaded Inserts and Thru Hole Mounting
- Foldback Short Circuit Protection

The unique CM Series is a creatively engineered package. These units are ideally suited for use with small dedicated microprocessor systems, instrumentation and test equipment. Their clever design allows a clamp type terminal to secure the wire without twisting. A recessed barrier strip permits tight connections that protect the wire from physical damage. The case has four molded-in threaded inserts and four through holes. The CM Series also comes with foldback current limiting for continuous short circuit protection. All CALEX chassis mount power supplies come with our standard 5 Year Warranty.

GENERAL SPECIFICATIONS:

- **Input:**

120VAC 60Hz	UL/CSA	North America
220VAC 50Hz	VDE/TUEV	Europe
100VAC 50Hz	JIS	Japan
240VAC 50Hz	BSI/SAA	UK, Australia, S. Africa

- **Output:** ±0.5VDC rated load.
- **Temperature:** 0°C to +40°C full load condition.
- **Dielectric Withstand Voltage:**

UL, CSA, JIS	1500VAC	1 Minute
VDE, BSI, TUEV, SAA	4000VAC	1 Minute

- **Enclosure:** Noryl SE 100J, Cyclolac ABS or Equivalent.
- **O/P Cord:** 6 feet Awg 24 or heavier.
- **Safety:** UL, CSA, JIS, VDE, TUEV, BSI, SAA.
- **MTBF:** 30000 Hours at 25°C full load.
- **QA:** MIL-STD-1Ø5D

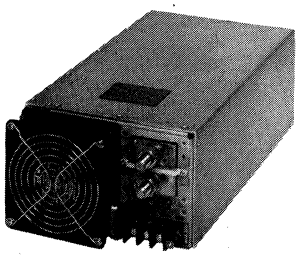
CEAG Switching Power Supplies

Industry Standard / Single Output Military Switching Power Supply / 4001 Series-1500 Watts

Voltage: 115/230 Vac. ±20%, 1 phase
Frequency: 57-63 Hz
Efficiency: 70% (min)
Power: 1500W
Voltage Adjustment: ±10%
Voltage Current: See chart below

Model	V	A	Model	V	A
4001-5	5	300	4001-18	18	85
4001-6	6	260	4001-24	24	65
4001-12	12	130	4001-28	28	60
4001-15	15	105	4001-48	48	35

Regulation: ±0.2% Weight: 26 lbs. max.
Operating Temperature: 0 to 71°C
Temperature Coefficient: 0.02%/°C max.
Protection: Over current, over-voltage and over temperature, built-in test and inhibit functions
MTBF: Greater than 50,000 hrs. @ 50°C in naval sheltered environment
Dimensions (ins): 5×8×15
Internal EMI Filter
Available Options: 3 phase input/ 47-440 Hz/Parallel (N+1) operation/Other outputs available

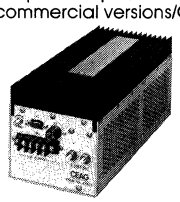


Single Output Military Switching Power Supply / 4032 Series-300 Watts

Voltage: 115/230 Vac. ±15%, 1 phase
Frequency: 47-440 Hz
Efficiency: 70% (min)
Power: 300W
Voltage Adjustment: ±10%
Voltage/Current: See chart below

Model	V	A	Model	V	A
4032-5	5	60	4032-18	18	17
4032-6	6	50	4032-24	24	13
4032-12	12	25	4032-28	28	11
4032-15	15	20	4032-48	48	6.5

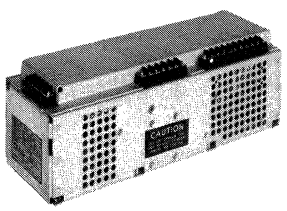
Regulation: ±0.25% Weight: 10 lbs. max.
Ripple and Noise: 100mVp-p
Operating Temperature: 0 to 71°C
Temperature Coefficient: 0.02%/°C max.
Protection: Over-current, over-voltage and over temperature, built-in test and inhibit functions
MTBF: Greater than 60,000 hrs. @ 40°C in naval sheltered environment
Holdup Time: 30mS
Cooling: Forced or free air
Dimensions (ins): 5×5×12
Internal EMI Filter
Available Options: 3 phase input/Industrial and ruggedized commercial versions/Other outputs available



Quad Output Shipboard Military Switching Power Supply / Model 4034-350 Watts ±15 Volts 6 Amps and ±28 Volts 3 Amps

Voltage: 115/220 Vac. ±10%, 1 phase
Frequency: 57-63 Hz
Efficiency: 70% (min)
Power: 350W
Voltage/Current: ±15V/6A ±28V/3A
Regulation: ±0.2%
Ripple and Noise: 200mVp-p max.
Operating Temperature: 0 to 65°C
Temperature Coefficient: 0.02%/°C

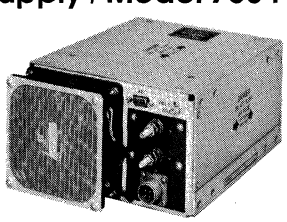
Protection: Over current, over-voltage and over temperature
MTBF: Greater than 50,000 hrs. @ 50°C in naval sheltered environment
Dimensions (ins): 4.75×4.75×13.75
Weight: 12 lbs. max.
Available Options: Other outputs and combinations available



Compact Fan-Cooled Single Output Military Switching Power Supply / Model 7604 1500 Watts / 28 Volts 54 Amps

Voltage: 115/230 Vac. ±20%, 1 phase
Frequency: 47-63 Hz
Efficiency: 80% (min)
Power: 1500W
Voltage/Current: 28V/54A
Regulation: ±0.5%
Ripple and Noise: 100mVp-p max.
Operating Temperature: 0 to 71°C
Temperature Coefficient: 0.02%/°C

Protection: Over current, over-voltage
MTBF: Greater than 120,000 hrs. @ 50°C in naval sheltered environment
Dimensions (ins): 5×8×11
Weight: 17 lbs. max. Internal EMI Filter
Available Options: AC input power fail/ Parallel (N+1) operation/Input frequency of 47-440 Hz available/3 phase input available/ Other output voltages available



DC-DC Six Output Military Switching Power Supply / Model 7654-130 Watts

5 Volts 20 Amps, −5 Volts .5 Amps, +15 Volts .5 Amps, −15 Volts .5 Amps, 21.5 Volts .2 Amps and −21.5 Volts .2 Amps

Voltage: 28Vdc, ±20%, per MIL-STD 1275A
Efficiency: 68%
Power: 130W
Voltage/Current: See chart below
Regulation: ±5V @ ±6%
±15V @ ±1.3%
±21.5V @ ±9.5%

5V/20A	−15V/.5A
−5V/.5A	21.5V/.2A
+15V/.5A	−21.5V/.2A

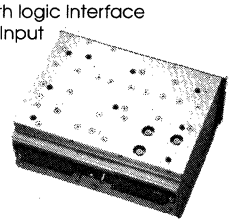
Ripple and Noise: 100mVp-p
Protection: Over-current and over-voltage
MTBF: Greater than 52,000 hrs. at 50°C, ground mobile environment
Temperature Coefficient: 0.02%/°C
Dimensions (ins): 1.8×7.6×8.4
Weight: 5.25 lbs. max.
Nuclear tolerant
Tempest:
Cooling wedgelock retainers
Available Options: Other outputs and combinations are available, EMI filter available

Nine Output Military Switching Power Supply / Model 7667

Voltage: 115/220 Vac ±10%, 1 phase
Frequency: 45-440 Hz Efficiency: 70%
Power: 320W, .95 power factor
Regulation: ±5%, Ripple: 100mVp-p
Voltage/Current: See chart below

5V/45A	-12V/1A	-5V/1.5A
5V/15A	15aV/0.5A	28V/0.05A
12V/1A	15bV/0.5A	15V/0.25A

Protection: Over-current, over-voltage, over-temperature ride through time during input power transitions
MTBF: Greater than 35,000 hrs at 50°C, ground mobile environment
Operating Temperature: —55 to 85°C
RAD hardened design for nuclear environment
Dimensions (ins): 8.38 x 3.875 x 6.38
Weight: 15 lbs max
Battery backup system with logic interface
Available Options: 28Vdc Input



CEC ELECTRONICS CORP.

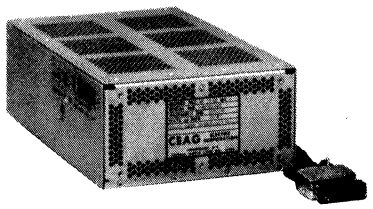
CEAG Switching Power Supplies

Quad Output Modular Military Switching Power Supply / Model 7860-250 Watts
5 Volts 21 Amps, −5.2 Volts 7.5 Amps, 12 Volts 7 Amps, −12 Volts 1.5 Amps

Voltage: 115VAC ±10%, 1 phase
Frequency: 60 Hz
Efficiency: 65%
Power: 250W
Voltage/Current: See chart below

5V/21A
−5.2V/7.5A
12V/7A
−12V/1.5A

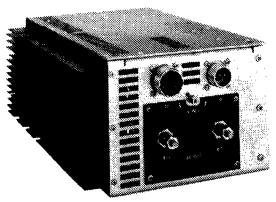
Regulation: ±1%
Output Ripple: 50mVp-p max
Protection: Over-current, over-voltage and over-temperature
MTBF: Greater than 40,000 hrs. at 40°C, ground mobile environment
Operating Temperature: −30 to 65°C
Dimensions (ins): 3.5×7×11
Weight: 12 lbs max



Triple Output Military Switching Power Supply / Model 7901-600 Watts
6 Volts 90 Amps, +15 Volts 1.5 Amps and −15 Volts 1.5 Amps

Voltage: 115 Vac, ±10%, 1 phase, per MIL-STD-1399
Frequency: 60 Hz
Efficiency: 65% min
Power: 600W
Voltage/Current: 6V/90A, 15V/1.5A, −15V/15A
Regulation: ±0.25%
Ripple and Noise: 100mVp-p
Protection: Overcurrent, overvoltage and overtemperature

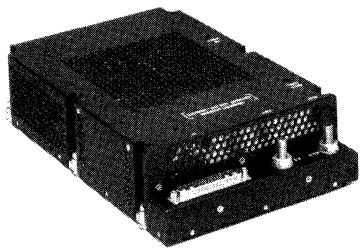
Internal EMI Filter
Remote Sense
Operating Temperature: 0 to 71°C
Temperature Coefficient: 0.02%/°C
Dimensions (ins): 5×6.75×12
Weight: 20 lbs max
Available Options: Other outputs and combinations available



Dual Output, Low Profile Military Switching Power Supply / Model 7911-710 Watts
5 Volts 100 Amps and 15 Volts 14 Amps

Voltage: 115 Vac, ±10%, 3 phase delta per MIL-STD-1399
Frequency: 47-440 Hz
Efficiency: 75%
Power: 710W
Voltage Adjustment: ±10%
Voltage/Current: 5V/100A and 15V/14A
Regulation: ±0.3%
Ripple and Noise: 75mVp-p
Protection: Overcurrent, overvoltage and overtemperature

MTBF: Greater than 100,000 hrs. @ 40°C in naval sheltered environment
Cooling Conduction
Operating Temperature: 0 to 65°C
Temperature Coefficient: 0.02%/°C
Dimensions (ins): 2.5×7×11
Weight: 10 lbs max
Available Options: Other outputs and combinations available

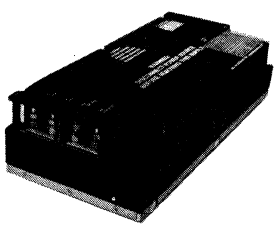


Triple Output, Low Profile Military Switching Power Supply / Model 7939-900 Watts
30 Volts 10 Amps

Voltage: 115 Vac, ±10%, 3 phase delta per MIL-STD-1399
Frequency: 47-440 Hz
Efficiency: 75%
Power: 900W
Voltage/Current: 30V/10A, 30V/10A, 30V/10A
Regulation: ±0.5%
Ripple and Noise: 100mVp-p
Protection: Overcurrent, overvoltage
MTBF: Greater than 100,000 hrs. @ 40°C in naval sheltered environment
Operating Temperature: 0 to 71°C
Dimensions (ins): 2.5×9.5×11.6
Weight: 12.5 lbs. max
Internal EMI Filter
Available Options: Other outputs and combinations are available

Single Output, Low Profile Military Switching Power Supply / Model 7970-785 Watts
5.25 Volts 150 Amps

Voltage: 115 Vac, ±20% triple phase delta MIL-STD-1399
Frequency: 47-440 Hz
Efficiency: 70% min
Power: 785W
Voltage/Current: 5.25V/150A
Regulation (line, load, temperature life): ±0.3%
Ripple and Noise: 100mVp-p
Protection: Overcurrent, overvoltage and overtemperature
MTBF: Greater than 45,000 hrs. at 40°C, naval sheltered environment
Operating Temperature: 0 to 75°C
Temperature Coefficient: .02%/°C
Dimensions (ins): 3×6×14
Weight: 16 lbs max
Internal EMI conduction cooled
Available Options: Remote Sense available
MIL-STD-704 input available



Single Output Military Switching Power Supply / Model 7996-750 Watts
5 Volts 150 Amps

Voltage: 200 Vac, ±10%, 3 phase
Frequency: 47-440 Hz
Efficiency: 75%
Power: 750W
Voltage/Current: 5V/150A
Regulation: ±0.3%
Ripple and Noise: 70mVp-p
Protection: Overcurrent and overvoltage

Operating Temperature: −25 to 70°C
MTBF: Greater than 50,000 hrs. @ 50°C (baseplate) in Airborne Uninhabited fighter environment
Dimensions (ins): 2.5×6×13
Weight: 17 lbs max
Available Options: BIT signal and inhibit input

- Regulated range:
  - ± 15% of nominal voltage (nominal spec)
  - ± 22.5% of of nominal voltage (special spec)
- Recovery time:
  - ≤ 3 cycles for load vibration
  - ≤ 5 cycles for line vibration
- Output voltage≤ regulation:
  - ±2.5% (typical)
- Output wave form:
  - Same with input
- Efficiency:
  - ≥ 95%
- Power factor:
  - ±0.7~1 suitable for pure capacitive or inductive load
- Operating temp:
  - 0°C to 40°C
- Relative humidity:
  - 0~ 90%
- Automatic bypass when overload, short circuit or abnormal. Meanwhile, buzzer will alarm for 30 seconds and LED will lit. (3φ type only)
- 1φ 2W type is built by 220V type which connects with an isolation transformer box.
- 3φ Δ - Y type is built by Z type which connects with an isolation transformer box.
- Input voltage range: ±30% max. (option)
- Voltage recovery time: within 2 cycles (option)
- Over load capacity: 125% 1 hr, 150% 10 min, 200% 15 secs
- Over voltage & inrush current protection
- Widest power factor, suitable for pure capacitive or inductive load
- Microprocessor control circuit. Super micro size and silent operation
- Automatic electronic bypass switching when overload or abnormal
- Electronic select switches for indicating input/output voltage (1φ) and R/S/T phase voltage/current (3φ)

SWITCHING POWER SUPPLIES

FEATURES/BENEFITS

- All products are warranted to be free of defects in materials and workmanship for a period of one year
- Custom and standard products
- Many models are available off-the-shelf for immediate delivery
- Engineering and manufacturing capacity to support major OEM programs
- 0°-70° operating ambient
- 75% efficiency typical
- All outputs are rated for nominal and peak current
- All models are rated for convection and forced air cooling
- Accommodates high peak drive requirements
- AC input provisions
  - —Power Factor Correction
  - —90-132/180-264 VAC, 37-440 Hz
  - —Jumper relocation for VAC range selection
  - —Input surge current limited
  - —Brown out protected
  - —Autoranging
- DC output provisions
  - —Complete overload protection
  - —Overvoltage protected
  - —Reverse voltage protected
  - —Low noise outputs
  - —High hold-up time
  - —Current sharing

SWITCHING POWER SUPPLIES

OPTIONS

- A) Remote On/Off
- B) Power Fail
- C) Thermal Shut Down
- D) EMI/Safety Cover
- E) Not Standard (Special per Series)*
- F) Wire for 230 VAC
- G) 115/230 VAC Remote Selection
- H) "L" Chassis Substitution for "U" Chassis
- J) AC Input in Same Side as DC Output
- K) ¼-20 Studs in lieu of Terminal Block on Output 1 (QX5 and QX6 only)
- L) ¼-20 Studs are not Applicable on Output 1 (QS3 and QS4 only)
- M) Internal VAC range Selection (QC3, QX9, QX10)
- N) Fan Output (QX5, QX6, QX9, QX10)
- P) Under Voltage Protection (QX9)
- R) Reverse Remote On/Off
- S) Reverse Power Fail
- T) Horizontal Output Studs (QS5-6)
- U) Fan at end, not top (QS6)

NOTES

1) UL Recognized, CSA Certified
2) TUV Approved
3) Fully compliant with FCC and VDE (Level A) standards for EMI
4) All EMI standards met with economical external filter
5) Increased output power can be obtained by appropriate heat sink mounting

SWITCHING POWER SUPPLIES

INTRODUCING! THE QD FAMILY/ HIGH FREQUENCY SWITCHERS

- **Power Factor Corrected**
- **Proprietary "Cascode" Technology combines the advantages of MOSFET speed and BiPolar reliability.**
- **Mag Amp auxiliaries for efficient, well regulated, high current outputs**
- **All outputs can be paralleled for load sharing or N+1 redundancy.**
- **Autoranging (115-230 VAC Selection) is available on all models.**
- **UL, CSA and TUV approvals in place for most models. Other models are pending. Consult factory for status.**
- **Cherokee's most efficient products: 80% typical.**

NEW STAND ALONE POWER FACTOR CORRECTION UNITS

Power Output: 1000 Watts Continuous
1300 Watts 10 Seconds **"PF-1"**

1500 Watts Continuous
1700 Watts 10 Seconds **"PF-2"**

Input Line Voltage: 90-264 VRMS. Single Phase
Line Frequency: 47-63Hz
Power Factor:
20% to 50% Rated Load Greater Than or Equal To 0.92
50% to 100% Rated Load Greater Than or Equal To 0.96
Line Current Harmonics: Per IEC555-2 Limits
DC Output Voltage: 375 ±5% Vdc
Efficiency @ 50% To 100% Load:
Greater Than Or Equal To 90% at 115V Input
Greater Than or Equal To 94% @ 230V Input
Ambient Temperature: 0-50°C
Cooling: Internal Fan
Physical Dimensions: 5" × 11" × 3"
EMI: Conducted. FCC Class "A"
Radiated. FCC Class "A"

Protection:
Over Voltage:
- Over Voltage Circuitry Will Shut Down The Converter Between 400 and 420 VDC.

Over Temperature:
- Supply Will Shut Down If Over Temperature Is Reached; It Will Restart Automatically After Cool Down.

Connectors:
- AC Input Connector:
6-32 Screw Terminal Barrier Block.
- DC-Output Connector:
6-32 Screw Terminal Barrier Block.

Safety:
Designed To Meet UL1950; CSA 1402C, C22.2 and IEC 950.

QD13 400 Watts up to 4 Outputs Fan Cooled

(5"×4"×10.5") Notes: 1, 2, 3 Options: A, B, C, E, F, K, R, S Plus Autoranging (V) Weight: 4lbs. 1oz.

Chloride-Electro Networks: The Experience and Capabilities to Design and Build Power Supplies and Transformers for Custom Applications.

Our Markets

Whether it's military or a commercial application, Chloride Electro Networks has the design expertise and the manufacturing skill. For over 40 years, we have designed and built State-of-the-Art magnetic components and power supply assemblies for a wide variety of applications. Our design skill is utilized for the following applications.

- Main Frame Computers
- Minicomputers and Work Stations
- Copier and Office Products
- Computer Peripherals
- Process Automation and Control Systems
- Telecommunications
- Military Magnetics
  - Space Applications
  - Avionics Computers
  - Airborne and Ground Based Radar
  - Antisubmarine Warfare
  - C31, Navigation & Weapons Systems

Manufacturing Capabilities

Chloride Electro Networks has the resources to support your critical production needs. Our manufacturing operation performs to "Baldrige" level quality standards.
Our capabilities include:
• Facility: 140,000 square feet of efficient manufacturing space located just south of Rochester, NY.
• Quality: Statistical Process Control has been implemented on a plant wide basis. Chloride Electro Networks is producing power supplies in a 6 sigma environment. Our facility is benchmarked against ISO-9001 standards. Quality systems are controlled by Mil-Std-9858A and Mil-I-45208A.
• PC Board Assembly: Highly automated PC Board assembly is available for both small and large volume production runs.
• Test Capabilities: Fully Automated test equipment is utilized in power supply testing. Custom test equipment is developed for unique applications.
• Reliability Testing: Chloride has full capability for prototype design integrity testing as well as production stress testing for both Thermal Cycling, Shock & Vibration.
• Transformer Manufacturing: Chloride has the in house capability to manufacture all magnetics components for support of all internal power supply requirements.

Engineering by Design

Chloride has the expertise to solve your design problems. The strength of the design community at Chloride is a combination of our skill in dealing with engineering intensive applications and our commitment to work together with our customer to achieve the design goals. As an illustration of the breadth of Choride's design capabilities, the following list indicates some of the product types we have have worked with:
• 50/60/400Hz Linear and Ferroresonant Transformers and Power Supplies.
• Custom and Built-to-Print High Frequency Switching Power Supplies for a broad spectrum of commercial applications.
• Uninterruptible Power Supplies designed and manufactured in the 10KVA to 250KVA power range.
• Power transformers and assemblies in a wide array of power supply technologies including 1 MHz resonant applications.
• Controller assemblies for Electric Vehicle applications.
• Complex output inductor assemblies for single or multiple output power supply applications. Out capabilities include both high current and high voltage design expertise.
• Encapsulating technologies for application in the most demanding military/commercial transformer applications.
Chloride Electro Networks is your total source for high quality engineered power conversion equipment. Please contact us for further information on how we can fulfill your power needs.

ELECTRONIC HIGH VOLTAGE POWER SUPPLIES

Model	Input Voltage	Output Voltage Range	Current Range	Typical Power	Application
Unregulated					
CS2041 CS2132 CS2073	120/240 VAC	6-18 kV	1-5μA	60mW	Laser Triggers, Ionizers, ESD, Electrostatic Speakers
CS2109	9-24 VDC	3-6 kV	25-100μA	0.5-1W	ESD Applications
CS2091	120/240 VAC	6-30 kV	25-600μA	1-5W	Home Air Cleaners, Clean Room Applications, Copiers
CS2095	120/240 VAC	5-15 kV	0.8-1.5mA	5-10W	Home Air Cleaners
Regulated					
CS2096	120/240 VAC	5-15 kV	1.0-2.5mA	10-20W	Industrial Air Cleaners
CS2094	120/240 VAC	5-15 kV	2.0-5.0mA	15-70W	Industrial Air Cleaners
CS2097	120/240 VAC	5 kV	10-15mA	50-120W	Laser Supplies
CS2098	120/240 VAC	10-20 kV	30-40mA	200-600W	Heavy Industrial Air Cleaners, Laser Supplies
Pulsed					
CS2099	120/240 VAC	3 kV	1mA Pulsed	3-5W	Biomedical Research Equipment
AC Out Unregulated					
CS3000	120/240 VAC	7 kV AC	60mA	300-400W	Ozonators

Custom variations are available on request. LED displays, bleeders, voltage clamps and adjustable output voltage controls can be included.

HIGH VOLTAGE MULTIPLIERS

Custom-designed to meet your requirements: 5kV to 120kV DC output. Applications: CRT, copiers, electrostatic filters, ionizers, HV power supplies. Packaged to meet your requirements.

HIGH VOLTAGE DIODE/RECTIFIER ASSEMBLIES

Series Type	Repetitive Peak Reverse Voltage V_{RRM} (kV)	Average Forward Current I_O	Reverse Recovery Time t_{rr}	Package
CS450F	8-12	15mA	<100 nsec	Axial
CS451F	7-50	15mA	<100 nsec	Axial 1-3 IN.
CS454	2-15	275mA-1A	75nsec-2.5μs	Lead Mount
XRay	to 250	to 380mA	Std.	Board Mount
High Power	to 200	to 1.5A	75nsec-2.5μs	Board or Encapsulated
Bridges	All	to 3.0A	Any	Encapsulated Bolt Down

NEW. TRANSIENT SUPPRESSOR ASSEMBLIES

Custom-designed to provide replaceable modular protection. Available in single-phase, 3-phase, and other circuit configurations, with or without fusing and other optional features.

Standard and Custom Designs

Typical features are:

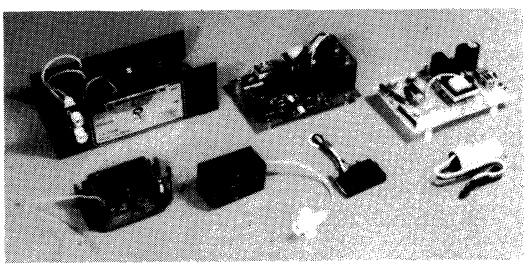
- 5kV to 35kV output voltage
- Output currents to 40mA
- Output power to 600 Watts
- Input: 110VAC; 220VAC; 12VDC

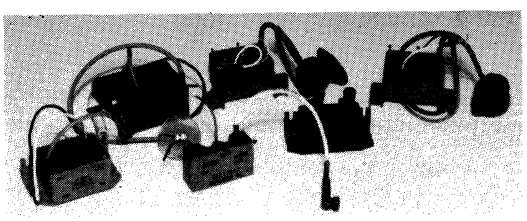
Ideal applications include:

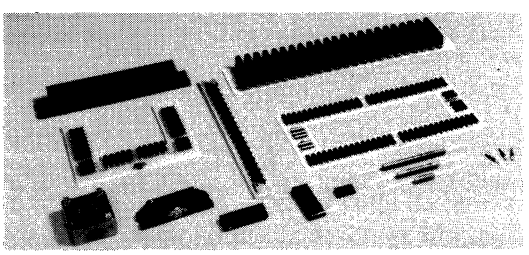
• Air Cleaners • Capacitor Charging • Arc Lamps • Laser Ignition • Laser Power • CRT HV Supply • Copier HV supply • Ionizers • Ozonators

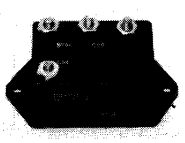
These all-solid-state power supplies from Collmer Semiconductor use advanced technology to produce superior solid-state power supplies at less cost and a fraction of the weight of supplies using traditional ferroresonant transformers. Many models are UL-recognized. These dependable power supplies are ideal for many types of appliances and computer peripheral equipment.

Collmer Semiconductor's high-volume production capacity assures on-time delivery for either standard types or those customized to meet your special requirements.









Also from Collmer: Power Semiconductors (See Sec. 4800)

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

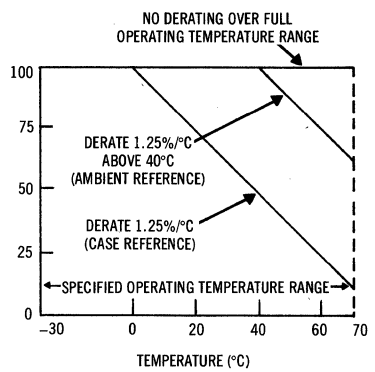

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

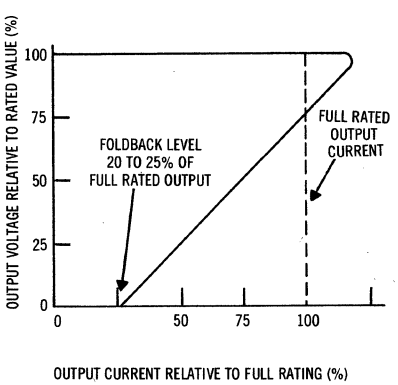

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

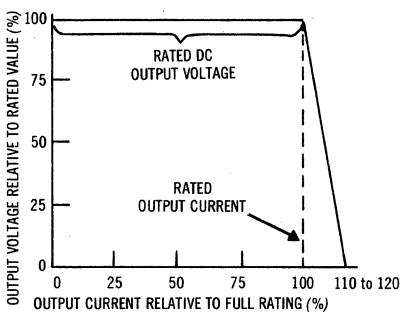

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

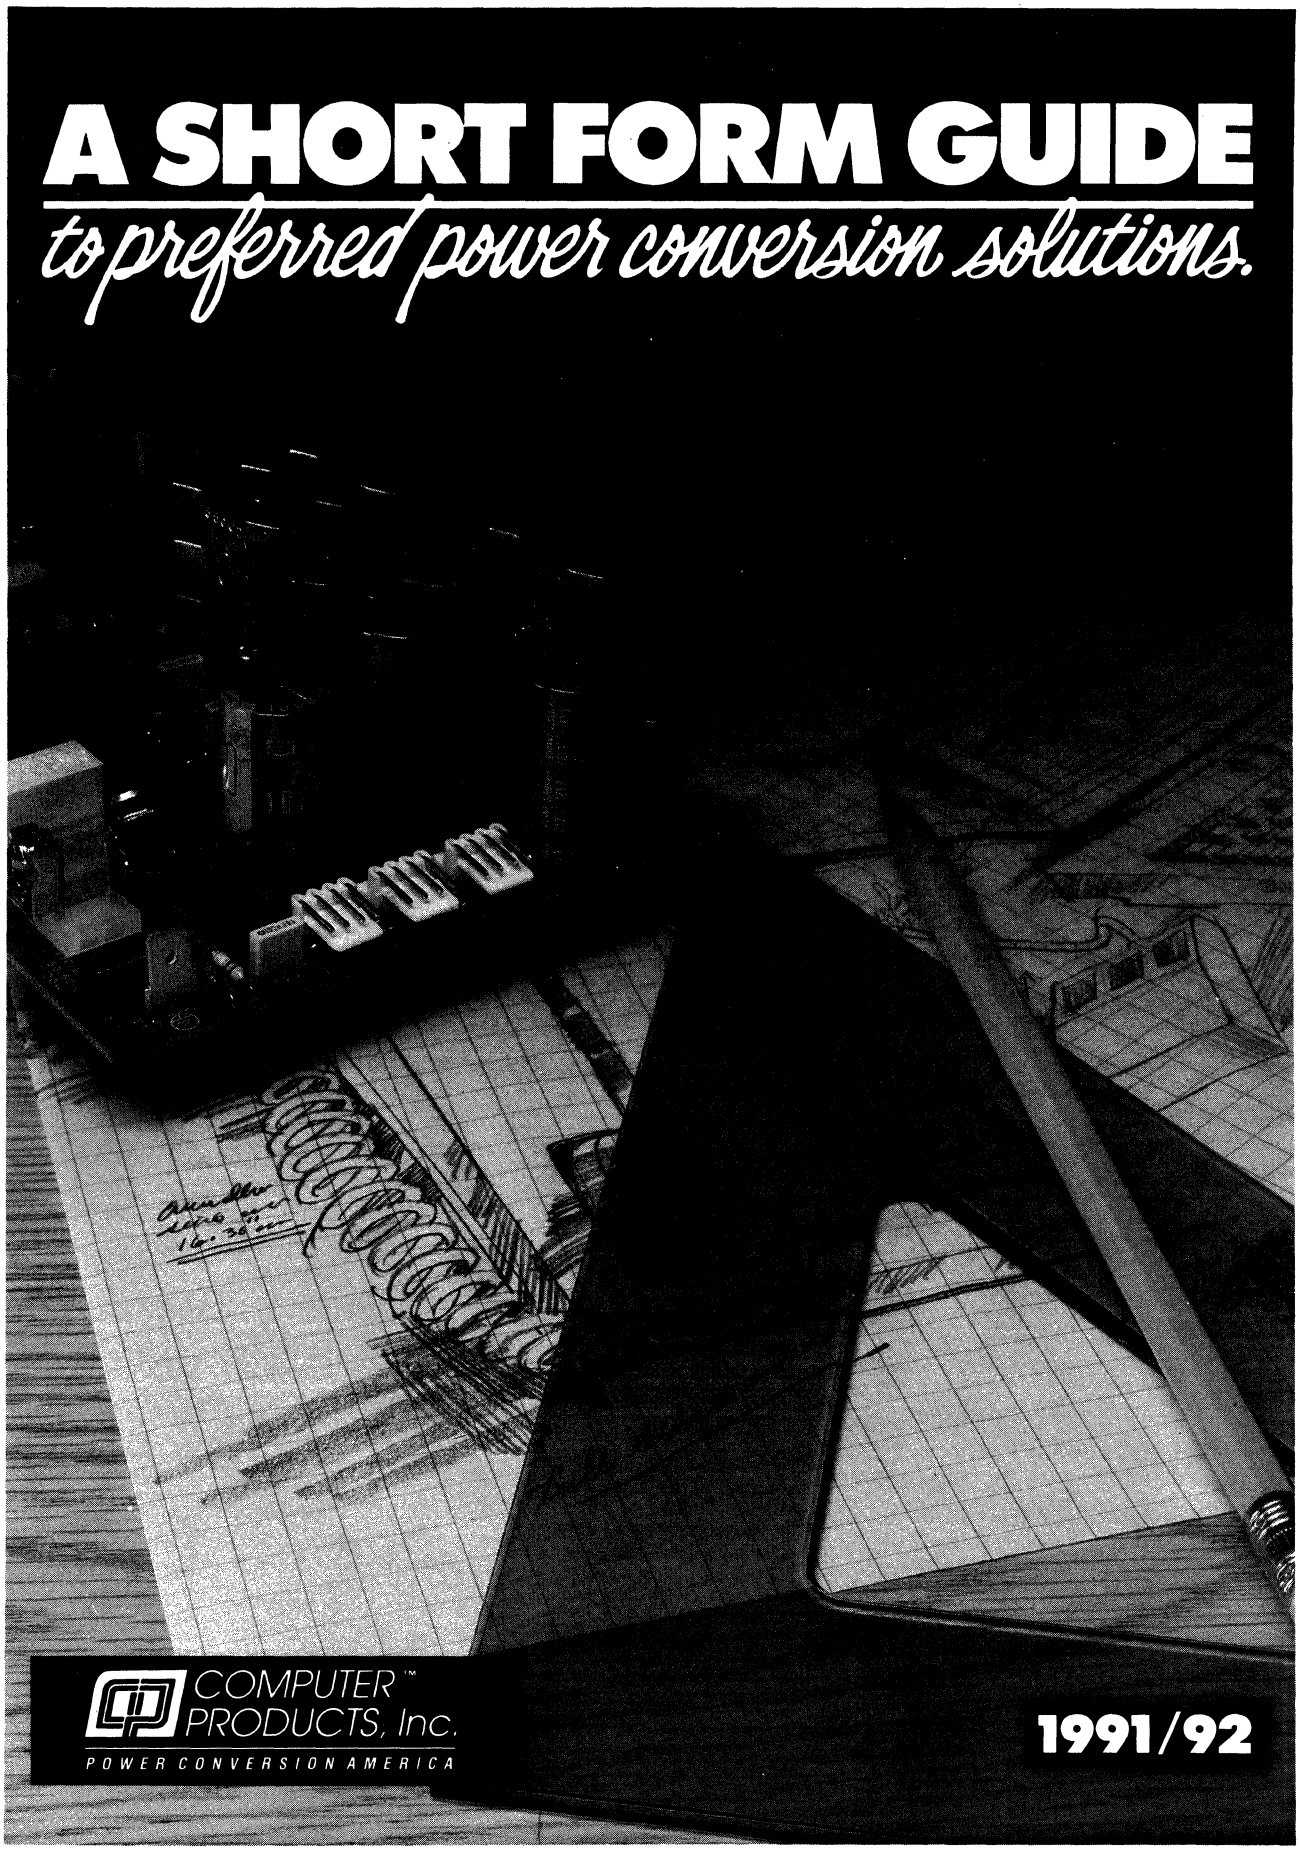
Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

A SHORT FORM GUIDE

to preferred power conversion solutions.



COMPUTER™ PRODUCTS, Inc.
POWER CONVERSION AMERICA

1991/92

INTRODUCTION

Computer Products has long been in the forefront of power conversion technology. Since 1969, our commitment to quality, service and reliability has been the consistent goal in developing leading-edge products to power the systems of tomorrow. We strive to design our AC/DC switchers and DC/DC converters to be the finest available on the market. Bar none.

Additionally, Computer Products is totally dedicated to the concept of "manufacturability." For us, it isn't enough to just design a high-quality power converter. It must also be practical and cost-effective to produce. Our manufacturing engineers have very tough standards, and only after we've satisfied them does a new product get the go-ahead for production.

This year, we take great pride in introducing eight new stars to the Computer Products line. These innovative new products include many advanced features which were previously unavailable or only available in a custom order. Complete specifications on all products are available through any Computer Products sales representative or distributor.

Computer Products. Giving you the power to win. And the products to get you there.

WARRANTY

ALL PRODUCTS of Computer Products as contained herein are guaranteed for two (2) years from date of shipment against defects in material and workmanship. This warranty does not extend to products which have been opened, altered or repaired by persons other than persons authorized by the manufacturer or to products which become defective due to acts of God, negligence or the failure of customer to fully follow instructions with respect to installation, application or maintenance. This warranty is extended directly by the manufacturer to the buyer and is the sole warranty applicable. EXCEPT FOR THE FOREGOING EXPRESS WARRANTY, THE MANUFACTURER MAKES NO WARRANTY, EXPRESS OR IMPLIED INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. As the sole and exclusive remedy under this warranty, manufacturer, at its option, may repair or replace the non-conforming product or issue credit, provided the manufacturer's inspection establishes the existence of a defect. To exercise this remedy, the buyer must contact the manufacturer's Customer Service Department to obtain a Return Authorization number and shipping instructions. Products returned without prior authorization will be returned to buyer. Packaging, freight, insurance and other charges incurred in returning the defective products to manufacturer will be paid by the buyer. If the buyer fails to fully comply with the foregoing, buyer shall not be entitled to any allowance or claim with respect to such product. The buyer agrees that no other remedy (including, but not limited to, incidental or consequential damages for lost profits, lost sales, injury to person or property or any other incidental or consequential losses) shall be available to the buyer.

COMPUTER PRODUCTS.
NOW MORE THAN EVER, THE POWER BEHIND THE PRODUCTS.

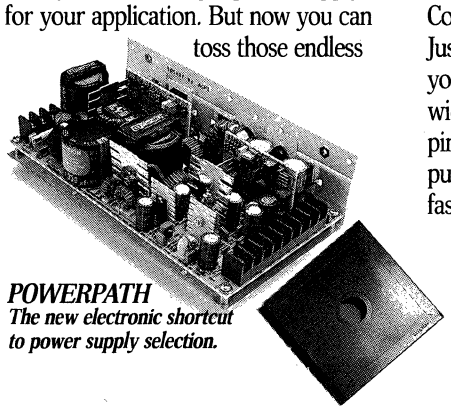
NEXT TIME YOU START SEARCHING FOR THE RIGHT POWER SUPPLY, YOU COULD HIT THE BOOKS, OR YOU COULD HIT ENTER.

Introducing PowerPath. With this free 5¼" diskette, finding the power supply you need is a snap.
Until now, you had to have a whole library to find the right power supply for your application. But now you can toss those endless catalogs in the recycling bin. Because there's a shortcut. With PowerPath, you can locate the part you need in seconds.

PowerPath gives you instant electronic access to hundreds of Computer Products power supplies. Just insert the diskette in your PC and you're ready to go. Need a 15-watt, wide-input DC/DC converter with a pint-sized footprint? PowerPath will punch up half a dozen to choose from, faster than you can say "search."

Whatever power supply you need, Computer Products has a solution—and PowerPath can find it for you. So why waste time looking for parts the hard way? With PowerPath as your electronic guide, you'll find the answers right under your nose—or rather, your finger.

Throw away the books and ask your distributor for your free PowerPath diskette. Or, for the name of your nearest distributor, phone us at 1-800-624-8999, extension 123.



POWERPATH
The new electronic shortcut to power supply selection.

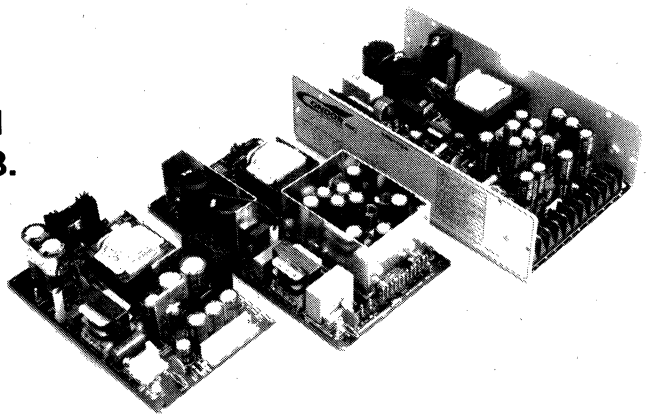
WORLD CLASS MEDICAL

Condor's international medical multi-output switchers — designed to meet UL 544/IEC 601/CSA 1402-3.



Condor's medical switchers are designed to meet full international specifications, as well as European EMI specifications.

Medical switcher features:

- 16 models, 5 power levels, 30 to 110 watts
- Multi-output (up to 5 outputs)
- AC input: 90-132 VAC/180-264 VAC, 47-63 Hz
- Designed to meet toughest domestic and international medical safety specifications
- Proprietary low leakage — high attenuation EMI filter (patent pending)
- Less than 30μA leakage current
- Meets stringent FCC and VDE 0871 Class B EMI specs
- Power fail available on 110-watt units
- Versatile output configurations for wide variety of applications
- Industry standard packages
- 24-hour full load burn-in and 2-year warranty
- Covers available for all units

MED 1 QUALITY PROGRAM

The MED 1 Quality Program is standard on all M-Series medical power supplies. It provides additional controls and testing which produces the extra level of quality that medical applications require. MED 1 is based in part on MIL-I-45208A, and includes the following procedures and tests in addition to the normal Condor quality assurance program.

1. **Lot Traceability:** Condor recordkeeping will include lot numbers, date of manufacture, test results and failure history. Each supply will be marked with a lot number and revision level.
2. **Extended Burn-In:** Burn-in duration is 24 hours for switching supplies and 8 hours for linear supplies. Test conditions are: full-rated load, room ambient temperature, and AC input power cycling.
3. **Safety Testing:** All units will be subjected to hipot and leakage current tests after burn-in. These tests are designed to identify potential failures that constitute the greatest risk of shock hazard in D.C. power supplies.
4. **Certificate of Conformance:** All power supplies shipped under the MED 1 program will be delivered with certificates of conformance to published specifications and the MED 1 Quality Program.

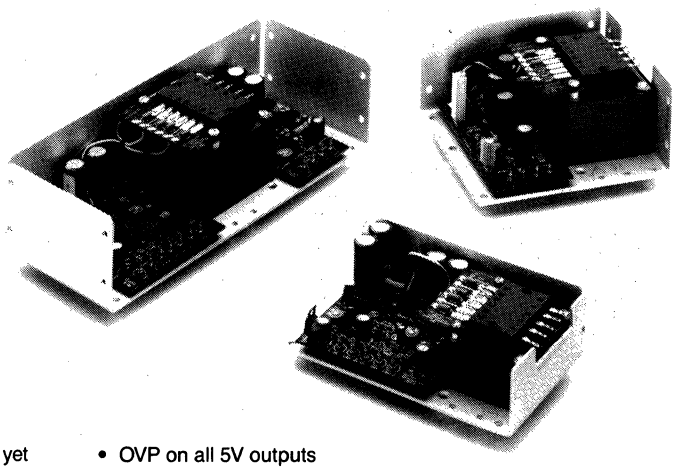
WORLD CLASS MEDICAL



Condor's international medical linears, designed to meet UL 544/IEC 601/CSA 1402-3.

Condor's medical linear power supplies offer innovative yet cost-effective design solutions for both high- and low-volume users.

Medical linear features:

- 38 models (single, dual & triple output)
- 3 power levels (5 to 92 watts)
- AC input: 110/120/220/240 VAC, 47-63 Hz
- OVP on all 5V outputs
- Meets EMI per FCC/VDE B
- Hermetically sealed power transistors and IC's
- MTBF 200,000+ hours per Mil Handbook 217D
- 8-hour burn-in with cycling
- Full 3-year warranty

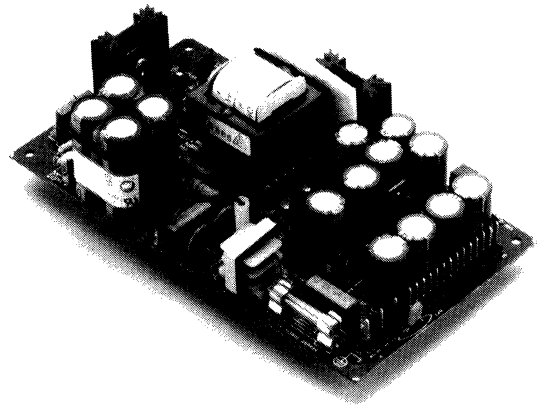
WORLD CLASS

Condor's "V" Series — agency-approved power supplies with high peak power for starting loads.



Our "V" Series multiple output switching power supplies meet the toughest domestic and international safety requirements, and are UL, CSA and TUV/VDE certified. "V" Series units give you the performance you need, too, with peak power levels for starting loads ranging from 125 to 140 percent of full rated power.

"V" Series features:

- Low cost
- 6 power levels — 30 to 125 watts
- 26 models — 2 to 5 outputs
- AC input: 90-132/180-264 VAC, 47-63 Hz
- Clean, low-cost, open-frame design
- Fully-protected — adjustable current limit, built-in OVP and reverse voltage protection
- Full load burn-in and 2-year warranty
- High peak current disk drive outputs plus closely regulated 3-terminal-type outputs
- Extremely versatile output configurations for tough applications
- Very high value for your purchasing dollar
- Isolated outputs can be used for positive or negative sources or in series with other outputs
- Pass vibration and shock per MIL-STD 810D

For high performance and world-class value in switching power supplies, call Condor!

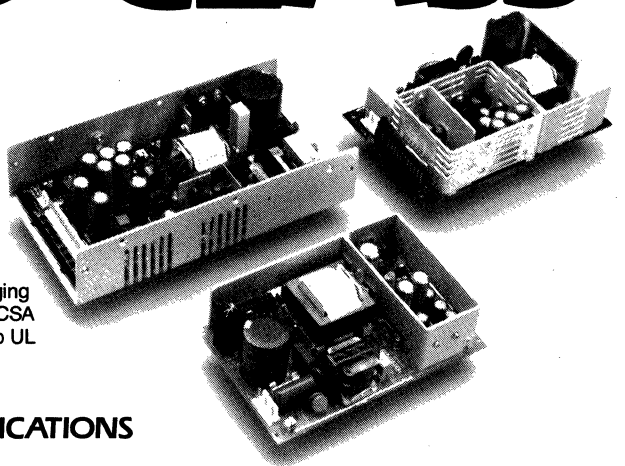
WORLD CLASS

NEW FROM CONDOR!
Global Performance switching power supplies with the agency approvals you need.



Our new Global Performance Series switchers feature full-input autoranging (84-264V) and are approved to UL 1950, VDE level B EMI, IEC 950 and CSA TUV. All models also are available in medical configurations, approved to UL 544 and IEC 601.

SPECIFICATIONS

	GP MODELS	VPA MODELS
AC INPUT:	85-264 VAC, 47-63 Hz single phase.	90-132 VAC or 180-264 VAC, user selectable. 47-63 Hz single phase. (For optional autoswitchover add "-AS" to model number.)
DC OUTPUTS:	See output rating chart.	See output rating chart.
HOLD-UP TIME:	20 mS minimum @ full load and nominal line (115 VAC).	20 mS minimum at full load and nominal input voltage.
OVERLOAD PROTECTION:	Fully protected against short circuit and output overload on all outputs. Short circuit protection is cycling type on most outputs; foldback on outputs with 3-terminal regulator post regulation. Overload protection recovery after removal of fault is automatic.	Fully protected against short-circuit and output overload with cycling-type overload protection. Automatic recovery after removal of fault.
MINIMUM LOAD:	Turn-On/Standby. No minimum load required for proper operation. Normal Operation: Output #1 and/or #2 combined load current must meet the minimums listed below for proper regulation as other outputs are loaded. GPx55 1.0A GPx80 1.0A GPx130 2.0A Single output models Not required	An 8-amp minimum load is required on output #1. A 20% minimum load is required on quasi-regulated outputs.
OUTPUT NOISE AND RIPPLE:	0.5% RMS, 1% PK-PK maximum on all outputs.	0.5% RMS, 1.5% PK-PK maximum on all outputs.
TRANSIENT RESPONSE:	+5V main output: 500 mS typical response time for a 50 to 100% or 100 to 50% load change. Maximum voltage deviation: 5.0%.	+5V main output; 500 mS typical response time for a 50% to 100% or 100% to 50% load change.
OVERVOLTAGE	Built in on + output with firing point set at 6.2V ±0.6V.	Built in on + output with firing point set at 6.2V ±0.6V.
VOLTAGE ADJUSTMENT:	Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on the +5V output. A separate potentiometer adjusts output #2 ±5% minimum.	Built-in potentiometer adjusts voltage from 4.5V to OVP trip point (6.2V nominal) on main +5V output.
REVERSE VOLTAGE PROTECTION:	All outputs protected against inadvertent application of reverse voltage up to 1 times the rated current of the reversed output.	All outputs protected against inadvertent application of reverse voltage.
OVERSHOOT:	No output overshoot on turn on or turn off.	No output overshoot on turn on or turn off.
INPUT PROTECTION:	Internal A.C. fuse provided on all units. This fuse only blows if a catastrophic failure occurs in the unit; it does not blow on overload or short circuit. A.C. input protected against line transients by metal oxide varistors on all medical units.	Internal A.C. fuse provded on all units. This fuse only blows if a catastrophic failure occurs in the unit. It does not blow on overload or short curcuit. A.C. input protected from line transients by metal oxide varistors.
TEMPERATURE COEFFICIENT:	0.03% per °C typical for all outputs.	0.03% per °C typical for all outputs.
TEMPERATURE RATING:	0 to 50 °C at full rated output power with natural convection cooling in a non-restricted environment. For operation in a confined space, moving air may be required. For operation above 50 °C, it is important that the cooling vs. load profile is such that the heatsinks do not operate above 90 °C for extended periods.	0 to 50 °C at full rated power with 26 CFM forced air cooling. Cooling air should be ducted directly over the unit. For less air, derate output power by 1% per CFM of air. For convection cooling @ 296 watts, unit must be installed in non-restrictive environment.
EMI SPECIFICATIONS:	All models include built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B.	All VPA models are designed with built-in EMI filters to meet or exceed the conducted emissions requirements of FCC 20870 Class B and VDE 0871 Class B.
SAFETY SPECIFICATIONS:	All commercial models are designed to meet UL 1950, CSA 1402C Level 3, IEC 950, VDE EN60950 and VDE 0750. All medical models are designed to meet UL 544 and IEC 601-1.	All VPA models are designed to meet UL 1950, UL 508, CSA Bulletin 1402C Level 5, IEC 950.

WORLD CLASS

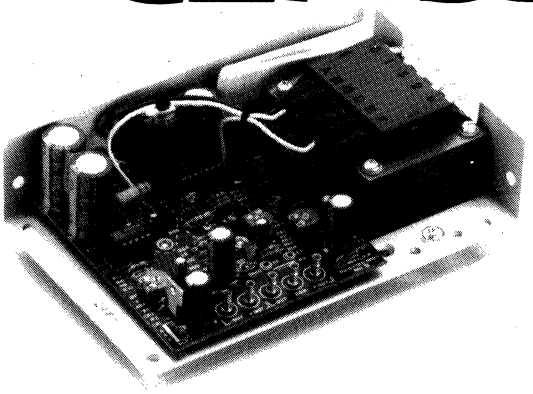
Condor's International Plus Series linear power supplies — certified to UL544.



Condor's *International Plus Series* D.C. power supplies virtually eliminate primary-secondary shorting because each coil uses a separate bobbin surrounded by two layers of glass-impregnated nylon, giving complete mechanical and electrical isolation.

The best low-noise 723 regulator chips are used throughout the line, together with proven, reliable semiconductors. TO3-cased pass elements are hermetically sealed, and the latest high-density, high-ripple current rating capacitors from proven, high-quality vendors ensure long life and reliability.

International Plus Series features:

- 9 power levels — 3 to 288W
- 75 models (single, dual & triple output)
- AC input: 100/120/220/230/240 VAC, 47-63 Hz
- OVP on all 5V outputs
- Meets EMI per FCC/VDE B (most units)
- Meets and approved to IEC 950
- Hermetically sealed power transistors
- MTBF 200,000+ hours per Mil Hndbk 217D
- 2-hour burn-in with cycling
- Full 3-year warranty

Sixty-five *International Plus Series* models are approved to UL478/1012; CSA C22.2 and TUV certified to VDE 0806 and IEC 950. Twenty-six models are also approved to UL544.

WORLD CLASS

Condor's SDS and SDM Series power supplies meet FCC/VDE Level B and have agency safety approvals!

Every tough, versatile Condor single (SDS) or multiple (SDM) switching power supply meets the toughest domestic and international safety requirements, and is UL, CSA and TUV/VDE certified. All units also meet FCC 20870 Level B and VDE 0871 Class B above 150KHz.

SDS/SDM Series features:

- 5 power levels — 45 to 200 watts
- 20 single and 29 multiple-output models (up to 5 outputs)
- AC input: 90-132 VAC/180-264 VAC, 47-63 Hz
- Clean, low-cost, open-frame design
- Fully-protected — adjustable current limit, built-in OVP and reverse voltage protection
- LED "on" indicator
- Full load burn-in and 2-year warranty
- Powerfail signal and logic inhibit on 140 and 200W levels
- High peak current disk drive outputs plus closely regulated 3-terminal-type outputs
- Extremely versatile output configurations for tough applications
- Very high value for your purchasing dollar
- Isolated outputs can be used for positive or negative sources or in series with other outputs
- Pass vibration and shock per MIL-STD 810D

Condor SDS and SDM power supplies can meet your most demanding design requirements!

CONVERSION DEVICES, INC.

EXCELLENCE IN CONVERSION TECHNOLOGY

0.5 TO 12 WATT, SINGLE AND DUAL OUTPUT DC/DC CONVERTERS

KEY FEATURES

- High Power Density
- Internal Input Filtering (Pi)
- High Switching Frequencies (>100Khz)
- Efficiences up to 75% @ FL
- 500VDC or 3000V P-P Typ. Voltage Isolation
- Up to ±0.03% Line/Load Regulation
- Very Low Output Ripple and Noise
- Short Circuit Protection
- Six-Sided EMI Shielded Case
- 100% Burn-In @ Full Load
- 2 Year Warranty
- Industry Standard Pinouts

Standard input voltage ranges from 5 to 48VDC with ± 10% to ±15% tolerance for telecommunications, data acquisition and conversion board level subsystems, process control, medical, local area network (LAN) transceivers, and other instrumentation applications where high isolation of data transmission is required in both analog and digital fields.

NOTES: 1. Single Output Models, 2. Dual Output Models

As a power conversion supplier, our product lines address the needs of OEM computer oriented industrial, medical, military instrumentation and telecommunications markets. We demonstrate our capabilities and leadership role by providing innovative state-of-the-art products combining the latest technological developments. We are dedicated to offering high quality, reliable products with excellent specifications. At reasonable prices.
Our reliability program is based on strong engineering and on the concept that our products have been designed in advance and offered for sale *only after* they have demonstrated proven performance.

CONVERSION DEVICES, INC.

EXCELLENCE IN CONVERSION TECHNOLOGY

7.5 TO 60W SINGLE, DUAL AND TRIPLE OUTPUT DC/DC CONVERTERS

KEY FEATURES

- Very Low Profile Packages
- Very High Power Density
- Internal Input Filtering (Pi)
- Wide Input Ranges
- High Switching Frequencies (> 100KHz)
- Efficiences up to 83% @ FL
- High I/O Voltage Insulation
- Outout OV Protection
- Over/Under Voltage Shutdown
- Short Circuit Protection
- Remote ON/OFF Control
- Extended Operating Temperature Ranges
- 100% Burn-In @ Full Load
- 2 Year Warranty

A large selection of regulated DC/DC converter models with a wide (2:1) input voltage range is available from 7.5 to 60 watts with very low profile and dense power packages. This new generation of DC/DC converters utilizes surface mount technology for ruggedness, long-term reliability and performance. Maintaining conservative design rules throughout, complemented by quality maufacturing and test standards, we accomplish excellent component stress levels and high MTBF. All product families below are suitable for wide application requirements in telecommunications, portable and battery powered equipment, aircraft, robotics and computer subsystem instrumentation.

We tailor our products to fit your needs.

At CDI, we are more than willing to tailor our products in order to offer you a total design solution. We just need the specs and the quantity. We'll then make sure they are done to meet your requirements. On time, of course.

We know that our reputation is riding on our product line. That's why we put our best foot forward in everything we do, from developing new products, to delivering them.

Whatever your requirements—commercial, industrial, or military—give us a call. We are ready to assist you and supply you with products of integrity in design and performance. Remember, power has its price...but it's lower than you may think!

FEATURES:	Features the application of surface mount technology in a low-cost PC board construction. Designed for high-volume applications requiring safety approvals and rigid EMI specifications. *VL Products feature a 1 year warranty.			Features the application of surface mount technology in an open frame switcher. The WI product line offers the user a flexible mounting scheme that provides excellent heat conduction to the mounting surface. *WI Products feature a 1 year warranty.			The versatile product easily modified to meet unique customer specifications. DC to DC models available in addition to Converter Concepts' universal AC input models. Rugged packaging in either open frame or enclosed package gives the VT/VX series maximum performance with a demonstrated MTBF in excess of 150,000 hrs. Many options available.					Features include a UPS (fail safe) system that allows operation from an AC power source or a DC power source. The VF also includes an integral battery charger. The VF product is a must if information retention is important during brown out of power line failures.

reliability. No wonder we can back our designs with an exclusive two-year warranty.*
Converter Concepts' in-house surface mount capabilities created a totally integrated manufacturing environment.
The result is greater reliability and total Made-In-America quality at a competitive price.

The standard power supplies listed below meet the demands of most design parameters. In applications that have specific performance requirements, Converter Concepts' engineers can design a power supply to meet your exact needs.

For more information, call (800) 253-5227.

Features UL 544 Recognition for use in medical applications, very flexible product with many options available.	Features output power capability up to 150 watts. Many output models available with many options possible. Excellent mounting scheme for either open frame or enclosed package.	Features an optional cable assembly, PC board construction and is designed for low power computer peripheral applications. *CP Products feature a 1 year warranty.	External, ultra-small design delivers improved line and load regulation, overcurrent/ overvoltage protection plus surface mount technology. *XT Products feature a 1 year warranty.	Offers an automatic degausser circuit and is designed for high-resolution color monitors and gas discharge displays.

SPECIFICATIONS:

INPUT VOLTAGE: – 120 V, 60 Hz, single phase
– Unit will operate with ± 10% change in input voltage.

Output Voltage: – Continuously variable from zero to the maximum voltage indicated in above table.

Output Current: – Zero to maximum indicated in above table.
– Current is limited to approximately 10% greater than this, even on a short circuit.

Line Regulation: – If the input line voltage changes ± 10% from its nominal 120 V, the output voltage will change no more than ± 0.03% or ± 15 mV, whichever is greater (at any load current within rating).

Load Regulation: – For changes in load current from zero to rated maximum, the output voltage will change no more than 0.15% or 50 mV, whichever is greater (at any line voltage within rating).

Ripple: – The rms value of the ripple voltage will be no greater than 0.05% or 20 mV, whichever is greater (at any line voltage or load current within rating).

Short Circuit: Proof – Output may be shorted continuously without damage to the unit. Power supply recovers automatically to normal when short is removed.

For more information on power supplies with higher outputs please contact:

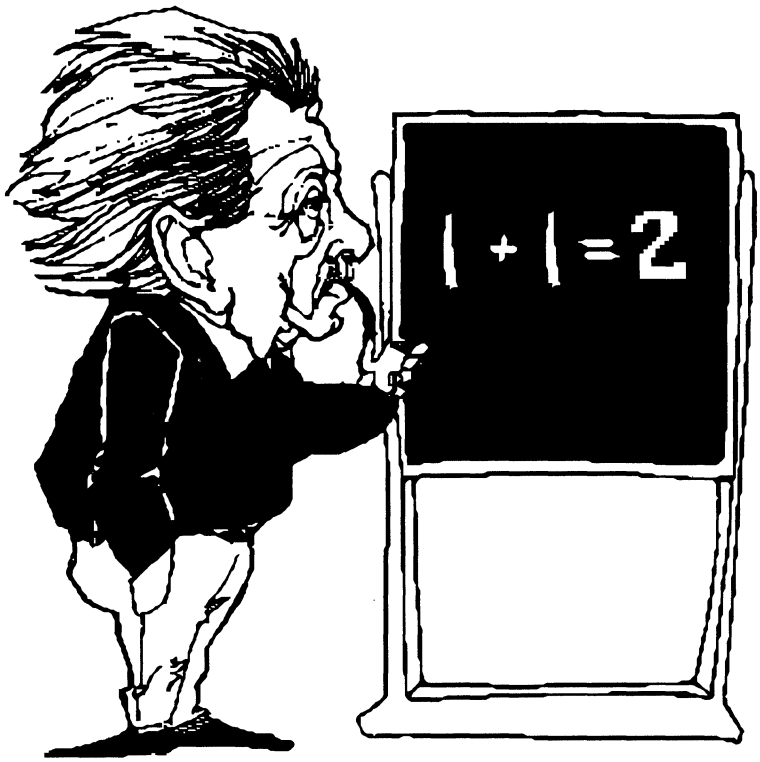
If your power problem is simple...



We'll tell you where to go!

Our commitment: designing and building the difficult – from one-of-a-kind military test systems to high volume commercial power supplies.

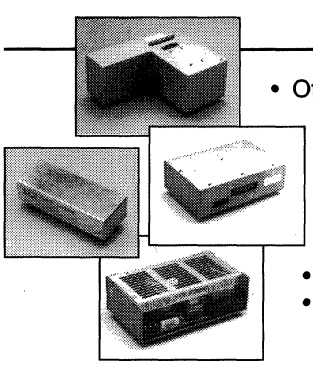
Our experience: everything from the slightly unconventional to exotic military hardware.

Our promise: if your particular power requirement can be satisfied with a standard, off-the-shelf product, we'll tell you where and how to get it.

You'll find us as pragmatic as we are inventive. We work hand in hand with your engineers and purchasing people to keep your costs down and make sure you get the manufactured product in spec and on time. We have the staff, the skills, the technology and the experience to handle your unique demands with dispatch and efficiency.

Learn how we can help you, as we have helped scores of Fortune 500 manufacturers. A copy of our capability brochure and application notes will be sent as soon as you inquire.

Custom Power Systems for:



- Off Line Switchers
- DC/DC Converters
- Battery Chargers
- Laser Supplies
- Motor Controls
- Special Packaging
- Multiple Outputs/Inputs
- Unusual Operating Ranges
- Combination AC/DC Inputs
- Unusual Electrical Specs–Tight Regulation, Ultra-low Noise
- Uncommon Voltages and/or Currents
- Redundant Power Supplies
- Uninterruptable Power Supplies
- Vibration Solutions
- Unusual Environmental Needs
- None Of The Above, But Another Design Problem

MECHANICAL CONSIDERATIONS

HOUSING MATERIAL:
Black ABS, self extinguishing

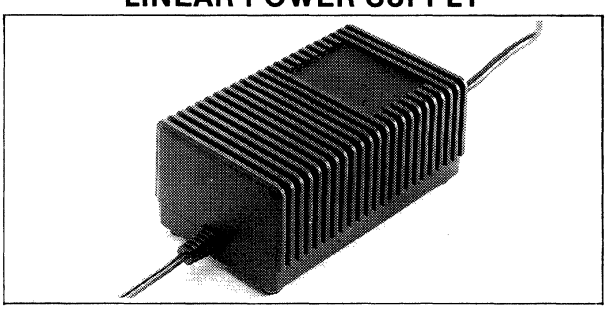
INPUT/OUTPUT CORDS
- All industry standard miniature molded cordsets are stocked.
- IEC Connectors, unit and cord mounted.

OPTIONS:

- L.E.D. charge or power-on indicator light.
- Ground pin - can be carried through with secondary.
- Center-taped secondary on AC/AC.
- European Input desktop for D_2 and E units.
- Japanese or other World-Wide input voltages and frequencies.
- Switchable 120 VAC/240 VAC 60/50 Hz. available in all case sizes.
- ±DC non-regulated and regulated outputs.
- Custom Hot-Stamping facilities.
- Custom designs to meet your exact requirements are available on request.
- Military equivalents available.

Featured Products

LINEAR POWER SUPPLY



6.3″L x 3.8″W x 3.0″H

Line Regulation	.1%
Load Regulation	3%
Ripple	1mv RMS max.
Input Voltage	105-126 60/50 Hz
Single Outputs	5 VDC @ 2.5 amps 12 VDC @ 2 amps 15 VDC @ 1.5 amps 24 VDC @ 1 amp 48 VDC @ .5 amp
Dual & Triple Outputs	Many combinations available call factory for information

AVAILABLE OPTIONS
- 115/230 Switch Selectable input
- 210-252 VAC 60/50 Hz input • 100 VAC 60/50 Hz input
- Remote Sensing gives 1% load regulation
- Overvoltage Protection (Crowbar Type)

For the '90's DEL puts more power than ever to work for you.

For over three decades, we've been the prime supplier for both standard and custom, rack and modular, high voltage power supplies, transformers and capacitors.

There isn't only one reason why more and more companies are putting Del Electronics to work for them. There's every reason.

Put Del's experience and expertise to work for you.

For 35 years, Del has been the leader in the design, development and production of high voltage power conversion systems for an ever-growing number of applications. Our most advanced technologies have been typically used for X-ray sources, pulsed and CW lasers, photomultiplier tubes, ion pumps and E-Beams, to name a few.

Put Del innovation to work for you.

For the 1990's, Del's research and development team will be there to assist in all your ever-changing power conversion requirements. Drawing on 35 years of experience and engineering expertise in power sources, we have led the way in areas as diverse as military CRT's, medical and industrial X-ray systems, oil exploration and an abundance of other OEM and laboratory applications. For example, Del is now offering a new RHVS series, a high voltage, high frequency resonant sine wave switching supply in a 19" rack mount configuration up to 1KW.*

Put Del quality and value to work for you.

Del power supplies are built with proven state-of-the-art technology with a dedication to quality and reliability which far exceeds commercial standards. Yet, when it comes to price, we offer the competition a run for their money.

Put Del power to work for you!

Call us with your specific requirements. And, if we don't have a standard product to suit your application, we can develop one.

DEL

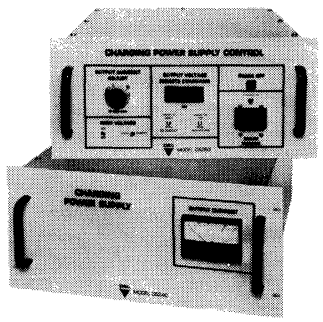
CUSTOM POWER CONVERSION SYSTEMS

DEL leads the way in designing standard and custom HV power conversion equipment for laboratory, military and industrial OEM applications. Some further examples of our custom capabilities are listed below:

Capacitor Charging Power Supplies (Multiplier PFN's)



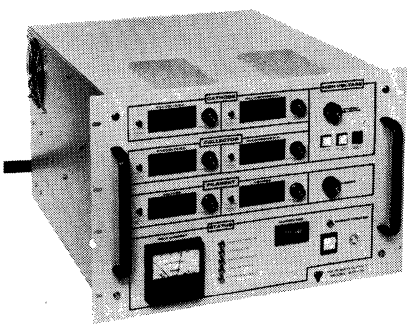
Features

- ▼ Fast Acting Current Source
- ▼ Start/Stop Command and Charge Status
- ▼ Local and Remote Monitor Capabilities
- ▼ External and Internal Interlocks
- ▼ Automatic Crowbar Circuit
- ▼ Peak HV Memory Read Out

Specifications

Input: 208, VAC ± 10% 3 phase, 50/60Hz
Output: 100 mA @ 50kV
Current Regulation: 0.1% NL to FL
Ripple: 0.5% Pk-Pk
Stability: 0.1% per hr.
Charging Rate: 50Hz
Size: Two Standard 8¾" High, 19" Racks

TWT Test Bed Power Supplies



Features

- ▼ Multiple Outputs
- ▼ Digital Metering of all Outputs
- ▼ Elapsed Time Indicator
- ▼ Adjustable Overcurrent Tripouts for all Outputs.
- ▼ Fault Diagnostics
- ▼ External Interlocks
- ▼ Helix Current Monitoring

Specifications

Input: 115 VAC ±10%, 1 phase 60Hz

1. **Cathode:** Output: 0-6kVDC Negative
   Output Current: 20mA
   Regulation: 1%
   Ripple: 4 Volts Pk-Pk
2. **Collector:** Positive Polarity fixed ratio 30% of cathode changes proportionately to a change in the cathode.
   Output Current: 240 mA
   Regulation: 5%
   Ripple: 10 Volts Pk-Pk
3. **Filament:**
   Output: 0-8 VAC @ 4 Amps min.
   (Floating with respect to cathode)
   Size: Standard 15¾" High, 19" Rack

Other Typical Applications:

- **Airport X-ray Inspection Equipment**
- **Electrostatics for Spray Painting**
- **Electron Beam Welding**
- **Laser Surgery**
- **Laser Guidance Systems**
- **Medical CT Scanners**
- **Military CRT Displays**
- **Oil Exploration**
- **Photomultiplier Tube**
- **Radar Systems: Airborne, Shipboard and Ground**
- **Traveling Wave Tubes**
- **Air Precipitators**
- **Industrial X-ray Machines**
- **Electrophoresis**
- **Ion Pumps**
- **Flocking**
- **Scanning Electron Microscopes**
- **Non-Impact Printers**
- **CRT Testing**
- **Spot Knocking**

RESONANT SINE WAVE POWER CONVERTERS

RHVS SERIES 300-1000 WATTS

Regulated HV Power Supplies

Features

- Uses the most advanced resonant sine wave switching technology
- Voltage regulation better than 0.005% for load and line
- 0.05% RMS Ripple
- Low stored energy
- Provides high efficiency and stability
- Standard 19″ Rack
- Available in 300, 500 and 1000 Watt models up to 125 kilovolts

Remote Capabilities

Remote Programming:
Voltage and Current: 0 to 10 VDC, analog
Remote Monitor Output:
Voltage and Current: 0 to 10 VDC, analog
1% accuracy
Remote Enable/Disable: TTL compatible
External Interlock: Dry contact closure
External Reference: 10.4 volts

Performance Specifications

Input: Selectable 115 or 220 VAC 50 or 60Hz
Output: Continuously adjustable from 0 to maximum rated output via local or remote controls. See chart below.
Voltage Regulation:
Line: ± 0.005% for a ± 10% line change
Load: ± 0.005% N.L. to full load change
Current Regulation:
Line: ± 0.05%
Load: ± 0.2%, 10% to full load
Ripple: 0.05% RMS at max. output
Stability: 0.01%/hr., 0.05%/8hrs after ½ hour
Temperature Range:
Operating: – 20°C to 55°C
Storage: – 40°C to 85°C
Temperature Co-efficient: 0.01/°C
Output Protection: Overvoltage, arc and adjustable short circuit
Slow Start: 3 seconds (zero to max. output)

Physical Specifications

Front Panel Controls and Metering

1. HV ON push button with light
2. HV OFF/Reset push button with light
3. Voltage and current control by 10 turn potentiometers (0.1% Resolution)
4. 3½ Digit LED Digital Panel Meters for both voltage and current, 1% accuracy
5. Voltage and current mode lights

Construction

Both the 300 and 500 Watt models are housed in a standard, 5¼″ high, 19″ racks, whereas all 1kW units are 10½″ high, 19″ racks. The typical depth in the RHVS series is 16″.
Note: Models 30kV and below are reversible. A floating output allows for either end to be grounded.

RHVS SERIES MODELS

kV	300 Watts	mA	500 Watts	mA	1 Kilowatt	mA
1	RHVS 1-300R	300	RHVS 1-500R	500	RHVS 1-1000R	1000
2	RHVS 2-300R	150	RHVS 2-500R	250	RHVS 2-1000R	500
3	RHVS 3-300R	100	RHVS 3-500R	166	RHVS 3-1000R	300
5	RHVS 5-300R	60	RHVS 5-500R	100	RHVS 5-1000R	250
10	RHVS 10-300R	30	RHVS 10-500R	50	RHVS 10-1000R	100
15	RHVS 15-300R	20	RHVS 15-500R	33	RHVS 15-1000R	65
20	RHVS 20-300R	15	RHVS 20-500R	25	RHVS 20-1000R	50
30	RHVS 30-300R	10	RHVS 30-500R	15.5	RHVS 30-1000R	33
40	RHVS 40-300*	7.5	RHVS 40-500*	12.5	RHVS 40-1000*	25
50	RHVS 50-300*	6	RHVS 50-500*	10	RHVS 50-1000*	10
60	RHVS 60-300*	5	RHVS 60-500*	8.5	RHVS 60-1000*	16.5
80	RHVS 80-300*	3.75	RHVS 80-500*	6.5	RHVS 80-1000*	12.5
100	RHVS 100-300*	3	RHVS 100-500*	5	RHVS 100-1000*	10
125	RHVS 125-300*	2	RHVS 125-500*	4	RHVS 125-1000*	8

*Specify P for positive, N for negative or R for reversible polarity.

Ordering Example:	RHVS (SERIES)	40 (40kV)	300 (300 Watts)	R (Reversible Polarity)	/100 (100 Volt Input)	/OL (Overload Tripout)

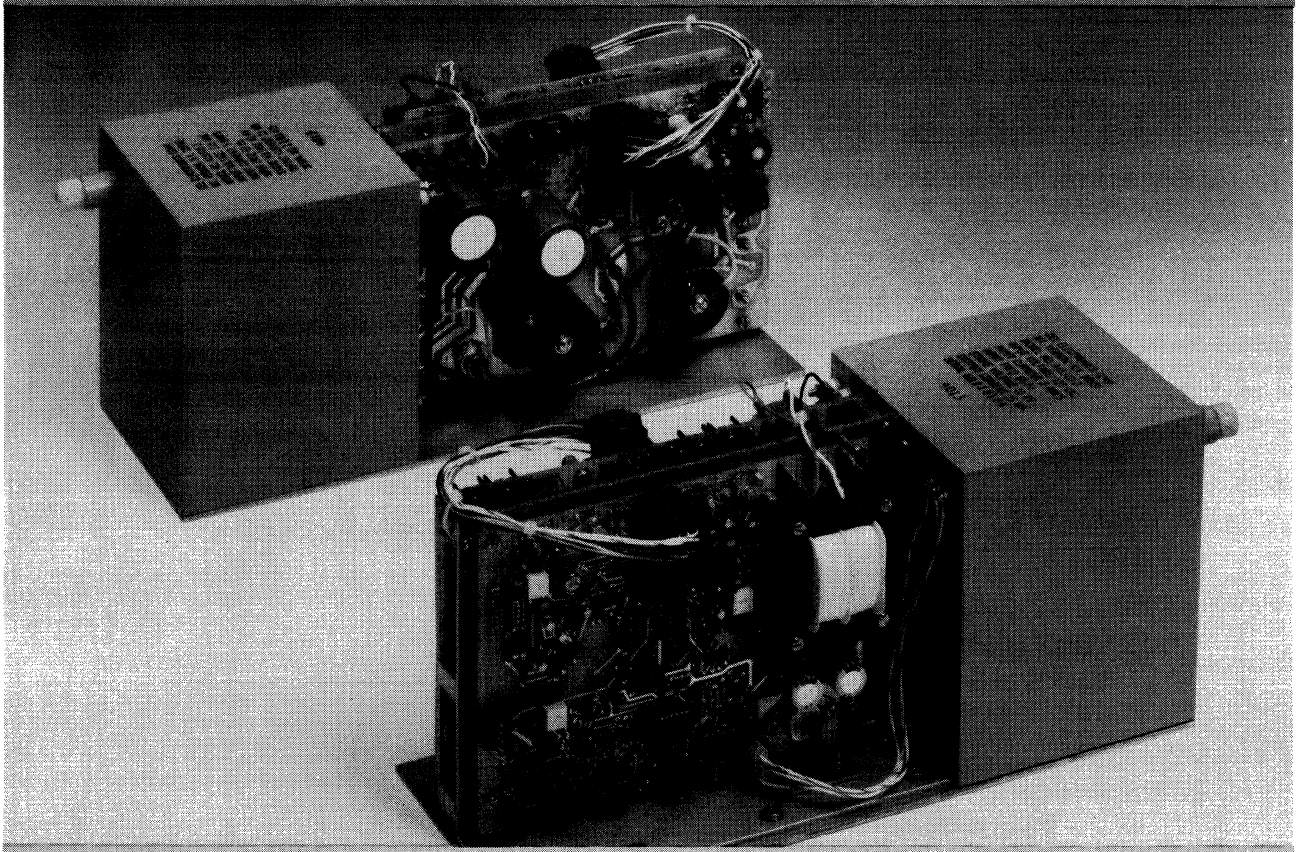
LASER POWER SUPPLIES



Typical CO_2 Laser Supply

FEATURES

- **Ballast Resistance Eliminated**
- **Switch Mode, Current Regulator**
- **High Efficiency**
- **Modular Construction**
- **Convection Cooling**

Description:

The DEL Model 201 is a current regulated supply which drives a CO_2 laser to produce a reliable, high performance system. A proprietary circuit utilizing high frequency regulator technology results in an efficient supply.

Regulated current as low as 0.5 mA is possible without a relaxation oscillation. A 2 ms settling time is achievable under pulse operation.

High system efficiency is achieved by eliminating the lossy ballast resistance normally required for loop stability.

User Controls:

Enable Signal: TTL low-HV off; high-HV on***
Output Current Control: 0.5V input for 0-25 mA output
Output Analogs: 0-5V for 0-25 mA output

Specifications

Striking Voltage	40 kV*	**Pulse Rate**	1 kHz - 150 us rise time**
Operating Voltage	10-25 kV D.C.	**Polarity**	pos/neg - specified with order
Output Power	350 Watts	**Size**	5″ x 14″ x 7″ high
Output Current	0.5-25 mA	**Weight**	20 lb.
Ripple	high freq. ≥1 kHz - 5%	**Cooling**	convection
	low freq. ≤ 1 kHz - 1%	**High Voltage Term.**	AMP-LGH Style
Regulation	0.5% - 2 ms settling time	**Input Voltage**	110 AC, 50/60 Hz, ±10%

*Lower striking voltage requirement to be specified with order.
**Max. to 90% ***The power supplies are pulseable using the TTL enable signal.

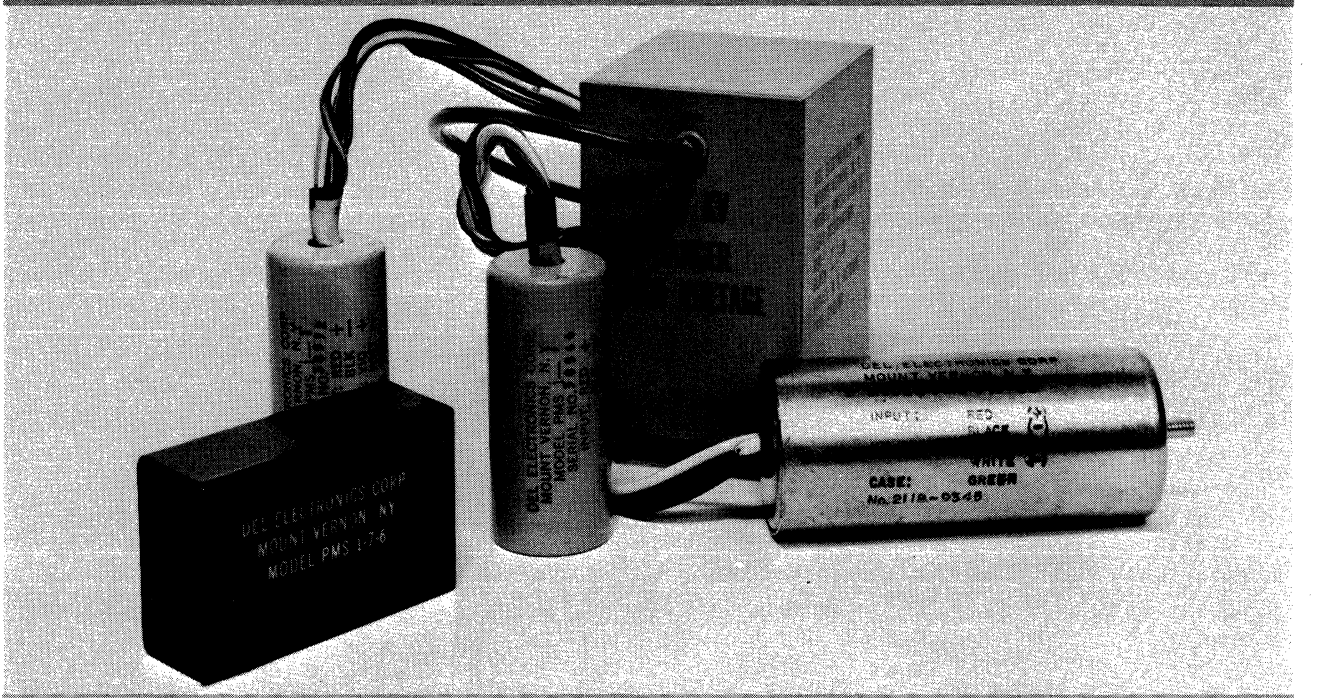
PMS SERIES



Photomultiplier Power Supplies

FEATURES

- Output isolated from Input
- Output proportional to Input
- Output momentary short circuit protected
- Reversible Polarity
- Temperature range O° to 60°C
- Small
- Lightweight
- Shielded

Description:

The DEL PMS Series is a family of highly reliable, compact, DC to DC proportional converters for use as power sources for photomultiplier and other tube applications. The series utilizes high frequency technology with low energy storage and arc protection.

Insulated, 8"- long, output high voltage leads are floating and fully isolated from the input leads and the case.

Shielding is provided by a steel case, except for the PC board mountable unit PMS 1-7-7.

Specifications

Model	Input DC	Output			Ripple P to P	Size L x W x H or Diameter x L	Mounting
		Voltage	Current	Min. Load (Meg. OHMS)			
PMS1-1	3-15V	300-1500V	1 mA	1.5	1.5V	1 x 2-1/4	Loop Clamp
PMS1-7-7	3-15V	300-1500V	1 mA	1.5	6.0V	2.4 x 1.5 x .81	P.C. Board
PMS3-.5	3-15V	300-3000V	0.5 mA	6.0	7.5V	1-1/4 x 2-3/8	8/32 Studs

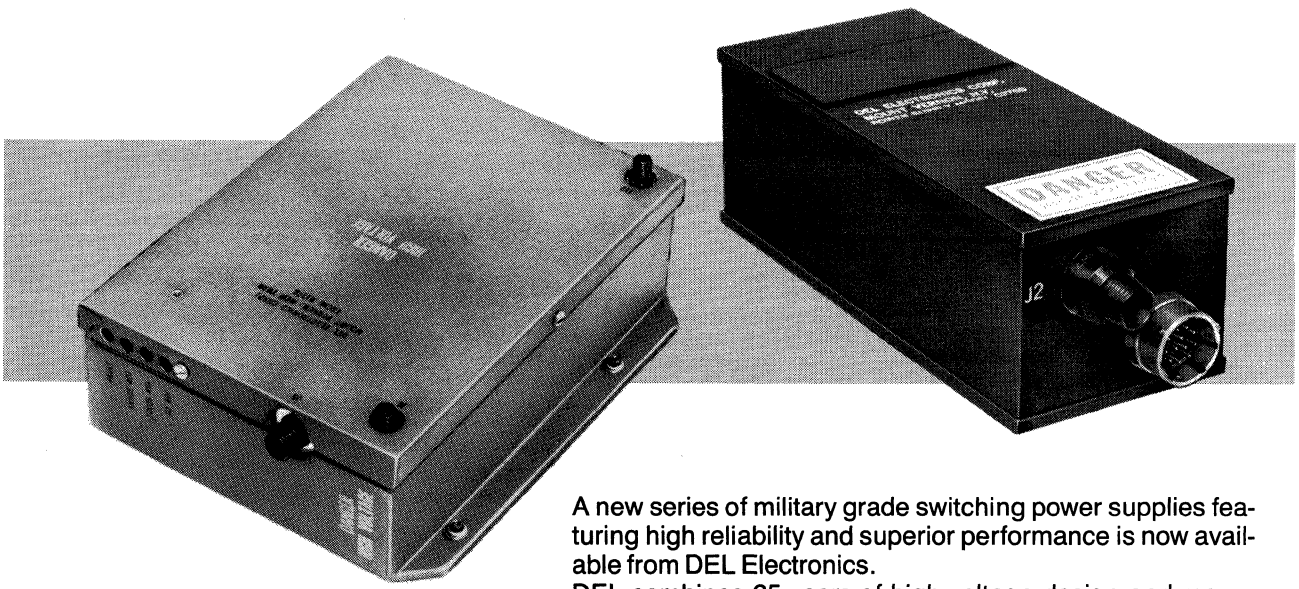
HIGH VOLTAGE CRT POWER SUPPLIES



A new series of military grade switching power supplies featuring high reliability and superior performance is now available from DEL Electronics.
DEL combines 35 years of high voltage design and manufacturing expertise to produce equipment utilizing state-of-the-art circuitry and packaging. These units have been developed for, and sold to, leading OEM display manufacturers.

FEATURES:

- **Outputs To 40W**
- **Color & Monochrome Applications**
- **Dynamic Focus**
- **TTL Enable/Disable**
- **Arc & Short Circuit Protected**
- **MTBF Exceeds 40,000 Hrs.**

TYPICAL SPECIFICATION:

MODEL	OUTPUTS	VOLTAGE	OUTPUT CURRENT	REGULATION		RIPPLE	INPUT POWER	FEATURES	SIZE (INCHES)
				LINE	LOAD				
	Anode	25 kV	1.2mA	0.05%	0.05%	1V Pk-Pk		Mil-Spec

Superb design capability, high production capacity and low defect rate have made Delta become the choice supplier to many leading companies in computer and electronics industries.

FEATURES

- Power range: 10W to 500W for models currently designed.
- Design capability: up to 1000W.
- MOSFET circuits for high frequency units.
- UL, CSA, TUV approved or approval in process.
- All units tested in our screen rooms to meet FCC docket 20780, part 15 & VDE 0871 regulations for conducted EMI.
- Overvoltage protection for + 5V; short circuit protection for all outputs.
- High efficiency: 70% typical.
- 100% dynamic burn-in.
- 200% computerized functional test before and after burn-in.
- MTBF: 100,000 hrs typical for standard models below 100W; 80,000 hrs typical for standard models over 100W.

GENERAL INTRODUCTION

A DC-DC converter is designed to alter a DC voltage for more flexible application, to isolate the primary from external load and to eliminate ground-loop effects. The typical application is shown in Figure 1 wherein a single output is distributed to various loads through DC-DC converters hence produces following advantages:

1. The main power supply is highly simplified.
2. Wire connection is streamlined to prevent wiring error and to facilitate maintenance.
3. The interference between different circuits is minimized due to the independence of power sources.
4. The addition or modification of circuits become much easier.

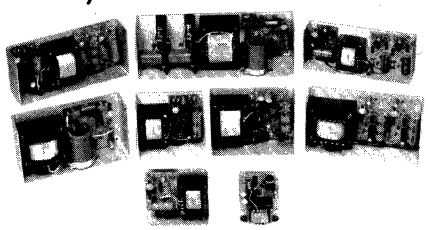
Features:

- **Low Cost**
- **115,220,230 and 240 VAC, 47-63Hz/Input**
- **Overvoltage Protection for All 5V Outputs**
- **Transformer - 2500V Isolation with Primary to Secondary Shield**
- **Two Hour "burn-in" on all units.**
- **RFI/EMI Free Operation**
- **U.L. Recognized and CSA Approved**
- **2 Year Warranty, Factory Repair Service**
- **Quantity-Volume Discounts**

OVP-12 Overvoltage Protector	
1-24	$7.95



The Q Series line of open frame power supplies, introduced in 1980, supersede the previous open frame models that have been in production since 1971.

SPECIFICATIONS:

A.C. Input	115, 220, 230, 240 volts ± 10% 50-400Hz. Load rating should be reduced by 10% when used at 50Hz
D.C. Output	5 volts to 24 volts (See tables)
Output Adjustment:	Minimum of ± 5%
Line Regulation:	< ± 0.05% for 10% line change
Load Regulation:	< ± 0.05% for 50% load change.
Ripple & Noise:	Units up to 15 volts — < 1mV R.M.S. Above 15 volts —< 3m R.M.S.
Transient Response:	< 30µ Secs. for 50% load change.
Overload Protection:	Automatic. Re-entrant current limit.
Overvoltage Protection:	Built into all 5v outputs. Set at 6.2v ± 0.4 volts. Other voltages optional "add-on" packages are available.
Output Isolation.	All outputs isolated from each other. Isolation output to frame, 30 megohms min., at 500 VDC
Remote Sensing:	All Models
Stability:	< ± 0.3% for 24 hours after warm up
Operating Temperature:	0° C to +50° full rating then linear derating to 40% at 70°C.
Storage Temperature:	-55°C to + 85°C.
Temperature Coefficient:	± 0.03% °C.
Efficiency:	5v units 45% 12 - 15v units 55% 24v units 60%
Vibration:	Per MIL-STD-801B, Method 514 Procedure 1, curve AB (to 50Hz).
Shock:	Per MIL-STD-801B, Method 516 Procedure V
Burn-in:	Each unit undergoes a 2 hour burn-in and is fully re-tested before shipment.
Packaging:	All units individually boxed and labeled.

DUAL OUTPUT MODELS (Outputs Isolated)			
Model	Ratings		Price
	Output #1	Output #2	1-24
QDA12 15	12V @ 1.0A, or 15V @ 0.8A	12V @ 1.0A, or 15V @ 0.8A	$40.95
QDB12 15	12V @ 1.7A, or 15V @ 1.5A	12V @ 1.7A, or 15V @ 1.5A	51.95
QDC12 15	12V @ 3.4A, or 15V @ 3.0A	12V @ 3.4A, or 15V @ 3.0A	84.95
QDB5 12	5V @ 3.0A	9-15V @ 1.25A	56.95
QDC5 12	5V @ 6.0A	9-15V @ 2.50A	91.95

TRIPLE OUTPUT MODELS (Outputs Isolated)				
Model	Ratings			Price
	Output #1	Output #2	Output #3	1-24
QTC1	5V @ 3.0A	12V @ 1.0A, or 15V @ 0.8A	12V @ 1.0A, or 15V @ 0.8A	$72.95

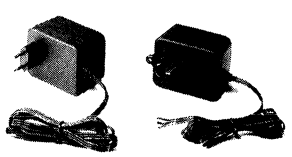
WALL PLUG-IN POWER SOURCES

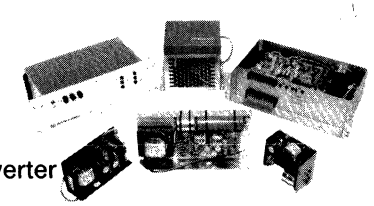


- AC-AC
- AC-DC (Unreg.)
- AC-DC (Reg.)
- Low Pricing
- Both Domestic and European Types

These are ideal power sources for modern microcomputers, alarm equipment, microprocessor-based units, games, calculators, and other similar equipment.

Call us to discuss your specific needs.

CUSTOM POWER SUPPLIES



- Switching
- Linear
- DC to DC Converter
- Ferroresonant

Dynage will design, to your specifications, for a wide range of applications.

At Dynage, custom power supplies are professionally designed and skillfully manufactured to achieve outstanding reliability and performance.

Call us to discuss your requirements. Our outstanding power supply design team offers seasoned engineering solutions to your power supply requirements.

DYNAGE Power

BATTERY CHARGERS

Ni-Cad – Gell Cell – Sealed Lead Acid – Others

NI-CAD CHARGERS*

Float Type - The least costly float charger design, with the C/10 charge rate usually recommended, require 14 to 16 hours for the batteries to charge from a full discharge. Specify the ampere-hour rating and the voltage rating of your nic-cad battery when ordering your low cost C/10 float charger. Float types with quick charge rates (4 to 5 hours) with C/3.33 or other charge rates are also available. Dual mode units for a combination of quick or fast charge and float charge are described below.

2-mode, time controlled, type - The chargers with time-controlled dual mode provide quick charge (C/3.33) for 4 hours and then revert to float charge (C/10, C/30, or C/50) continuously are availalbe. Internal timer is reset with external switch on charger unit to set charge at "quick rate" for fixed time period. The above time-controlled dual mode can also be applied to have C/10 float charge rates run for 16 hours and then revert to a C/30 or C/50 smaller float charge rate.

2-mode, temperature controlled types - The chargers with temperature controlled dual mode to provide fast charge (C/1) until battery temperature high limit is reached and then revert to float charge (C/10, C/30 or C/50) continuously are available. The temperature sensor must be assembled with the battery pack and connected with separate conductor of the output cord of the charger unit.

Custom Types - Contact us to design battery chargers to meet your requirements.

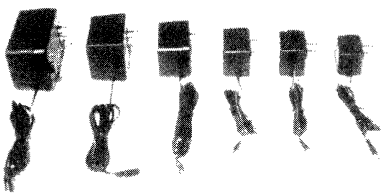
GELL CELL CHARGERS**

Float Type - These chargers with a single fixed voltage provide optimum battery life in standby type applications and will maintain a battery in the fully charged condition at the float voltage of 2.28 to 2.30 volts per cell. The float type charger delivers a constant potential to the battery and is current limited to 20% or less of the 20 hr capacity of the battery. This type is used for products that activate in the event of a power failure and for applications where the charger is always connected to the battery. These chargers can be simultaneously used as a power supply and a charger.

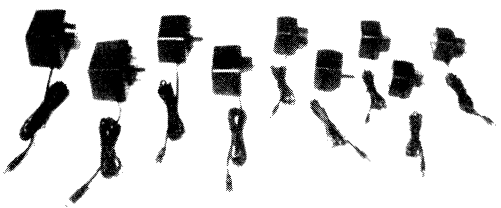
Cyclic (2-mode) Type - These chargers are designed to quickly recharge batteries without danger of overcharging and are suited for applications where batteries are repeatedly being discharged and recharged. The dual modes consist of (1) fast charge constant potential of about 2.50 volts per cell with current limit to 40% or less of the rated 20 hr capacity of the battery and (2) float charge constant potential of about 2.29 volts per cell with current limit to 20% or less of the rated 20 hr capacity of the battery. The automatic switchover from fast charge to float charge is initiated by sensing the charge current and switching to "Float" at a set point of about C/100 under the fast charge constant potential condition.

* Contact Sales Office for button cell chargers.

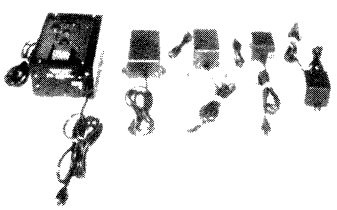
** Also starved electrolyte lead acid chargers.



Wall plug-in units for North American receptacles.



Wall plug-in units for various International receptacles.



Desktop and wall mount units with input cords for North American receptacles or various International receptacles.

GATES SEALED (TO 50 PSI) LEAD ACID BATTERIES

Same as for Gell Cell except:

Float Type - Same as Gell Cell Charger except use constant potential of 2.3 to 2.4 volts per cell with current limit set at 200% or less of the rated 20 hr capacity.

Cyclic Type - Same as Gell Cell Charger except use constant potential up to 2.6 volts per cell with current limit set to 200% or less of the rated 20 hr capacity.

● **Low Prices** ● **High Quality** ● **Custom Designs**

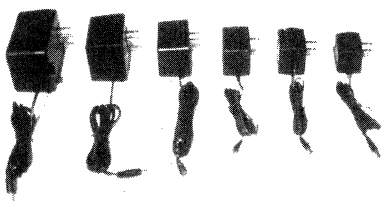
WALL PLUG-IN, DESK TOP, AND WALL MOUNT UNITS

AC/AC, AC/DC, and AC/DC Regulated

AC/AC ADAPTERS

Up to 14 case sizes are offered with a variety of output cord and connector configurations to meet your specific requirement. Units can be custom designed to meet your input and output ratings. Plug types for many different countries are available. Several standard models with UL, CSA and other approvals are offered.

Centertapped or multi-secondary versions with three or four conductor output cords are availalbe. Screw terminal outputs are also offered on some case sizes.

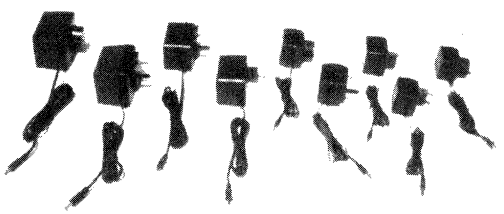


Wall plug-in units for North American receptacles.

AC/DC ADAPTERS

These adapters are unregulated, filtered, DC output units offered in up to 14 case sizes with a wide variety of output cord and connector configuation. Dual or triple DC outputs with three or four conductor output cords are available. Input plug types of many different countries are offered.

UL and CSA approved standard models are available. Units designed to meet VDE, TUV, and others are also offered.



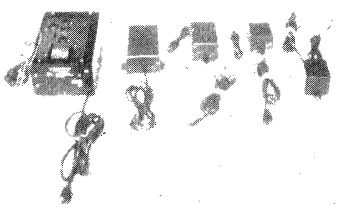
Wall plug-in units for various International receptacles.

LINEAR REGULATED POWER SUPPLIES

The larger case sizes are used for the linear regulated DC power supply units. Some of the larger cases are of the wall plug-in type mainly for North American receptacles. Most of the larger cases are of the desktop (or wall mount) style.

Single or multiple regulated outputs are offered with 2, 3, 4, or 5 conductor output cords available. Input cords for most countries are available in the desk top or wall mount units.

Custom designs can be made to meet your specific requirements.



Desktop and wall mount units with input cords for North American receptacles or various International receptacles.

SWITCHING POWER SUPPLIES

the switching regulated power supplies are offered primarily in the larger case sizes. Some versions are available in wall plug-in type cases but most offerings are in desk top units. Units are designed to meet EMI requirements per FCC Docket 20780 Class B. Wide input voltage ranges of 90–130 and 180-260 VAC are standard.

Custom designs can be made to meet your specific requirements.

- Low prices
- High quality.

- Custom designs to meet your exact requirements.
- Standard designs available with UL and CSA approvals.
- UL, CSA, and VDE submittals upon request.
- Quick delivery on preproduction units (made in USA)
- Plugs for Continental Europe, UK, Australia, North America, and others.

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

Dynapower Custom Rack

Dynapower Custom Rack Mount Power Supplies combine high precision and solid stability in a compact and extremely reliable system. Designed to your specifications, and constructed from our standard subassemblies, Dynapower Custom Rack Mount Power Supplies provide specialized equipment at off-the-shelf prices.

Deciding which power supply to purchase is often tough. Specifications from different manufacturers don't always mean the same thing, and trying to compare various brands of power supplies can be very confusing. On top of that, you have to either buy a catalogued item, or pay the price for custom designed and built equipment.

Dynapower solves these problems with its new line of Standard Custom Rack Mount Power Supplies. The Standard means that they are assembled from standard subassemblies, proven in hundreds of power supply installations throughout the world. The Custom signifies that each power supply is constructed from these standard components to meet your particular specifications.

Typical SCR System Specifications:

Voltage regulation	0.01%
Current regulation	0.01%
Tempcos (15°C to 35°C)	
Internal reference	2 ppm/°C
Voltage control	200 ppm/°C
Current control	200 ppm/°C
Current Stability	<0.02% with constant ambient, input and load
Ambient temperature	0 - 40°C
Ripple	<0.2%
Standard Rack Mount Size	
	16" High
	20" Deep
	19" Wide

Standard Features

- Step-start on secondary SCR units
- Soft-start on primary SCR units
- Push-button local/remote Stop-Start control
- Phase loss/reversal protection
- Overtemperature protection
- 10 turn output controls
- Automatic voltage/current crossover
- Constant voltage/current mode indicators
- Magnetic circuit breaker
- Remote current programming
- Remote voltage sensing
- Digital meters
- Output inhibit
- Copper wound transformers and inductors
- External connections
- Adjustable load compensation
- Quick delivery
- High efficiency
- Exclusive warranty

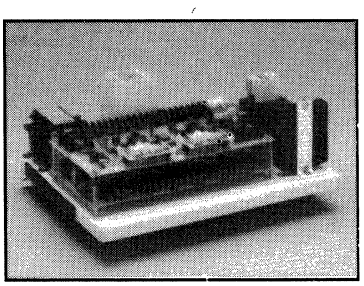
Applications

- Superconducting Magnets
- Semiconductor Ovens
- Illumination Systems
- Crystal Growth
- General DC Power
- Laboratories
- Focusing Magnets
- Precision Plating
- Research Facilities
- Battery Formation

When you order a Dynapower Custom Rack Mount power supply, we help you determine the configuration that best meets your needs. Dynapower will then design and construct your power system from standard components, with each subassembly being fully tested and correct for the total design. You will be involved in the specification and design stages, ensuring that the equipment you receive is the equipment you want.

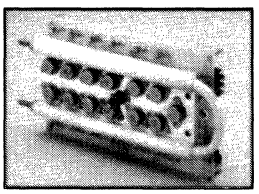
Input/Output

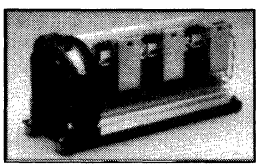
Line inputs and DC outputs can be virtually any level desired. Single phase inputs are available in power supplies up to 1 kw, while three phase is required for outputs of over 1 kw. Standard input voltages are 230, 460, and 600 vac, with others as options. DC outputs of up to 500 amperes and 600 volts are available. Maximum output in a standard size rack mount is 10 KVA. Higher outputs are possible with larger enclosures or different configurations.



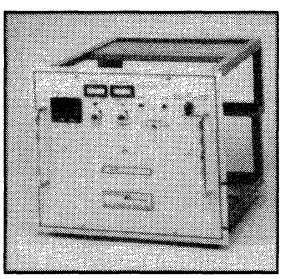
Standard electronics consist of precision regulators and firing circuits. Regulator boards are equipped with switches allowing precise compensation for the resistance and inductance of the load. Standard current and voltage regulations are 0.01% of rating. Optional regulators provide current regulation of 0.001% or better, and voltage regulation of 0.2% or better. Also available are RS-232, IEEE-488, and GPIB interfaces.

Mount Power Supplies





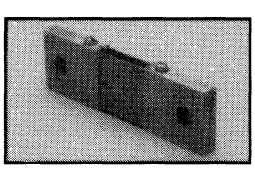
Either forced air or direct water cooling is available on a Dynapower rack mount unit. Air cooled designs incorporate highly efficient aluminum heatsinks, while water cooled units utilize unique Dynapower electrolytically pure copper heatsinks. Each is designed to maximize heat dissipation and minimize semiconductor junction temperatures. The cooling method most appropriate will depend on where the system is located, the physical size of the unit, and the power rating.



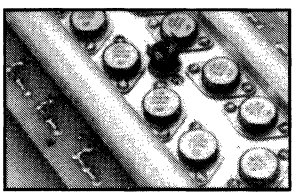
Dynapower not only manufactures enclosures for power supplies, but also peripherals such as instrumentation and data acquisition systems. For example, Dynapower can design and manufacture an enclosure that contains a power supply, a strip chart recorder, an industrial PC, and a precision voltmeter. Additionally, this enclosure can be mounted on casters allowing a convenient means to transport equipment from one location to another. Dynapower manufactures cabinets to satisfy your particular requirements.

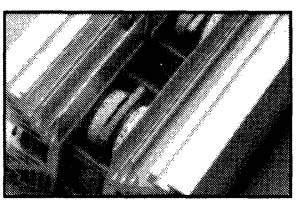
Rectification

AC-DC transformation is performed by one of three rectification methods: phase control SCR, series pass transistor, or pulse width modulated switch mode. The particular configuration utilized will be determined by your output power, regulation, ripple, and noise requirements.

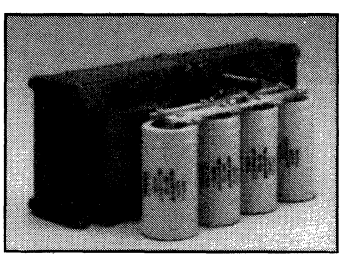


One of the critical aspects of successful precision power supply operation is the ability to accurately measure the output current. This is especially important when the power supply is used to power bending or focusing magnets. The standard Dynapower rack mount power supply utilizes a precision shunt to monitor the output current. This shunt, when combined with our standard precision electronics, provides regulation of at least 0.01%. Dynapower also manufactures a precision current measuring device, the Dynapower ZFCT (Zero Flux Current Transductor), with accuracies of 0.0001% or better. The ZFCT is contained in its own temperature controlled 19" rack mount enclosure. The most cost-effective current measurement configuration will be determined by your specific needs.





Dynapower utilizes only the highest quality semiconductor devices available. If the power supply is a phase control SCR design, the rectification configuration will be either primary thyristor/secondary diode or secondary thyristor, depending on the desired output voltage. Series pass and switch mode units incorporate high power, top quality transistors. No matter which design is selected, the semiconductors will be utilized at no more than 50% of their rated values, ensuring unsurpassed reliability and performance. Optional semiconductor features, such as crowbar and reversing systems, follow the same conservative design criteria.



Ripple control is of paramount importance in precision power supplies. Dynapower offers both active and passive filtering systems that can reduce ripple to virtually any level desired. The standard passive system consists of an efficient split leg choke combined with computer grade capacitors, providing a minimum ripple component. Active systems, such as the unique Dynapower Ripple Bucker, reduce ripple even more. The degree of ripple reduction required will be determined by your particular application.

For additional information concerning your specific power supply needs, please write or call:

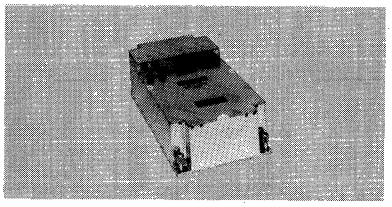
CUSTOM AND STANDARD DESIGNS

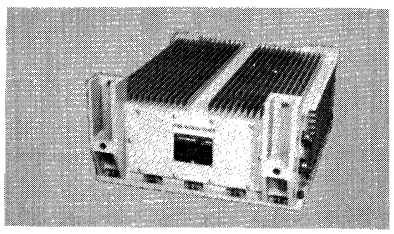


SHIPBOARD SWITCHING POWER SUPPLY
P/N 2-12150-01

Input Power: 115VAC, 60Hz, 3ϕ per MIL-STD-1399, Sec. 103, Type 1

Outputs	Reg.	Noise
+5VDC @ 70A	±1%	50mV p-p
−50VDC @ 1A	±1%	50mV p-p
+12VDC @ 1A	±1%	120mV p-p
−12VDC @ 2A	±1%	120mV p-p

Size: 10 × 6.25 × 3 inches
Weight: 12 pounds
Environment: (MIL-E-16400):
Temp.: 0 to 75°C
Humidity: to 95%
Fungus: MIL-STD-810
Vibration: MIL-STD-167
Shock: 75g's
Cooling: Convection/Conduction
Efficiency: 66%
EMI: MIL-STD-461 Notice I
MTBF: 40,000 hours @ 60°C, N_S

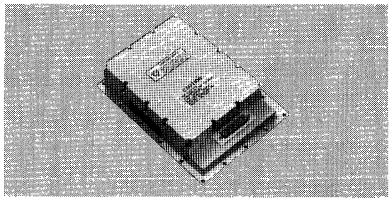


SHIPBOARD SWITCHING POWER SUPPLY
P/N 5498058

Input Power: 115VAC, 60 or 400Hz, 3ϕ per MIL-STD-1399, Sec. 103, Type 1

Outputs	Reg.	Noise
±20VDC @ 2.5A	±1%	3% Max.
±28.5VDC @ 10A	±1%	3% Max.
±30VDC @ 10A	±1.5%	3% Max.
±33VDC @ 10A	±1%	3% Max.
+33VDC @ 10A	±1%	3% Max.

Size: 26 × 22 × 12 inches
Weight: 185 pounds
Environment: (MIL-E-16400G)
Temp.: 0° to 50°C
Humidity: 0 to 95%. MIL-STD-810
Vibration: MIL-STD-167-1
Shock: MIL-STD-901C
Cooling: Conduction/Convection
Efficiency: 75%
EMI: MIL-STD-461A
MTBF: 80,000 hours, each regulator @ 50°C, N_S



RADIATION HARDENED AIRBORNE DC-DC CONVERTER
P/N 2-18800

Input Power: 28VDC per MIL-STD-704C

Outputs	Reg.	Noise
5VDC @ 15A	±2%	100mV p-p
15VDC @ 0.5A	±2%	100mV p-p
15VDC @ 0.5A	±2%	100mV p-p

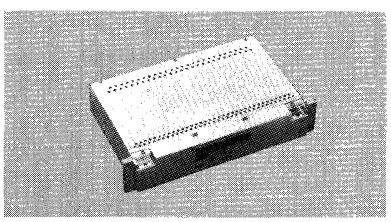
1.0 Amp Current Source		
12.5VDC @ .18A	±2%	200mV p-p

Size: 10 × 7.6 × 2.7 inches
Weight: 7.0 pounds
Environment:
Temp.: −54°C to +65°C
Shock: 15 gpk, 11 msec.
Vibration: 10.7gRMS Random
Nuclear Environment
Cooling: Conduction
Efficiency: 62%
EMI: MIL-STD-461
MTBF: 201,000 hours @ 60°C, A_{IC}

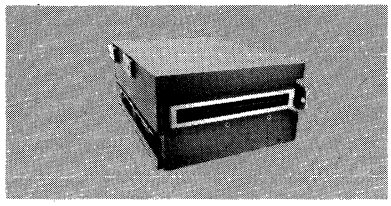


AIRBORNE POWER SUPPLY
P/N 2-11470

Input Power: +28VDC per MIL-STD-704

Outputs	Reg.	Noise
+20VDC @ .69A	±5%	100mV p-p
+12VDC @ .975A	±5%	100mV p-p
+5VDC @ 11.28A	±5%	100mV p-p
−14.7VDC @ 2.3A	±2%	100mV p-p

Size: 7.63 × 5.6 × 1.69 inches (incl. mounting flanges)
Weight: 4 pounds
Environment:
Temp.: −54°C to 100°C
Altitude: 0.560 to 15.5 psia
Acceleration: ±10g's, all axes
Vibration: MIL-E-5400, Curve IV
Shock: MIL-T-5422, 30g's
Explosive Atmosphere: MIL-E-5400
Humidity: MIL-T-5422, Para. 4.4
Salt Spray: MIL-T-5422, Para. 4.5
Sand & Dust: MIL-T-5422, Para. 4.7
Fungus: MIL-T-5422, Para. 4.8
Cooling: Conduction through mounting flanges
EMI: MIL-STD-461A (CE01, CE03, RS02, RS03, RE02, CS01, CS02)
MTBF: 27,000 hours

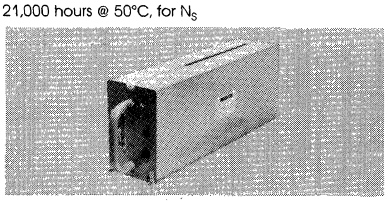


AIRBORNE/SHIPBOARD HIGH DENSITY SWITCHING POWER SUPPLY
P/N 2-16200-01

Input Power: 115/200VAC, 400Hz, 3ϕ per MIL-STD-704A or 270VDC

Outputs	Reg.	Noise
+5.2VDC @ 200A	±4%	2%
−6.5VDC @ 4.5A	±3%	3%
+6.5VDC @ 2.5A	±3%	3%
+15.0VDC @ 7.1A	±2.5%	1%
−15.0VDC @ 1.9A	±2.5%	1%
+5.9VDC @ .6A	±3.4%	2%
+5.0VDC @ 1.0A	±10%	4%
+8.3VDC @ .065A	±12.0%	2.5%
+5.0VDC @ .17A	±6.0%	2%
±15.0VDC @ .2A	±4.7%	4.7%
±5.1VDC @ 1.8A	±8.0%	2%

Size: 6.09 × 9.51 × 3.65 inches **Weight:** 13 lbs.
Environment: (MIL-E-5400T)
Temp.: −54°C to +71°C
Humidity: MIL-E-5400, Para. 3.2.24.4
Vibration: Special High Vibration and Gunfire
Shock: MIL-S-901, Class 1
Cooling: Air Cooled Central Heat Exchanger
Efficiency: 75%
EMI: MIL-STD-461, Class A1b and A4
MTBF: 12,000 hours for Class 2x Auf
21,000 hours @ 50°C, for N_S



AIRBORNE TRANSCEIVER POWER SUPPLY
P/N 2-17100

Input Power: 208VAC, 400Hz, 3ϕ per MIL-STD-704

Outputs	Reg.	Noise
200VDC @ 25mA	±5%	2000mV p-p
100VDC @ 160mA	±5%	1000mV p-p
28VDC @ 55A, 50% duty cycle	±3.5%	200mV p-p
9VDC @ 6.5A	±11%	45mV p-p
3VDC @ 11A	±6.7%	15mV p-p
16VDC @ 350mA	±7%	80mV p-p

Size: 1/2 ATR Long **Weight:** 30 pounds
Environment:
Temperature-Shock: MIL-STD-810 Method 503
Temperature-Pressure: MIL-STD-810 Method 504
Humidity: MIL-STD-810 Method 507
Salt Fog: MIL-STD-810 Method 509
Fungus: MIL-STD-810 Method 508
Shock: 15g half sine, 11ms
Vibration 8.9gRMS random
Nuclear Environment
Cooling: Forced air
Efficiency: 80%
EMI: MIL-STD-461
MTBF: 41,000 hours @ 60°C, A_{IC}

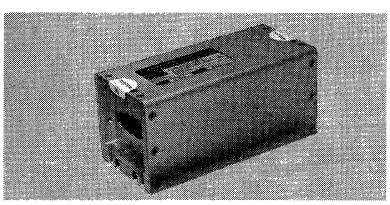
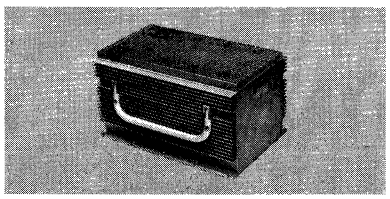
Size: 6.80 × 10.80 × 2.48 inches
Weight: 12 pounds
Environment:
Temp.: −10°C to +60°C
Temp. transient (1 hour): +80°C
Shock: MIL-S-901 Class 1
Vibration: MIL-STD-202
Humidity: 0 to 95% MIL-STD-810
Salt fog: MIL-STD-810
Thermal shock: MIL-STD-202
Cooling: Conduction to coldplate
Efficiency: 70%
EMI: MIL-STD-461
MTBF: 100,000 hours @ 50°C (60°C for /8) N_S



DC TO DC CONVERTER

Input Power: 28VDC
Output Power: −5VDC @ 8A
Size: 5.5 × 2.5 × 2.5
Weight: 1.5 lbs.
Environment: (MIL-E-16400)
Efficiency: 70%
Features: For use with the AN/UYK 44 Computer in combination with SPSP Power Supply P/N 5854683/3.
MTBF: 890,000 hours @ 60°C, N_s

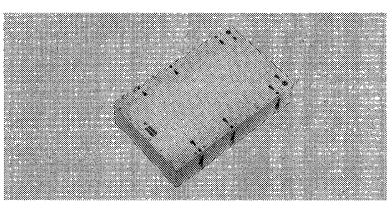


CONDUCTED INTERFERENCE ATTENUATOR

Input Power: 115VAC, 3ϕ Δ or Y
Output Power: 155 or 270VDC up to 4.5 kilowatts
Size: from 295 to 1000 cu. inches
Weight: from 14 to 75 lbs.
(consult factory for other sizes)
Environment: (MIL-E-16400)
Power Factor: > 0.98
EMI: MIL-STD-461, CE01, CE03
Features: Provides electrical solution to CE01 limits of MIL-STD-461 and the 3% harmonic distortion limits of MIL-E-16400 and DOD-STD-1399 Sec. 300.
MTBF: 360,000 hours @ 60°C, N_S

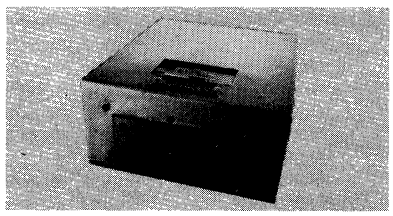
CONDUCTED INTERFERENCE ATTENUATORS FOR U.S. NAVY SHIPBOARD ELECTRONICS SYSTEMS

BACKGROUND: Electrical power generation and distribution systems on board U.S. Navy ships and submarines have problems with power supplies that produce excessive harmonic currents due to rectifying and filtering the AC line. These currents distort the AC waveform of the distribution system which produces several harmful effects such as: conducted interference in attached equipment, low power factor, increased mechanical wear in rotating equipment, and increased heating in electrical equipment. While various military specifications limit harmonic currents produced by user equipment to very low levels, methods used to date to meet these specifications pay significant penalties in cost, reliability, or efficiency, or all three. EG&G Power Systems has developed a patented multi-phase transformer approach which limits harmonic currents due to AC line rectification and filtering to specified levels without suffering the penalties of prior methods. These mutli-phase transformers are combined with rectifiers in a unit called a Conducted Interference Attenuator (CIA) which can be used to convert any 3-phase AC input to any DC voltage without exceeding military specification limits on harmonic currents.



BATTERY CHARGER TRANSFER SWITCH

Input Power: 155VDC
Output Power: 115VDC @ .6A
or 180VDC @ 2A
Size: 6.8 × 2.48 × 10.8 inches
Weight: 10 lbs.
(consult factory for other sizes)
Environment: MIL-E-16400
Features: Charges lead acid batteries. Constant current charging with constant current trickle or constant float voltage when charged.
MTBF: 139,000 hours @ 60°C, N_S

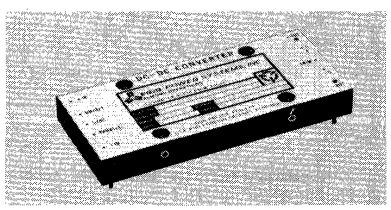


SHIPBOARD SWITCHING POWER SUPPLY
P/N 2-15800-01

Input Power: 115VAC, 50 to 400Hz, 1ϕ
per MIL-STD-1399A, Sec. 103, Type 1

Outputs	Reg.	Noise
+5VDC @ 20A	±1%	50mV p-p
−15VDC @ 2.5A	±1%	150mV p-p

Size: 7 × 6 × 3 inches
Weight: 7.5 lbs.
Environment: (MIL-E-16400)
Temp.: −20°C to +85°C (Baseplate)
Shock: MIL-STD-901, Class 1
Vibration: MIL-STD-167-1, Type 1
Humidity: 0 to 95%, MIL-STD-810
Cooling: Cold plate
Efficiency: 70%
MTBF: 40,000 hours @ 40°C, N_S
Redundancy: Built-in Diode OR-ing



100 WATT HIGH DENSITY DC TO DC CONVERTER
P/N 2-20100

Input Power: 28, 48, 155 or 270VDC per MIL-STD-704 or MIL-STD-1399

Outputs Available	Reg.	Noise
5VDC @ 20A	±1%	100mV p-p
6VDC @ 16A	±1%	120mV p-p
12VDC @ 8.5A	±1%	240mV p-p
15VDC @ 6.67A	±1%	300mV p-p
28VDC @ 3.5A	±1%	560mV p-p
±15VDC @ 3.3A ea.		
5VDC @ 15A, ±15VDC @ 1A ea.		

Size: 4.6 × 2 × .515 inches
Weight: .45 pounds
Environment:
Temp.: −55°C to +85°C
Humidity: 0 to 100%
Shock: MIL-S-901 Class 1
Sine Vibration: MIL-STD-167
Random Vibration: 8 gRMS
Cooling: Conduction to coldplate
Efficiency: 77-83%
MTBF: 91,000 hours with 65°C baseplate, Auf

ALL NEW with this edition of EEM

GET ORGANIZED!

Are your catalog files organized? Can you find any given catalog in a matter of seconds? If your answer is "Yes," you probably already have the EEM File System. But, if you said "No," you really ought to look into this simple system. It will save hours of time and tons of aggravation.

The EEM File System was invented over twenty-five years ago to help people who specify, buy, or work with electronic products and equipment. It is upgraded on a constant basis to reflect the current state of the art. It's easy to use and easy to customize to your particular needs.

You say you want to file catalogs by type of product? That's easy to do with the System. But, what are you going to do when there are multiple products in one catalog? Take Mallory for example. There are all kinds of products in the Mallory Short Form Catalog. With the EEM File System all you do is file the catalog under "M" for Mallory and refer to it on all of the cross reference cards that apply.

There are thousands of EEM File Systems in everyday use in engineering and procurement offices all over the world. Shouldn't you be using this proven system?

The EEM File System is shipped in one neat package. The package contains everything you need to set up your very own filing system. Best of all, it's easy to get and very affordable. Send a check or money order for $25.00 and EEM will pay the postage and sales tax. If you must use a purchase order, please add $5.00 for postage and handling. An invoice will be mailed to you under separate cover.

Don't waste any more time. Get organized now!

EEM FILE SYSTEM,
645 stewart ave., garden city, ny 11530

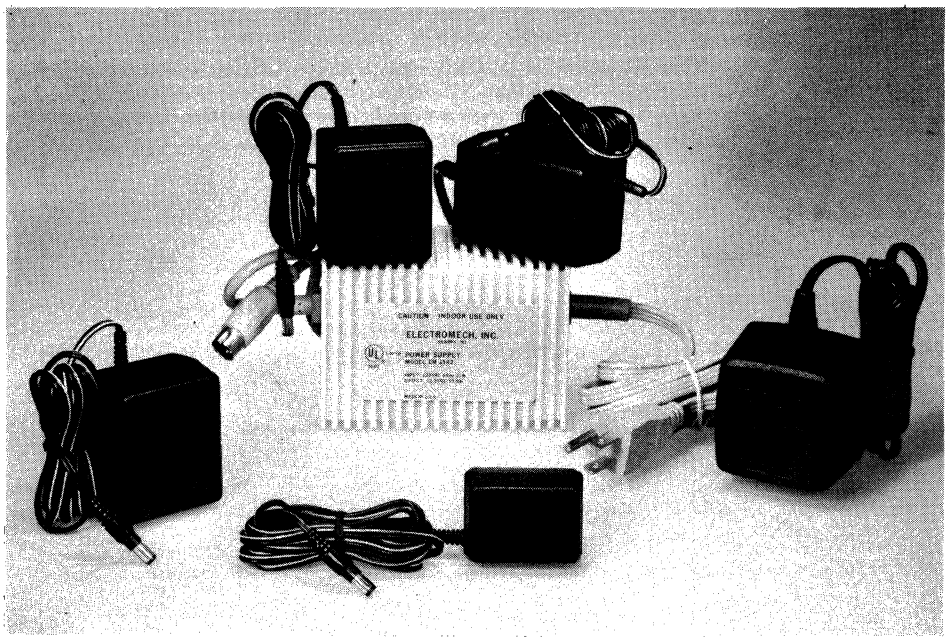
POWER SUPPLIES

WALL PLUG-IN/DESK TOP POWER SOURCES • TAILORED TO YOUR EXACT NEEDS



- **FULL ISOLATION**
- **AC/AC**
- **AC/DC (unreg)**
- **AC/DC (reg)**
- **BATTERY CHARGERS**
- **LINEAR SUPPLIES**

FEATURES

Power—.1VA to 40VA (WALL PLUG-IN)
.1VA to 1KVA (DESK TOP)

Input—100VAC to 240VAC

Freq.—47Hz to 400Hz

Output—.1V to 200V (WALL PLUG-IN)
.1V to 1KV (DESK TOP)

Current—.01A to 5A (WALL PLUG-IN)
.01A to 400A (DESK TOP)

Termination—CONNECTORS, SCREW TERM.
ETC.

SERVICES

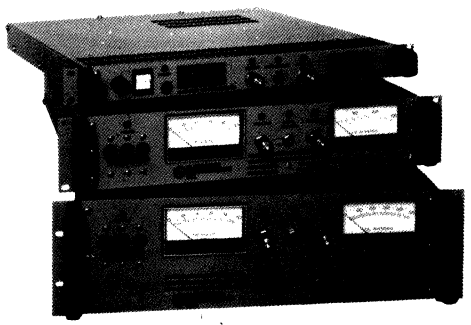
DC SWITCH MODE POWER SUPPLIES

EMS SERIES

U/L RECOGNIZED



MAJOR SPECIFICATIONS

AC input voltage:
100-132/200-264 V, 47-63 Hz,
1ϕ (600W & 1000W models)
190-253V, 46-63 Hz, 1ϕ (2500W model)
190-253V, 45-63 Hz, 3ϕ (2500W model)
190-253V, 46-63 Hz, 3ϕ (5000W model)

DC output:
Zero to value shown in model designation (volts-amps. See chart.)

Mechanical Specifications:
600W & 1000W: 1¾" H x 19" rack x 17"D 15 lbs.
4.4cm H x 48.3cm x 43.0cm D 7 kg
2500W: 3½"H x 19" rack x 18"D 35 lbs.
8.9cm H x 48.3cm x 43.0cm D 15.9 kg
5000W: 5¼"H x 19" rack x 22"D 60 lbs.
13.3cm H x 48.3cm x 55.9cm D 27 kg
10,000W: 8¾"H x 19" rack x 22"D, 105 lbs.

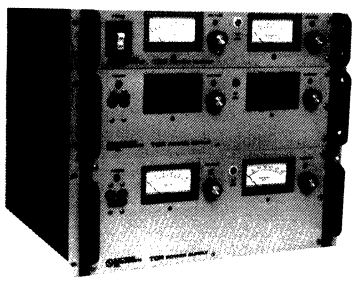
SCR-REGULATED DC POWER SUPPLIES

TCR SERIES SINGLE-PHASE MODELS



MAJOR SPECIFICATIONS

AC input voltage:
105-130V, 47-63 Hz (600, 1000 and 1800W Models)
190-253V, 47-63 Hz (2800W Model) 190-253V
Input options available on 600, 1000, and 1800W Models.

DC output:
Zero to value shown in model designation (volts-phase-amps). See chart. Regulation 0.1%.

Options:
Over voltage protection available on all units at additional cost. Digital panel meters available at no additional cost.

Sizes:
600 and 1000 watt: 3½″ High, 19″ rack by 18½″ Deep
1800 watt: 5¼″ High, 19″ rack by 18½″ Deep
2800 watt: 7″ High, 19″ rack by 18½″ Deep

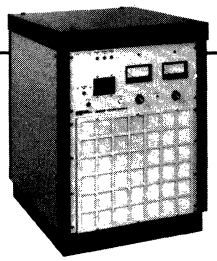
EMHP SERIES THREE-PHASE MODELS 20, 30, 60 KILOWATTS



FEATURES

- Low cost
- Quick delivery time
- High efficiency
- High performance

APPLICATIONS

- Electromagnets
- Magnetic beam bending
- Cryogenic magnets
- Precision electroplating
- DC motor power
- Large relay systems
- Inverter power source
- High energy electronic systems
- Electrochemical processes
- High-power illumination systems
- Thermodynamic and thermonuclear research
- Battery charging
- Industrial DC power

MAJOR SPECIFICATIONS

AC Input Voltage: 460 VAC ± 10%, 60 Hz. Optional inputs available.

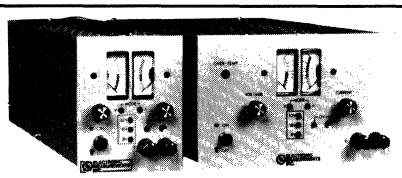
ATR SERIES LINEAR POWER SUPPLIES

ATR-100



ATR-250

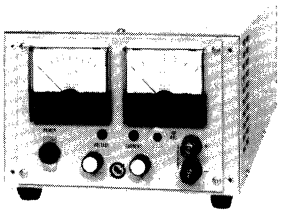
FEATURES:

ATR-100 and ATR-250 are 100 and 250 watt, wide range, linear, DC power supplies. Through a unique switching circuit these units produce essentially a constant power output capability so that as the output voltage requirement is lower the available current output is higher. The units are fully metered, programmable and have a self contained OVP circuit.

MODEL	OUTPUT RANGES		
ATR 100	0-8V 0-10A	8-18V 0-5A	18-32V 0-3A
ATR 100B	0-16V 0-5A	16-36V 0-2.5A	36-64V 0-1.5A
ATR 100C	0-32V 0-2.5A	32-64V 0-1.3A	64-128V 0-0.75A
ATR 250	0-8V 0-25A	8-18V 0-13A	18-32V 0-7A
ATR 250B	0-16V 0-12A	16-36V 0-6A	36-64V 0-3.5A
ATR 250C	0-32V 0-6A	32-64V 0-3.0A	64-128V 0-1.75A

Operating Temp: 0°C to +40°C at full rating
Storage Temp: −40°C to +85°C
Over Voltage Protection: Adjustable from 2.5V to 128V
Cooling: Fan cooled, thermostatically-protected
Weight: 18 lbs. (ATR-100); 32 lbs. (ATR-250)
Size: 4″Wx5″H x 18″D (ATR-100); 8″W x 5″H x 18″D (ATR-250)
Rack adapter systems available.

HCR SERIES DC MODELS - 250 WATTS



MAJOR SPECIFICATIONS

AC Input Voltage: 105-130V, 47-63 Hz or 190-253 V, 47-63 Hz. Optional inputs available.

DC Output: Regulation, voltage mode — ±0.1%; regulation, current mode - ±0.25%, 8 hours; temperature coefficient — 0.02%/°C.

Weight: 45 lbs.

Size: 5″H x 7⅝″W x 18½″D

Rack Adaptors: Available for 1 & 2 units.

EMTL-488 SPECIFICATIONS

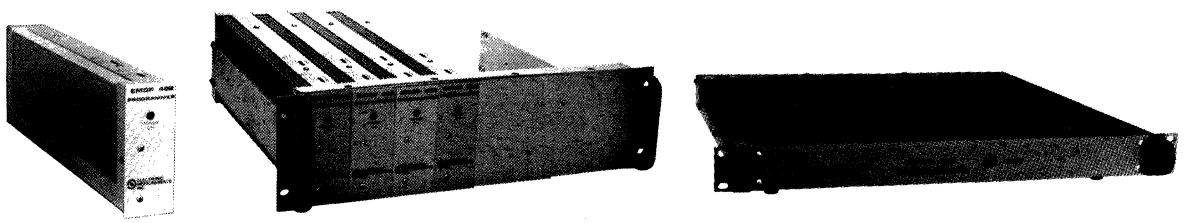
INPUT	
AC Voltage	95-130 VAC or 190-260 VAC. 1Φ 47-63 Hz
Power	15 watts per card
Data Format	ASC II/ISO-7
Factors	AHI – acceptor handshake EHI – source handshake L4 – base listener T6 – base talker, Serial poll

OUTPUT	
Channel A	0-5 volts @ .024% resolution (12 bits)
B	0-100 millivolts @ .024 resolution (12 bits)
Talker Function	two channel digitized analog response of the controlled power-supply to the programmed bus command. Four digit resolution
Zero Adjust	± 10 millivolts.
Output Impedence	Channel A less than .05 ohms Channel B less than .05 ohms
Programming Time	1500 micro seconds from execute command
Programming Range	00.00% to 99.99% of output voltage
Data Transfer Time	2K bytes per second
Transfer Format	byte serial/bit parallel
Linearity Error	± 1/2 L.S.B.
Polarity	Unipolar

MODEL NUMBERS

Part Number	Rack Size	Output
EMTL-488-1-XX	1/8th	Dual channel
EMTL-488-2-XX-XX-XX	Full	3 dual channel
EMTL-488-3-XX	—	Dual channel, programming card
RA-4 kit	Full	Rack adapter to mount up to 8 units into a standard 5¼" relay rack

XX = dc output voltage of power supply to be controlled.



EMDP SERIES SPECIFICATIONS

An interface/control unit to remotely control outputs of E/M power supplies.

Interface: IEEE-488 1978 standard for programmable instrumentation; AM1, L1, SHO1, TO, SRO, RLO, PPO, DCO, DTO, CO; average data transfer rate 2K bytes per second: byte serial, bit parallel.

Output: one to six independent, unipolar analog sources mutually isolated for potentials not to exceed 800 VDC.

MODELS

Part Number	Rack Size	Resolution	Output
EMDP-100/3	1/8	Standard	Single Analog
EMDP-100/4	1/8	High	Single Analog
EMDP-200 3/3	1/8	3 digit both channels	Dual Analog
EMDP-200 4/4	1/8	4 digit both channels	Dual Analog
EMDP-200 4/3	1/8	channel A 4 digit channel 2 3 digit	Dual Analog
EMDP-600	Full	as above - per card IEEE Bus Address: 3 each dual channel cards. 1 Bus Address per card.	1-6 channels: 1 to 3

Message: ASCII/ISO 7 bit code

Programming Range: (1) to 5 VDC or (2) 0 to 10 VDC

Output Resolution: Standard .001 x full scale or High .0001 x full scale

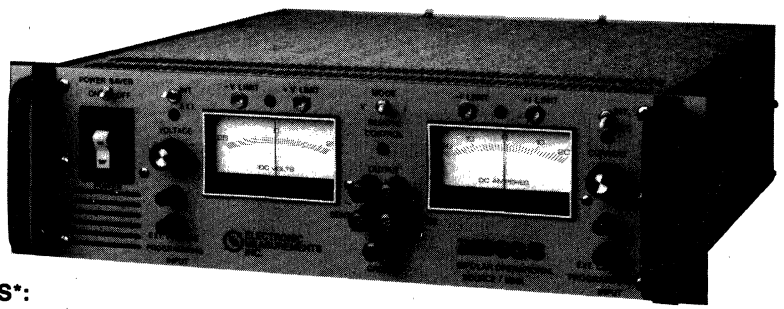
The BOS/S™

A bi-polar power supply that delivers both positive and negative voltage. As a SOURCE it delivers *both* positive *and* negative current from the supply. As a SINK it dissipates power at any polarity from an active load. All BOS/S's may be series or parallel generated, and an IEEE-488 or RS-232 programmable option is available.



MAJOR SPECIFICATIONS
AC Input: 105-125 vac 50/60 Hz; or 200-250 vac 50/60 Hz

DC OUTPUT RANGES*:

PWR	Eo	Io	Eo	Io	Eo	Io	Eo	Io	Eo	Io	Eo	Io

FOR OTHER VOLTAGE/CURRENT LEVELS CONSULT FACTORY.

VOLTAGE ADJUSTMENT RANGE: through a range of +5% to –20% of the nominal setting.

REGULATION - (Line): 0.1% over the range of the input.
(Load): 0.5% for a 100% load change.
RIPPLE: 0.25%
TRANSIENT RESPONSE: output voltage returns to within 1% within 5 milli seconds.
OVER VOLTAGE PROTECTION: output power is removed when the output voltage exceeds an internal set pont. The adjustment range is from 90-110% of the output voltage.
TEMPERATURE: Operating 0 to 70°C derate 1% per degree C for each degree above 40°C. Storage temperature –40 to +85C. TC is 0.02% per degree C.
COOLING: natural convection operating range can be extended by using forced air.
STABILITY: .05% for eight hour period after a 30 minute warm-up.
ISOLATION: 2500 VAC input to output and input to case; 500VAC output to case.
TERMINATIONS: (Input) Molex 15-31-1046 or equal
(Output) Molex 15-31-1036 or equal
WEIGHT: 3 pounds
SIZE: 2⅜"H×5"W×10"D
U.L. RECOGNIZED

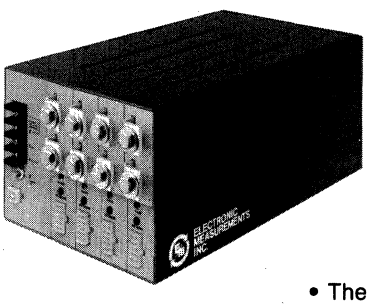
The MAGIC MODULE™ SYSTEM

Over 100,000 Combinations of High Density, High Performance, Multiple Output Power Systems – Without Any Development Time...Development Costs or – Regulatory Agency Delay!

Up to 3,000 Watts Output



The QUIQ Power Systems represents a break-through in the way power systems are designed, specified and produced. At the same time, these systems are totally compatible with existing applications.

Using the most advanced electronic thermal and packaging concepts, the QUIQ system permits any one of thousands of custom configurations to be arranged with unprecedented simplicity.

The standardized design and manufacture process contribute to enhanced reliability and cost effectiveness of volume-based manufacturing.

- Custom systems without development time or cost; up to 12 outputs in a single supply package 5″ x 7″ x 11.5″
- Permits operation of converter modules in satellite mode (remote module)
- High frequency power magnetics, including state-of-the-art planar windings, for maximum repeatability
- Troubleshooting or retrofit greatly simplified because of simple removal/ replacement of independent modular elements
- Master clock circuit in power entry module synchronizes all units, provides surge limiting control signals, generates voltage for long-life, low voltage fan and provides an external sync signal
- Predictable operating temperatures for all power semiconductor junctions
- The reliability of a standardized, fixed-frequency, forward converter, current mode design regardless of the custom configuration
- High efficiency: Minimum of 80% regardless of output voltage levels

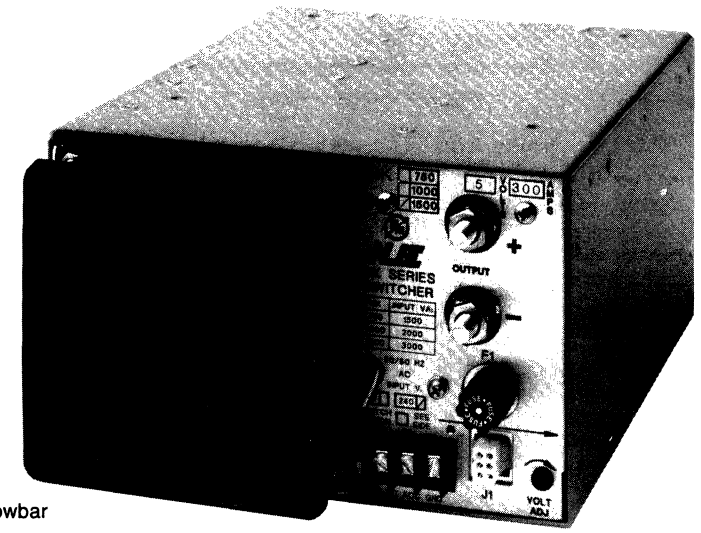
NJE

POWER SUPPLIES

SWITCHERS

5-YEAR WARRANTY!



SPECIFICATIONS

Input
Single-phase standard, 3-phase optional.
MK750 and MK1000 units
120 VAC (+10% -25%), 47-63 Hz standard.
240 VAC (+10% -25%), 47-63 Hz optional.
120/240 VAC Switch Option available.
MK1500 units
240 VAC (+10% -25%), 47-63 Hz standard.
120 VAC optional.

Efficiency
Up to 85% depending upon model.

Protection
Voltage: Overvoltage shutdown standard, crowbar overvoltage optional.
Current: Automatic current limit/foldback.
Thermal: Automatic shutdown when internal heat sink temperature exceeds safe limit. Automatic restarting when temperature returns to normal.
Reverse Voltage: Supply is protected from damage due to reverse polarity voltage across DC output terminals.

Cooling
Integral fan provides forced air cooling.

Operating Temperature
0° TO 71°C ambient; full output to 50°C.
Derate 2% per °C to 71°C.

Mechanical
5 x 8 x 11″

Convenience Functions
Inhibit/Remote Shutdown
Margin Check
Power fail/output good signal

Agency Approvals
U.L. Recognized
C.S.A. Certified
TUV Approved (Specify MKA)

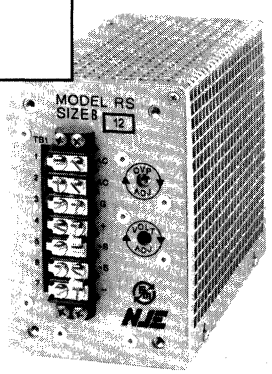
NJE POWER SUPPLIES

LINEARS



For Low-Noise And High Reliability

Our RS Series is designed for extremely high reliability in applications where an open-frame design is not desirable. These fully enclosed linear power supplies feature a 5-year warranty and are available in many 'industry-standard' models. Output ranges from 2 to 500 volts, up to 175 amps.

OPTIONS

- Special Input Voltage
- Series Start
- Thermostat
- Load-Sharing Redundancy

MANY RACK OPTIONS

- Standard 16″ And 21″ Trays
- Sequential Starting
- Custom Front Panels & Assemblies
- Meters
- Chassis Slides
- Special Finishes
- Plus Others . . .

SPECIFICATIONS

Input:
Voltage: 105-132V rms
Protection: fuse

Output
Line Regulations: 0.01% + 1 mv
Load Regulation: 0.01% + 1 mv
Ripple & Noise: 1.0 mv rms; 3 mv, Pk-Pk
Transient Response: 50 microseconds to 0.1%
Stability: (long-term drift/24-hr. period): 0.1%
Overshoot (on or off): None

Protection
Current (fold-back adjustment): 75% – 125%
Voltage: Internal crowbar standard 5-volt models, optional on all other

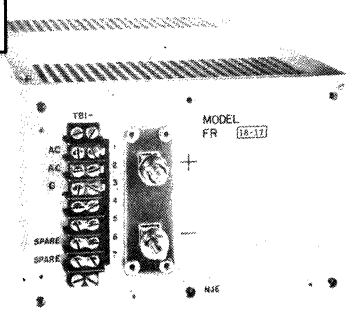
Remote Programming
Resistance: 500 ohms/volt
Voltage: 1 volt per volt

Remote Sensing: Provided

Temperature Range:
Operating: – 20°C to + 71°C
Storage: -55°C to + 85°C

FERRORESONANT

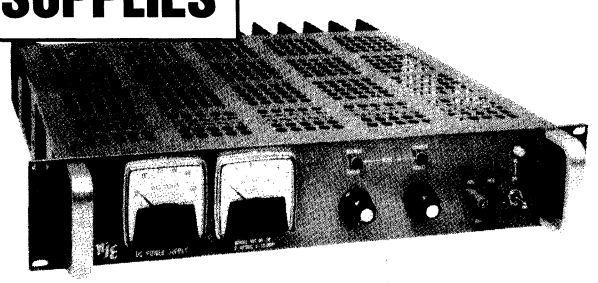
The FR Series of ferroresonant power supplies provide the ultimate in reliability. They are available in standard case sizes with efficiency ratings of up to 90%.



For Ultimate Reliability

- 8.5 - 50 Volts, Up To 100 Amps
- Many Standard And Custom Models Available Which Provide Up to 2500 Watts
- Inherent Overload Plus Over-Voltage Protection
- Inherent Input & Surge Suppressing
- Both 50 And 60 Hz Operation
- More Efficient Than Switchers

LAB SUPPLIES



The SVC series for general purpose laboratory and test equipment use. All supplies have excellent regulation in both the constant voltage and constant current modes. All supplies are equipped with front panel meters for voltage and current monitoring.

FIVE YEAR WARRANTY

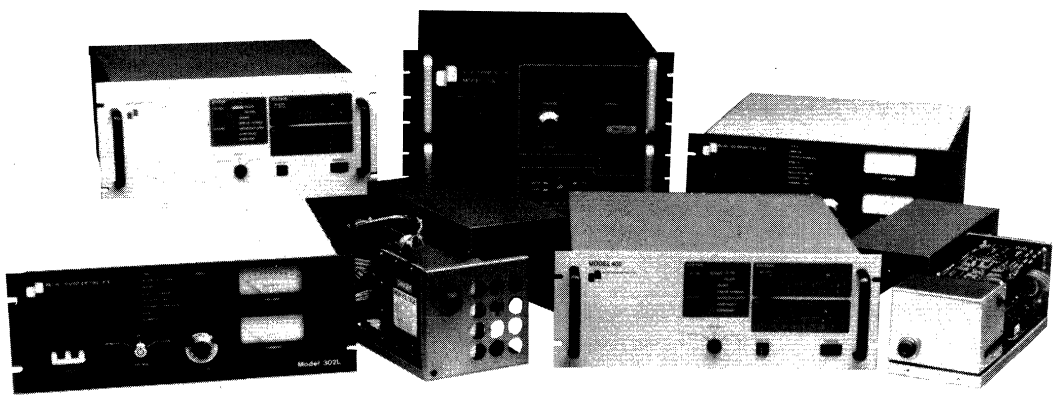
150 Homer Avenue, Ashland, MA 01721 (508) 881-5252 • FAX (617) 235-6588

A.L.E. is a leader in the design and manufacture of advanced switchmode power conversion systems for high power, high voltage applications. Our broad experience solving complex high voltage problems for the OEM and laboratory environments include power supplies for dye, excimer, TEA, vapor, Yag, CO_2, lasers and other pulsed power applications world wide.

Capacitor Charging Supplies: The A.L.E. Series of high voltage capacitor charging supplies is available with power outputs of 500 to 15,000 Joules per second. All units are available with full scale voltages to 50kV. Most models are available in both fully instrumented and OEM versions. All types are highly resistant to external electromagnetic interference.



Supplies for CO_2 Lasers: A.L.E.'s patented converter topology produces a controlled high voltage current source for operating CW CO_2 lasers. Available with output powers of 250W and 500W and operating voltages of 4.5kV to 24kV, these units allow ballastless operation of negative impedance discharges. A.L.E.'s CO_2 supplies provide strike potentials up to 40kV and can be operated in parallel for greater output.

High Voltage D.C. Supplies: A.L.E. also has the capability of producing high power D.C. supplies on a custom basis. Providing outputs of 2kW to 30kW and voltages to 80kV, A.L.E.'s converter capabilities encompass a broad range. Our proprietary high voltage conversion stages use a minimal number of multiplication stages resulting in very low levels of stored energy.

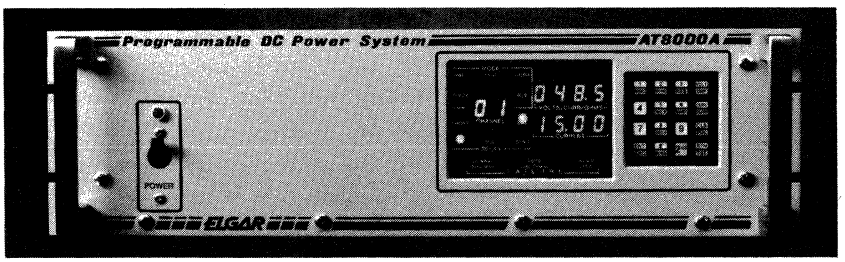
Programmable DC Power Systems

AT8000A Programmable DC Power System



- 16 channels, up to 19,200W at a single bus address
- 6 channels, up to 1200W, in a single 5.25" drawer
- Parallel programming
- Sub-modular construction
- Programmer, keyboard/display
- Confidence test on command
- Fault isolation to replaceable module level
- Qualifiable to MATE guidelines
- Programmable shut-down sequence

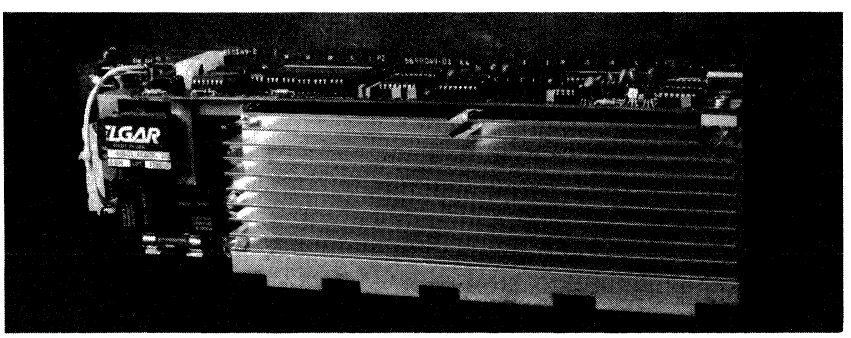
Elgar's AT8000A Programmable DC Power System holds from 1 to 6 totally independent channels of DC power in a 5.25" rack-mount chassis. By using expansion chassis, it can be expanded to 16 output channels controlled by an internal master programmer, either from the front-panel keyboard or remotely via IEEE-488 GPIB using one selectable bus address. It integrates programmer, power and load modules, built-in test equipment and all signal/load interfaces into the most compact and powerful package available.
Using 200W modules, a single-chassis system can deliver up to 1,200W. Adding additional modules and chassis can raise total power to 19,200W at a single bus address. Programmable paralleling can provide any combination of 200W increments up to 1,200W per channel.

Front-panel Keyboard/Display includes a 16 pad, multilevel keyboard with increment/decrement keys plus an LED display to speed and simplify programming. The system can show programmed values or, with the built-in test option, actual measured values, as well as channel number, voltage and current. It allows complete local/ manual control of most functions, alerts the operator to identified system malfunctions and prompts the operator for ease of programming and operation.

Internal Programmer can employ either user-friendly ABLE (Atlas Based Language Extension) or optional CIIL (Control Interface Intermediate Language) for complete voltage, current and general system control.

DC Power Modules employ a high efficiency linear design for fast response and low noise. Eight standard output voltage ranges are available: 0 to 7, 10, 20, 32, 40, 80, 160 and 320 VDC — and the design makes modification to accommodate special voltage application requirements quick and easy. Outputs are completely isolated and all operate in programmable voltage or constant current mode. There's over current sensing and over voltage protection with SCR crowbar shutdown. Load isolation (confidence) relays are standard and polarity switching relays are optional.

NEW Electronic DC Load Modules



Elgar's versatile new 300W Electronic DC Load Modules can be installed in the AT8000A Programmable DC Power Systems to simulate all real-world characteristics for testing, evaluation and burn-in of DC power supplies, batteries, capacitors and other power components.
The DC load modes of operation are: constant current, constant voltage, constant resistance, short circuit, and transient operations.
Programmable slew rates automatically duplicate the dynamic behavior of real-world load conditions, while analog modulation with external input accurately duplicates complex load waveforms. Remote sensing capabilities increase flexibility while maximizing programming and readback accuracy.

Auxiliary Drive Module (ADM)

Elgar's Auxiliary Drive Module (ADM) is a digital-to-analog converter which adds two versatile functions to AT8000A Systems. It can act as:

- Two programmable analog signals to drive external AC or DC power sources or other electronic equipment.
- A programmable connect/disconnect relay driver for controlling an external power relay.

With an ADM, a non-Elgar external bulk supply can take on the same personality as an AT8000A DC module — extending the AT8000A's normal power-per-module from 200W. ADM's occupy a single AT8000A slot and are addressed as a single channel from the front panel keyboard or over the IEEE-488 bus. The ADM has 2 separate isolated outputs (one each for programming voltage and current) plus two programmable relays which can serve as contact closures to activate external high-power disconnect/isolation relays or serve as status indicators. Optional Built-In Test (BIT) for readback of voltage and current measurement of the external device is also available.

60LO1
Maximum power 300W continuous
Voltage range 3-60V
Current ranges 0-6A, 0-60A
Resistance range 0.1-100 ohm
Modes of operation Constant current, constant voltage, constant resistance, short circuit and transient operations

120LO1
Maximum power 300W continuous
Voltage range 3-120V
Current ranges 0-3A, 0-30A
Resistance range 0.1-1.0K ohm
Modes of operation Constant current, constant voltage, constant resistance, short circuit and transient operations

ELGAR

Programmable DC Power Systems

AT4000 Programmable DC Power System

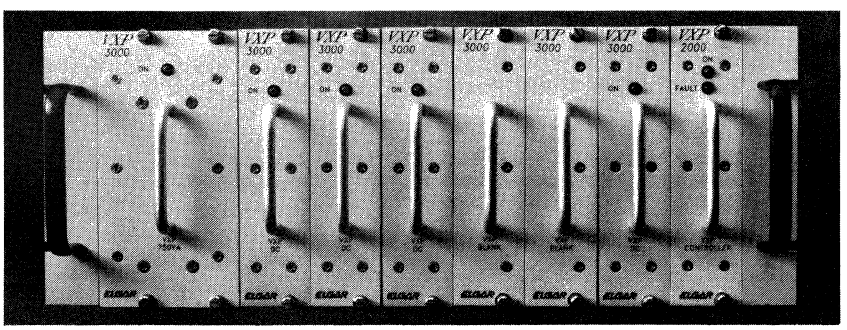
Elgar's AT4000 Programmable DC Power System is a half-rack version of the AT8000A. It holds from 1 to 3 "instrument-on-a-card" DC power supplies in a 7" chassis. Each chassis can provide up to three 150W channels — for a maximum of 450W per chassis. As in the 6-channel AT8000A, it is controlled from either the front-panel keyboard or remotely via the IEEE-488 BUS using one selectable bus address.

SPECIFICATIONS:
Configuration 1 to 3 output channels per 7" high, half rack chassis
Full rated output power Up to 150W per channel
Other specifications See AT8000A section

The AT4000 integrates programmer, power modules, built-in test equipment and all interfaces into a compact, powerful package. Software can be developed in the laboratory with the AT4000 and then be transferred to AT8000A production systems with no modifications.

By adding virtually the same powerful capabilities offered by the AT8000A at a reduced size, the AT4000 can support requirements for smaller manual bench-top DC power supplies, programmable bench-top power sources, ATE production test systems and verification test systems.

VXP3000 Programmable Power System



Elgar's VXP3000 Programmable Power System is the state-of-the-art solution for test systems where high power density, small size and flexibility are the key priorities.

The unique chassis design employs 1.8 inch wide slots which accept one controller module and up to eight power modules or three 750VA AC modules. The ability to provide both AC and DC power in one chassis and at one GPIB address is further enhanced by an Auxiliary Drive Module (ADM). This module allows the VXP controller to program external bulk or high power DC power supplies as if they were standard VXP power modules.

CONTROLLERS
IEEE-488 controller With ABLE or CIIL (MATE) syntax
Slave controller for use with expansion chassis or as an interface to a VXP1000 power programmer located in a VXI chassis

DC POWER MODULES
Output voltage range 0-7, 10, 14, 20, 32, 40, 60, 100 and 200 VDC; 1.8" standard width (up to 8 modules per chassis)
Full rated output power 200W for 10, 14, 20, 32, 40, 60, 100 and 200 VDC modules; 140W for 7 VDC module; 1.5 KW, 4-wide module available at 100 VDC
Parallelable For load sharing (available for 140W and 200W modules)
Series connectable Up to 400 VDC

AC POWER MODULES
Full rated output power 750 VA
Output voltage range 0-135 VAC, 3.6" double-wide size
Frequency range 350-999.9 Hz (45-350 Hz with reduced specifications)
Configurable For up to 2250 VAC single-phase or up to 6750 VA three-phase
Parallelable For higher power requirements by using the special plug-in VXP-LSM module
Auxiliary output A 0-26 VAC/2A output proportional to the main output voltages provided. An optional 5 VAC/5A auxiliary output is available.
Fast current limit protection Against short circuits
Efficiency Over 80%

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

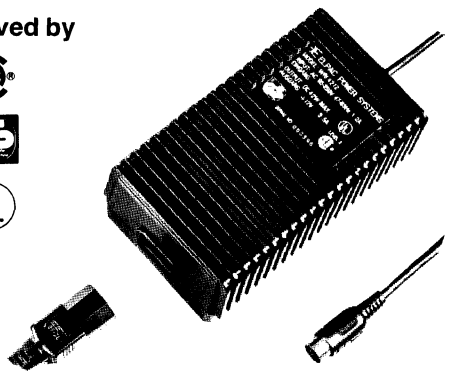
EXTERNAL POWER SUPPLIES

Approved by



WIDE RANGE INPUT SERIES SWITCHING POWER SUPPLY

PLUG THEM IN ANYWHERE IN THE WORLD!
APPROVED BY ALL MAJOR REGULATORY AGENCIES.

Designed to operate from any standard voltage source worldwide, qualifiable to Level B noise emission standards (FCC 20780 Level B: VDE 0871, Level B) making the entire Series available for residential and consumer applications. Features 90-250VAC, 47-440 Hz or 110-350 VDC; internationally approved IEC input connector; 13 standard tabletop models; Single, dual or triple outputs; optional output cables/connectors; warranty one year. Customs available. Contact Sales for Details.

Approved By

WM SERIES REGULATED WALLMOUNTS

Single and multiple output; 2.5 watts to 15 watts, UL 1310 Listed, CSA approved. Input voltage: 115 VAC, 60 Hz; Output ripple: 20 millivolts (p-p); operating temperature 0 to 40 degrees C; standard 5 pin DIN connector; combined regulation ±5%; fusing: internal, non-replaceable; thermal current limited; dielectric voltage: 1500 VAC, RMS.

MODEL	OUTPUTS 1	2	3	CONNECTOR TYPE

Approved for Common Market

CMI SERIES LINEAR POWER SUPPLIES PENETRATE THE EUROPEAN MARKET QUICKLY

Designed to help U.S. and Canadian companies penetrate the European market without the usual regulatory agency approval delays. All five models are TUV approved and accept input voltages ranging from 200-250 VAC, 50 Mz - typical voltages throughout continental Europe, the United Kingdom and Australia.

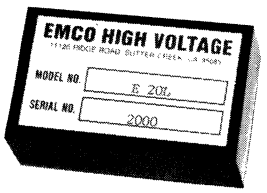
PROPORTIONAL PC MODULES

100 to 10,000 VDC UP TO 3 Watts

E Series



ELECTRICAL SPECIFICATIONS

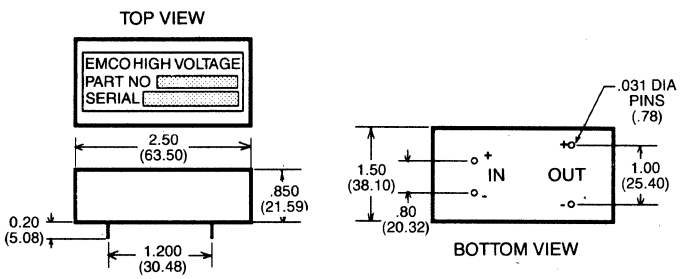
- Input/Output Floating
- 3,500 Volts Isolation*9
- Operating Temp −10 to +60 C
- Efficiency >60% Typ.
- Output 3 WATTS Min.

PHYSICAL SPECIFICATIONS

- Size: 2.5″ × 1.5″ × 0.85″
- Weight: 3 Ounces
- Fully Epoxy Encapsulated
- Four Pin P.C. Mounting
- Black Glass/Epoxy Case

FEATURES

- EFFICIENT DC TO DC CONVERSION
- EASY P.C. BOARD MOUNTING
- INPUT/OUTPUT PROPORTIONAL
- LOW COST, COMPACT MODULE
- INAUDIBLE >25 KHz CONVERTER
- VERY LOW RIPPLE AND NOISE
- RFI FILTERED, 3 INPUT SECTIONS
- EXCEPTIONAL RELIABILITY



Dimensional Tolerances: Inches .XX ± .03
Metric equivalents in parenthesis: (.XX ± .75)

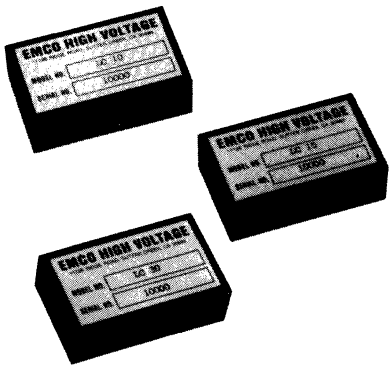
LOW NOISE PC MODULES

60 to 2,000 VDC @ 1.5 Watts

L Series



FEATURES

- FOUR PIN-OUT OPTIONS or
- FLYING LEAD OPTION
- EXCEPTIONAL RELIABILITY
- VERY LOW RIPPLE AND NOISE
- R.F.I. FILTERING/SHIELDING
- FLOATING OPTION VOLTAGE
- LOW COST/HIGH PERFORMANCE
- SMALL COMPACT MODULE
- ONE YEAR LIMITED WARRANTY

PHYSICAL CHARACTERISTICS

Size: 2.5 x 1.5 x .85 inches
Weight: 3 Ounces (87 grams) Appx.
Packaging: Fully Encapsulated
Case Material: Black Glass/Epoxy
Potting Compound: Hard Polyurethane
Pins: 0.030 Diameter, 0.20 Minimum Length
Wires: #22 AWG Stranded

HE-NE LASER POWER SUPPLIES

DESCRIPTION

Today's demand for a quality end product can only be achieved by incorporating quality components and sub assemblies. This line of Helium Neon Laser Power Supplies boasts a True Efficiency of at least 85%. Improved efficiency produces a Cool Running Power Supply, which in turn, not only ensures increased reliability; but also allows Your product to perform at it's best, and Keep performing.
With over 20 years of High Voltage Power Supply Design and Manufacture experience in a World Wide O.E.M. market, our expertise allows us to produce the most efficient, reliable He-Ne Power Supply available. Numerous electrical and mechanical configurations are offered; custom modifications are readily accommodated.

PRECISION PHOTOMULTIPLIER SUPPLY

1,000, 1,500 and 2,000 VDC @ 10 WATTS

PD Series

FEATURES

- EXCELLENT REGULATION
- LOW RIPPLE AND NOISE
- SHORT CIRCUIT PROOF AND ARC PROOF
- LOW TEMPERATURE COEFFICIENT
- EXTENSIVE INPUT FILTERING
- LOCAL/ REMOTE PROGRAMMING

PHYSICAL CHARACTERISTICS

Size: 4.1" x 5.1" x 1.5" (W x L x H)
Weight: 1.5 lbs. (approx.)
Case Material: Aluminum
Finish: Black Anodize
Input Connector: Molex 09-75-2074
Mating Connector: Molex 09-50-3071
Output Connection: Flying Lead, Shielding RG59A/U
Mounting: Four #6-32 Inserts
Packaging: Fully RTV Rubber Encapsulated

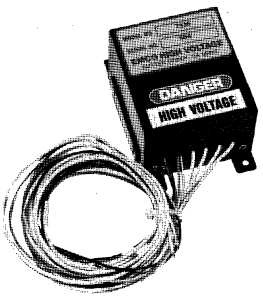
MULTIPLE OUTPUT CRT WITH FLOATING FILAMENT

3,250 VDC (+/-)

733 Series



DESCRIPTION

The Model 733 CRT High Voltage Power Supply is unique in its miniature package, offering multiple outputs, including a floating filament voltage supply. This package can be made available with alternate output voltages, in addition to those described here. The high voltage outputs are separate; +3,250 VDC @ 20 µA, and a –3250 VDC @ 200µA. Three auxiliary outputs are provided, one at –160 VDC @ 140 µA (Ref to the –3250 VDC), a +250 VDC @ 15 mA, and the Floating Filament of +6.3 VRMS @ 120 mA (With Respect to the –3250 VDC). Output Regulation and Ripple are rated at 1%. Input voltage is +14 to +16 VDC @ 560mA.

PHYSICAL CHARACTERISTICS

Size: 3.5" x 2.5" x 1.62" (L x W x H)
Weight: 12 Ozs.
Case Material: Aluminum
Finish: Black Anodize
Input Connections: Flying Leads
Output Connections: Flying Leads
Packaging: Fully RTV Encapsulated
Mounting: Thru Holes for #4 screws (4)

9,000 VDC

E09 Series

DESCRIPTION

The Model E09 is a High Voltage module, with one auxiliary output. This module is packaged in a compact P.C. mount configuration. Specified input voltage range is +9.5 to + 15VDC, with a high Voltage Output of +9,000 VDC @ 25µA (±500 volts). Oaximum at Full Load. The auxiliary output voltage is –1,000 VDC @ 120µA, with Output Regulation of <1%. Alternative voltages are readily available.

PHYSICAL CHARACTERISTICS

Size: 4.00" x 2.00" x .90" (Lx W x H)
Weight: 8 Ozs.
Case Material: Steel
Finish: Blue Texture Paint
Input Connections: P.C. Pins
Output Connections: H.V. -#22 AWG 30 KV Silicone Rubber Lead
Auxiliary: P.C. Pin
Packaging: Fully RTV Encapsulated
Mounting: P.C. Pins (4) .031 Dia.

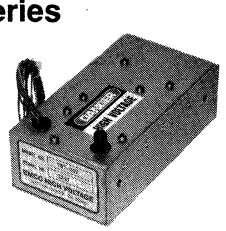
CUSTOM HIGH VOLTAGE SUPPLIES CRT/PMT/LASER, ETC.

For more than two decades, EMCO High Voltage Co. has designed and manufactured High Voltage Power Supplies for such applications as *HE-NE Lasers, C.R.T.'s, Photomultipliers,* and *Capacitor Charging Equipment.*

Specifically, we emphasize Precision, Low Power (up to 50 watts), High Voltage applications. Our product line ranges from lower voltage, low current photodetector bias supplies through medium voltage photomultiplier products, to C.R.T. power supplies with multiple outputs and floating filament voltages. We also manufacture High Reliability, wide temperature (–55 to +85 C) Airborne/Shipboard C.R.T. supplies.

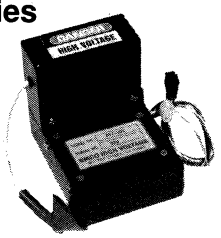
Custom requirements and modifications to existing standard products are welcome. EMCO's extensive design inventory and use of CAD/CAM design and manufacture, allows for prompt and cost competitive quotations; as well as timely and reliable prototype capabilities. Please feel free to contact your Representative, or the factory direct to discuss your custom requirements.

767 Series



Input Voltage: +10 to +30 VDC
High Voltage Output: +10,000 VDC @ 100uA
Output No. 2: +5 VDC @ 1 Amp
Output No. 3: +500 to +900 VDC, Adjustable
Output No. 4: -100 VDC
Output No. 5: -100 to 300 VDC, Adjustable
Output No. 6: +6.3 VAC RMS ±5% @ 500 mA
Op. Temp..: -55 C to +70C
Alt.: 70,000 Ft
Shock, Vibration, Humidity, EMI: DO160 Compliable

762 Series



Input Voltage: +28 VDC
High Voltage Output: +14,000 VDC @ 500 UA
Output No. 2: +3,000 VDC @ 50uA
Output No. 3: +1,000 VDC @ 50uA
Output No. 4: +85 VDC @ 35 uA

LP Series

Input Voltage: +10 to +14 VDC
Output Voltage: 1,000 to 3,000 VDC
Output Current: 3 mA to 8 mA
Striking Voltage: +10,000 VDC
Efficiency: >75%

777 Series

Input Voltage: +26 @ 400 mA
High Voltage Output: +12,000 VDC ±2% @ 400 uA
Output No. 2: +800 VDC @ 1 mA
Output No. 3: -116 VDC @ 1 mA

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

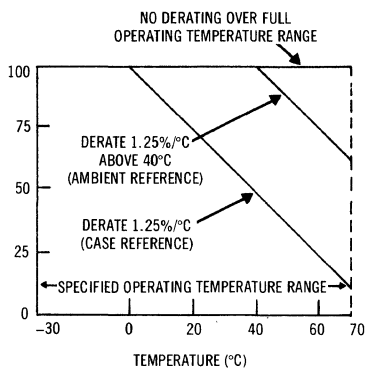

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

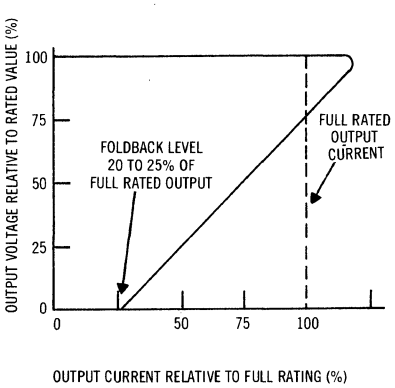

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

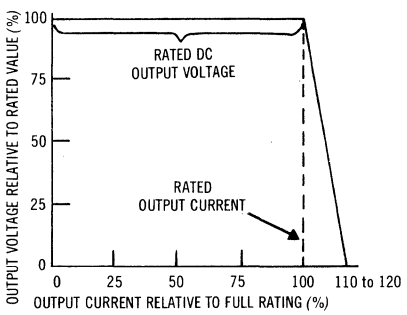

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

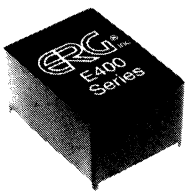
Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

DC-DC Converters

for power on the P.C. board up to 25W

Ideal for any end-use where up to 25W is needed from battery or other low-voltage source. No reason to design "special" multiple output power supplies for your unique application! Mount up to 4.2W per cu. in. on your P.C. board. Operating efficiencies to 85%. For as little as $1/W! We'll **transform** the way you look at DC-DC conversion!



Step-Down Regulated DC-DC Converters

ERG P/N	Input VDC
E424-050B50 (E337)	16-32 VDC
E412-050B50 (E339)	9-16 VDC
E405-120A20 (E399)	4-6 VDC

Output Voltage: 5.00 VDC +/− 3%
12.00 VDC +/− 3% (E399)
Includes Line & Load Regulation & Set Point

Output Current: 0 - 500 MADC

Operating Temperature: 0 - 70°C

Efficiency: 80% (Typical)

Size: 1" × 1.35" × .7" high

Other Input/Output Combinations Available!

Match our converter to your power need!

Your Power Requirements	ERG Converter Series	Options	Input	Output	Size	Weight	Package
Up to 3W	E700	Single, center tap (± voltages) Unregulated, regulated (single output only)	5,9,12,15 V DC standard	5-500 V DC (your choice)	unregulated: 1.1" (27.94 mm) × 1.2" (30.48 mm) × .91" (23.11 mm) high regulated: 1.43" (36.32 mm) × 1.50" (38.10 mm) × 1.03" (26.16 mm) high	30 gms. unregulated 40 gms. regulated	Plastic
	E500*	Single, center tap (± voltages)	5,9,12,15 V DC standard	5-500 V DC (your choice)	1.00" (25.40 mm) × 1.38" (35.05 mm) × 0.70" (17.78 mm) high	20 gms.	Plastic
Up to 6W	E1600	Center tap (± voltages) available	5,9,12,15 V DC standard	5-500 V DC (your choice)	1.30" (33.02 mm) × 1.88" (47.75 mm) × .82" (20.83 mm) high	44 gms.	Plastic
Up to 12W	E900	Dual output	5,12,15 V DC standard	5-500 V DC (your choice)	2" (50.80 mm) × 2.5" (63.50 mm) × .98" (24.9 mm) high	122 gms.	Aluminum
Up to 25W	E1200	Single output only	12,15 V DC standard (others available)	5-500 V DC (your choice)	2" (50.80 mm) × 2.5" (63.50 mm) × 1.19" (30.23 mm)	185 gms.	Aluminum

*For high-volume requirements, E500 delivers same performance as E700 at significantly lower unit cost!
Mounting: P.C. board standard
Encapsulation: All ERG converters are fully encapsulated
Isolation (in/out): 600V RMS (60 Hz. breakdown for 1 min.) standard
Temperature: 0–70° C. standard. Wider ranges available. 85° C. case max. 25° C. temp. rise typical for E1200
All specifications subject to change without notice.

ERG Smart Force™ DC-AC Inverters compensate for the aging characteristics (brightness loss over time) of electroluminescent (EL) phosphors to improve EL lamp useful life. Smart Force™ Inverters automatically adjust operting voltage and frequency as the impedence of the EL lamp changes. Thus, providing an almost constant brightness throughout the life of the lamp. (See Typical Relative Brightness VS Time Performance Curve below.)

TAILORED INVERTERS:

Because all EL lamps are not electrically the same, ERG offers a Dedicated Series for different EL lamp brands. As a result of working jointly with the various manufacturers of EL to define each lamp brand's characteristics, ERG can offer the best matched inverter for ANY MANUFACTURERS EL LAMP!

Each DEDICATED inverter series is tailored specifically to the required voltages, frequency and load characteristics of the specific area of selected manufacturers EL lamp. Each Series offers four different output voltage configurations (providing different brightness levels), 3 different package sizes with a wide range of input voltages available providing maximum flexibility!

DEDICATED SERIES INVERTERS CONSIST OF:

JLA Series ... Imported EL Backlit Displays
LPS Series ... Loctite Luminescent Systems, EL Products

SMART FORCE™ DC-AC INVERTER SPECIFICALLY DESIGNED FOR IMPORTED LCD BACKLIGHTS!

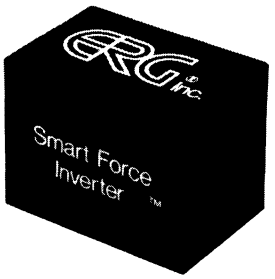
Endicott Research Group's JLA Series Smart Force™ DC-AC Inverter is tailored specifically to match the power requirements of EL backlites which are incorporated into imported LCD display modules. Designed to match the load characteristics of these imported EL lamps, the JLA series provides maximum performance and increased useful life.

The JLA Series Inverters offer the exclusive ERG Smart Force™ feature, which automatically adjust the operating voltage and frequency as the impedence of the EL lamp varies overtime. The low power consumption (typically less than 200 milliwatts per unit load, Brightness Code 2) allows the electroluminescent lamp to become an ideal light source in many battery operated devices.

JLA Series inverters are ideal for powering EL backlit modules from Densitron, Hitachi, Epson, NEC, Optrex, Satori, Seiko, Sharp, Toshiba and others...It is available in 4 different output voltage configurations and in 3 different package sizes (depending on output) for maximum, design flexibility.

SMART FORCE™ INVERTERS

FOR ELECTROLUMINESCENT LAMPS



GENERAL SPECIFICATIONS:

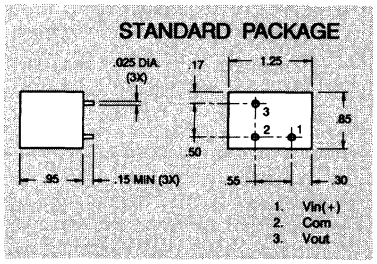
Input: 3, 5, 6, 9, 12, 15, 18, 24, 28 VDC (your choice)
Output: 60-130 V RMS @ 400-700 Hz. nom.
Package: Nylon, epoxy filled
Mounting: PCB Mount standard
Temperature Range:
Operating: -25° C to + 85°C
Storage: -40° C to + 100°C

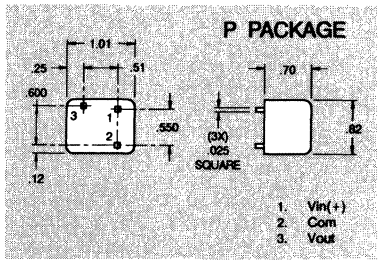
STANDARD PACKAGE

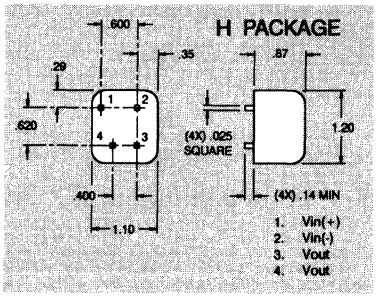
MINIATURIZED "P" PACKAGE

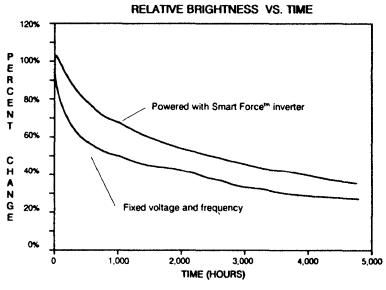
"H" PACKAGE SERIES IDEAL FOR LARGER EL LAMPS

SUPER "H" FOR HIGH EFFICIENCY APPLICATIONS









NO MATTER WHOSE EL LAMP...ERG HAS THE RIGHT INVERTER!!!

NO OTHER COMPANY IN THE WORLD OFFERS A WIDER RANGE OF DC-AC INVERTERS FOR EL LAMP APPLICATIONS!

AND NO OTHER COMPANY OFFERS THE SMART FORCE™ FEATURE!

REGULATED & SEMI-REGULATED POWER SUPPLIES

Ruggedly-constructed, low voltage D.C. power supplies for use in design, development, testing of transistor circuitry . . . for servicing and operating auto, aircraft, marinecraft radio, electronic equipment . . . for production line testing, industrial and educational laboratory work and many other applications.

Precision made and engineered to give unequalled performance life per dollar. Features include: Voltage regulation, AC ripple filtering, adjustable output voltage, large easy-to-read meters, isolated output terminals, 1-year warranty.

INPUT—*Regulated Models:* 105-125 V. AC. 60 Hz *Industrial and General Purpose Models:* 117 V. AC 60 Hz. Models available to fit W.E. and EIA racks. Custom-design or modification of standard units to your specs.

INVERTER — Transistorized. Converts 12 V. DC to 117 V. AC, 60 Hz to operate equipment from car, truck or boat battery, or other 12 V. DC source for camping, traveling, boating. Reverse polarity and short circuit protection.

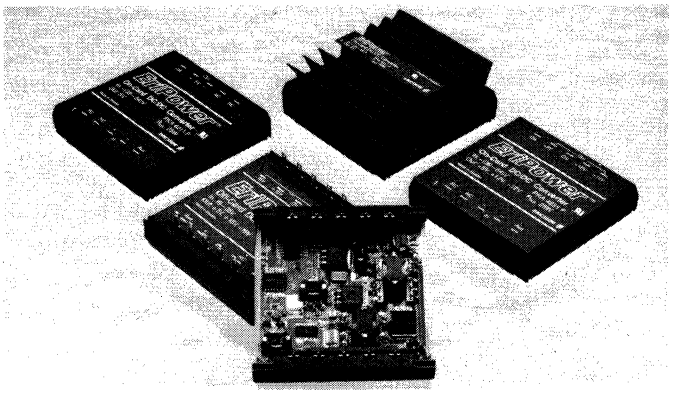
ERICSSON EriPower™

THE RELIABLE SOURCE

DC/DC Converters 25 - 40W

PKA Series

- **-45°C to +85°C ambient temperature range, no derating**
- **+115°C max. case temperature**
- **MTBF>2,000,000 hours at +45°C per MIL -HDBK 217E**
- **Efficiency 80-85%**
- **500VDC isolated or non-isolated models**
- **Complete, no extra filters or heatsinks required**
- **Parallelable for redundancy and power upgrading**
- **Compact, 3" x 3" x 0.7"**



Compact On-Card and Off-Card mountable power modules in hybrid technology

The PKA-series of DC/DC converters consists of 40 models, available in non-isolated or 500VDC input/output isolated versions. The single, dual and triple output converters with input ratings of 19-35VDC or 39-64VDC and with an output power of 25-40W, are recognized as the industry standard for miniaturized On-Card converters. The ambient temperature range is -45°C to +85°C without derating. Low profile 40W models with an additional height of only 2 mm (compared to the 25-30W models) have a temperature range of -45°C to +65°C. Using thickfilm hybrid technology, very efficient thermal management combined with a 300kHz switching frequency has made it possible to achieve a verified MTBF of >200 years. Two transistor topologies based upon proprietary drive and control circuits have facilitated the use of only highly reliable ceramic capacitors instead of electrolytics (one of the keys to the MTBF-figures). The reliability makes them ideal in Telecom, Datacom and Medical applications. Their low weight and height in addition to their electrical and mechanical ruggedness offer possibilities for use as distributed power sources directly on PCB:s (On-Card) or Chassis (Off-Card) mounted in Industrial, Airborne and other demanding applications. Special design care has been taken regarding the mechanical performance. Consequently, the vibration, shock and bump specifications normally associated with components such as resistors and capacitors. Output characteristics together with accurate laser trimming of output voltages in the highly automated production line makes it possible to parallel the PKA:s in great numbers.

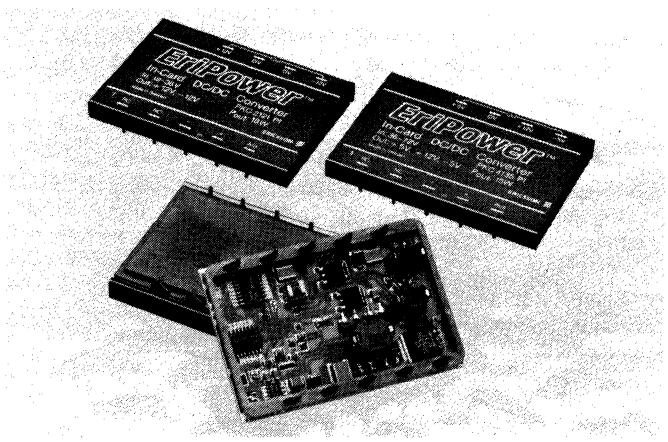
THE RELIABLE SOURCE

DC/DC Converters 15 - 18W

PKC Series

- **-45°C to +85°C ambient temperature range, no derating**
- **+115°C max. case temperature.**
- **MTBF>2,000,000 hours at +45 C per MIL -HDBK 217E**
- **Efficiency 80-87%**
- **500VDC isolation**
- **Complete, no extra filters or heatsinks required**
- **Parallelable for redundancy and power upgrading**
- **All outputs well regulated**
- **Compact, 2.17" x 3.15" x 0.42"**
- **Low profile 0.33" (In-Card mounting)**



500VDC isolated compact On-Card and In-Card mountable power modules in hybrid technology

The PKC-series of DC/DC converters consists of 14 models with input ratings of 19-35VDC or 36-72VDC and with an output power of 15-18W. They are specifically designed for distributed power supply requirements and their outputs can easily be parallelled for power upgrading or redundancy. The ambient temperature range is -45°C to +85°C without derating. The converters can either be mounted as On-Card with a maximum height over the PCB of 10.7 mm/0.42" or as In-Card, i.e. into a punched hole in the PCB, with a height over the board of 8.5 mm/0.33" thus allowing 3TE/0.6" board spacing in a rack. The PKC-series converters has up to three well regulated outputs which will stay within 3% of their nominal voltage for all specified load, line and temperature ranges.

The PKC-series of DC/DC converters does normally not require external components even when used in sensitive applications. Conducted RFI is within the VDE 0871 curve A and FCC 20780 class A. The mechanical design conforms to the IEC 68-2 specifications, normally appliable to discrete components such as resistors and capacitors.

Surface mount hybrid technology provides excellent thermal management and with the 300kHz switching frequency it has been possible to use ceramic capacitors only within the design thus achieving an MTBF>200 years. Together with the low weight (50g/1.76ozs.) this makes them ideal for Telecom, Datacom, Airborne, Industrial and Medical applications.

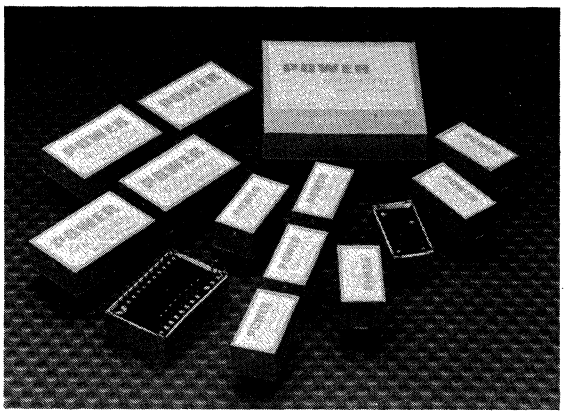
ERICSSON POWER industries

DC/DC Converters 0.3 - 6W



- **MTBF > 200,000 hours at 30°C according to MIL-HDBK 217 D (4 PIR and 7 PIR 150,000 hours)**
- **Isolation voltage 500 VDC (33 PR has 2,500 VDC)**
- **Isolation resistance > 10 Mohm at 50 VDC**
- **High power density and low heat dissipation**
- **Single and dual output: 5,9,12,15, ± 15 and ± 18V**
- **Output voltage accuracy ± 5%, ± 2% on request (8 PIR has ± 1%)**
- **Permanent short circuit protection**
- **Input filter standard on all units**
- **RFI shielding standard on 4 PI, 7 PI, 8 PI and 33 PR, optional on 2 PI**
- **Operating temperature: -25° to +70°C**
- **Storage temperature: -50°C to +125°C**
- **All DIL 24 compatible units are available in 12 pins type X package**

Power Industries is a new series of 0.3 to 6W hybridized DC/DC converters, which offers single and dual 5, 9, 12 and 15V outputs from 5, 12, 24 and 48V inputs. The program includes both non-regulated and regulated converters plus special LAN versions. All for professional applications in telecom and industrial.
A high switching frequency 80-120 kHz together with an efficient temperature management gives power densities higher than conventional circuit designs in the same standard housings. Short circuit protection is utilized with a fold-back characteristic, to minimize power dissipation.
The case material is self extinguishing and the potting is approved for aeronautical applications. The units are tested under +40°C and +95% RH during 56 days.

Regulated DC/DC converters PR,PPR,PIR

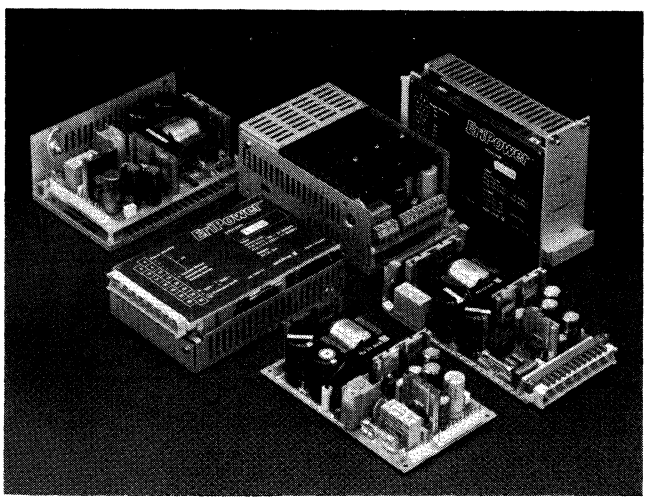
ERICSSON EriPower™

THE RELIABLE SOURCE

AC/DC Switching Power Supplies 60 - 100W

- **MTBF>300,000h at +35°C.**
- **Efficiency 78-87%**
- **Ambient temperature -10 to + 70°C.**
- **Open frame and Eurocard versions available.**
- **Input 115/230 VAC**
- **Interference suppression to VDE 0871B, FCC 15-JB**
- **VDE, UL, CSA approved.**
- **Agency approvals**
- **Designed to safety standards:**
  IEC 380, 435, 950
  VDE 0805, 0806
  UL 478, 1012
  CSA 22.2, No 143, 154, 220
  BS 6301
- **Protection against:** **Overload**
  Short circuit
  Overvoltage
- **Power fail signal**

3267



Rack mounting PLB 11

The PLB-series of EriPower™ Switching Power Supplies, constitute highly reliable MOSFET-switchers suitable for a wide range of professional OEM applications. The series conform to world safety standards stated by IEC, VDE, UL, CSA and BS. The series accomodate RFI-filters and conform to the regulations set by VDE and FCC. Input voltage can be selected to 115VAC or 230VAC by means of an on-board jumper.

The mechanical design of PLB 11 Plug-in units is in conformance with IEC 297-3 and DIN 41494 (the base for Euro-Rack or VME mechanical standards) while the PLB 62/63 are chassis versions with Pin Conectors respectively Screw Terminals of the principal supply.

The "Optimized Flyback Technology" used in the PLB series is the result of a long experience in Power Supply design. Special care has been taken in order to find a technology that besides offering cost effective designs also offers high reliability and high efficiency. Efficiency is typically 78-85% depending on output voltage. A power warning DC signal, proportional to the high voltage DC-level on the Hold-Up capacitors and consequently a measure of the stored energy, facilitates flexible Power Fail Signal designs.

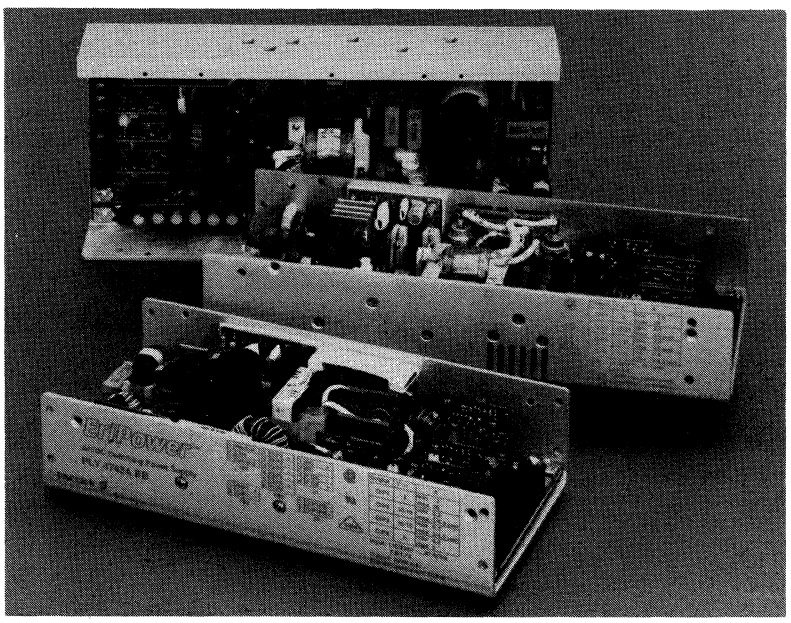
ERICSSON EriPower™

THE RELIABLE SOURCE

- **Quad independent, regulated and adjustable outputs**
- **1.5 x rated current for disc drives start-up surge current**
- **Approved by CSA, UL and VDE. Designed to CSA 22.2, UL 478, UL 1012 and VDE 0806 plus IEC 380/950**
- **RFI suppression in conformance to FCC subpart 15J and VDE 0871 curve B**
- **Protected against: Overload, Over-voltage, Overcurrent, Overheating, No Load, Reverse Voltage, Short Circuit and Brownouts**



PLY-series Quad Output versatile 150-400W flexible Switchers in standard footprint

The PLY series of regulated quad output switchers constitutes a series of versatile standard open frame Power Supplies. Standard footprints and a very wide range for adjusting the outputs, make them ideal not only for substituting an existing Power Supply but also for applications requiring "odd" voltages. Combining and adjusting the outputs makes possible to meet almost every voltage needed.

High frequency MOSFET switching, surface mounting and a compact design contribute to the attractively small dimensions. Output 2-4 are post regulated and floating, giving possibilities for series connections of selected outputs. The voltages can be adjusted within a wide range and for one of the outputs as much as from 11.5VDC to 26VDC. An attractive feature is the outputs possibility for surge current (1.5 times max. continuous) which allows start-up of disc drives.

The products are approved from major safety agencies, offering a security to the user in his application for such safety approval of the complete equipment. The PLY 47—have universal input voltage, making it possible to connect them either to 115VAC or 230VAC without selecting the input while the PLY 48/49—are user selectable by means of a strap.

The products are protected against overload, overvoltage, overcurrent, overheating, no lead, reverse voltage, short circuit and brownouts. A Power OK signal is available as well as the possibility for Remote Control and Remote Sense.

A 100% cycled Burn-In procedure and ATE testers at both pre and post Burn-In are guarantees for high and smooth quality. An MTBF figure of 100,000h makes these switchers ideal for applications within computers, communications and industrial systems.

Product Program

Model number	Max output power W	Output Volts/Ampéres (max. continuous at forced air cooling, + 40°C)				Weight	Cooling CFM

FARNELL ADVANCE POWER

(216) 349-0755 FAX (216) 349-0142

Multi-output Switch Mode Power Supplies 30-1500 Watts

The Company

Farnell Advance Power is a division of Farnell Instruments Ltd., with over 20 years of experience in producing quality power supplies.

Product Line

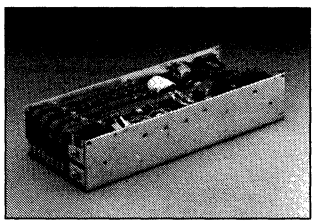
Farnell products include open frame and enclosed switch mode power supplies with single and multiple outputs ranging up to 2500 watts, linear power supplies, and a wide range of telecommunications products. Farnell power supplies are manufactured in the UK; designed and, in many cases, listed to international standards including BS, UL, VDE, CSA, IEC, BT and BABT.

Availability

Inventories of Farnell power supplies are maintained in the U.S.A. for prompt shipment. For complete specifications and the name of your nearest Farnell Advance sales representative, contact Farnell Advance, 32111 Aurora Road, Solon, Ohio 44139. **PHONE (216) 349-0755. FAX (216) 349-0142.**

NEW. Compact U-shape 350-watt switcher with universal input, multiple outputs.

Compact 2-1/2" x 5" x 12" U-shape chassis simplifies cost, design and service problems. New AF/AR series offers up to nine outputs per unit, current share N+1 redundancy, and automatic adjustment to all A.C. inputs from 90 to 264 volts, 45 to 440 hz. Built-in cooling optional. Call today.



A.C. Input/Fixed Outputs

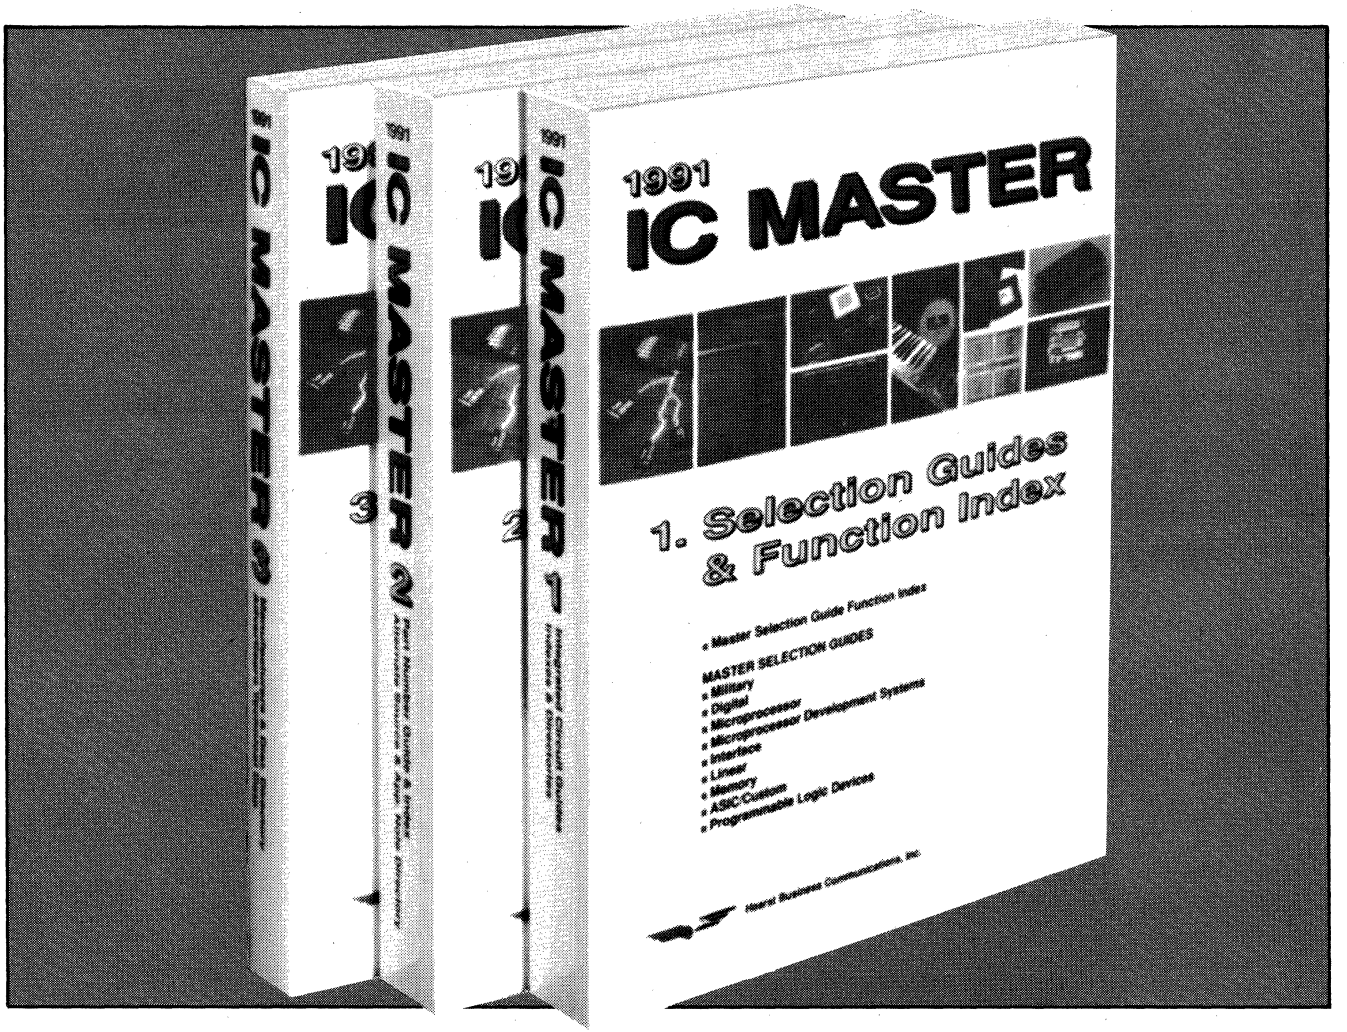
SUPER TIME SAVER!



Do you work with ICs? Do you have trouble finding the IC you need? Are you sick and tired of sifting through dozens of manufacturers' data books? Do you have trouble comparing one set of specs to another? Are you sick and tired of wasting time?

Do we have good news for you! Get your hands on the latest annual copy of the IC Master. The Master will save you both time and money. Here's how.

The Master lists every single IC you can buy. Better yet, the Master lists ICs by function. You know what you want to do. The Master tells you who makes what for what you want to do.

There's more! The Master lists every known alternate source to every integrated circuit. If somebody makes a substitute for an IC, the Master tells you. And fast!

Want to find a custom or semicustom IC? The Master tells you who the manufacturers are, what their capabilities are, and what design tools you need.

Looking for a distributor or a local sales office? The Master tells you where they are. Got a technical problem? The Master tells you who to call. Can't figure out a part number? The Master tells you how the part number systems work.

There's more! The Master has a section on microprocessor development tools with complete performance parameters. There's another section on programmable logic devices giving you everything from output configuration to PLD development systems.

Want to know if there's an application note available on a given part? The Master tells you!

If your question has anything to do with integrated circuits, you need the IC Master. Subscribe now by calling (516) 227-1314. Ask for Marie Botta. Tell Marie you need the Master now.

If you prefer, write to Marie, Hearst Business Communications, 645 Stewart Ave., Garden City, NY 11530. She'll mail you the IC Master subscription form right away.

And, if you tell her you saw it in the 1991/92 EEM, she'll take $10 off the subscription price!

IC MASTER

FRIWO

EUROPE'S LARGEST MANUFACTURER OF DESKTOP AND WALL PLUG-IN POWER SUPPLIES

Call or fax our U.S. office with specifications for customizing any of your power supply needs. Additional catalogs and information available upon request.

- German quality & attention to detail
- $70 million in sales
- 20 years in business
- 12 month warranty
- Over 80 million sold
- 100% tested and inspected during all phases of manufacturing process
- Production rate - over 45,000 power supplies per day

FRIWO

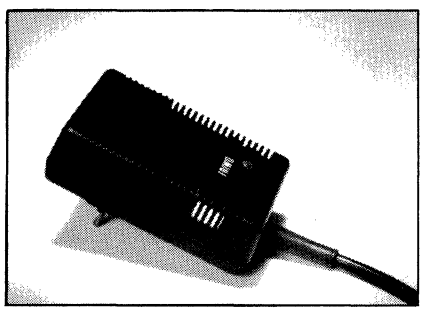
SWITCHER

FRIWO primary switched plug-in and desk power supplies are especially designed to meet higher power requirements for microprocessor and peripheral systems in power ranges from 15-100 Watts. FRIWO's solutions are primary switched units in order to increase the power ranges in these fields of applications. Custom designed units are delivered within 10-12 weeks.



SPECIFICATIONS

- Input voltage 220 V/50 Hz
- Ripple noise ≤ 1%
- Efficiency: ≥ 75%
- Operation temperature 0 - +50°C
- Storage temperature -40 - + 80°C

FEATURES

- Wall plug-in and desktop styles
- Single and multiple output models available
- Switcher regulation ± 5%
- Ranges 15 W to 100 W
- Some available with 120 V/60 Hz
- Available through distribution

WALL PLUG-IN, SINGLE OUTPUT ≤ 30 W

MODEL NUMBER	OUTPUT	CASE SIZE l x w x h, mm
11.3018	5 V @ 3 A	80x128x40

HIGH VOLTAGE POWER SUPPLIES

REGULATED CONSTANT VOLTAGE CONSTANT CURRENT

1KV to 400KV
30 WATTS to 3000 WATTS

NEW

SERIES RR

FEATURES

LOW STORED ENERGY: The use of high frequency (>20KHz), high voltage power supply techniques allows stored energy to be minimized thus insuring maximum safety to operating personnel and sensitive loads.

PROGRAMMING OUTPUT VOLTAGE & OUTPUT CURRENT: This feature allows output voltage or output current to be remotely programmed from either an external voltage source or with external potentiometers from the internal reference voltage. A zero to +5V voltage source is required for full scale programming. Internal circuitry insures that the output voltage and output current cannot be externally programmed beyond the maximum settings of the front panel controls.

CONSTANT VOLTAGE/CONSTANT CURRENT WITH AUTOMATIC CROSSOVER: Dual control loops allow either voltage or current to be precisely regulated. Each parameter is controlled and limited by a ten-turn potentiometer on the front panel. The constant voltage/constant current automatic crossover feature allows the power supply to be used as a voltage regulated current limited system or as a current regulated voltage limited system. Thus, both output voltage and output current are totally under operator control under all load conditions, including overload and arc-over conditions.

OVERLOAD, ARC-OVER & SHORT CICRUIT PROTECTION: Full protection against any overload condition is inherent in the constant voltage/constant current design concept. This is augmented by the liberal use of surge limiting resistors and reactive limiting. On 600W, 1KW and 3KW units customer may select either constant current or a variable overload trip by means of a front panel mounted switch.

VOLTAGE REGULATION: Line and load regulation is better than 0.005%. Note: On 1000 watt and 3000 watt units load regulation is better than 0.01%.

CURRENT REGULATION: Current regulation is better than 75uA.

RIPPLE: At 150 watts ripple of 0.02%. At 300, 600 and 1000 watts ripple of 0.05%. At 3000 watts ripple of 0.1%.

EFFICIENCY: Efficiency is typically greater than 75% at full load.

EXTERNAL POLARITY REVERSAL (Reversible Units Only): A reversing switch mechanism located at the rear of the power supply facilitates polarity reversal.

EXTERNAL INTERLOCK/OUTPUT INHIBIT: Circuitry is provided so that the user can, if desired, inhibit output voltage. External contact closure located on the rear terminal strip will enable the power supply. Open contacts will inhibit the power supply.

FLOATING GROUND: This feature allows the low end return of the power supply to be isolated with respect to chassis ground. Consult factory.

REMOTE OUTPUT VOTAGE & CURRENT MONITORING: Voltage monitoring and true output current conitoring signals are provided at the rear terminal strip.

MODULAR CONSTRUCTION: Modular construction techniques are used throughout this design thus reducing downtime in critical applications.

OPTIONS

ZERO VOLTAGE START INTERLOCK (ZVS): To prevent accidental damage to loads, the output voltage control must be set to zero before the high voltage can be applied.

VARIABLE OVERVOLTAGE PROTECTION (VOV): This option causes the power supply to shut down when the output voltage exceeds the setting of the overvoltage control potentiometer located at the rear of the power supply. (adjustable from 20% to 110% of maximum rated output voltage.)

VARIABLE OVERLOAD TRIPOUT (VOL): This option causes the power supply to shut down when the output current equals the setting of the front panel current control (adjustable from 20% to 110% of maximum output current of the power supply.) Standard feature on 600W, 1000W and 3000W units. Front panel control allows user to activate this feature when desired.

DIGITAL PANEL METER: SINGLE METER (SDPM) — TWO METERS (DDPM): A Single 3½ digit meter reading both voltage and current is available. This meter replaces the two analog meters normally provided. Two 3½ digit meters can also be provided in place of the two analog meters normally provided.

SLOW START (SS): The slow start option enables the output voltage of the power supply to ramp to its maximum output voltage setting at a linear rate. This rate can be factory set from one to fifteen seconds.

SLAVED BI-POLAR OPERATION (SBP): Any two power supplies of the same voltage rating may be operated as a Bi-Polar pair. One power supply acting as the master controller will control both power supplies from zero to maximum rated output voltage. The output voltages of both supplies will track each other within 2% from 10% to maximum rated output voltage. Each power supply is also capable of operating independently.

TTL (TTL): Compatible "enable" line.

AUXILIARY OUTUT/FOCUS TAP (FT): This option provides an independent auxiliary output which is variable from zero to maximum rated voltage up to 15KV to 300uA maximum. Control is achieved via front panel mounted potentiometer. For other voltages and power levels consult factory. Multiple auxiliary outputs are also available. Consult factory.

REMOTE CONTROL PANEL (RCP): Any standard model can be supplied with a control panel remote from the basic power supply. 20 feet of appropriately shielded interconnection is provided. This remote control panel replaces the front panel normally provided on standard units.

220 VOLT INPUT — 50/60 Hz (220): 220 volt, 50/60 Hz. Input is available.

BENCH CABINET (BC): A deluxe style cabinet is available for all models.

30 WATTS to 3000 WATTS

NEW

SERIES RR TO 300 WATTS

SPECIFICATIONS

INPUT VOLTAGE: 105-125V RMS at 5 Amps maximum (50-60 Hz)

OUTPUT VOLTAGE: Continuously adjustable from zero to maximum output voltage ratings of power supply. See Model selection guide.

***VOLTAGE REGULATION:** Line: Better than ±0.005% over specified input range. Load: 0.005% for full load change.

***CURRENT REGULATION:** Line: Better than ±0.005% over specified input range. Load: Better than 75uA for a 75% change in compliance voltage.

‡RIPPLE: 60 and 150 Watt units: 0.02% 300 Watt units: 0.05%

***TEMPERATURE COEFFICIENT:** 100ppm/°C over the range of 0 to 60°C.

***STABILITY:** 0.01%/hour. 0.03%/8 hours.

CONTROLS:
1. Power (HV ON)
2. Output Voltage (10-turn potentiometer)
3. Output Current (10-turn potentiometer)

INDICATORS:
1. Power (HV ON)
2. Output Voltage (meter ±2% of full scale)
3. Output Current (meter ±2% of full scale)

CONNECTORS:
1. High Voltage: All models are provided with 6 feet of shielded high voltage cable. The cables are fitted with bushings to mate with a re-entrant receptacle.
2. Input: 3-wire line cord.
3. Low Voltage. Rear mounted barrier terminal block for:
   a) External Interlock
   b) Voltage Programming
   c) Current Programming
   d) V/I Monitors

HIGH VOLTAGE POWER SUPPLIES MODULAR

SERIES MC

7 Models Covering the Range of 50VDC to 10,000VDC

ELECTRICAL CHARACTERISTICS:

Input Voltage: 1.75 to 12VDC
Input Current: 400mA
Output Voltage: Proportional to Input (see table)
Output Current: 3 Watts maximum (see table)
Load Regulation: 5% (½ load to full load)
Ripple: 1% p-p (typical)
Insulation Strength: 3000V Input/Output

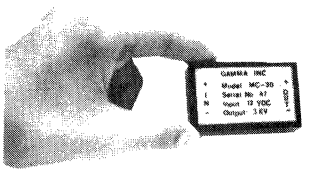
PHYSICAL CHARACTERISTICS:

Dimensions: 1.5″ x 2.5″ x 0.75″ (up to 5KV)
1.5″ x 2.5″ x 1.5″ (10KV)
Volume: 2.8 cu. in. (up to 5KV)
5.6 cu. in. (10KV)
Weight: 4 oz.
Packaging: Solid encapsulation
Terminations: 4 PC pins (.043 dia holes) up to 3KV)
3 PC pins (.043 dia holes) (5 and 10KV)

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: −20°C to +60°C

MINIATURE HIGH VOLTAGE POWER SUPPLIES



ELECTRICAL SPECIFICATIONS:

OUTPUT MODEL	OUTPUT VOLTAGE RANGE	OUTPUT POLARITY	CURRENT
MC-5	50VDC to 500VDC	Reversible	6mA
MC-15	150VDC to 1500VDC	Reversible	2mA
MC-30	300VDC to 3000VDC	Reversible	1mA
MC-50R	500VDC to 5000VDC	Reversible	200µA
MC-100P	1000VDC to 10,000VDC	Positive	100µA
MC-100N	1000VDC to 10,000VDC	Negative	100µA
* MC-100R	1000VDC to 10,000VDC	Reversible	100µA

*: SIZE: 4.5 x 1.437 x 1.375
†: INPUT: 18VDC

SERIES RC

7 Models Covering the range of 0-3KV to 0-30KV at 10 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage: +28VDC ±10%
Output Voltage: Programmable from zero to maximum rated voltage from either an external 5K ohm potentiometer or a zero to +10 volt low voltage ground referenced source
Output Current: 10 Watts maximum
Line Regulation: 0.01% maximum
Load Regulation: 0.01% maximum
Ripple: 0.05% maximum
Temp. Coefficient: 0.01%°C
Stability: 0.01%/8 hours
Monitor Outputs: 1) Voltage Monitor (Optional)
2) Current Monitor (Optional)
Programming:
Method 1. Resistance: External 5K ohm potentiometer
Method 2. Voltage: Zero to +10 Volts

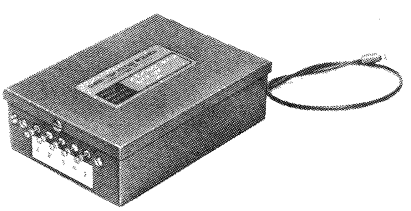
PHYSICAL CHARACTERISTICS:

Dimensions: 3½″ x 5⅛″ x 1 9/16″ (up to 15KV)
3¾″ x 6″ x 2¾″ (20 & 30KV)
Weight: 2½ lbs (up to 15KV)
3½ lbs (20 & 30KV)
Packaging: Solid encapsulation, metal case with metal inserts in base
Input Connector: Terminal strip
Output Termination: 12″ flying lead

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

REGULATED DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
RC10-3	0-3KV	3.3mA
RC10-5	0-5KV	2.0mA
RC10-10	0-10KV	1.0mA
RC10-15	0-15KV	0.66mA
RC10-20	0-20KV	0.5mA
RC10-25	0-25KV	0.4mA
RC10-30	0-30KV	0.33mA

All units are available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired.

SERIES UC

7 Models Covering the range of 0-3KV to 0-30K at 5 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage: +24VDC ±10%
Input Current: 400mA maximum
Output Voltage: Adjustable from zero to rated voltage by adjustment of DC input voltage
Output Current: 5 Watts maximum (see table)
Load Regulation: 20% maximum (½ load to full load)
Ripple: 0.1% per watt

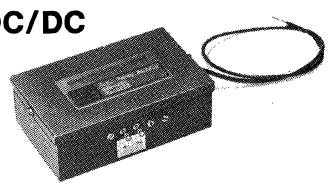
PHYSICAL CHARACTERISTICS:

Dimensions: 2¾″ x 4½″ x 1 9/16″ (up to 15KV)
3½″ x 5⅛″ x 1 9/16″ (20, 25 & 30KV)
Weight: 1½ lbs. (up to 15KV)
2½ lbs. (20, 25 & 30KV)
Packaging: Solid encapsulation, metal case with metal inserts in base
Terminations: Two terminals for DC input. 12″ flying lead for H.V. output

ENVIRONMENTAL CHARACTERISTICS:

Temperature Range: 0 to 50°C

PROPORTIONAL DC/DC HIGH VOLTAGE POWER SUPPLIES



MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
UC5-3	0-3KV*	1.6mA
UC5-5	0-5KV*	1.0mA
UC5-10	0-10KV*	0.5mA
UC5-15	0-15KV	0.33mA
UC5-20	0-20KV	0.25mA
UC5-25	0-25KV	0.2mA
UC5-30	0-30KV	0.166mA

All Models available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired. *3KV, 5KV and 10KV Models can be provided with reversible polarity (consult factory).

HIGH VOLTAGE POWER SUPPLIES MODULAR

SERIES PMT

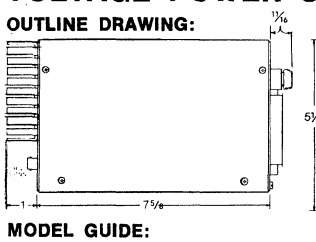
4 Models covering the range of 0-1.5KV to 0-3KV

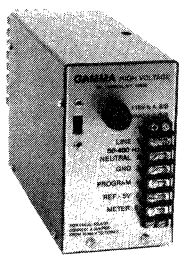
ELECTRICAL CHARACTERISTICS:

Input Voltage:	115/230 VAC ±10% 50 to 400 Hz
Output Voltage:	Continuously adjustable from zero to maximum output rating
Output Current:	See ratings of individual models
Regulation:	0.001% for ±10% line change 0.002% for NL-FL or FL-NL
Ripple:	0.001% peak-to-peak
Stability:	0.01%/hour, 0.02%/8 hours
Temp. Coefficient:	50ppm/°C over, the range of 0 to 50°C
Monitor Output:	0 to 5V/100μA for zero to maximum output voltage
Control:	Local: 20 turn potentiometer for zero to maximum output voltage Remote: Voltage (0 to −5V) or resistance for full range
Connections:	Input line, programming and metering via Terminal Block. Alternate connectors available
Size:	5½" H x 3⅛" W x 8⅝" L

PHOTOMULTIPLIER TUBE HIGH VOLTAGE POWER SUPPLIES

OUTLINE DRAWING:





MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT	POLARITY
PMT1.5P	0-1.5KV	10mA	Positive
PMT1.5N	0-1.5KV	10mA	Negative
PMT3P	0-3KV	5mA	Positive
PMT3N	0-3KV	5mA	Negative

SERIES XRM 10 Models covering the range of 0-1.5KV to 0-60KV up to 60 Watts

ELECTRICAL CHARACTERISTICS:

Input Voltage:	105-125 VAC 50 to 400 Hz
Output Voltage:	Continuously adjustable from zero to max output volt
Output Current:	See ratings of individual models
Voltage Regulation:	Line: ±0.005% over specified input range Load: ±0.01% for full load change
Current Regulation:	Better than ±0.005% over specified input range
Load Regulation:	Better than 50μA for a 75% change in compliance volt
Ripple:	0.05%
Temp. Coefficient:	100ppm/°C over the range of 0 to 60°C
Stability:	0.01%/hour; 0.03%/8 hours
Programming Output Voltage and Output Current:	The output voltage or output current can be remotely programmed from either an external volt source or external potentiometers from the internal reference volt. A zero to +5 source is required to full scale programming.

PHYSICAL CHARACTERISTIC:

Dimensions:	6" H x 4" x W x 10" L
Weight:	10 lbs.
Packaging:	Modular construction with high voltage section encapsulated in a silicone elastomer
Input Connector:	D-Subminiature 25 pin connector
Output Termination:	Re-entrant type bushing is standard, with mating output cable provided Customer specified output connectors can be provided

REGULATED, LINE OPERATED MODULAR HIGH VOLTAGE POWER SUPPLIES

(Non-Standard Connectors on Unit shown)

MODEL GUIDE:

MODEL	OUTPUT VOLTAGE	OUTPUT CURRENT
XRM1.5	0-1.5KV	33.0mA
XRM3	0-3KV	15.0mA
XRM5	0.5KV	10.0mA
XRM10	0-10KV	5.0mA
XRM15	0-15KV	3.5mA
XRM20	0-20KV	2.5mA
XRM30	0-30KV	2.0mA
XRM40	0-40KV	1.5mA
XRM50	0-50KV	1.0mA
XRM60	0-60KV	1.0mA

All units are available in positive or negative polarity. Add P or N as suffix to Model Number to indicate polarity desired.

HIGH VOLTAGE DIVIDER

SERIES HVD

MODEL HVD-100 SPECIFICATIONS:

Input Voltage:	100KVDC maximum
Input Impedance:	200 megohms
Output Impedance:	20,000 ohms
Output Taps:	1 volt/100KV
Temp. Coefficient:	75 ppm
Accuracy:	0.2%
Size:	17½" high (maximum). Termination 10" toroid
Output Connector:	BNC

MODEL HVD-100-S SPECIFICATIONS:

Model HVD-100-S is identical to Model HVD-100 with the exception of accuracy which is 0.1% and temperature coefficient which is 25ppm.

MODEL HVD-200 SPECIFICATIONS:

Input Voltage:	200KVDC maximum
Input Impedance:	4000 megohms
Output Impedance:	40,000 ohms
Output Taps:	2V 1 (volt/100KV)
Temp. Coefficient:	75ppm
Accuracy:	0.2%
Size:	30" high (maximum). Termination 12" toroid
Output Connector:	BNC

MODEL HVD-200-S SPECIFICATIONS:

Model HVD-200-S is identical to Model HVD-200 with the exception of accuracy which is 0.1% and temperature coefficient which is 25ppm.

HVD-100

HIGH FREQUENCY DIVIDER NEW

MODEL HFD-60

Capability of measuring pulses wtih rise time of less than 20nS at voltages to 60KV.

GLASSMAN HV POWER SUPPLIES...better by design!

The choice of a high voltage power supply involves many factors besides the obvious ones. Of course, the supply must meet the maximum output voltage and current required for the particular application. It must provide adequate ripple suppression, static line regulation, and static load regulation. And its input voltage and frequency requirements must be considered and met. However, other factors may be of even more significance.

Safety Considerations

Safety considerations are of utmost importance. Any high voltage power supply poses a threat to operating personnel. Glassman power supplies, however, are designed to minimize the danger. They operate, not at line frequencies, but at RF. The higher frequency means that the filter capacitors used to suppress ripple are orders of magnitude smaller in value than those used in line frequency supplies. Since stored energy is equal to $E = \frac{1}{2} CV^2$, a smaller capacitor means less stored energy. In fact, the stored energy available from most Glassman supplies is well below the 4 to 5 joules required to kill a person.

Nevertheless, lethal energy may be present at higher voltages. To guard against this danger, Glassman supplies are equipped with extensive protective devices, including safety interlock circuits with intelligent latching, full panel status annunciators, and selectable restart conditions in the event of a power outage.

Efficiency, Size, and Weight

The use of RF in Glassman supplies has other advantages beyond that of safety. Higher operating frequencies mean smaller and lighter transformers, as well as smaller capacitors and inductors. This leads directly to lower weight, smaller size, and lower cost. And RF supplies are more efficient because of lower losses. This translates into cooler operation and increased reliability.

Another consequence of RF supplies, with their lower stored energy, is that the output cable and connector do not have to support large levels of energy in the event of a short circuit condition. Glassman supplies are equipped with an eight-foot, shielded, light weight coaxial output cable.

Regulation

The high frequency of an RF supply simplifies closed loop regulator design. Dynamic regulation becomes important when either the line or the load may be expected to change abruptly or when the load is sensitive to momentary deviations in the output. Glassman supplies have typical regulation response times of 1 millisecond. Both the degree of regulation and the speed of response is considerably better than line frequency-based designs.

Air Insulation

Glassman supplies are unique in that they use air insulation. Competitive supplies use vacuum encapsulated high voltage components. The use of air insulation has considerable advantages. Reduced weight is one. More importantly, air insulation leads to improved serviceability. Individual components can be replaced, if necessary, without the need to scrap an entire assembly. Air insulation also avoids the danger of delamination of the encapsulation which can lead to unseen creepage paths and catastrophic failure. Glassman high voltage components are designed with careful consideration of potential gradients, assuring corona-free operation.

For output voltages up to 125 KV, high voltage components are enclosure-mounted for protection against contamination. For voltages above 125 KV, open-stack components are used. Some consideration of atmospheric contamination is then required. However, 12 years of experience with air insulation and thousands of units in operation from deserts to coastal plains and altitudes to 10,000 feet demonstrate the reliability of air insulation.

STANDARD POWER SUPPLIES FROM GLASSMAN

Glassman offers a broad selection of the most advanced high voltage power supplies available. Each features unbeatable performance, versatile control and protection capabilities, field-tested reliability, and significant size and weight advantages. Standard models, features, and options are summarized at right.

In addition to our broad base of standard models, we welcome the opportunity to discuss your "OEM" requirements.

Glassman High Voltage, Inc. warrants standard power supplies to be free from defects in materials and workmanship for three years from date of shipment. OEM and modified standard power supplies are warranted for one year from date of shipment. The company agrees to replace or repair any power supply that fails to peform as specified within the warranty period. Formal warranty available.

Typical Specifications

Voltage Regulation:* Load, better than ±0.005% ±1 volt for full load variation; line, better than ±0.005% ±l volt.

Current Regulation:* Load, better than ±0.05% from short circuit to rated voltage at any load condition. Line, better than ±0.005% ±1 μA.

Ripple:* 0.03% rms of rated voltage at full load. Ripple voltage is proportional to load current and decreases linearly to 0.01% rms of rated voltage at no load.

Stability: 0.01% per hour after 1/2 hour warm-up. 0.05% per 8 hours.

Temperature Coefficient: 0.01%/°C.

Ambient Temperature: -20° C to +60° C, operating; -40° C to +85° C, storage.

Protection: Automatic current regulation protects the power supply against all overload conditions, including arcs and short circuits. Fuses, surge limiting resistors, and low energy components provide the ultimate protection.

Most models can be tailored to meet your precise requirements. Consult factory

* Some specifications vary on particular models. Check with the factory or refer to individual product data sheets for details.

Series MJ — 15 Watt

FEATURES

- Premium performance at low cost.
- Multi-mode operation allows local voltage and/or current control or remote control via a 0-10 V signal or external potentiometers.
- External interlock terminals.
- TTL enable/disable.
- Overload, short circuit, and arc protection.
- AC input eliminates the need and expense of an auxiliary DC power source.

OPTIONS

Symbol	Description
100	100 volt input: rated for 90 to 110 volts RMS, 48-420 Hz
220	220 volt input: rated for 210 to 250 volts RMS, 48-420 Hz

B: 3¼×5¼×13¾

For typical specifications see page 1.

Series MK — 75 Watt

FEATURES

- High power laboratory performance in a compact package.
- Multi-mode operation allows local voltage and/or current control or remote control via a 0-10 V signal or external potentiometers.
- External interlock terminals.
- TTL enable/disable.
- Overload, short circuit, and arc protection.
- AC power annunciator.

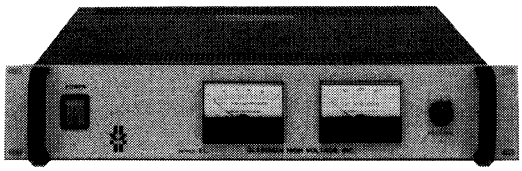
Series EL — 40/45 Watt



FEATURES

- Laboratory performance at an economical price.
- Fast transient response time. Less than 3 milliseconds for a 50% load transient.
- Ten-turn voltage control with locking vernier dial.
- Self-restoring automatic crossover from voltage regulation to current limit mode with overload.
- Overload, short circuit, and arc protection.
- 19-inch rack or bench mounting, 3½ inch high.

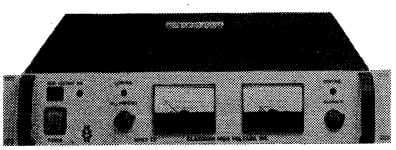
Series ER — 300 Watt



The 300 W Series ER represents a significant advance in sophisticated high voltage power supplies. Available in output voltage ranges of 0 to 2 KV through 0 to 75 KV, Series ER is only 3½ inches high and weighs a mere 18 pounds. In addition to its standard configuration with dual analog meter displays, it is available as a Series ERDM with digital meters or with a blank panel for OEM/system applications.

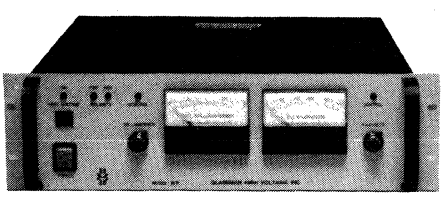
ADDITIONAL FEATURES

- Automatic crossover from voltage or current regulated mode dependent on load conditions.
- 3 ½ inch high, 18 lbs.
- Less than 3 ms response for a 50% load transient.
- Voltage and current program/monitor terminals.
- TTL HV enable/disable.
- Safety interlock terminals.
- +10 V reference source.

OPTIONS

Symbol	Description
100	100 Volt Input: rated 90 to 110 V RMS, 48-63 Hz
220	220 Volt Input: rated 200 to 264 V RMS, 48-63 Hz
400	48 to 420 Hz, available on standard model and options 100 and 220
DM	3½ digit LCD panel meters
NC	Blank front panel (power switch only)
CT	Current Trip. Power supply trips off under overload conditions
ZR	Zero start interlock. Voltage control must be at zero before accepting an enable signal
SS	Slow start ramp of up to 30s available. Specify time

Series WR — 250 Watt



The 250 W Series WR is a natural extension of Series ER, adding output voltages from 0 to 85 kV through 0 to 125 kV...in a panel height of only 5.25 inches. It also is available with analog displays, digital displays, or with a blank panel for OEM/system applications. For analog and digital versions, voltage and current control is by means of separate 10-turn potentiometers with locking vernier dials.

For typical specifications see page 1.

ADDITIONAL FEATURES

- Automatic crossover from voltage or current regulated mode dependent on load conditions.
- Less than 3 ms response for a 50% load transient.
- Voltage and current program/monitor terminals.
- TTL HV enable/disable.
- Safety interlock terminals.
- +10 V reference source.

OPTIONS

Symbol	Description
100	100 Volt Input: rated 90 to 110 V RMS, 48-63 Hz
220	220 Volt Input: rated 200 to 264 V RMS, 48-63 Hz
400	48 to 420 Hz, available on standard model and options 100 and 220
DM	3½ digit LCD panel meters
NC	Blank front panel (power switch only)
CT	Current Trip. Power supply trips off under overload conditions
ZR	Zero start interlock. Voltage control must be at zero before accepting an enable signal
SS	Slow start ramp of up to 30s available. Specify time

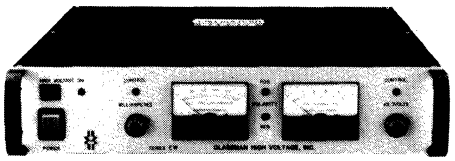
Series EW—500 Watt with Extended Current Capability



FEATURES

- Maximum current equivalent to 600 W supply for output voltages below 84% of rated.
- Low stored energy, for maximum personnel/equipment safety.
- Constant voltage/constant current operation.
- Primary contactor— prevents self-turn-on after power outage.
- Pulse width modulated off-the-line configuration results in full load efficiency bette than 85%— low internal dissipation, very high reliability.
- Remote and front panel monitoring of both DC ouput voltage and current.
- Regulation— better than 0.005%— line and load.
- 3 ½ inch high, 18 lbs.

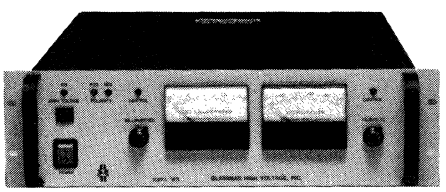
Symbol	Description
220	220 Volt input: rated for 210 to 250V RMS, 50-400 Hz
100	100 Volt input: rated for 90 to 110V RMS, 50-400 Hz
400	48 to 420 Hz available on standard model and options 100 and 220
B	Bi-Polar Operation (Requires 2 power supplies)
CT	Current Trip
DM	Digital Panel Meters

Note: Product of voltage and current automatically limited to 500W maximum.

For typical specifications see page 1.

Series WX — 1000 watt



FEATURES

- Constant voltage/Constant current operation.
- Ten-turn voltage and current controls with locking vernier dial.
- Three different control panel configurations for maximum application flexibility.
- Remote control facilities include voltage and current program/monitor terminals, TTL high voltage enable/disable, safety interlock terminals, as well as a +10 volt reference source.
- Light weight, 40 pounds; **compact 5¼" panel height.**

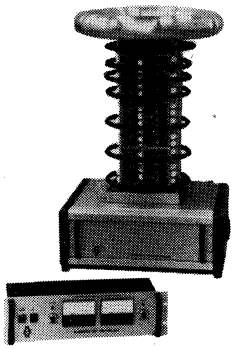
Series PG — 500/1000 Watt



FEATURES

- Adjustable current limits, output surge-limiting resistors provide additional margins of safety.
- Off-the-line configuration results in full load efficiency better than 75% — low internal dissipation, very high reliability.
- Remote and front panel monitoring and programming of both DC output voltage and current.
- Regulation better than 0.005% — line and load.
- Less than 3 msec recovery from 50% load transient.

OPTIONS

Symbol	Description
220	220 Volt input: rated for 210 to 250 volts RMS, 50-60 Hz.
100	100 Volt input: rated for 90 to 110 volts RMS, 50-60 Hz.
400	48 to 420 Hz, available on standard model and options 100 and 220.
CT	Current Trip: supply turns off when overload occurs. Manual reset required to return to normal operation.
DM	4½-digit LED displays for both voltages and current readouts.
TTL	TTL compatible "enable" line.

For typical specifications see page 1.

MODELS

Open stack models are supplied with cabinet mounted stack and driver, and remote control panel. Driver mounted controls are optional.

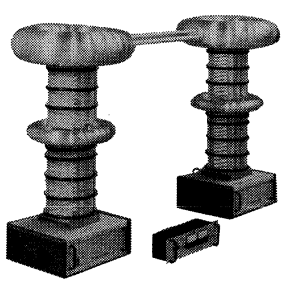
Series PG-LR — Open Stack Models With Low Ripple



SPECIFICATIONS

Input:
208 VRMS 50-60 Hz; 3 phase. Less than 5 amperes.

Voltage Regulation:
Better than ±0.005% ±1V line and load.

Current Regulation:
Load, better than 100 microamperes from short circuit to rated voltage at any load condition.
Line, better than ±0.005% ±1μA.

Controls:
Complete remote control panel, power on/off high voltage on switches, voltage and current meters, ten turn voltage and current controls with active mode indicators, 20′ interconnection cable.

OPTIONS

Symbol	Description
CT	Current Trip: supply turns off when overload occurs. Manual reset required to return to normal operation.
TTL	TTL compatible "enable" line.
DM	4½-digit LED displays for both voltage and current readouts.

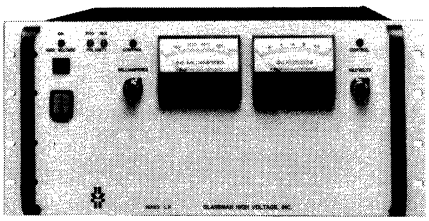
Series LX — 1000 Watt



FEATURES

- Extended current equivalent to a constant power 2000 W supply for output voltages below 50% of rated.
- Air insulation reduces total weight and allows for easy serviceability.
- Ripple is less than 0.03% of rated voltage + 1V at full load.
- Voltage regulation better than 0.005% for allowable line and load variations.
- As standard, all LX models provide output voltage and current program/monitor terminals, TTL high voltage enable/disable, safety interlock terminals, and a +10 V reference source.
- Panel height only 8.75 inches. Weight is less than 47 pounds.

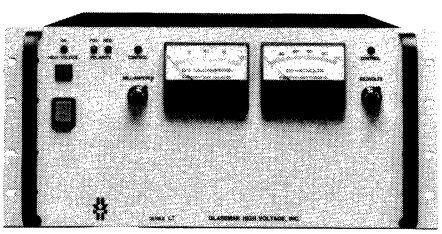
OPTIONS

Symbol	Description
100	90-116 V input, 48-63 Hz. NEMA 5-15 plug.
200	180-232 V input, 48-63 Hz. NEMA 6-15 plug.
DM	3½ digit LCD panel meters.
NC	Blank front panel, power switch only.
CT	Current trip. Power supply trips off under overload condition. This option has a rear panel switch that selects either "trip" operation or normal current limiting of an overload.
ZR	Zero start interlock. Voltage control, local or remote, must be at zero before accepting an enable signal.
SS	Slow start ramp. Specify standard times of 1, 2, 3, 5, 10, 15, 20 or 30 s ±20%
5VC	0-5V voltage and current program/monitor.

Note: Product of voltage and current automatically limited to 1000 W maximum.

Series LT — 2000 Watt



FEATURES

- Off-the-line pulse-width modulation provides high efficiency and a reduced parts count for reliability.
- Air insulation reduces total weight and allows for easy serviceability.
- Automatic crossover from constant-voltage to constant-current regulation protects against overloads, arcs, and short circuits.
- Ripple is less than 0.03% of rated voltage + 1V at full load.
- Voltage regulation better than 0.005% for allowable line and load variations.
- As standard, all LT models provide output voltage and current program/monitor terminals, TTL high voltage enable/disable, safety interlock terminals, and a +10 V reference source.
- Panel height only 8.75 inches. Weight is less than 47 pounds.

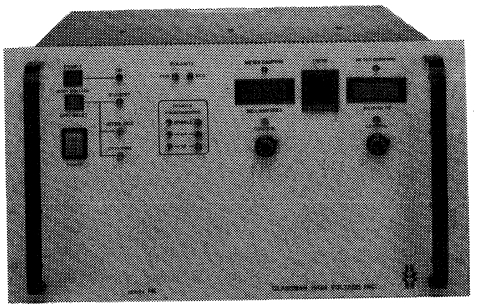
Series PK — 4/8 Kilowatt (208V 3-phase input)



The new Series PK features unprecedented 4 or 8 KW performance in a choice of models providing output voltages to 500 KV. Each model offers significant savings in size and weight over competitive units, as well as tighter regulation, improved stability, and lower temperature coefficients.

Output voltage and current are displayed on separate LCD digital readouts with selectable damping. A dual bargraph provides an additional "analog" indication of rapidly changing output levels.

All Series PK models provide extensive remote programming capabilities with front panel annunciators displaying remote activity. Both voltage and current levels can be controlled by external analog signals and an external digital signal can activate high voltage enable.

ADDITIONAL FEATURES

- Front panel interlock indicator shows a customer interlock "is" or "was" open. Output voltage is disabled and cannot be enabled until the open interlock is corrected and the system reset.
- Front panel external indicator shows an external disable signal "is" or "was" present. The external fault can be latching or non-latching at the user's discretion. When latched, the system must be reset to enable the high voltage. When unlatched, the voltage will re-enable as soon as the external signal is removed.
- Front panel standby indicator shows the system is ready for high voltage enable. A monitoring system will defeat a standby indication if the AC line voltage is too low, internal bias voltage is missing, a current trip fault occurred, or if an external disable or open interlock signal is or was present.
- A current limiting mode is standard. The user may select instead a soft current trip with 500 milliseconds delay. A hard trip also is available on request.
- A rear panel connector accepts an external trip signal of 5 volts. Operation can be user selected as latching or non-latching.
- In the event of a power outage, the system can be configured to automatically restart or to shut down until a reset is performed.

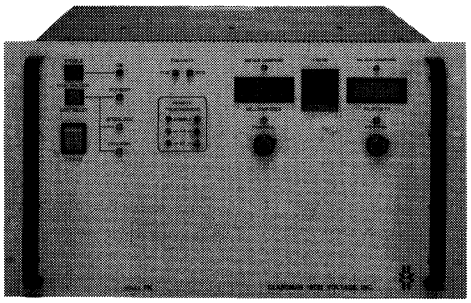
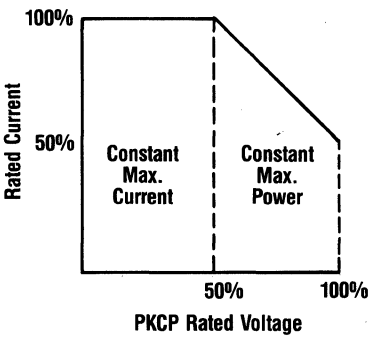
Series PKCP — 2/4 Kilowatt (220V single-phase input)



The new Series PKCP has all the performance features, operating controls, displays, and safety facilities of the Series PK. The PKCP, where CP denotes Constant Power, differs in that the output power is reduced to a choice of 2 KW or 4 KW. Output voltage ranges are the same as PK: 0 to 3 KV through 0 to 500 KV. However, from 50% to 100% of rated voltage the maximum available output current is linearly reduced providing, in effect, a region of constant power.



As the result of reduced power, PKCP does not require a 208V three-phase input supply. Instead, it operates with a 220V single-phase supply while still developing the same range of output voltages as the PK.

Hearst Engineering Software

ICMASD...IC Alternate Source Directory

The all new 1991 version of the world famous Alternate Source Directory is now available in floppy disk form for your IBM XT & AT and 100% compatible personal computer with hard drive.

The **1991 ICMASD** contains the more than 180,000 listings that appear in the Alternate Source Directory Section contained in Volume Two of the printed version of the 1991 IC Master ...plus additional discontinued parts. The database includes complete vendor addresses and phone numbers.

You can personalize the **ICMASD** for your application. The program allows you to add comments, up to 20 digits long, to each listing. These comments can be part numbers, prices, or any information specific to your needs. You may also add, delete and/or discontinue devices!

For greater flexibility the base number search feature enables you to access parts by base number, i.e., the device number stripped of prefixes and suffixes. You don't need to know the manufactures codes to call up any of the alternates to these devices.

The **1991 ICMASD** is fast, convenient and very user friendly!

Complete program documentation is included. When ordering, be sure to specify if you want the **1991 ICMASD** on three, double-sided, double-density disks OR on one high-density disk.

For immediate delivery you can order the **1991 ICMASD** at $179.50* simply by charging your Visa or MasterCard credit card. To place your order or for more information, call or write:

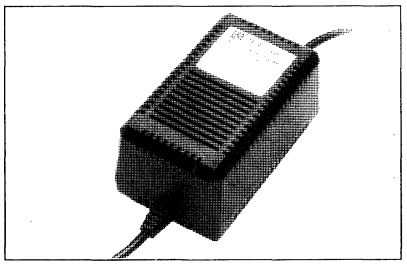
External Switching Power Supply — 30-40W



FEATURES
- Cost Effective Design
- High Efficiency
- Current Mode Circuit Design
- 115/230 VAC Selectable
- DIN Connector
- Short Circuit Protection for All Outputs
- Full Compliance with UL, CSA & TUV Safety Standards
- Detachable IEC input cord

APPLICATIONS
- External Tape Drives
- External Floppy Drives
- Test Instrumentation
- Video Games
- Small Computers
- Modems
- Digitizers

Linear Regulated External (Wall Plug-In & Desk-Top) Power Supplies

- **Input Voltage:** 120VAC ± 10%, 60Hz
- **Input Connection:** (1) Wall Plug-In—2 prong or 3-prong (2) Desk-Top—6 FT cord with 2-prong or 3-prong plug
- **Line Regulation:** ± 3% Max.
- **Load Regulation:** ± 5% Max.
- **Storage Temperature:** 20°C ~ + 85°C
- **Operating Temperature:** 0°C ~ + 50°C
- **Safety Agency:** Meet or exceed UL1012 & CSA 22.2 standards, see table below for individual approvals.
- **Housing:** Black impact-resistant thermoplastic, see table below for types and sizes.
- **Outputs:** See table below
- **Applications:** Computer, data communication, telecommunication, industrial controls, battery chargers, consumer products.
- **Output Tolerance:** ± 5% full load 120V input
- **Output Connection:** (1) Single output—PL01 ~ PL-06 (2) Multiple outputs—PL08 ~ PL10
- **Ripple & Noise:** 50 mV p-p Maximum
- **Transient Response:** 50% ~ 100% load change, recovery time 500 µS, overshoot 2% Max.
- **Storage Humidity:** 10 ~ 90% RH, non-condensing
- **Operating Humidity:** 10-75% RH, non-condensing
- **UL/CSA Listed:** • (Wall Plug-In) ⊙ (Desk-Top)

Plug-In AC/DC Unregulated Power Supplies

- **Input Voltage:** 120VAC ± 10%, 60Hz
- **Output Power:** See table below (custom spec. available)
- **Operating Temperature:** 0°C-40°C (rated for continuous duty)
- **AC Dielectric Strength:** 1500VRms 60Hz for one minute between primary and secondary
- **Humidity:** 10% to 90% RH, non-condensing
- **Input Plug:** 2-Prong (3-Prong optional available), Desk-Top models with 6 FT cords
- **Output Connection:** 6 FT cord. Screw terminals available on some models
- **Housing:** Black impact-resistant thermoplastic (case type may vary depending on availability)
- **Application:** Battery chargers, consumer products, data communication equipment, computer peripherals

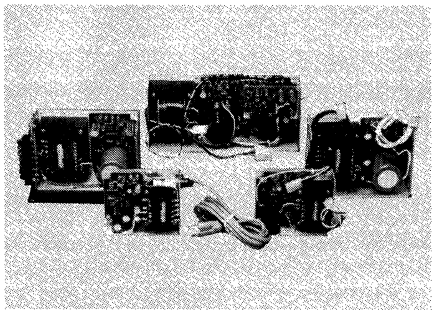
INTERNATIONAL POWER
DC POWER SUPPLIES

A Worldwide Standard of Reliability

International Power • 355 N. Lantana, Suite 710, Camarillo, CA 93010, (805) 987-7900 • FAX 805-388-2686

DC Power Supplies



Description:

The International Power open frame series are a high reliability line of power supplies designed to operate over the wide range of A.C. power sources found worldwide. This feature simplifies your inventory and service consideration by allowing the use of one standard power supply regardless of destination.

These models are designed to meet many domestic and European regulatory agency requirements. If you plan to distribute your products worldwide, obtaining necessary agency approvals can be greatly simplified by specifying the International Power open frame series.

Features:

- VDE transformer construction
- 100/120/220/230-240 VAC input
- OVP on 5 volt outputs
- ±.05% regulation
- Remote sense on most outputs
- Industry standard case size
- Full rated to 50°C
- Foldback/current limit
- Made in the USA
- Two hour burn-in
- Two-year warranty
- U.L. recognized - File #E84242
- C.S.A. Certified - File #LR52143
- Chassis notched for A.C. input
- Input accepts .110 x .032 fast-on or solder connection

Specifications:

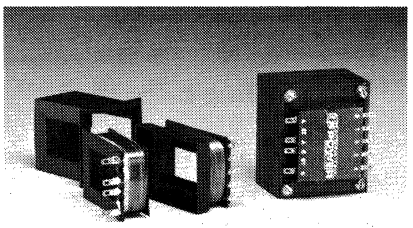
A.C. Input	100/120/220/230-240 VAC +10% −13% 47-63 Hz. See chassis A.C. connection table for jumper and line fusing requirements. Derate output current 10% for 50 Hz operation. Tolerance for 230-240 volt operation is +15% −10%.
D.C. Output:	See voltage current rating chart. Adjustment range ±5% minimum.
Line Regulation:	±.05% for a 10% line change.
Load Regulation:	±.05% for a 50% load change.
Transient Response:	50 μseconds for 50% load change.
Output Ripple:	2 volt to 15 volt units: 5.0 mV PK-PK maximum. 24 volt to 250 volt units: .02% PK-PK maximum.
Short Circuit and Overload Protection:	Automatic current limit/foldback.
Overvoltage Protection:	Build-in on all 5 volt outputs. Set at 6.2 ±.4 volts. Other outputs use overvoltage protection modules.
Remote Sensing:	Provided on most models, see voltage/current rating chart. Open sense lead protection built-in.
Efficiency: (Typical)	5 volt unit: 45%. 12 and 15 volt units: 55%. 24 through 250 volt units: 60%.
Stability:	±.3% for 24-hour period after 1 hour warm up.
Temperature Rating:	0°C to 50°C full rated, derated linearly to 40% at 70°C.
Temperature Coefficient:	±.3% maximum.
Vibration:	Per MIL-STD-810D, Method 514.3, Category 1, Procedure I.
Shock:	Per MIL-STD-810D, Method 516.3, Procedure III.

Value Added Services

International Power offers a variety of value added services for standard catalog models, examples of which are, but not limited to, installation of AC and DC harnesses, line cords, fuse holders, terminal blocks, PEM hardware, chassis modifications and output voltage/current modifications. This service is available for small quantities as well as for production quantities. Please contact your local factory representative, distributor, or the factory direct for quotations and availability of services.

DC Power Supplies

International Power • 355 N. Lantana, Suite 710, Camarillo, CA 93010, (805) 987-7900 • FAX 805-388-2686



Transformers

International Power, open frame series transformers feature separate, fully enclosed, primary and secondary coils. Meets safety requirements of VDE, UL, CSA, BPO, IEC, CEE, and ECMA.

Summary of Regulatory Safety Agency Specifications

The following regulatory agency specifications have gained acceptance throughout the electronics industry as the most important to comply with when designing products for worldwide distribution. The International Power open frame series meets or exceeds the creepage distance, leakage current and dielectric withstand test requirements of these specifications.

UL **UNDERWRITERS LABORATORIES, INC.**

UL 1012 - Power Supplies
This specification covers the safety requirements for commercial and industrial power supplies.

UL 478 - Electronic Data Processing Units and Systems
This specification covers electrically operated machine units that, separately of assembles in systems, electronically,accumulate, process and store data.

CSA **CANADIAN STANDARDS ASSOCIATION**

CSA 22.2, No. 220-1986 - Office Machines
This standard applies to office machines such as dictating machines, calculators, cash registers, duplicators, photocopiers, etc.

CSA 22.2, No. 154-1975 - Data Processing Equipment
This standard applies to equipment designed to prepare, store, process, transmit, or display data. All International Series power supplies are CSA certified.

VDE **VERBAND DEUTSCHER ELECTROTECHNIKER**

VDE 0730 Part 2P - Business Machines
This specification covers business machines used in office environments. Safety requirements are similar to IEC 380.

VDE 0804/3.77 - Telecommunications and Electronic Data Processing Equipment
This specification was the basis for IEC 435 and therefore contains similar safety requirements.

VDE 0806/11.81
This standard adopts IEC 380 as a German National Standard. It is essentially the same as IEC 380.

Please note the VDE certification is not mandatory for marketing products in Germany. However, equipment must be designed and built to meet the applicable VDE specifications. Equipment found not in compliance may be banned from sale in Germany.

BPO **BRITISH POST OFFICE TECHNICAL GUIDE No. 26**
Details the electrical protection requirements to which privately owned and maintained equipment must conform if supplied for attachment to post office maintained property.

ECMA **EUROPEAN COMPUTER MANUFACTURERS ASSOCIATION**

ECMA-57 - Safety Requirements for Data Processing Equipment
This standard applies to data processing equipment and associated electronic units, data preparation equipment and data terminal equipment. Safety requirements are essentially the same as IEC 435.

CEE **INTERNATIONAL COMMISSION ON RULES FOR THE APPROVAL OF ELECTRICAL EQUIPMENT**

CEE 10, Part 2P - Specification For Business Machines
This specification specifically covers office business machines. Safety requirements are similar to IEC 380 and VDE 0730 Part 2P.

IEC **INTERNATIONAL ELECTRO-TECHNICAL COMMISSION**

IEC 380 - Safety of Electrically Energized Office Machines
This specification is similar to IEC 435 but pertains specifically to office machines designed to be used in offices or similar locations. Such equipment as typewriters, duplicators and calculators are covered by IEC 380.

IEC 435 - Safety of Data Processing Equipment
This specification covers data processing equipment and associated electronic units, data preparation and data communication terminal equipment in office environments.

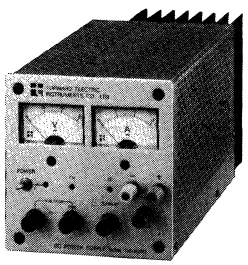
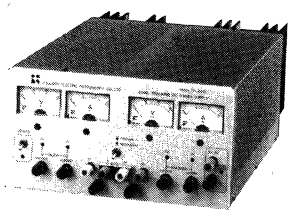
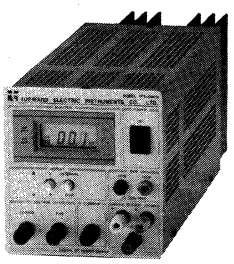
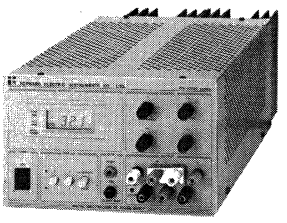
LABORATORY DC POWER SUPPLIES—TPS2000/4000 SERIES

TPS-2000	TPS-4000	TPS-2000D	TPS-4000D
			








FEATURES FOR ALL MODELS

- Constant Voltage. Constant Current Mode Operation
- Short Circuit Protection Standard
- Compact aluminum case for excellent heat dissipation
- Built in separate Voltage and Current meters for analog models
- 3½ digit auto Ranging Panel Meters for Voltage or Current display in digital models
- Single, Dual, Triple Models available
- Fully Variable Voltage and current set point control
- Excellent Ripple and Noise, Line/Load Regulations
- Unsurpassed Price/Performance Ratio
- Immediate Delivery

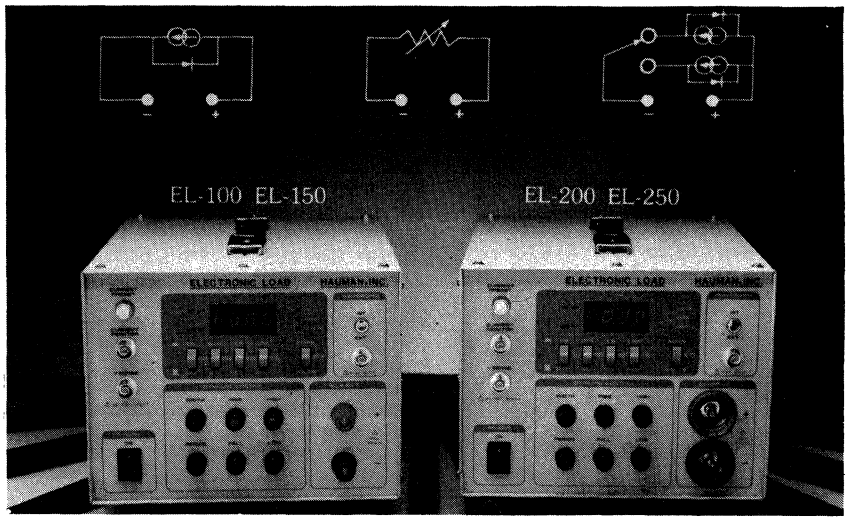
MULTI-FUNCTION, STATE-OF-THE-ART ELECTRONIC LOADS 100W, 150W, 200W, 250W MODELS



FEATURES

- Static and dynamic loading operation.
- Constant resistance (CR) and constant current (CC) modes.
- Presetable dynamic current waveform with independent control of rise and fall time, pulse width and period high and low current levels.
- 3½ digit LED voltage and current display.
- 0-5V proportional current waveform monitor.
- Optional digital I/O control interface.
- External, arbitrary waveform input (2A/μS slew rate maximum, DC-20 KHz).
- Remote voltage sensing capability.
- Protections against over-power, over-current, over-voltage, over-temperature, and reverse polarity.
- Multiple units parallelable to increase power/current capacity.
- Advanced power MOSFET design.
- Bench use or rack mount.
- Optional GPIB control with Talk/Listen capability.

APPLICATIONS:

- Power supply testing.
- Burn-in testing.
- Battery testing.
- Coil testing.
- Relay testing.
- Power resistor.
- Constant current source.
- DC switch.
- Fuse testing.
- Motor testing.

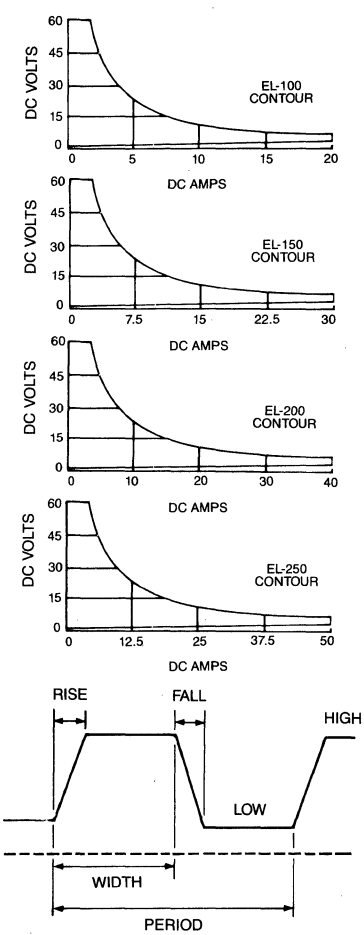
GENERAL				
Operating condition	0-40°C, 85% relative humidity maximum			
Cooling	Fan cooled			
AC input	110/220V ± 10%, 50/60Hz, Factory set			
Dimensions	8"W × 6"H × 13"D			
Weight	Approximately 15 Lbs			

OPTIONS

- Rack mounting kit for 1 unit—Part no. RMK1
- Rack mounting kit for 2 units—Part no. RMK2
- digital I/O interface card—Part no. DA4000B

OPERATING AREA



PERIOD: Time interval between the leading edge of consecutive pulses
WIDTH: From leading edge start to trailing edge start.
RISE/FALL: Time interval between the 10% and 90% amplitude point on the leading/trailing edge.
HIGH/LOW: Current waveform amplitude high/low level.

HC: The New Standard for Reliability and Efficiency in High Power Switchers

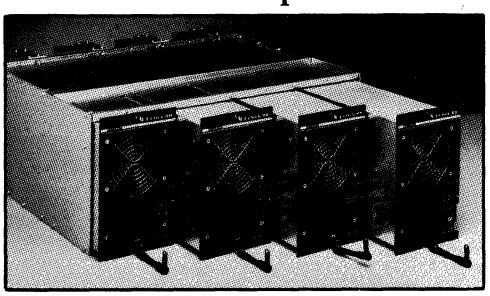
Hi-Rel Power MOSFET Design With Unique Current Mode Control Guarantees Minimum 250,000 Hour MTBF

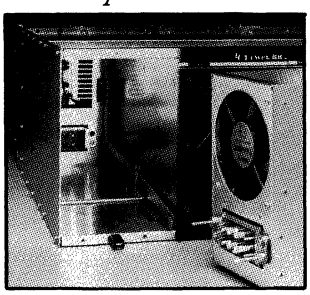
This new concept in high power switcher design sets new standards for high performance and operating life.

HC switch-mode supplies incorporate new technology that delivers maximum power from the smallest possible package. Choose from 500 to 4000 watts, with one to five outputs; in standards or custom designs.

This thoroughly proven line allows instantaneous rejection of input voltage transients and absolute current sharing of parallel outputs, while assuring transient response to large step load changes in **less than 50 microseconds.** Single Pole loop compensation yields greater stability with tighter regulation, and 120 Hz ripple is eliminated entirely!

NEW! HC "Hot Swap" Redundant Power Systems





This unique concept allows power supplies to be replaced by untrained personnel while your system is in operation. Hot Swap eliminates any possibility of wiring errors, and is ideal for applications in fault-tolerant systems. Select any standard power supplies listed on this page, then call us for a technical consultation.

Specifications

INPUT SPECIFICATIONS

AC Input Ranges: 90-132 VAC, 180-264 VAC, 47-440 Hz, single or three phase.
Optional: 180-264 VAC, three phase.
DC Input Range: 42-58 VDC, 21-28 VDC optional. Other DC inputs available on special order.
Line Transient: Meets IEE 472.
Line Filtering: Optional filter complies with FCC Docket 20780, Level A, and VDE 0871, Level A.

OUTPUT SPECIFICATIONS

Voltage Adjust Range: ±10%.
Load Regulation: 0.2%.
Cross Regulation: 0.1% maximum.
Ripple & Noise: 1% or 50 mV, whichever is greater.
Rapid Transient Response: <50 μsec.
Output Polarity: All outputs are floating.
Minimum Load: No minimum loading is required on any output.

LOGIC AND CONTROL

Remote Sense.
Remote Margin.
AC Power Fail Warning.
Current Sharing.
Current Monitor.
DC- OK.

PROTECTION

Over Voltage Protection.
Over Current.
Thermal Shutdown.
Reverse Polarity.

HC Switcher Selection Guide—500 to 4000 Watts, 1 to 5 Outputs.

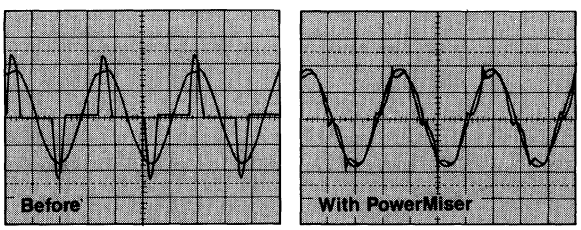
Introducing PowerMiser: The Patented, New Breakthrough in Power Factor Correction

Cuts AC Input Requirements by 30%; Reduces Harmonic Distortion To Meet DOD-STD-1399, Section 300.

Available for power levels from 500 through 4000 watts, this patented new concept in power factor correction assures safe and reliable operation of computers and business equipment while reducing AC input requirements. This unique device also attenuates AC line harmonics induced by switching supplies and prevents overloading of neutral conductors and transformers in major electrical/electronic installations.

This cost effective technology breakthrough permits operation of a 1000 watt switch-mode power supply from a 115 VAC, 15 Amp outlet, without exceeding the 12 Amp limit imposed by UL regulations.

Eliminate Troublesome Harmonic Line Distortion Induced by Switching Power Supplies. PowerMiser Converts Current Pulse to Modified Sine Wave.



PowerMiser Selector

Select Maximum Power and Case Configuration

Output (1)	Case Size	Optional (3) Filter	Input Voltage	Output Power Code	Input Term.	Output Term.
500 W	A	Yes	1, 2, or 4	0	1 (2)	1
500 W	B	—	1, 2, or 4	0	1	1
500 W	D	Yes	1	0	2	3
1000 W	A	Yes	1, 2, or 4	1	1 (2)	1
1000 W	B	—	1, 2, or 4	1	1	1
1500 W	A	Yes	1, 2, or 4	9	1 (2)	1
1500 W	B	—	2	9	1	1
2000 W	A	—	2	2	1	1
2000 W	B	—	2	2	1	1
2000 W	E	—	1	2	4	4
3000 W	E	—	2	3	4	4
3000 W	F	—	2	3	4	4
4000 W	E	—	2	4	4	4
4000 W	F	—	2	4	4	4

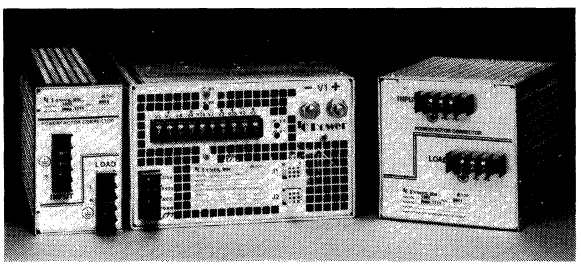
(1) Specify a power rating equal to the maximum output power of your power supply. More than one power supply can be connected to the PowerMiser if the combined output power does not exceed the rating of the PowerMiser.
(2) The input terminals will be studs, Code 5, if the optional AC line filter is ordered.
(3) Optional filter not available on units with strappable inputs.

Specifications

AC Input Voltage Ranges:
90-132 VAC, 47-63 Hz, Single Phase
180-264 VAC, 47-63 Hz, Single Phase

Output Power Ranges:
500 W, 1000 W, 1500 W, 2000 W, 3000 W, 4000 W.
Specify power rating equal to the driven power supply or supplies.

Optimum Operating Range: 50 to 100% of the full rated power. Operation below 50% of rating will simply result in a slight degradation of the power factor.



Power Factor: .98
Conversion Efficiency: 98%
Harmonic Current Attenuation: Complies with DOD-STD-1399 for Section 300A, Type 1 Power, Under 1 KVA.
Line Filtering: Optional filter complies with Level B of FCC Docket 20780 and VDE 0871.
Inductive Loading: The PowerMiser has been specifically designed to work with capacitive input power supplies. However, up to 10% of the total load may be inductive loads such as fans or motors.
"X" Caps: The "X" caps in the input filters of the driven power supplies should not exceed .01 mfd per watt.
Protection: External fuse or circuit breaker required
Operating Temperature: 0°C-70°C full power to 50°C, derate to 60% at 70°C.
Storage Temperature: −55°C To +85°C, with maximum of 95% relative humidity.
Cooling: Case E and Case F have forced air cooling. All other cases are convection cooled.
Safety: Meets UL 478, CSA C22.2 #220, and IEC 950. Check factory for status of approvals
Precautions:
Lead length between PowerMiser and Power Supply should not exceed 8 feet.
AC Power should be turned off before disconnecting load.
The PowerMiser is an AC in/AC out device which operates at line frequency. Not recommended for mounting within 24″ of equipment sensitive to 60 Hz radiation.

NOTES:
(1) Performance with products manufactured by other than HC POWER cannot be guaranteed.
(2) Specifications subject to change without notice.

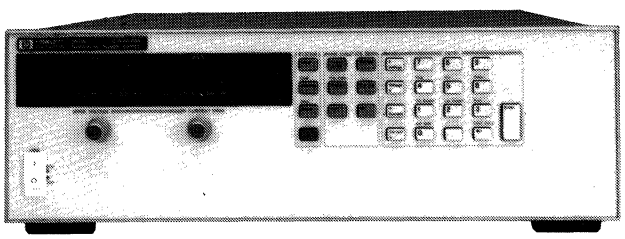
Dedicated to the Design and Manufacture of High Quality Switchers

HEWLETT PACKARD

For Performance and Selection... Hewlett-Packard DC Power Supplies and Electronic Loads



HP 6671A HP-IB

HP's "One-Box" Solution Power Supplies

Hewlett-Packard's approach to designing power supplies for computer-controlled applications is to design everything related to the power supply into one box. This includes HP-IB (IEEE-488) voltage and current programmers, voltage and current readback, load protection circuits, SRQ interrupts, status readback, and relay control. The benefits of this approach are:

- Ease-of-integration
- Ease-of-use
- Reliability
- Fully specified performance
- Reduced system cost
- Protection for the DUT

These popular low-cost bench supplies are designed for general laboratory use. All models feature short-circuit protection and CV and CC operation.

For same day shipment call HP Direct at 1-800-538-8787 to place your order, and it will be shipped within 24 hours.

For details on HP's full range of power supplies from 10 to 11,000 watts, request the HP DC Power Supply Catalog described below.

- Ideal for testing dc power supplies, batteries and power components
- Constant current, constant voltage, and constant resistance modes
- Built-in transient generator
- "One-Box" Solution with full HP-IB control and readback
- Front panel control
- High reliability

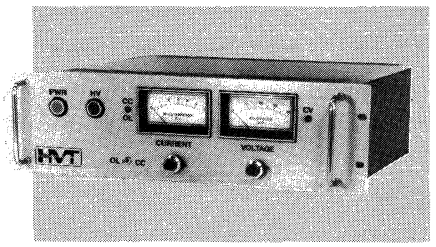
Call 1-800-752-0900 Ext. 2130 and ask for Hewlett-Packard's DC Power Supply Catalog. This handy reference catalog provides detailed specifications for HP's complete range of dc power supplies and electronic loads.

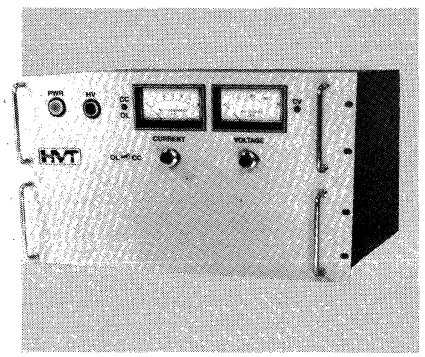
- Over 90 models to choose from
- Convenient reference format
- Application information

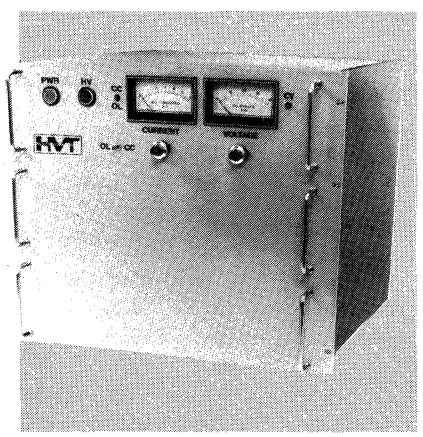
HEWLETT PACKARD

HIGH VOLTAGE TECHNOLOGY, INC.

HIGH VOLTAGE REGULATED DC POWER SUPPLIES







FEATURES:

- Light weight, compact
- Low stored energy
- True Current and Voltage monitor
- Programmable Output Voltage & Current
- CC/CV Automatic Crossover
- Overload, Arc-over & Short Circuit Protection
- Efficiency is typically better than 75%
- External Polarity Reversal
- External Interlock/Output Inhibit
- Remote Voltage & Current Monitoring

DESIGN CONCEPT

High Voltage Technology LS Series incorporates high efficiency switch mode technology. The DC unregulated bus is switched at a frequency greater than 20KHZ rate by means of a power switch. All control and monitoring functions are isolated from the power line.

Ferrite Core high voltage transformer is used to perform the necessary step-up to power the high voltage multiplier.

Voltage or Current Regulation is achieved by independent high gain wide band width feedback networks, thus achieving excellent dynamic power supply regulation. A control signal is generated by a comparison between the sampled output voltage or output current with a temperature stabilized reference voltage. This signal controls the output of the pulse width modulator, allowing the output voltage to be maintained to better than 0.005%.

Constant Voltage/Constant Current Automatic Crossover operation is achieved by means of a gating function.

SPECIFICATIONS:

Output Voltage:
Adjustable from zero to maximum rated output voltage.

Output Current:
Adjustable from 10% to 100% rated output current.

Voltage Regulation:
Line: ±0.005% over specified input range.
Load: ±0.005% for full load change.

Current Regulation:
Line: ±0.005% over specified input range.
Load: ±Better than 100μA from 10% to rated output voltage.

Ripple:
60 & 150 Watt units: 0.02% RMS 3KW units: 0.15%
300, 600 & 1KW units: 0.05% RMS

Temperature Coefficient:
100PPM/°C over the range of 0 to 60°C (for voltage range from 10% to 100% of rated output).

Stability:
0.01%/hour; 0.03%/8 hours: for voltage range from 10% to 100% of rated output.

Input Voltage:
AC input voltage ± 10% all units

OPTIONS

#1 (ZVR) Zero Voltage Reset:
Output Voltage program must be set to zero before high voltage can be programmed.

#2 (OVR) Overvoltage Reset:
Power supply will shut down when output voltage exceeds preset setting (adjustable from 10% to 110% of maximum rated voltage).

#3 (DPM) Digital Panel Meter:
3½ digit meter for Voltage and Current. 4½ digit meters available, consult factory.

#4 (TTL):
Compatible "enable" line.

#5 (RCP) Remote Control Panel:
Power supply can be controlled up to 100 feet away from drive unit and high voltage assembly.

#6 (MOD) SPECIAL MODIFICATION:
Any non standard option or modification consult factory.

#7 IEEE-488 or RS232C INTERFACE.

30 YEARS OF SERVICE

Hipotronics®

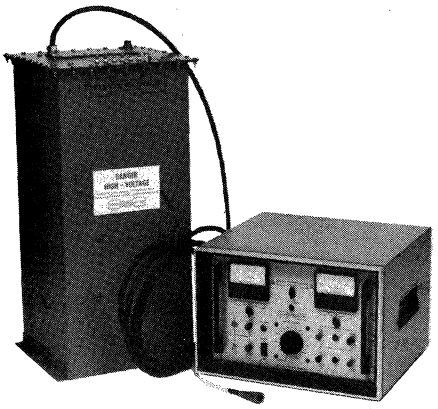
1KV TO 1 MEGAVOLT, 1KW TO 1 MEGAWATT HIGH VOLTAGE DC POWER SUPPLIES

Hipotronics manufactures a complete line of High Voltage Power Supplies with continuously adjustable output voltages for Electrostatic Systems, Accelerators, Lasers, High Voltage Power Sources, X-Ray Systems, Precipitators, DC Transmission Line Components and more.

Modified units can be supplied with thyristor regulators for capacitor changing applications as well as crowbar circuits, high energy discharge solenoids, line regulators, special control functions, and special packaging.

Standard Features
(provided with all units)

- Output connected triple range voltage meter.
- Triple range current meter in return leg of HV circuit.
- Reversible polarity.
- Rated current available from zero to rated voltage.
- Solid state rectifiers.
- Continuously variable output voltage from zero to maximum.
- HV on and off pushbuttons.
- Meter recalibration potentiometers.



Typical DC Power Supply

Quality Products

These units are designed and manufactured with the highest quality components. They are available with fully instrumented control consoles or without controls for use in OEM equipment.

All critical components—transformers, capacitors, rectifier assemblies, tanks, etc., are designed and manufactured by Hipotronics so that superior quality and on-time delivery schedules can be assured.

30 YEARS OF SERVICE

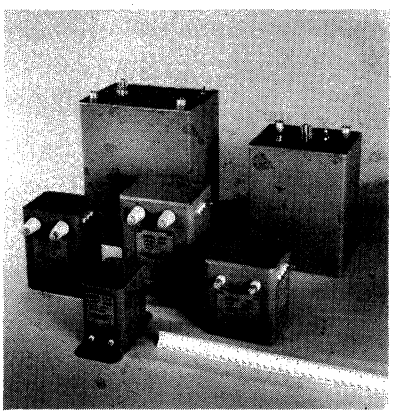
Hipotronics®

HV DC POWER SUPPLIES

Some of the High Voltage dc Power Supplies Hipotronics has manufactured during the past 25 years are illustrated on these pages. Call with your application and for other power products see our pages under transformers and ac Power Supplies.

Power Packs:

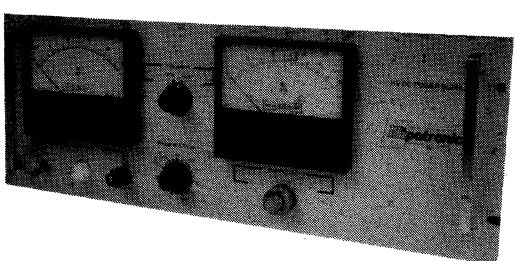
Manufactured with all components rated at well above designated operating level and pre-assembly Hipot tested at 1.5 operating voltage. Power Packs are available from 2.5 kV to 150 kV. Input voltage 115/220V.



Model No.	Output KV	MA
2.5B	2.5	5
2.5C	2.5	10
5B	5	5
7.5C	7.5	10
10B	10	5
10C	10	10
15C	15	10
20B	20	5
30B	30	5
30C	30	10
40A	40	2.0
50B	50	5
60A	60	2.0
100B	100	5
100C	100	10
150B	150	5

Metered Power Packs with simplified controls:

Provide complete output metering and overload protection system in a unit suitable for mounting in standard 19″ relay racks. Current limited to 5 mA.



SPECIFICATIONS:

INPUT: 125 Volts (Output Voltages & Current — Stated for Nominal 117 Volt Input)
Regulation: 10% to 15% No Load to Full Load.
Ripple: 0.5% RMS per Milliampere Output.

Model No.	Output (kV)	Current (mA)	Ripple (%rms/mA)	Polarity	KV Meter Range (kV)	Current Meter Range (mA)
R2B	0- 2	5	0.5	Reversible	0- 2.5	0-5
R5B	0- 5	5	0.5	Reversible	0- 6	0-5

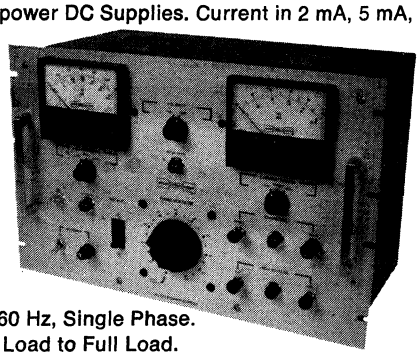
R50B	0-50	5	0.5	Reversible	0-50	0-5
R60A	0-60	2.0	0.5	Reversible	0-60	0-2.0

Power Packs with deluxe controls:

Provided with many safety and control features previously found only in higher power DC Supplies. Current in 2 mA, 5 mA, and 10 mA.



SPECIFICATIONS:

Input: 115 Volts, 50/60 Hz, Single Phase.
Regulation: 15% No Load to Full Load.
Ripple: 0.5% RMS Per Millampere Output.
HV Output: 20 Foot Shielded Cable.
Polarity: Reversible

Model No.	Max. kV	mA	kV Meter Ranges	mA Meter Ranges

EEM MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

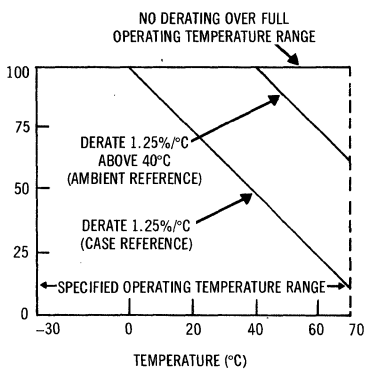

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

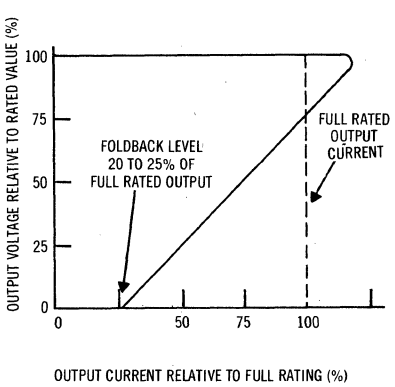

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

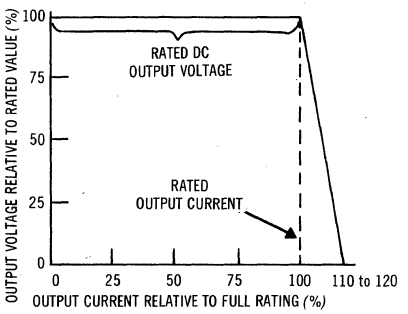

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

HITRAN

Key source for reliable magnetic components, power supplies and control systems for over 40 years.

DC POWER SYSTEMS DC BATTERY CHARGERS

Also see our catalog pages under AC POWER SUPPLIES and TRANSFORMERS.

AT10 SERIES STATIONARY FLOAT BATTERY CHARGERS

AT10 series charger/rectifiers are self contained, constant potential, DC power supplies designed for floating and charging stationary batteries and/or supplying power to utility, communication and industrial type loads.

***AT** means **Advanced Technology** microprocessor control.*

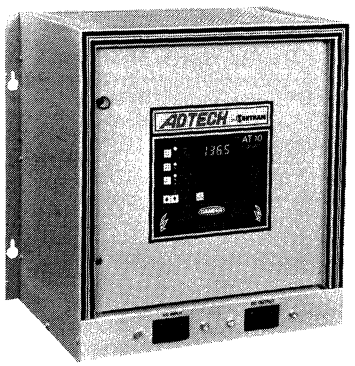
Design Features:

- *Modular Construction* — Rectifier, microprocessor control, input/output, power transformer, filter and alarm assemblies are all modular and easily replaceable.
- *Long Life* — All units are engineered for 30 years life with a MTBF of 60,000 hours (6.85 years).
- *Field Serviceable* — For fast service, enclosure and instrument panel are easily removable without disturbing chassis or installed conduit. Schematic and diagnostic information plates are mounted right on enclosure. Modular construction results in an MTTR of less than 60 minutes.
- *Installation and Field Adjustment* — Units are easily wall mounted. Control, alarm and operating level set points are adjusted digitally from the front panel while on-line, without the need to vary loads or external conditions.

Specifications

Input

- Voltage: 120/208/240 Volts +10%, −12%, single phase, 60 Hz ±5%
- Power Factor: 0.80 pf at full load
- Efficiency: 85% minimum at 50-100% load



Output

- Voltage Ratings: 12, 24, 48 or 130Vdc nominal
- Current Ratings: 6, 12, 16, 20 or 25Adc
- Voltage Regulation: ±0.25% for line, load and temperature variations
- Current Limited: 110% of rated output current
- Continuous Rating: 110% output at max equalize volts and 0-50°C
- Electrical Noise: 30mVrms/32dBrnC weighted max on filtered units
- Surge Withstand Capability (SWC): per IEEE-472/ANSI C37.90a

Standard Accessories & Features

- Digital LED display meter for Vdc, Adc, timer hours and alarm levels
- AC input and DC output circuit breakers
- 0-255 hour manual float/equalize timer and selector switch
- 0-255 hour line failure auto-equalize timer
- Local or remote voltage sense
- High DC voltage shutdown
- Open control loop shutdown
- Reverse polarity start inhibit
- MOV surge suppressors
- Switchboard wire, UL VW-1

Optional Accessories

- Alarm assembly with local LEDs and alarm relay contacts for AC fail, DC fail, High Vdc, Low Vdc, (+) ground, (−) ground
- High AIC circuit breakers
- Input lightning arrester
- Output filter for 30mVrms ripple
- Temperature compensation w/probe
- Fungus proofing (Tropicalization)
- Floor or rack mounting
- Drip shield
- NEMA 4 or NEMA 12 enclosures

Enclosure Sizes (inches)

- 12V-6, 25A; 24V-6; 25A; 48V-6, 12A; 130V-6A models: 15.25H x 16W x 10D
- 48V-16, 25A; 130V-12, 25A models: 17.63H x 19.25W x 12.5D

SCR/SCRF SERIES STATIONARY FLOAT BATTERY CHARGERS

Industrial float type chargers, designed to automatically control charging rates for a wide variety of battery types. Filtered and unfiltered 600V class input. Single phase and three phase. 47 to 63 Hz. Outputs range from 12 to 260V at 6 to 600Adc.

***SCR/SCRF Series** constant voltage chargers are automatically controlled by solid state integrated circuitry.*

Performance

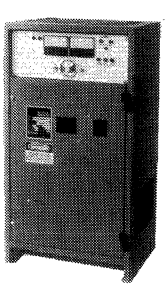
- Full rated output for both continuous and intermittant loads.
- Electronic current limiting at 110% of rated output.

Regulation.

- Continous taper charging as required.
- ± ½% Load Regulation of DC voltages from no load to full load.
- ± ½% of DC voltage setting maintained with input line variations of ±10% voltage, and/or ±5% frequency.
- ±1% Output Regulation maintained against the combined variations of line, load and temperature.

Design Features

- No adjustment taps required.
- Lockable float/equalize controls on recessed front panel.
- Enclosures wall, floor or rack mountable.



SCR/SCRF Series Battery Charger

AC Input Voltage

120, 220, 240, 480 single phase, 47-63Hz and 208, 240, 380, 416, 480 three phase, 47-63Hz.

DC Output Ratings

6-600 Adc at 12, 24, 48, 130 or 260 Vdc, nominal.

Standard Accessories

- DC Ammeter and Voltmeter.
- Potentiometers for float and equalize charge adjustments.
- AC input circuit breaker.
- Dual fused DC output.
- Front panel switch to change from float to equalize charging rate.
- Internal connection blocks for AC input, DC output and optional accessories.
- Protection diode to prevent damage due to improper connection of battery cables.

Optional Accessories

- DC circuit breaker to replace standard fusing.
- Equalize timer, 0-72 hour.
- Ground detection alarm relays and lights.
- HI & LO Vdc alarm relays and lights.
- Charger failure alarm relay and lights.
- Output filtering as required, 30mV RMS or less as charger or eliminator.
- And many more.

Designs and specifications subject to change without notice.

SYMBOLS USED BY INTERNATIONAL REGULATORY AGENCIES

These symbols appear on many electrical/electronic components distributed in the world market. They indicate that a country's standard-setting agency has approved the design of the component and/or a testing agency has approved the performance of the component in meeting the standard. This page lists only those countries that have a *symbol* to represent their authority.

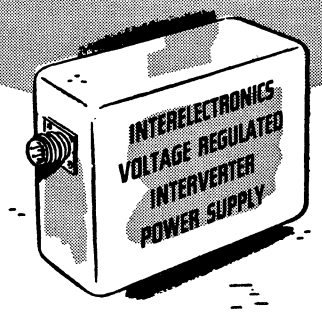
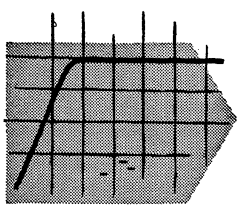
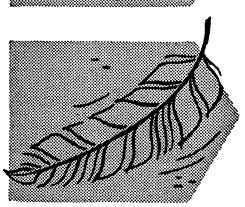
PROVEN RELIABILITY—
DC-DC, DC-AC, SOLID-STATE POWER INVERTERS
over 260,000 logged hours— voltage-regulated, frequency-controlled, for missile, telemeter, ground-support, 135°C all-silicon units available now—



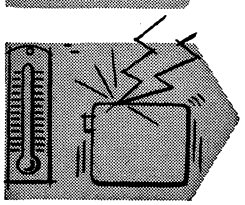


Interelectronics all-silicon thyratron-like gating elements and cubic-grain toroidal magnetic components convert DC to any desired number of AC or DC outputs from 1 to 10,000 watts.



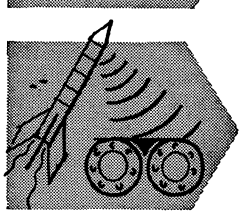
Ultra-reliable in operation (over 260,000 logged hours), no moving parts, unharmed by shorting output or reversing input polarity. High conversion efficiency (to 92%, including voltage regulation by Interelectronics patented reflex high-efficiency magnetic amplifier circuitry).

Wide input voltage range (1 to 250 volts DC). Wide input voltage regulation (output voltage maintained with variations up to 50% in input voltage).

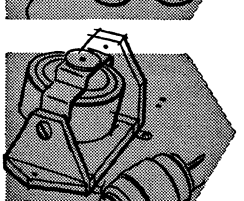


Light weight (to 6 watts/oz.), compact (to 8 watts/cu. in.), low ripple (to 0.01 mv. p-p), excellent voltage regulation (to 0.1%), precise frequency control (to 0.2%) with Interelectronics extreme environment magnetostrictive standards or to 0.0001% with fork or piezoelectric standards.

Complies with MIL specs. for shock (100G 11 misc.), acceleration (100G 15 min.), vibration (100G 5 to 5,000 cps.), temperature (to 150 degrees C), RF noise (I-26600).



AC single and polyphase units supply sine waveform output (to 2% harmonics), will deliver up to ten times rated line current into a short circuit to actuate MIL type magnetic circuit breakers or fuses, will start gyros and motors with starting current surges up to ten times normal operating line current.



Now in use in major missiles, powering telemeter transmitters, radar beacons, electronic equipment. Single and polyphase units now power airborne and marine missile gyros, synchros, servos, magnetic amplifiers.

Interelectronics—first and most experienced in the solid-state power supply field produces its own all-silicon solid-state gating elements, all high flux density magnetic components, high temperature ultra-reliable film capacitors and components, has complete facilities and know how—has designed and delivered more working KVA than any other firm!

For complete engineering data, write Interelectronics today, or call (914) EL 8-8000 in Congers.

MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

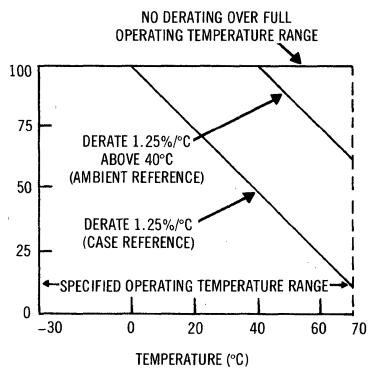

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

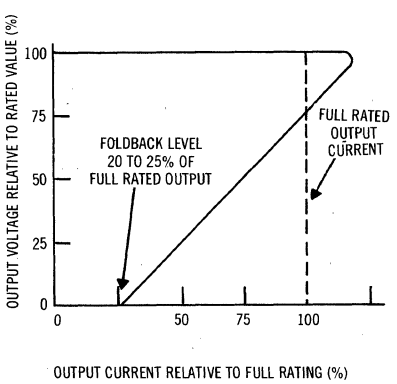

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

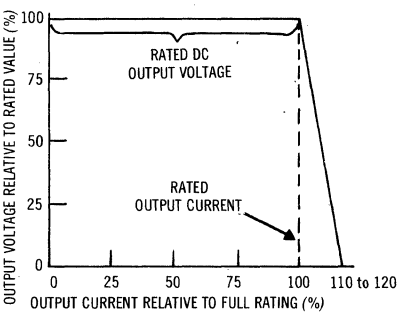

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

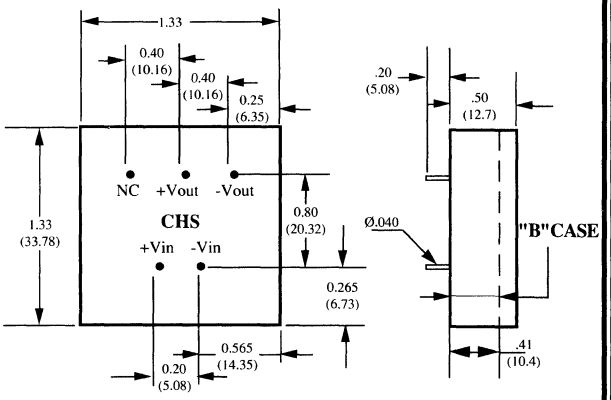
CH CASE



COMMON SPECIFICATIONS:

All Specifications Typical @ +25°C, Nominal Line, and Full Load Unless Otherwise Specified.

Input Filter ..... **Π (Pi) Filter**

Isolation Voltage ..... **500VDC, min. (Except Non-Isolated HNS, LNS and QNS Series, and CHS Series (2,500 VDC, min.)).**

Operating Temperature Range: ..... **-25°Cto +71°C**

Storage Temperature Range: ..... **-40°C to +125°C**

Cooling ..... **Free Air Convection**

EMI/RFI ..... **Six-Sided Continuous Metal Case, (Except C Series and Some D and F Series)**

Case Material ..... **Phenolic for C Series and Some D and F Series, Otherwise Black Painted Copper, or Anodized Aluminum with Non-conductive Base.**

Accessories: .. **Mating Sockets and Heat Sinks Available for Most Models**

COMMONLY USED ELECTRICAL/ELECTRONIC ABBREVIATIONS AND ACRONYMS

A
A/D acrylonitrile butadiene-styrene
A/D analog to digital
ADC analog to digital converter
ADP automatic data processing
AFC audio frequency control
AFT automatic filter test
ALGOL algorithmic language
AM a logical operator
AQL acceptable quality level
ASCII American national standard code for information interchange
ASIC application specific IC
ATE automatic test equipment
ATG automatic test generation
AWG American wire gauge

B
BALUN balanced to unbalanced
BASIC beginners' all-purpose symbolic instruction
BCD binary-coded decimal
BNC baby "N" connector
BUS basic utility syste

C
CAD computer-aided design
CAE computer-aided engineering
CAM computer-aided manufacture
CAMAC computer-automated measurement and control
CAPP computer-aided process planning
CAT computer-aided test
CATV cable television or community antenna television
CCC (leaded) ceramic chip carriers
CCD computer-controlled display
CERMET ceramic metal element
CIE computer-integrated engineering
CIM computer-integrated manufacturing
CLCC ceramic leadless chip carriers
CMOS complementary metal-oxide semiconductor
Comm. communications
CPS characters per second
CPU central processing unit

D
D/A digital to analog
DAC digital to analog converter
DBMS data base management system
DC direct current
DFT design for testability
DIAC bidirectional trigger diode
DIL dual in-line
DIN Deutsche Industrie Normenausschuss
DIP dual in-line package
DPM digital panel meter
DRAM dynamic RAM
DTL diode transistor logic

E
EDA electronic design automation
EDP electronic data processing
EBCDIC extended binary coded decimal interchange code
EEPROM electrically erasable PROM
EIA Electronic Industries Association
EMC electromagnetic compatibility
EMI electromagnetic interference
EMP electromagnetic pulse
EPROM erasable programmable ROM
ESR equivalent series resistance

F
FEP fluorinated ethylene propylene Copolymar, 200° Teflon
FET field-effect transistor
FM frequency modulation
FORTRAN formula translator

G
GaAsFET gallium arsenide FET
CMIP commn management information protocol
GPIB general purpose interface bus
GPS global positioning system

H
HF high frequency (3 to 30 MHz)
HIPOT test, measurement, and diagnostic equipment
HLL high level language
HV high voltage
Hz Hertz

I
IAB Internet Activities Board
IC integrated circuit
IDC insulation displacement contact
IF intermediate frequency
IO input/output (devices)
IR insulation resistance (or) infrared
ISDN integrated services digital network
ISO International Standards Organization

J
JEDEC Joint Electronic Device Engineering Council
JFET junction FET
JMOS junction MOS

K
kHz kilohertz (10^3 hertz)
KSR keyboard send /receive

L
LAN local area network
LC (filters) inductance/capacitance
LCC leaded chip carrier
LCD liquid crystal display
LED light-emitting diode
LF low frequency (30 to 300 kHz)
LIF low insertion force
LNA low noise amplifier
LNB low noise band
LSI large scale integration
LVDT linear velocity displacement transformer

M
MASER microwave amplification by stimulated emission of radiation
MATV master antenna television
µF microfarad
MHz megahertz
MIC microwave IC
MIPS million instructions per second
MIB microcomputer interface board
MOS metal oxide semiconductor
MOSFET metal oxide semiconductor FET
MOSIGT metal oxide semiconductor insulated-gate transistor
MOV metal oxide varistor
MPU microprocessor unit
MSI medium scale integration

N
NBS National Bureau of Standards
NEMP nuclear electromagnetic pulse
NIM national instrumentation module
NOR not OR
NTC negative temperature coefficient

O
OCR optical character reader
OEM original equipment manufacturer
OR a logical operator
OSI open systems interconnection

P
PAL programmable array logic
PC printed circuit
PCB printed circuit board
PCM pulse code modulation
PCS plastic clad silica
pF picofarad
PGA pin grid array
PIN positive-intrinsic-negative (transistor)
PLA programmable logic array
PLCC plastic leaded chip carrier
PLL phased lock loop
PPI plan position indicator
PROM programmable ROM
PTC positive temperature coefficient
PUT programmable unijunction transistor

Q
QAM quadrature amplitude modulation
Q (meter) quality-factor meter

R
RAM random access memory
RC resistance-capacitance
RFI radio frequency interference
RMS root mean square
ROM read only memory
RF radio frequency
RFC radio-frequency choke
RFI radio-frequency interference
RTD resistance-temperature detector
RTL resistor transistor logic
RTV room temperature vulcanizing
RW read/write

S
SAS silicon asymmetrical switch
SBC single board (micro) computer
SBS silicon bilateral switch
SCR silicon-controlled rectifier
SCS silicon-controlled switch
SDA source & detector assemblies
SGMP simple gateway monitoring protocol
SIDAC bidirectional voltage-triggered switch
SIMM single in-line memory module
SIP single in-line package
SMD surface mount device
SMT surface mount technology
SNMP simpole network management protocol
SO small outline
SOIC small outline IC
SOT small outline transistor
SSI small scale integration
SSR solid-state relay
STL Schottky transistor logic
SUS silicon unilateral switch

T
TC temperature coefficient
TCE thermal coefficient of expansion
TXCO temperature compensated crystal oscillator
TFE tetrafluoride ethylene propylene Copolymer, 250° Teflon
TRIAC bidirectional AC switch
TTL transistor-transistor logic
TTY teletypewriter

U
UHF ultra high frequency (300 MHz to 3 GHz)
UJT silicon unijunction transistor
UL Underwriters Laboratory
UPS uninterruptible power supply

V
VAC volts (of) alternating current
VAN value-added network
VAR volt-ampere reactive
VCR video cassette recorder
VDC volts (of) direct current
VHF very high frequency (30 kHz to 300 MHz)
VHSIC very high speed integrated circuit
VLF very low frequency (3 to 30 kHz)
VLSI very large scale integration
VME virtual machine environment
VRM voice recognition module
VTVM vacuum tube volt meter
VU volume unit
VSWR voltage standing wave ratio

W
WPS word processing software

Y
YIG yttrium iron garnet

Z
ZIF zero insertion force

International Power Sources, Inc.

DC/DC Converters

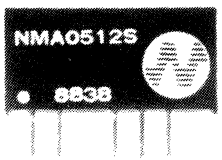
½ Watt to 650 Watts

Switching Power Supplies

15 to 650 Watts

½ Watt–2 Watt Epoxy Encapsulated DC/DC Converters

- 5, 12, 24 and 48 VDC Inputs
- SIP and DIL Packages
- 500 VDC Isolation
- 0.12 in² board space
- 80% Efficiency
- 22 Watts per in³



Output Voltage	Output Current	Part Number			
		5VDC Input	12VDC Input	24VDC Input	48VDC Input
±5VDC	±100mA	NMA0505	NMA1205	NMA2405	NMA4805
±12VDC	±40mA	NMA0512	NMA1212	NMA2412	NMA4812
±15VDC	±30mA	NMA0515	NMA1215	NMA2415	NMA4815

Output Voltage	Output Currents	Part Numbers	
		5VDC Input	12VDC Input
5VDC	160mA	NME0505	NME1205
12VDC	84mA	NME0512	NME1212
15VDC	67mA	NME0515	NME1215

Output Voltage	Output Currents	Part Numbers	
		5VDC Input	12VDC Input
±5VDC	±200mA	NMH0505	NMH1205
±9VDC	±110mA	NMH0509	NMH1209
±12VDC	±85mA	NMH0512	NMH1212
±15VDC	±65mA	NMH0515	NMH1215

Add suffix "S" for single-in-line package, suffix "D" for dual-in-line package.

NEW! NMF Series for Flash Memory Programming

- Remote Flash Programming
- 0.18 in² Board Space
- Fully Regulated Outputs

Output Voltage	Output Currents	Part Numbers	
		5 VDC Input	12 VDC Input
5 VDC	100mA	NMF0505S	NMF1205S
9 VDC	55mA	NMF0509S	NMF1209S
12 VDC	40mA	NMF0512S	NMF1212S
12.75 VDC	40mA	NMF0513S	—
15 VDC	33mA	NMF0515S	NMF1215S

1.5–6.0 Watt DC/DC Converters

- 5, 12, 24, 28 and 48 VDC Inputs
- Industry Standard Pinouts
- 500 VDC Isolation
- Input π Filters
- Fully Regulated Outputs
- Low Cost

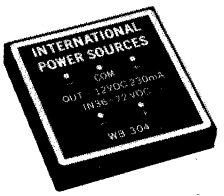
NEW! WA/WB/WC Series
3/5/15 Watt DC/DC Converters



- 2:1 Input Range
- Isolated Outputs
- Efficiency to 80%
- 100 kHz Switching Frequency
- WA—24 Pin DIL Package
- Input π Filter
- Fully Regulated Ouputs
- Industry Standard Pinouts
- PCB Mountable
- WB/WC—2.0″×2.0″×.4″ Package

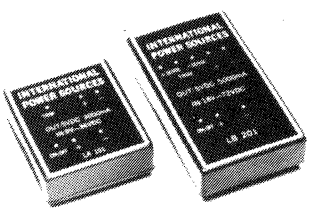
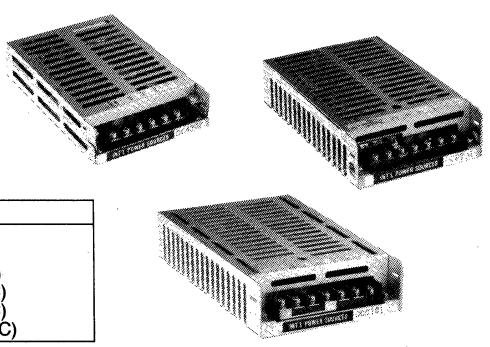
LA/LB Series
15–30 Watt DC/DC Converters



- 4:1 Input Range
- PCB Mountable
- Efficiency to 86%
- Industry Standard Pinouts
- 500 VDC Isolation
- Remote Sense/Disable

15–150 Watt AC/DC Power Supplies and DC/DC Converters

- Single, Dual, and Triple Outputs
- Compact Size/Light Weight
- 500 VDC Input/Output Isolation
- High Efficiency—80kHz Switcher
- Low Cost
- Fully Enclosed
- 8 Input Ranges
- No Minimum Load
- Same Size AC or DC Input



Series	Output Power
ACA/DCA	15 Watts
ACB/DCB	25 Watts
ACC/DCC	50 Watts
ACE/DCE	100 Watts
ACF/DCF	150 Watts

Input Voltage Ranges
90–132 VAC
180–264 VAC
12 volt nominal (9–16 VDC)
24 volt nominal (19–32 VDC)
48 volt nominal (38–63 VDC)
110 volt nominal (85–140 VDC)

NEW! PUP55 Series — External Switching Power Supplies

- Universal Input Range 85–264 Vac
- Switching Power Supply Small Size
- UL 1950, CSA 1402C & IEC 950 Approved
- Enclosed Polycarbonate Case 94V-0 Rated
- Built-In EMI/RFI Filter VDE "A", FCC "B"
- IEC 320 Inlet, DIN Output Connectors

Power	Model	Input	Output						
			+5V	+12V	−12V	+24V	−5V	+15V	−15V

interpoint

The World-Wide Reliability Standard

Interpoint is the premier world-wide supplier of high reliabilty dc-dc converters. Its components supply reliable power on virtually every commercial airliner in the West, the space shuttle, the most advanced U.S. and European fighters, and in a wide variety of missile systems, ground vehicles, industrial applications and medical electronic systems.

All Interpoint converters—even those intended for industrial programs—are manufactured to military program quality levels. Our production facilities offer full MIL-STD-1772 qualification, Statistical Process Controls, and audited verification of sources, processes, and procedures.

20 Years of Innovation and Quality

For over twenty years Interpoint Corporation has provided leadership for high reliability systems. Founded in 1969 as Integrated Circuits Incorporated (ICI), the company set the industry's size and reliability standards when it applied its thick-film hybrid techniques to dc-dc converters. Later, it became one of the first companies to be certified and qualified to MIL-STD-1772 quality levels.

Interpoint's power products include military/aerospace dc-dc converters, EMI filters and Hi-Rel Industrial converters.

Military/Aerospace Converters

These sealed, metal encased converters offer power levels from 1 to 200 watts with the highest reliability, best performance, and smallest size in the industry. Environmental screening is available referenced to the most demanding military specifications.

Filters and Protection Modules

Matched to our military/aerospace converters, these modules bring Interpoint converters within MIL-STD-461's CE03 noise limits and protect them against surges and spikes. Sealed, metal packages are standard. Optional environmental screening is also available.

Hi-Rel Industrial Converters

These metal or potted epoxy designs are intended for industrial applications that need higher reliability and smaller size than standard commercial grade parts. They are built to the same quality standards as our military parts but without the extra documentation, testing, and severe environmental requirements.

STANDARD SCREENING PROCEDURE FOR MHF DC-DC CONVERTERS

- Pre-cap internal visual inspection: Per method 2017.
- Stabilization bake: 24 hrs. at 125°C.
- Temp. cycle: 10 times, -55°C to +125°C per method 1010.
- Constant acceleration: 500 g per method 2001.
- Gross leak: Per method 1014, cond. C.
- Fine leak: Per method 1014, cond. A.
- Burn-in: 96 hr. at 125°C case (typ).
- Final electrical test (25°C).
- Final external visual inspection: Per method 2009.

Consult individual data sheets for screening options available for each model.

Comprehensive Environmental Screening Options

Before being offered as standard products, Interpoint military/aerospace converters undergo complete qualification testing using in-house procedures and methods from MIL-STD-883 and MIL-STD-202. The tests include thermal and mechanical shock, vibration, acceleration, hermeticity, bond strength, die shear, resistance to solvents, and a life test.

Interpoint also offers environmental screening for all of its military/aerospace converters and filter modules with procedures referenced to MIL-STD-883C, in-house procedures, or customer specifications.

MFL SERIES NEW 1991

- **28 or 270 Vdc input models**
- **Up to 65 watts output power**
- **Paralleled current sharing**
- **-55 to +125° C case temp range**

The MFL Series converters offer up to 65 watts output power in a sealed metal case measuring only 1.5 x 3.0 x 0.375 inches. Up to three units may be paralleled to provide a shared output of up to 195 watts. Standard features include undervoltage lockout, remote sense, and sync. Mounting options include side-leaded cage mount or through-hole styles. Operating temperature is -55 to +125° C. Environmental screening available.

**Case dimension 2.7 x 1.35 x 0.4 inches.
***Max. for each output; total power may not exceed 30 watts.

MTR SERIES NEW 1991

- **Up to 30 watts output power**
- **16 to 40 Vdc input range**
- **Up to 84% typical efficiency**
- **-55 to +125° C case temp range**

The high frequency MTR Series converters offer up to 30 watts output power in a hermetically sealed package only 1.12 x 2.12 x 0.4 inches – the same outline as our 15-watt MHE/MLP series. The parts offer full power operation from 16 to 40 Vdc input and over the full -55 to +125° C temperature range. Features for the isolated, regulated units include low-voltage lockout, remote sense, voltage trim, and sync. Single, dual, and triple outputs available. Environmental screening available.

*Case dimension 2.7 x 1.35 x 0.4 inches.

MHD SERIES NEW 1991

- **Up to 20 watts output power**
- **1, 2, or 3 outputs**
- **-55 to +125° C case temp range**
- **Case pinout and outline match MHE and MTO converters**

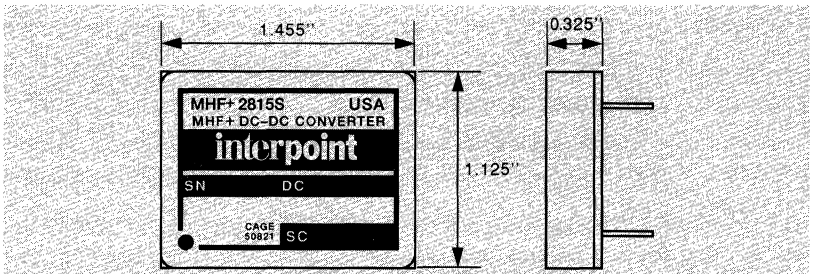
The MHD Series converters provide state-of-the-art dc-dc conversion with case outlines and pinouts that match our industry standard 28 V input MHE and MTO series products. The MHD series offers excellent audio rejection (up to 50dB), improved transient response, current limiting overload protection, 16 to 40 Vdc input, and -55 to +125° C full power operation. Height of the metal hermetic case is only 0.400 inch. Environmental screening optional.

MILITARY/AEROSPACE DC-DC CONVERTERS

MHF+ SERIES NEW 1991

- **Up to 15 watts output power**
- **16 to 40 Vdc input range**
- **Up to 82% typical efficiency**
- **-55 to +125° C case temp range**

An upgrade to our industry standard MHF Series, MHF+ Series converters provide up to 15 watts output power over the full -55 to +125° C temperature range. The sealed metal parts are available in welded hermetic packages that take up only 1.7 sq. in. of board area and are only 0.325 inch high. Up to 82% efficiency. Single and dual outputs. Environmental screening optional.



MODEL	VDC INPUT	OUTPUT @ FULL LOAD			MAX WATTS

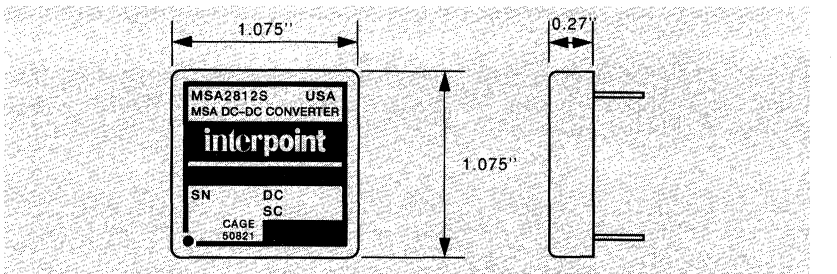
MHF+2815D	16 to 40	±15	±500	81	15

MSA SERIES NEW 1991

- **Up to 5 watts output power**
- **0.27 inch profile**
- **Up to 76% typical efficiency**
- **-55 to +125° C case temp range**

The MSA Series converters offer up to 5 watts output power in our lowest profile case—just 0.270 inch high. These regulated, isolated converters offer 600 kHz switching and full power operation over the full military temperature range. Audio rejection is up to 50 dB. No external capacitors are required. Metal sealed cases. Single and dual outputs. Environmental screening available.



MODEL	VDC INPUT	OUTPUT @ FULL LOAD			MAX WATTS

MSA2815D	16 to 40	±15	333*	76	5

*Total; up to 90% from either output

MQO SERIES NEW 1991

- **Up to 16.5 watts output power**
- **4 outputs (including -5 Vdc)**
- **Meets CE03, CS01, CS02, CS06, DO160B standards**
- **-55 to +125° C case temp range**

The new MQO Series dc-dc converters supply up to 16.5 watts in a four-output configuration. Outputs include +5 Vdc and -5 Vdc (often used for ECL applications) and either ±12 Vdc or ±15 Vdc. A built-in EMI filter and transient suppressor allows the unit to meet MIL-STD-461C's CE03 reflected ripple standard and CS01, CS02, CS06, and DO160B conducted susceptibility standards without any external components. An output holdup feature provides a low power flag and full output power holdup through transient dropout conditions. Metal hermetic case. Environmental screening optional.

MFW SERIES

- **Up to 70 watts—1, 2 or 3 outputs**
- **19 to 40 Vdc input range**
- **Up to 84% typical efficiency**
- **-55° to +85°C case temp range**

The MFW converters provide up to 70 watts of power at up to 84% efficiency with single, dual, or triple outputs. Outputs are regulated and isolated. On dual output models, up to 95% of rated power is available from either output. On triple output models, up to 83% of rated power is available from each output. Packages are sealed plated steel with heat dissipating flange mounting. Environmental screening available.

MHL SERIES

- **Up to 15 watts—dual output**
- **4 to 8 Vdc input range**
- **Up to 78% typical efficiency**
- **-55° to +85°C case temp range**

MHL converters have dual, regulated output voltages with a common output ground. Both outputs are fully isolated from the input. Up to 95% full power is available from either output up to a total of 15 watts. Sealed, plated steel packages with flange option. Environmental screening available.

MILITARY/AEROSPACE DC-DC CONVERTERS

MHE/MLP SERIES

- **Up to 20 watts output power**
- **9 to 16 and 16 to 40 Vdc input range**
- **Up to 86% typical efficiency**
- **-55° to +85°C case temp range**

High efficiency MHE/MLP converters feature single or dual isolated, regulated output voltages, wide input voltage range, and sealed, plated steel packages for military/aerospace applications. MLP models offer low profile cases. Flange mount optional. Environmental screening available.

- **9 to 16 and 16 to 36 Vdc input range**
- **Up to 79% typical efficiency**
- **-55° to +85°C case temp range**

MTO converters have three regulated output voltages with a common ground. All outputs are isolated from the input. Full rated output power can be drawn from the 5 Vdc output, or the dual outputs can be loaded as shown. Total power is up to 15 watts. Package is sealed, plated steel with optional flange. Environmental screening available.

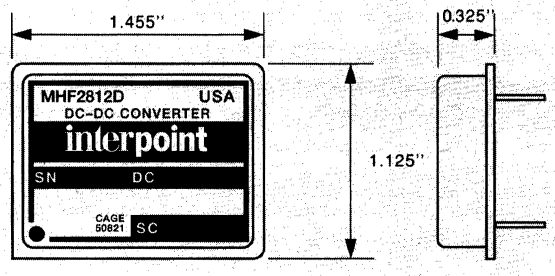
MILITARY/AEROSPACE DC-DC CONVERTERS



MHF SERIES

- **12 watts—low profile**
- **16 to 40 Vdc input range**
- **84% efficiency**
- **-55° to +125°C case temp range**

MHF series converters provide 30 watts/in³ power density in a low profile (.325 inch max) part. Regulated and isolated single or dual outputs provide up to 12 watts at up to 84% efficiency. Full power operation from -55° to +125°C. Environmental screening available.

MODEL	VDC INPUT	OUTPUT @ FULL LOAD			MAX. WATTS	PRICE GROUP

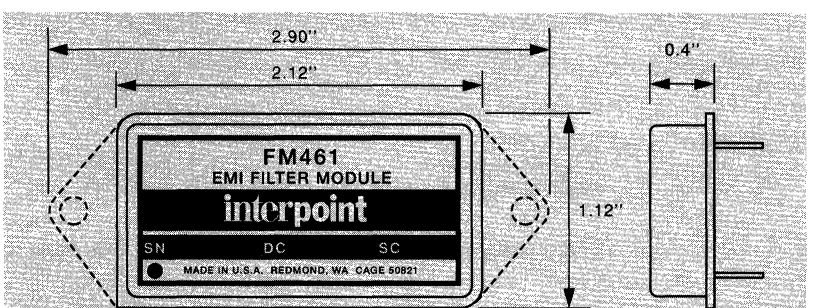
EMI FILTERS & PROTECTION MODULES

FM-461 SERIES

- **MIL-STD-461 accessories for high frequency dc-dc converters**
- **MIL-STD-704B through D transient protection**
- **40 dB min reflected ripple current reduction**
- **-55° to +85°C case temp range**

The FM-461, FMA-461, and FMB-461 filters bring MHE, MLP, MTW, MTO, MHL or MFW converters into compliance with MIL-STD-461B's CE03 limits for reflected input ripple current. The sealed, plated steel case has an optional flange. Environmental screening available.



MODEL	VDC INPUT	MAX. CURRENT	MIN. ATTENUATION	COMPATIBLE CONVERTERS*	PRICE GROUP
FM-461	0 to 40.0	1.75 A	40dB 100kHz to 50MHz	MHE, MLP, MHL, MTO	Q-1
FMA-461	0 to 40.0	4.0 A	40dB 100kHz to 50MHz	MTW	Q-2
FMB-461	0 to 40.0	5.0 A	40dB 100kHz to 50MHz	MFW	Q-3

*For MIL-STD-461B CE03 limits for reflected ripple

FILTERS & PROTECTION MODULES

FM-704A	0 to 40.0	40 W	50dB 200kHz to 50MHz	400 V, 0.5 Ω imp	100 V, 0.5 Ω imp	Q-4

MSF-461

- **MIL-STD accessory to MSR, MDR, DCH, and MDP series converters**
- **MIL-STD-704B thru D transient protection**
- **50 dB min reflected ripple current reduction**
- **-55° to +85°C case temp range**

In a sealed, plated steel case of less than 1.2 square inches, the MSF-461 brings MSR, MDR, DCH, and MDP dc-dc converters within MIL-STD-461's CE03 limits for reflected ripple current. Environmental screening available.

FMC-461

- **High temperature MIL-STD-461 accessory**
- **MIL-STD-704B through D transient protection**
- **40 dB min reflected ripple current reduction**
- **-55° to +125°C case temp range**

The FMC-461 will bring any Interpoint converter into compliance with MIL-STD-461B CE03 reflected input ripple current limits up to its rated current. Welded bathtub case, -55 to 125°C case temperature operation, and environmental screening available.

FMH-461

- **Low profile MIL-STD-461 accessory**
- **MIL-STD-704B through D transient protection**
- **40 dB min reflected ripple current reduction**
- **-55° to +125°C case temp range**

The lightweight (26 grams), low profile FMH-461 filter brings both high and low frequency converters into MIL-STD-461B's CE03 noise limits for reflected ripple. Up to 15 watt throughput over -55° to +125°C case temperature. Environmental screening available.

FM-704A

- **Combined EMI filter and protection module**
- **Protects against surges and spikes**
- **40 watts throughput power**
- **-55° to +125°C case temp range**

The FM-704A protection module protects any high frequency converter against MIL-STD-1275A and MIL-STD-704A surges and MIL-STD-461C CS06 spikes. Its filter element brings MHE, MLP, MTO, MTW, and MHL converters within MIL-STD-461B's CE03 noise limits. Up to 40 watts throughput from -55 to +125°C. Environmental screening available.

HI-REL INDUSTRIAL DC-DC CONVERTERS

HR300 SERIES

- **Up to 30 watts output power**
- **Metal, sealed package**
- **1 or 2 outputs**
- **Up to 85% efficiency**

The HR300 series offers Hi-Rel Industrial applications up to 30 watts of output power and military levels of quality. HR300 converters provide single or dual regulated, isolated outputs and up to 85% efficiency. Operating temperature range is from -20° to +70°C. Packages are sealed, plated steel.

HR150 SERIES

- **Up to 20 watts output power**
- **Metal, sealed package**
- **1, 2, or 3 outputs**
- **2 input voltage ranges**

The HR150 series converters provide military program levels of reliability in a Hi-Rel Industrial class part. They provide up to 20 watts of power at up to 83% efficiency. Outputs are tightly regulated and are isolated from the input. Operating temperature range is from -20° to +70°C. Like our military/aerospace converters, the packages are sealed, plated steel.

DC SERIES

- **Up to 6.4 watts of output power**
- **Isolated, unregulated outputs**
- **Rugged encapsulated construction**
- **4 input voltage ranges**

The dc series of unregulated dc-dc converters consists of single and dual output models in four input voltage ranges. They can be used with external regulators or in applications that do not require regulated voltages. Operating ambient temperature range for these plastic encapsulated devices is -20° to +70°C.

DDC SERIES

- **Up to 5 watts of output power**
- **Isolated, unregulated outputs**
- **24 pin DIP compatible package**
- **4 input voltage ranges**

The DDC models are unregulated and are designed to be used in applications where regulated voltages are not needed, or with external regulators. The outputs are isolated from the input. They can be operated over an ambient temperature range of -20 to +70°C, and they are encapsulated in plastic packages.

DCR SERIES

- **Up to 4 watts output power**
- **Isolated, regulated outputs**
- **Foldback current limiting**
- **No external components required**

The DCR series features isolated, dual-tracking outputs and four different input voltage ranges. They have input pi filters for good ripple rejection and the nonsaturating core design minimizes radiated and conducted noise. These plastic, encapsulated converters can be operated over an ambient temperature range of -20° to +70°C.

DDR SERIES

- **Up to 3 watts output power**
- **Isolated, regulated outputs**
- **24 pin DIP compatible package**
- **5 input voltage ranges**

The DDR series dc-dc converters are isolated and regulated. They are built with a nonsaturating core design to minimize reflected ripple and radiated noise. The rugged plastic 24-pin DIP packages are rated for operation from -20 to +70°C ambient.

CALL (800) 822-8782 TO ORDER DATA SHEETS

HI-REL INDUSTRIAL DC-DC CONVERTERS

DIP SERIES

- **Up to 1.5 watts output power**
- **Up to 82% typical efficiency**
- **Wide input voltage ranges**
- **14 pin DIP compatible package**

The DIP switching regulator series consists of units that operate over a wide input voltage range, over a wide range of loads, with high efficiency. They are ideal for battery applications or wherever high efficiency and small size are important. The output common is connected internally to the input common. They are encapsulated in plastic packages and will operate over an ambient temperature range of -20° to +70°C.

Note: External output capacitors are required.

NETCON SERIES

- **Cheapernet/Ethernet compatible**
- **Up to 1.25 watts output power**
- **24 pin DIP package**
- **-9 Vdc output**

Built to IEEE 803.2 CSMA/CD specifications, the NETCONs are intended for use with the AM7990 chip family offered by AMD for LAN applications. The rugged plastic 24-pin DIP package is rated for operation from -20° to +70°C ambient.

DIP_DT SERIES

- **Up to 1 watt output power**
- **Isolated, regulated outputs**
- **14 pin DIP compatible package**
- **5 input voltage ranges**

DIP_DT series converters can provide up to one watt of regulated, isolated output power. The ±12 Vdc and ±15 Vdc outputs are regulated by monolithic dual-tracking series regulators which provide good regulation and ripple characteristics. Also available as non-catalog standards are 5 Vdc Output models that provide up to 0.5 watts. The plastic encapsulated packages are rated for operation from -20° to +70°C ambient.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

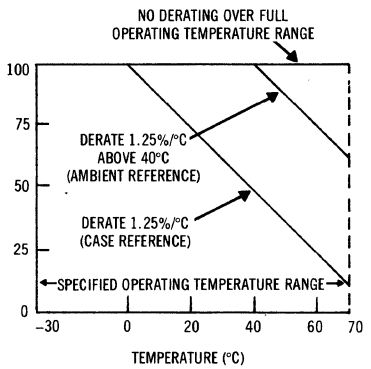

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

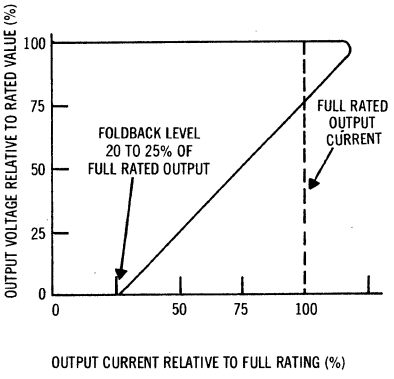

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

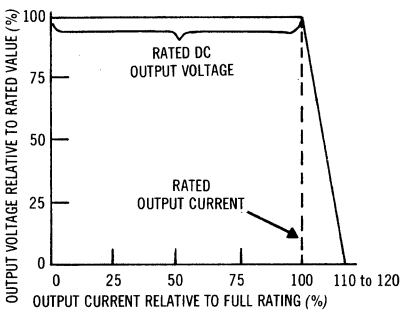

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

CUSTOM DESIGN COMPONENTS

This data is presented to show Jerome Industries Corporation's diversified line of products including UL & CSA Listed Items.

STANDARD DESIGN

One or more of the items shown in the charts may be suitable for your application. Our Customer Service Department can assist you with additional information.

CUSTOM DESIGN

As you will note in these pages, Jerome Industries Corporation has many Case sizes and Output cords. Not shown are many transformers, P.C. Board Assemblies, and cord and plug types which we can modify to meet your specifications. After your review of our line of products, give our Customer Service Department your requirements and they will be pleased to have our Engineering Department design a unit to your specifications, and will quote you accordingly.

See Next Pages Of This Issue For Additional Product Information. Also See Transformer Section.

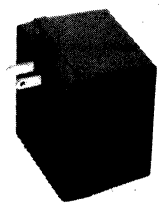
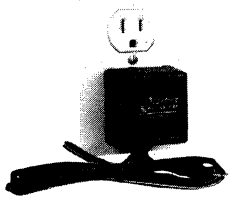
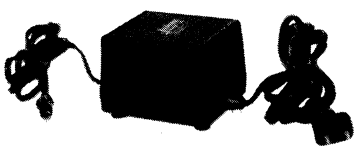
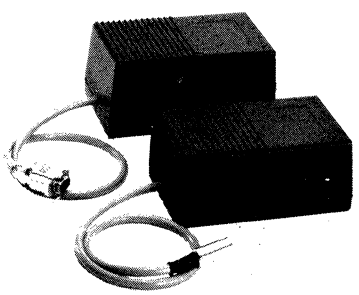
STANDARD AND CUSTOM DESIGNS

JEROME INDUSTRIES CORPORATION









All items made to U.L. specifications 478, 1310, 504, 516, 544 (Patient & Non Patient Connected), 694, 1012, 1235, 1411 and also equivalent C.S.A., V.D.E. IEC, TUV and other National and European specifications.

WALL PLUG-IN/DESKTOP STYLE/WALL MOUNTED

APPLICATIONS — Computers, Modems, Microprocessor Controlled Systems, Telecommunications, Operational Amplifiers, Computer Peripherals, Test Equipment, Security Systems, Multiplexers, Medical Equipment.

ELECTRICAL SPECIFICATION

INPUT:
120 VAC-50/60 Hz, 240 VAC-50/60 Hz, 120/240 VAC-50/60 Hz, Switchable.

OUTPUT:

TRANSFORMERS: Up to 90 Watts

POWER SUPPLIES:

Non Filtered-	
Non Regulated	Up to 60 Watts
Filtered only	Up to 45 Watts
Regulated	Up to 25 Watts
Multi Output	Up to 20 Watts
Switchers	Up to 60 Watts

BATTERY CHARGERS:
Ni-Cad Batteries Charge Rates of — C/10, C/5, C/1, Up to 45 VA Lead Acid/Gel Cells — Fixed & Automatic Dual Voltage

MECHANICAL SPECIFICATION

WALL PLUG-IN/WALL MOUNTED/DESKTOP

- Standard Cords For Output, or to Customer Specifications
- Screw Terminal Output On Various Styles
- Customer Logo can be Applied
- Variety of Case Colors Available
- European Style Plug-In Configuration
- On & Off Switch
- Pilot Light

See Next Pages Of This Issue For Additional Product Information Also See Transformer Section

FEATURES—ALL TYPES

Available electrical and mechanical features to enhance the appearance or working capability of plug-in adapters.

- Screw Terminals, Styles D, J, G, & M
- Cord & Plug assemblies to Customer Specs.
- On & Off Switch
- Multi Volt Switch for Dual Input
- Pilot Light
- Regulated Output
- Others to Specific Customer Requirements
- All Units can be designed to U.L. &/or CSA Requirements.
- Molded Cases have dual tapered surface for positive push-pull grip.
- Case available in a variety of colors to match your product.
- Your personal Hot Leaf stamped Logo or Trademark enhance the case appearance.

SWITCHING POWER SUPPLIES

STANDARD FEATURES

Input:
- Voltage: 90-130 VAC, 47-63 HZ.
- Ground available.

Output:
- Operating temperature: 0° to 40°C.
- Continuous Duty.
- Combined Regulation: 5% Max.
- No minimum load required for regulation.
- Output Ripple: 50 MV P-P max.
- Transient Response: 100 microseconds for 50% load change typical.
- Overcurrent and Short Circuit protected.
- Auto reset from overcurrent.
- Holdup Time: 32 MSec min at 120 VAC.
- Conducted EMI: meets FCC Class B. Radiated EMI: designed to FCC Class B.

BATTERY CHARGERS

JEROME INDUSTRIES CORPORATION

WE CUSTOMIZE TO YOUR REQUIREMENTS

BATTERY CHARGERS—NI-CAD

The Ni—Cad battery chargers shown on chart, show the C/10 charge rate usually recommended. At this rate the batteries will take 14-16 hrs to charge. At the rated current, C/5 & C/3 rates can be applied to batteries under controlled time conditions. Jerome also designs special chargers at customer request.

All types of fast chargers available

BATTERY CHARGERS—GEL CEL—LEAD ACID

CYCLIC DESIGNS
(Automatic Dual Voltages)

- Will rapidly recharge batteries without danger of overcharge
- Should be used when batteries are repeatedly being discharged and recharged
- Allow remote product use because charger is not connected to battery during discharge. Typically used for portable instrumentation

FLOAT DESIGNS
(Fixed Voltage)

Provide optimum battery life in standby applications. Will maintain fully charged battery at a constant voltage, used typically in the event of power failure or when charger is always connected to battery during discharge. Can be used as a power supply and charger at the same time.

CUSTOM PRODUCTS

Jeta's standard product design and production capability is equally reflected in its custom products. Call or fax Jeta for a quotation on your unique custom design or modified standard product.

JETA POWER SYSTEMS, INC.
2675 Junipero Avenue ■ Signal Hill, CA 90806 ■ 213/427-0095 ■ FAX: 2134262417

DISTINGUISHING FEATURES & BENEFITS OF JETA HIGH CURRENT POWER SUPPLIES

500 to 3000 WATTS:

A wide choice in high current DC power supplies enables you to minimize over-specification and make a selection closest to the applications needs. Models are available with 500, 800, 1000, 1200, 1500, 1800, 2000 and 3000 watt outputs in single output configurations.

ONE to FOUR OUTPUTS:

Your system's multiple DC voltage needs may be satisfied with a main output channel and selection of up to three auxiliary outputs. A variety of power levels for the main and auxiliary outputs, from 180 amps down to 3 amps, are available.

CURRENT to 600 AMPS and MORE:

High current needs may probably be satisfied in only one package but, should higher currents be needed, all JETA power supplies are automatically parallelable and capable of operation in fault tolerant (N+1) systems.

POWER FACTOR CORRECTION:

Some JETA products have PFC such as the 1000 watt four output model. It meets the proposed IEC harmonics standard 555-2 and UL requirements for a maximum line current of 12A from a 15A, 115V service. The PFC line conditioner changes the high current pulses into a sinusoidal waveform in phase with the line voltage, thus reducing rms line current and harmonics.

BATTERY BACKED MODULE:

A 750 watt battery backed module integrates JETA's proven high current multiple output switcher design with a dual-stage battery charger and a boost converter. Driven by a 48 volt battery it delivers highly reliable power even during brownouts and blackouts. And, you have unrestricted battery operation time. Nice.

INTERFACE SIGNALS and CUSTOMIZATION:

A variety of standard interface signals that are costly options elsewhere are provided enabling greater system utility. These include: power fail detection; remote inhibit; current monitor; remote programming; remote voltage adjust; and DC OK. In fact, JETA can fashion to your particular needs; OVP actuated,logic inverses or even reverse air flow. JETA can also start at the foundation and make electrical and mechanical modifications.

RELIABILITY THROUGH DESIGN:

JETA focuses on achieving the highest reliability in commercial and industrial products through: a unique hybrid thermal design (patent pending) that maintains the lowest component-to-ambient temperature gradient; a MOSFET based switching design that reduces the component count; high voltage transistor reshaping for safe area operation; fault tolerant design that provides protection for the system and the power supply; and the use of well established, conservative half-bridge, full-bridge and forward converter circuit designs. All ensure that the highest attainable reliability is replicated throughout the entire product line.

RELIABILITY THROUGH MANUFACTURING:

Reliability is not only a priority; it is ***the*** priority. JETA practices design for manufacturability (DFM) principles while designing its products and continuously monitors processes via statistical process controls (SPC) to intercept any undesirable trends on a real time basis.

STRESS TESTING:

Each unit is subject to our in-house vigorous stress tests. They consist of turning the unit on into short circuit and no-load conditions and shorting the outputs after the unit is on and loaded. This verifies the effectiveness of the circuitry and quality of components under abnormal conditions.

BURN-IN and GUARANTEE:

All products undergo a 24 hour cyclical burn-in prior to shipment. Infant mortality is eliminated, thus insuring that the most reliable product is delivered to you. And then, JETA guarantees the product for two full years for parts and labor. You will find no double standard, but one unvarying, inflexible standard for reliability.

PROTECTION and SAFETY CERTIFICATION:

Protective features for both the power supply and the system include overvoltage, thermal, overload, no-load, in-rush current, line fusing, AC ground termination, output isolation, brown-out, open and reverse sense leads and reverse voltage protection. In addition, JETA complies with the safety requirements of UL, CSA, IEC and VDE enabling the OEM speedy certification.

These are but a few of an impressive list of features and benefits. Match Jeta's specifications with your own needs. Discuss them with JETA engineers. Then see if JETA can't best meet those needs.

Call or fax for Jeta's complete data sheets.

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

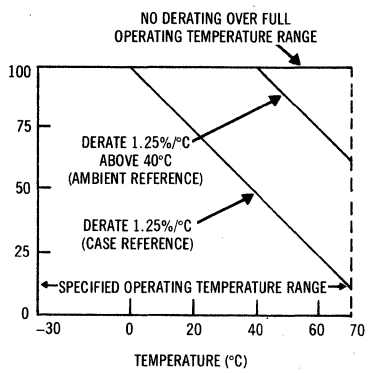

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

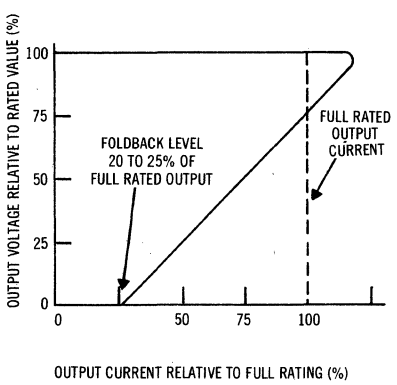

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

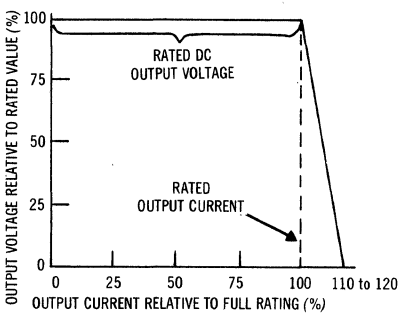

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

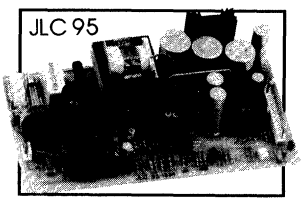
Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

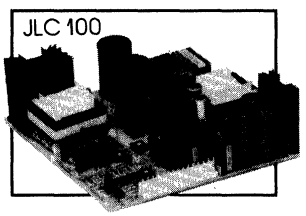
HIGH PERFORMANCE OEM POWER SUPPLIES

We've got the power

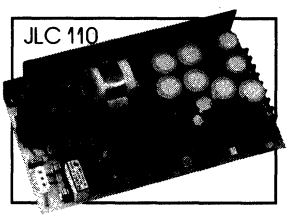
At Joule Power, we've got the power supplies to meet your needs. We use only high quality components and employ advanced design techniques which demand fewer parts for a clean layout. We offer a variety of configurations for multiple applications and flexibility.



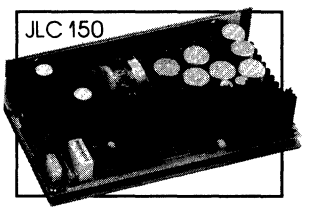
Input: 110 VAC / 220 VAC
Strappable
Size: 7.75" x 4.25" x 2.0"



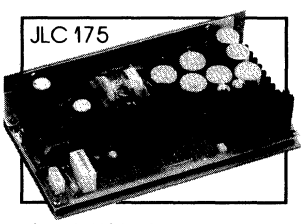
Input: 110 VAC / 220 VAC
Strappable, 12 VDC
Size: 6.0" x 6.5" x 2.0"



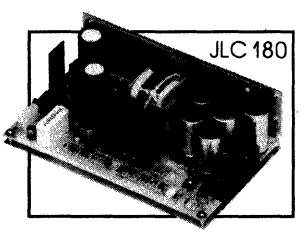
Input: 110 VAC / 220 VAC
Strappable
Size: 9.5" x 4.75" x 2.0"



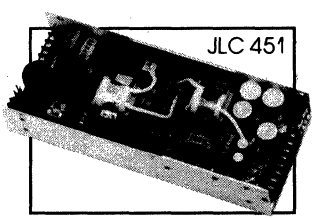
Input: 110 VAC / 220 VAC
Strappable
Size: 9.5" x 5.0" x 2.5"
w / cover: 9.5" x 5.0" x 2.7"



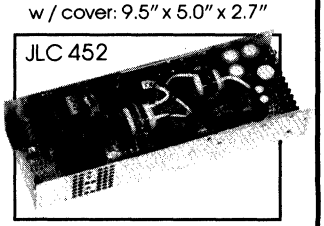
Input: 110 VAC / 220 VAC
Strappable
Size: 9.5" x 5.0" x 2.5"
w / cover: 9.5" x 5.0" x 2.7"



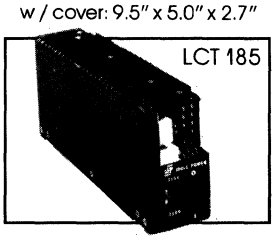
Input: 110 VAC / 220 VAC
Strappable
Size: 8.0" x 5.0" x 2.5"



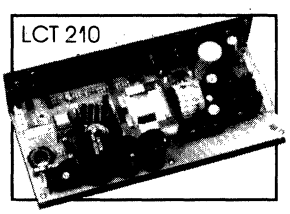
Input: 110 VAC / 220 VAC
Strappable
Size: 12.5" x 5" x 2.5"



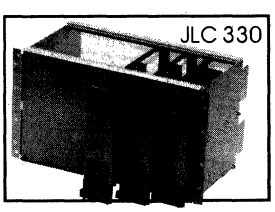
Input: Auto Ranging,
85 – 264 VAC
Size: 14.0" x 5.0" x 2.5"



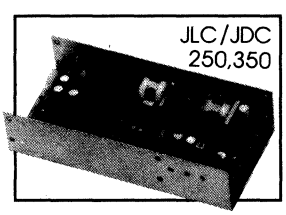
Input: 110 VAC / 220 VAC
Strappable
Size: 10.0" x 4.40" x 2.4"
w / cover: 10.15" x 4.45" x 2.54"



Input: 110 VAC / 220 VAC
Strappable
Size: 10.5" x 4.8" x 2.65"



Input: 110 VAC / 220 VAC
Strappable, 48 VDC
Rack mount
Size: 6U high x 220mm
deep x 12 HP wide



Input: 110 VAC / 220 VAC
Strappable, 48 VDC
Size: 10.5" x 5.0" x 2.5"

Joule Power has the ability to tailor all our standard products to meet various requirements of our customers, such as:

- Output Voltages from 5V to 48V
- Single or Multiple Outputs
- Auto Ranging Inputs
- UL 544 (Non Patient Connect)
- Power Factor Correction
- On/Off Switch
- Redundant Rack Mount Supplies (N+1 with Current Sharing)
- 2-Year Warranty

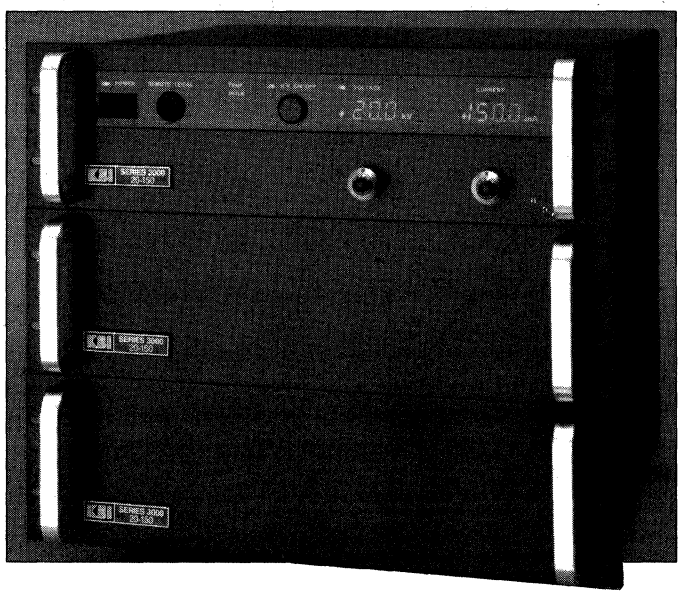
High Voltage Power Supplies



Reliable Power from the Reliable Source®

Kaiser Systems, Inc. designs, builds, and sells high performance, highly reliable power supplies that are engineered to protect themselves and the systems they power. From initial concept through prototype and production units, our employees are concerned with more than just the specs. **Quality, Performance, Cost,** and **Delivery** are also part of the design.

Quality starts with good people doing a good job. Designing reliable circuits that utilize high quality components. Adhering to stringent QA standards in manufacturing. Making sure that each and every KSI power supply meets or exceeds the published specs.

Performance depends on how well the design is thought out. Is the circuit optimized? Have all fault conditions been considered? Can it be manufactured consistently? At KSI, performance means the product still conforms to the original specs, long after the warranty runs out.

Cost to manufacture is a function of application, design, production methods and quality control. Cost to the customer is the sum of acquisition and ownership expenses. KSI produces products knowing that cost must be in relation to value, and that the customer must get the best value possible for the amount spent.

Delivery is just as important as product performance. Without it there's nothing but excuses. At KSI, our MRP II operates at Class A level. That means we know what we're doing, when we're doing it and, most importantly, how we're doing it. It also means we have an on-time delivery record of 98%!

When we say Reliable Power from the Reliable Source®, we mean it. Try us!

KSI Kaiser Systems, Inc.

Selection Guide High Voltage Power Supplies

Selecting the right HV power supply for a specific application requires careful consideration of many parameters. The following table, which compares the performance characteristics of several types of power supply technologies, will help in selecting the appropriate choice for your application. Note that the shaded areas indicate the optimum condition for each appropriate parameter.

	LINE FREQUENCY			HIGH FREQUENCY SWITCHING		
Design Parameters	**Unregulated**	**Input Regulated**	**Output Regulated**	**PWM**	**Series Resonant**	**Quasi Resonant**
Frequency	50 Hz to 400 Hz	50 Hz to 400 Hz	50 Hz to 400 Hz	20 kHz to 50 kHz	10 kHz to 20 kHz	20 kHz to 30 kHz
Output Voltage	to 300 kV	to 300 kV	to 200 kV	to 300 kV	to 500 kV	to 300 kV
Power Level	to 200 kW	to 200 kW	1 kW to 150 kW	to 12 kW	to 70 kW	to 10 kW
Regulation	N/A	variable tranformer or SCR control	series pass vacuum tube on output	pulse width modulation	frequency or phase modulation	pulse width and pulse amplitude modulation
Stored Energy[1]	high	high	lowest[2]	low	low	low
Current Limit Turnoff Time ΔT	≥ 10 ms	≈ 10 ms	< 1 μs[3]	≈ 0.1 ms	≈ 0.5 ms	≈ 0.1 ms
Transient Response	N/A	slow	very fast	medium	medium	medium
EMI	very low	low/medium	very low	high	medium	medium
Efficiency	≈ 95%	≈ 90%	75 to 90%	≈ 85%	≈ 80%	≈ 80%
Parts Count	lowest	low	low	high	high	medium
Size per Watt	large	large	large	small	small	small
Cost per Watt	low	low/medium	high	medium	medium	medium
Insulation Mediums	air, oil, SF_6			air, oil, encapsulation, SF_6		

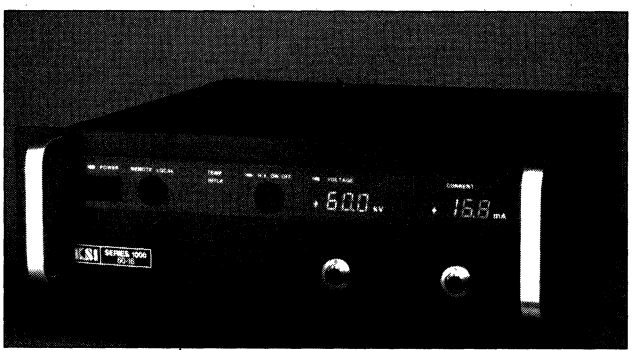
1. Stored energy at the output is due to the output filter capacitor. Lower filter requirements (higher ripple) reduce the stored energy within any one type of design.
2. A series pass vacuum tube isolates internal capacitor stored energy from the load.
3. Prevents system damage from surges.

Choose your supplier as carefully as you choose your supplies. Ask yourself the following: are the designs modern, efficient, and reliable? Does your supplier care as much about quality as you do? Will delivery be on time? Will the power supply remain reliable over time? At KSI the answer is yes.

The High Voltage Power Supplies That Work®

Kaiser Systems, Inc.
126 Sohier Road, Beverly, MA 01915 • Phone: (508) 922-9300 • FAX: (508) 922-8374

Standard High Voltage Power Supplies



The SERIES 1000 answers user needs for a multi-purpose, laboratory grade HV power supply with superior performance and unprecedented reliability.

Benefits:

High Frequency Switching Design
- Low stored energy for operator and equipment safety
- High efficiency and minimal heat dissipation
- Reduced size of internal components for smaller overall size
- Air-insulated for the lowest possible weight

Advanced Quasi-Resonant Inverter
- Greater reliability due to fewer components
- Better output regulation through optimized design
- Withstands minor fault conditions without system shut-down
- Control linearity with zero over-shoot
- Open and short circuit protected

Standard Features
- Constant voltage/constant current with automatic crossover and current limiting
- Full programming and monitoring from front panel or remote control
- Digital panel meters for voltage and current
- Soft start
- Self locking primary contactor
- Thermal overload protection
- Typical efficiency greater than 80%
- 5 year warranty

Optional Features
- OEM/Remote configuration
- Slaved bipolar operation
- IEEE-488 and RS-232C interface
- 220 Vac 50/60 Hz input

Performance Specifications Summary
- Voltage regulation: load and line better than ±0.005%
- Current regulation: load better than 100 microamps; line better than ±0.005%
- Ripple better than 0.1% rms, full load, dc to 100 kHz
- Stability better than 0.01% per hour, 0.05% per 8 hours, after ½ hour warm-up
- Transient response better than 3 ms with no overshoot, no load to full load change

Request Technical Specifications sheets for detailed specifications.

SERIES 1000 Standard Models

Output Voltage	Output Power (Watts)	Panel Height (Inches)
Choose from standard rated outputs: 5, 10, 20, 40, 60, 80, or 100 kV Negative or positive polarity	500	5¼
	1000	5¼
	2000	10½
	3000	15¾

All models have continuously adjustable voltage and current from zero to full rated output.

Request SERIES 1000 Technical Specifications Sheet for specific model numbers and rated outputs.

Kaiser Systems, Inc.
126 Sohier Road, Beverly, MA 01915 • Phone: (508) 922-9300 • FAX: (508) 922-8374

Standard High Voltage Power Supplies

SERIES 5000
3 kW and 5 kW Models

The SERIES 5000 sets new standards for compact size and high performance in medium power high voltage supplies:

- Models available with outputs from 1 kV to 60 kV at 3 kW or 5 kW continuous power ratings
- All models only 5-1/4 inches high in a standard 19 inch rack mount design
- Stable, well regulated output
- High immunity to noise, EMI, transients
- Extensive fault protection for dependable operation

Features

- Advanced high frequency switchmode design with low stored energy
- Constant voltage/constant current with automatic crossover
- Open and short circuit protected
- Arc-over protected
- Full front panel controls with digital meters
- Complete remote control and monitoring

Optional Features

- Constant power
- Parallel operation for increased output power
- ArcQuench™ arc suppression circuitry
- Adjustable overload trip
- Low output ripple (0.05% peak-to-peak)
- EMI filter
- OEM/Remote configuration for remote-only operation

Performance Specifications Summary

- Input: 187-264 Vac, three phase, 50/60 Hz
- Voltage and current regulation better than ±0.01%
- Ripple less than 0.1% peak-to-peak
- Stability better than 0.01% per hour, 0.05% over 8 hours, after one-half hour warm-up
- Temperature coefficient better than 0.01% per °C
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

SERIES 6000
6 kW and Higher

The SERIES 6000 is a family of highly reliable, high performance dc power supplies with output power ratings of 6 kW and higher. Customized for each application, they are the best choice for your toughest application.

- Output voltages from 50 V to 200 kV
- Modular design for packaging flexibility and compact size
- Tight regulation, low drift operation
- Extensive fault protection for long-term dependability

Features

- Advanced high frequency switchmode design
- Low stored energy
- Separate converter and output chassis for installation flexibility
- Fully protected against fault conditions
- Control and monitoring per customer requirements
- ArcQuench™ arc suppression circuitry

Typical Specifications

- Voltage and current regulation better than ±0.01%
- Ripple less than 0.05% peak-to-peak
- Stability better than 0.01% per hour, 0.05% over 8 hours, after one-half hour warm-up
- Forced air or water cooling

Contact KSI for detailed model and specification data.

Capacitor Charging Power Supplies

LS1500
1500 J/s and Higher

The LS1500 series of capacitor charging power supplies offer unprecedented levels of reliability and dependability for lasers and other pulsed power applications.

- Models available with outputs from 1 kV to 40 kV at 1500 J/s average power
- Rack mounted or modular packaging
- High immunity to noise, EMI, transients

Features

- Advanced quasi-resonant high frequency converter utilizing IGBTs
- Open and short circuit protected, arc-over protected
- Rack mount chassis has full front panel control and monitoring with digital meters, plus full remote control interface
- Modular design is compact and air cooled
- Units can be operated in parallel for higher output power

Optional Features

- Custom interfaces, output configurations and performance specifications are available
- Modular units are available with output connector on top or rear
- EMI filter
- OEM/Remote rack mount configuration for remote-only operation

Performance Specifications Summary

- Voltage regulation better than ±0.5% at rep rates up to 200 Hz
- Fully protected against external open and short circuits, arc-overs, overvoltage and overtemperature
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

LS5000
5000 J/s and Higher

The LS5000 series of capacitor charging power supplies offer the same high reliability as the LS1500 family, but at higher output power levels.

- Models available with outputs from 1 kV to 40 kV at 5000 J/s average power
- Only 5-1/4 inches high in a 19 inch rack mount design
- High immunity to noise, EMI, transients
- Compact, air cooled design

Features

- Advanced quasi-resonant high frequency converter utilizing IGBTs
- Open and short circuit protected, arc-over protected
- Full front panel control and monitoring with digital meters
- Full remote control and monitoring via standard 25 pin connector
- Units can be operated in parallel for higher output power

Optional Features

- OEM version with blank front panel
- Master/slave configurations for parallel operation
- EMI filter
- Custom interfaces, output configurations and performance specifications are also available

Performance Specifications Summary

- Voltage regulation better than ±0.5% at rep rates up to 200 Hz
- Fully protected against external open and short circuits, arc-overs, overvoltage and overtemperature
- Efficiency better than 85%

Contact KSI for detailed model and specification data.

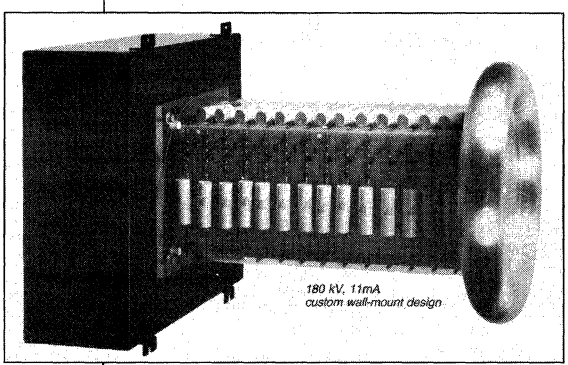
Custom High Voltage Power Supplies

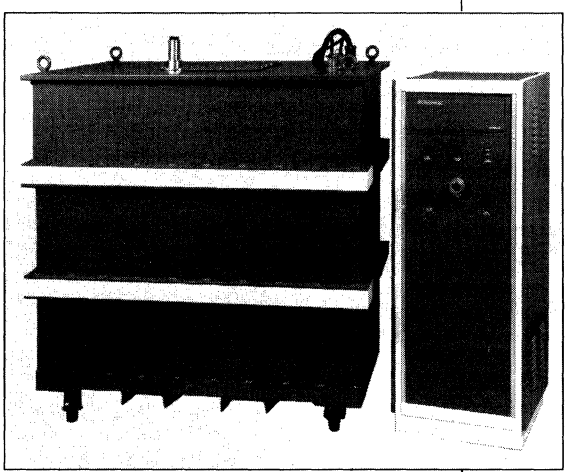
When you need extreme reliability and top performance in your critical high voltage application, call KSI. We're the leader in high performance highly reliable custom power supplies for these applications:

- Ion implantation equipment
- Flash lamps
- Electro-static air filtration
- Electron beam
- Capacitor charging
- Material deposition
- X-ray
- Lasers
- PMTs
- Accelerators
- Radar
- Research and Development

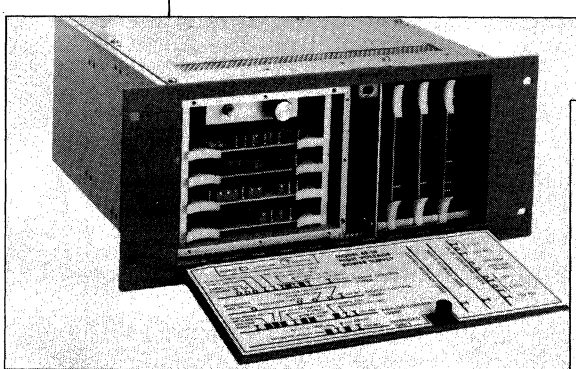
Shown below are some examples of custom HV power supplies that solved application problems other manufacturers couldn't solve. Call us with your HV problems ... we'll solve them too.



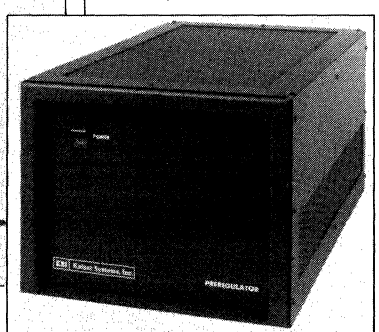
Resonant Converter, Air Insulated.
Output 2 kW, adjustable 0 to 180 kV, 0.05% regulation, 0.3% ripple.

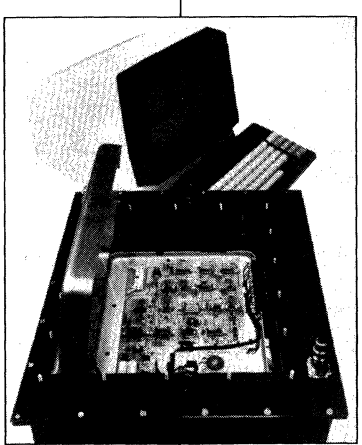


High Current Pulsed.
Output adjustable 40 to 130 kV, 0.1%, 1A. 12 kW average. 2 sec max pulse width, rise and fall time <10 ms.



Series Pass Regulator.
Output 8 kW, adjustable 1 to 100 kV, 0.01% regulation, 0.01% ripple.





Microprocessor Controlled HV Supply.
Output 40 kV, 20 mA, 0.01% ripple. Ultra compact vacuum tube regulated, full RS-232C interface via fiber optic cable links.

SERIES DCB (24-PIN)

DC-DC CONVERTERS FOR NETWORKING APPLICATIONS

FEATURES

- 500 or 2000VRMS isolation available
- Industry standard 24-pin DIP package
- Continuous short-circuit protection (regulated units only)
- Input π filter available
- Low output noise
- All units burned-in at high input voltage, full load and maximum temperature

RATINGS

- Output power .....: 2 watts MAX.
- Efficiency .....: ≥50% (80% typical at full load)
- Operating temperature range ....: −25°C to +70°C
- Storage temperature range .....: −40°C to +100°C
- Operating frequency range:
  - Regulated configurations.....: 25 to 75 KHz
  - Unregulated configurations .....: 25 to 140 KHz
- Output Ripple (20 Hz to 20 MHz BW).:
  - Regulated configurations.....: 50m Vp-p MAX.
  - Unregulated configurations .....: 100m Vp-p MAX.
- Regulation .....: ±5%

KEPCO® THE POWER SUPPLIER™

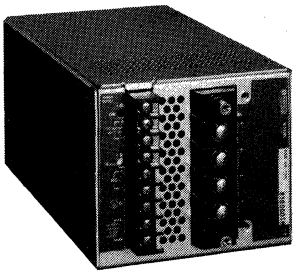
KEPCO HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

150KHz FET-BASED a-c to d-c SWITCHING POWER SUPPLIES

RAX™

115/230V a-c input

These single output a-c to d-c switching power supplies employ FETs operating at 150 KHz to provide a low profile (4.3") package that fits easily behind standard 5¼" panels. Reliability is assured by a low parts count that results from extensive use of custom hybrid microcircuits using surface mount components. Available sizes: 50W, 100W, 175W, 300W, and 1500W.



Shown: 300-Watt Model RAX 24-12K (24V/12A) supplied fully enclosed for industrial applications.

Features:

- **"Power-OK" LED**
- **Remote on/off:** Optically isolated logic signal.
- **Active soft-start circuit.** Limits initial input current surge.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Remote voltage control:** Adjust output setting with external resistance.
- **Adjustable voltage:** Internal trimmer accessible through case.
- **Overvoltage protection.**
- **Undervoltage protection in 300W and 1500W models:** Shuts down for voltage below 70% of nominal after 20 seconds.
- **Rectangular current limiting** so you can drive non-linear loads.
- **Parallel operation:** Units may be paralleled for increased current. The 1500W models feature automatic current sharing.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Fan cooling in 300W and 1500W models:** Other models employ convection. No external heat sinks required.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780, Class A.
- **Safety:** All models recognized by UL 478 (4,5); UL 1950. Certified by CSA 1402 level 3. Approved by TÜV Rheinland IEC 380 & 950, VDE 0806, EN 60 950. Also certified to meet the MIL STD 810D environment.

KEPCO® THE POWER SUPPLIER™

KEPCO HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

KEPCO 600 WATT, 150KHz a-c to d-c SWITCHING POWER SUPPLIES

RBX™ 115/230V a-c input

These single output a-c to d-c switchers squeeze 600 Watts of stabilized power into a low profile package only 3¾" high. Series RBX operates FETs at 150 KHz for high efficiency. The extensive use of custom hybrid microcircuits and a unique output power assembly contribute to high reliability by reducing the parts count well below that of conventional designs.

Features:

- **"Power-OK" LED**
- **Active soft-start circuit:** Limits a-c turn-on surge.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Remote voltage control:** Adjust output setting with external resistance.
- **Adjustable voltage:** Internal trimmer accessible through case.
- **Overvoltage protection.** (See table)
- **Undervoltage protection:** Shuts down for voltage below 70% of nominal after 20 seconds.
- **Rectangular current limiting:** So you can drive non-linear loads.
- **Parallel operation:** Units may be paralleled for increased current. Provision is made for current sharing.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Fan cooling:** "Fan ok" circuit inhibits Power FET drive and turns off output if fan fails to operate.
- **EMI:** Auxiliary filter (FLA 250-20) available to meet FCC 20780 for Class B computing devices.
- **Safety:** All models recognized by UL and certified by CSA. Also certified to meet the MIL STD 810D Environment.

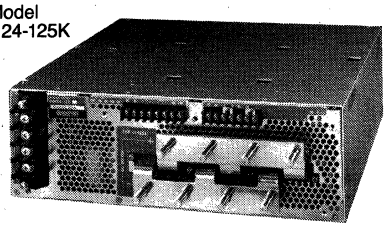
KEPCO® THE POWER SUPPLIER™

KEPCO HEAVY DUTY INDUSTRIAL GRADE SWITCHING MODULES

RAY™

Model
RAY 24-125K



3000 WATT, 3 PHASE a-c INPUT

Series RAY is an extension of Kepco's popular RAX power supply design. It comprises three models 5V, 24V and 48V, rated for approximately 3000 Watts. The 5V model produces 600 Amperes to drive heavy-duty loads. Yet RAY retain the low profile 110mm (4.3") height that characterize RAX.

To accommodate this enormous power, the input is configured for three phase delta input (200-240 Volts line to line, nominal, 50-60Hz).

RAY incorporate passive power factor correction. The power factor of 0.92 is typical. Approval is pending by TÜV to the new international safety standard IEC 950 and by UL to its counterpart, UL1950. CSA has certified to EB 1402C. An FCC class A EMI filter is built in. They have been tested in accordance with MIL STD 810D.

RAY are modern 150KHz forward converters that provide 80% conversion efficiency.

Features:

- **Current balance circuit:** In case 600 Amperes is not enough, a current balance allows up to three like units to be paralleled to share the load.
- **Remote on/off:** A TTL compatible signal applied to the optically isolated "RC" terminals turns the output on. This control reduces surge stress on the input circuit components.
- **Remote voltage adjustment:** Provides a means to trim the output setting remotely.
- **Over voltage/Under voltage:** These sensors shut the power supply down and require that the operator reset by removing the input. A red LED provides visual warning and the output alarm logic signal (open collector) is activated.
- **Power OK:** Provides a photocoupled open collector logic when the output is correct.
- **Open phase:** A sensor lights a red LED and shuts down the power supply if any one of the three input phases fails. This sensor also activates the output alarm logic signal (open collector).
- **Fan failure:** A lack of proper cooling (there are three fans) activates the output alarm logic, shuts down the power and lights a red LED.

DIMENSIONS

KEPCO® THE POWER SUPPLIER™

KEPCO HEAVY DUTY INDUSTRIAL GRADE d-c to d-c CONVERTERS

ERD™ SINGLE OUTPUT

24V and 48V d-c input

These are d-c to d-c converters operating at 300KHz. High frequency switching, plus extensive use of custom hybrid microcircuits with surface mount components, allow for small size (the ERD are only 3¾" high). The microcircuits afford high reliability by contributing to low parts count. The ERD are true transformer isolated power supplies whose output polarity is independent of the input. Available sizes: 30W, 60W, and 150W.

Features:

- **"Power-OK" LED.**
- **Remote on/off:** Optically isolated logic signal.
- **Remote error sensing:** Compensates for voltage drops between power supply and load.
- **Adjustable voltage** with internal trimmer.
- **Overvoltage protection.**
- **Rectangular current limiting** so you can drive non-linear loads.
- **Built-in EMI filter** meets conducted noise standard of MIL- STD 461B.
- **Safety:** All models recognized by UL, certified by CSA.

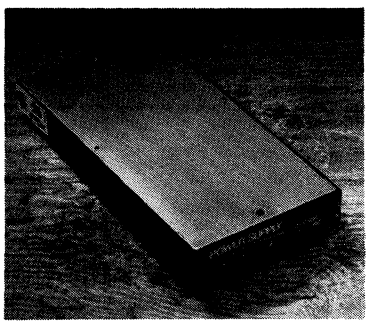
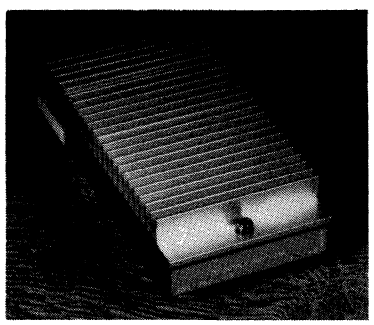
KEPCO® THE POWER SUPPLIER™ FPD™

KEPCO FLAT PACK d-c to d-c BOARD-MOUNT CONVERTERS



50 and 100 Watt Module



100 Watt Module Shown With Optional Finned Radiator

FINNED ACCESSORIES

Finned radiators available for 50W & 100W designs.

The FPD 5W and 10W modules require no added cooling for normal operation. The 50W and 100W modules may require additional heat sinking. The special construction of FPD fastens surface-mount devices to the aluminum base plate so that excellent thermal coupling is obtained. Depending upon your application, FPD modules may be fastened by their base plate surface to a chassis or other cold plate – or a finned radiator may be attached as illustrated.

For normal operation at 100% current, the average base plate surface temperature should be maintained at or below 85°C.

FPD 50W	12V, 24V, 50V, 150V	use FIN-50
FPD 100W	24V, 48V	use FIN-50
FPD 100W	150V	use FIN-100

DIMENSIONS

5W: inches – 2 x 1.57 x 0.3 mm – 50.8 x 39.8 x 8.5
10W: inches – 2 x 2 x 0.3 mm – 50.8 x 50.8 x 8.5
50W: inches – 2.28 x 4.53 x 0.52 mm – 58 x 115 x 13.2
100W: (24V, 48V) inches – 2.28 x 4.53 x 0.52 mm – 58 x 115 x 13.2
100W: (150V) inches – 2.28 x 5.12 x 0.52 mm – 58 x 130 x 13.2

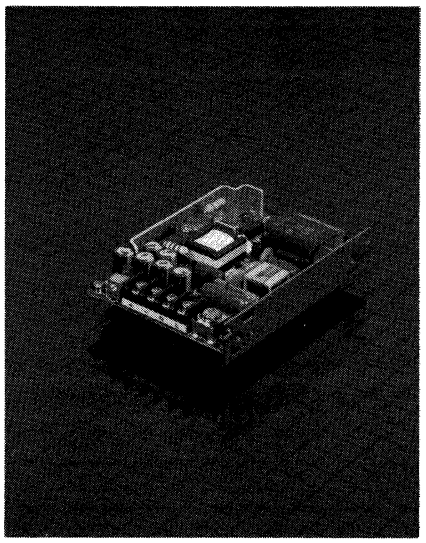
KEPCO® THE POWER SUPPLIER™

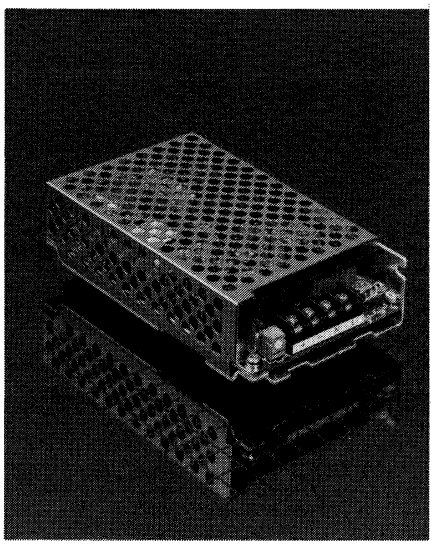
KEPCO OEM a-c to d-c SLIM SWITCHING MODULES

Very compact switching power supplies featuring surface mount construction, 1-inch thin.

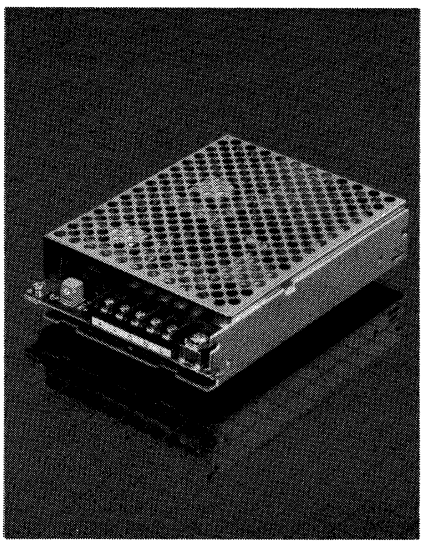
NORTH AMERICAN SERIES FAK™ 85-132V a-c input



15W Model FAK 5-3K
(optional enclosure CA-21)



25W Model FAK 5-5K
(shown with optional enclosure CA-22)



50W Model FAK 5-10K
(shown with optional enclosure CA-23)

These modern single output switchers employ advanced surface mount technology to achieve small size and very low profile, to fit where space is at a premium. They are designed to the standards of UL and CSA. Input is 85~132V a-c; outputs are 5V, 12V, 15V, and 24V d-c. The 15 and 25 Watt models employ flyback topology; the 50 Watt models are forward converters.

Features:

- **Power-OK LED:** green.
- **a-c input 85-132V; d-c input 110-170V.**
- **FET-based high frequency operation** (up to 250 KHz) for high efficiency.
- **Soft-start circuit:** Limits a-c turn-on surge.
- **Adjustable voltage:** Internal trimmer accessible through the case allows manual adjustment of the voltage setting.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780, for Class B computing devices. Optional perforated metal covers attenuate radiated noise and provide protection.
- **Safety:** UL recognized. CSA certified.
- **Optional Steel Enclosures:** CA 21, CA 22, CA 23.

For summary specifications see pages 16 & 17

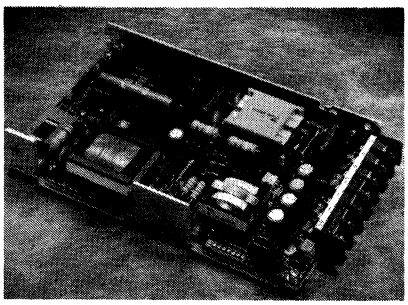
KEPCO® THE POWER SUPPLIER™

KEPCO OEM a-c to d-c SLIM SWITCHING MODULES

Very compact switching power supplies featuring surface mount construction, 1-inch thin.

INTERNATIONAL SERIES FAW™

Wide Range 85-264V a-c input



50W Model FAW 12-4.2K

These modern single output switchers employ advanced surface mount technology to achieve small size and very low profile, to fit where space is at a premium. They are designed to the standards of UL, CSA and TÜV Rheinland. Input is 85~264V a-c; outputs are 5V, 12V, 15V, and 24V d-c. The 100 and 150 Watt groups feature 28V and 48V output models. The 15 and 25 Watt models employ flyback topology; the 50, 100 and 150 Watt models are forward converters.

Features:

- **Power-OK LED:** green.
- **Power-OK logic:** open collector.
- **a-c input:** 85-264V a-c; **d-c input:** 105-370V d-c.
- **Operating frequency:** 120-130KHz.
- **Soft-start circuit:** limits a-c turn on surge.
- **Adjustable voltage:** internal trimmer.
- **Holding time:** output is sustained by internally stored energy for 20ms typical 15ms minimum.
- **Built in EMI filter:** attenuates the conducted noise below the requirements of both FCC 20780 and VDE 0871 for Class B computing devices. Optional perforated metal covers attenuate radiated noise and provide protection.
- **Safety:** All models recognized by UL 478 (4,5); UL 1950. Certified by CSA 1402 level 3. Approved by TÜV Rheinland IEC 380 & 950, VDE 0806, EN 60 950. Also certified to meet the MIL STD 810D environment.
- **Connections:** input and output screw terminal barrier strip.
- **Remote error sensing:** the 50W, 100W & 150W FAW provide separate remote error sense terminals: 0.25V drop/wire.
- **Optional Steel Enclosures:** CA 24, CA 25, CA 26, CA 27 and CA 28.

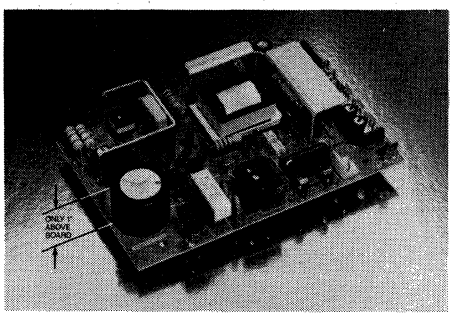
KEPCO® THE POWER SUPPLIER™

KEPCO OEM a-c to d-c SLIM SWITCHING MODULES

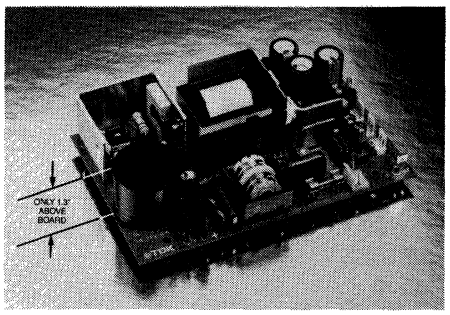
Universal input 90~264V a-c without user selection.
Low profile on industry standard 100 x 160mm PC card footprint, optional enclosure.

MRW™ 90~264V a-c input

A new series of multi-output PC card switchers which employ advanced input and output capacitors and magnetics to achieve a very slim profile. In Model MRW 150KV (35 Watts) the overall thickness is 30mm and component length is only 1" (25.4mm) above the PC card. All models are built on the same card footprint (100 x 160mm) to allow users for whom low profile and/or a wide input range will be significant, to easily upgrade. Connector cable kits available.



Model MRW 150KV



Model MRW 160KV, MRW 161KV

Features:

- **115/230V a-c operation without user intervention:** Special flyback circuit accepts any input voltage from 90V to 264V a-c.
- **Power-OK logic (TTL compatible) signal** may be used as power fail signal. Logic "1" is given when +5V output is above 4.5V.
- **Current trade-off:** Current may be increased from one of the outputs at the expense of the others, within the limits defined by Figure 1.
- **Adjustable voltage:** Internal trimmer.
- **Overvoltage protection for principal output** shuts down all outputs if output voltage is forced beyond the set limit.
- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780 for Class B computing devices.
- **Safety:** All models recognized by UL 478 (4,5); UL 1950. Certified by CSA 1402 level 3. Approved by TÜV Rheinland IEC 380 & 950, VDE 0806, EN 60 950. Also certified to meet the MIL STD 810D environment.
- **Optional Steel Enclosures:** CA 19, CA 20.

KEPCO® THE POWER SUPPLIER™

KEPCO OEM a-c to d-c SLIM SWITCHING MODULES

FMP™ 115V a-c input

SINGLE OUTPUT LOW PROFILE PLASTIC ENCASED SWITCHING POWER SUPPLIES

10W model shown
Model FMP 5-2K

These are plastic encased 3- and 10-Watt single output a-c to d-c flyback voltage stabilizers, producing 5V, 12V, 15V, or 24V.

Features:

- **±10% voltage adjustment.**
- **Voltage limited** by zener diode across output.
- **Rectangular current limiting** so you can drive nonlinear loads.
- **Low profile:** Only ¾" thick.

3 WATT MODELS

MODEL	OUTPUT VOLTS	ADJUSTMENT RANGE	OUTPUT CURRENT, AMPS, AT 50°C Max	SW RIPPLE mV	NOISE (SPIKE) Max mV
FMP 5-0.6K	5	4.5-5.5	0.6	<50	<100

Case size: 2.17" x 0.75" x 3.16" Net weight: 0.2 lb. **Cased only.**

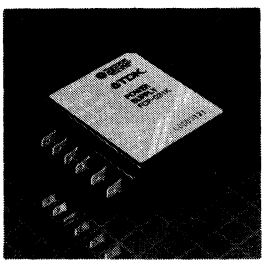
FCP™ 115V a-c input

DUAL OUTPUT LOW PROFILE PLASTIC ENCASED SWITCHING POWER SUPPLIES

These are plastic encased 3- and 10-Watt flyback a-c to d-c switchers producing a dual output (±12V or ±15V).

Features:

- **Principal (*plus*) output adjustable ±10%;** auxiliary (*minus*) tracks it with an accuracy of ±2% using a 3-terminal (linear) regulator.
- **Rectangular current limiting on both outputs.**
- **Low profile:** Only ¾" thick.



3W model shown

Case size: 2.17" x 0.75" x 3.16" Net weight: 0.18 lb. **Cased only.**

(1)Output #2 tracks Output #1 setting, ± 2%.

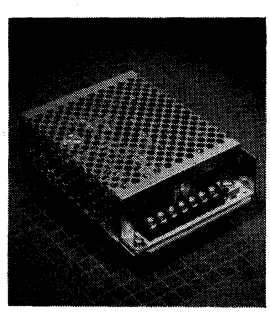
ECM™ 115V a-c input

TRIPLE OUTPUT L-CHASSIS SWITCHING POWER SUPPLIES

These are triple output, 16 Watt metal enclosed switching power supplies featuring simplicity and high reliability.

Features:

- **Adjustable voltage:** (+5V) set by internal trimmer.
- **Auxiliary outputs:** (±12V or ±15V) use 3-terminal stabilizer.
- **Metal enclosure** reduces the radiated noise and provides protection.



16 WATT MODELS

MODEL	OUTPUT VOLTS (Output #1)	OUTPUT VOLTS (Output #2)	OUTPUT VOLTS (Output #3)	OUTPUT CURRENT, AMPS, AT 50°C (Output #1) Max	OUTPUT CURRENT, AMPS, AT 50°C (Output #2) Max	OUTPUT CURRENT, AMPS, AT 50°C (Output #3) Max	SW RIPPLE mV	NOISE (SPIKE) Max mV

ECM 022K-CB	+5	+15	−15	2	0.3	0.2	<120(1)	

Case size: 3.6" x 1.28" x 4.72" Net weight: 0.8 lb. **Cased only.**

(1) Outputs 2 & 3: <60mV.

ALL MODELS:

- **Holding time:** 30 milliseconds typically, 20 milliseconds minimum.
- **Built-in EMI filter** attenuates conducted noise below the requirements of FCC 20780 for Class B computing devices.
- **Safety:** All models recognized by UL, certified by CSA.

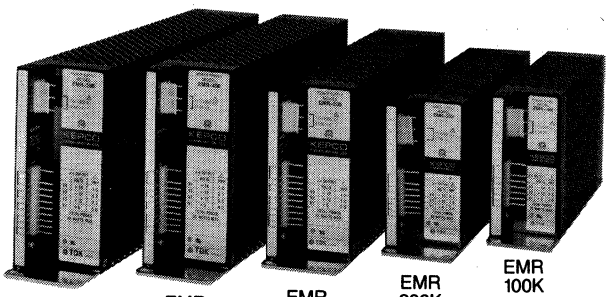
KEPCO® THE POWER SUPPLIER™

KEPCO OEM a-c to d-c SWITCHING MODULES

EMR™ THREE AND FOUR OUTPUT

115/230V a-c input



EMR 500K | EMR 400K | EMR 300K | EMR 200K | EMR 100K

These fully enclosed multi-output power supplies are intended for industrial grade applications when low cost open frame units just won't do. Their built-in EMI filter meets FCC Class B, conducted EMI specifications. Molex input-output connectors allow easy installation. Connector cable kits available.

EMR 100K			22W
OUTPUT	VOLTS	AMPS	SW RIPPLE mV typ
Output #1	+5V	1.0 to 3.0	<50
Output #2	+12V	0.0 to 0.3	<50
Output #3	−12V	0.0 to 0.3	<50

Case size: 1.8″ x 3.9″ x 6.4″ Net weight: 1.3 lbs.

EMR 200K			42W
Output #1	+5V	1.0 to 3.0	<50
Output #2	+12V	0.4 to 2.0	<50
Output #3	−12V	0.0 to 0.3	<50

Case size: 2.0″ x 3.9″ x 7.8″ Net weight: 1.8 lbs.

EMR 300K			54W
Output #1	+5V	2.0 to 6.0	<50
Output #2	+12V	0.2 to 1.0	<50
Output #3	−12V	0.2 to 1.0	<50

Case size: 2.1″ x 4.5″ x 8.8″ Net weight: 2.2 lbs.

EMR 400K			53W
Output #1	+5V	2.0 to 4.0	<50
Output #2	+12V	0.1 to 0.5	<50
Output #3	−12V	0.0 to 0.3	<50
Output #4	+24	0.2 to 1.0	<50

Case size: 2.1″ x 5.1″ x 8.8″ Net weight: 2.4 lbs.

EMR 500K			80W
Output #1	+5V	2.0 to 5.0	<50
Output #2	+12V	0.4 to 2.3	<50
Output #3	−12V	0.0 to 0.3	<50
Output #4	+24V	0.2 to 1.0	<50

Case size: 2.1″ x 5.1″ x 10.0″ Net weight: 3.1 lbs.

For summary specifications see pages 16 & 17

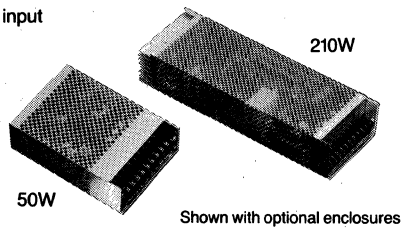
EFX™ FOUR OUTPUT

115/230V a-c input

Four convenient sizes: 50 Watts, 100 Watts, 150 Watts and 210 Watts. Each available in a variety of popular volt-ampere combinations. Built-in EMI filter attenuates conducted EMI to the limit of FCC Class A.



Shown with optional enclosures

Note: Figures in parenthesis ( ) are for 15V aux. output

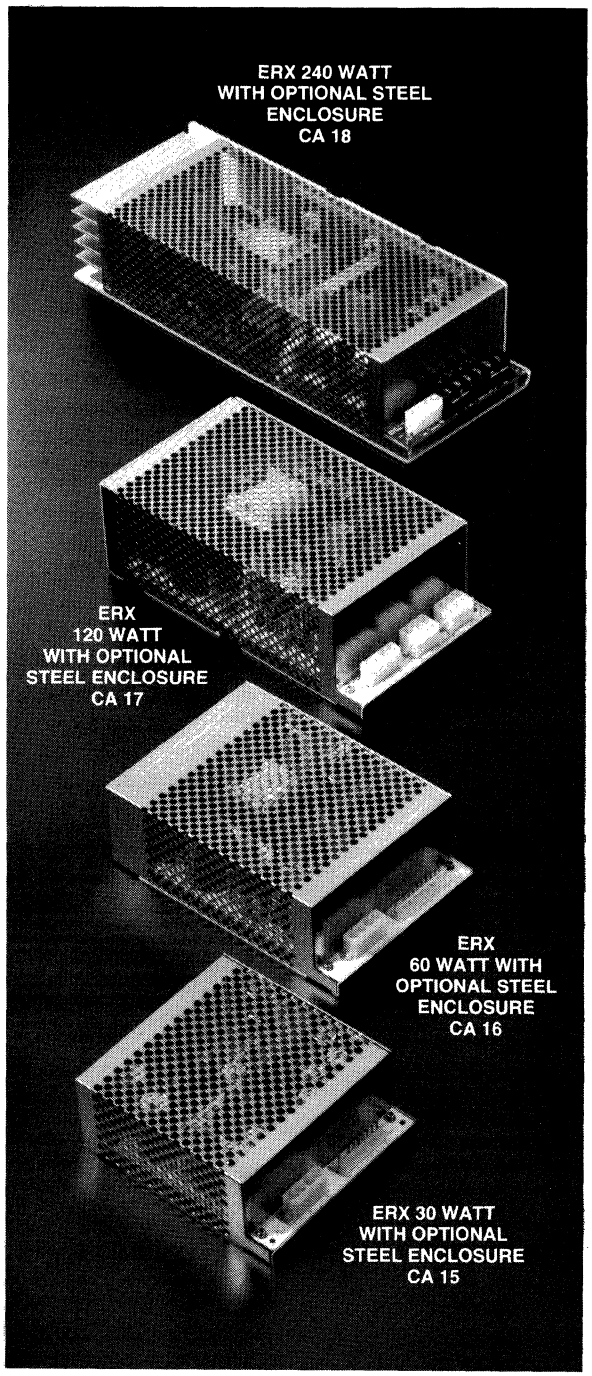
KEPCO® THE POWER SUPPLIER™

KEPCO OEM a-c to d-c SWITCHING MODULES

ERX™ 115/230V a-c input

WORLD POWER™ SINGLE OUTPUT

For the demanding requirements of OEM instrument makers, these are affordable low cost switching power supplies built on an open frame L-chassis, with optional perforated metal enclosures. Input and output is via Molex pin headers for easy installation (except for the 240 Watt models which use a barrier strip for their high current output). The built-in EMI filter meets the conducted EMI attenuation limits of FCC Class B. The use of custom hybrid microcircuits reduces parts count and contributes to high reliability. Connector cable kits available.



240 WATT MODELS

KEPCO® THE POWER SUPPLIER™

KEPCO CUSTOM SYSTEM POWER ASSEMBLIES

You design them... Kepco builds them for you.

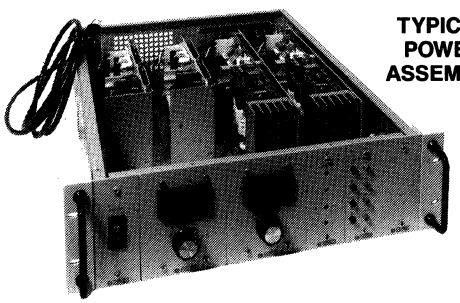
These are combinations of Kepco power supplies and accessories, custom-designed by you and your Kepco sales engineer, expertly wired, ready for your rack — at surprisingly low cost.

Our expert engineers will work with you to layout a custom assembly to your specifications choosing from power modules that span 3 Watts to 1500 Watts, 2 Volts to 48 Volts — a-c and d-c inputs.

Call your Kepco Sales Engineer to help you meet your Custom Power Assembly needs.

Let us send you a 4-page brochure that tells you a lot more. Ask for Power Assembly brochure 146-1637.

Consult factory for special requirements.



TYPICAL POWER ASSEMBLY

CURRENT SENSING RESISTORS

Model	Resistance	Current display
KT 1915	1.0Ω	0-199.9mA

KEPCO® THE POWER SUPPLIER™

POWER MANAGERS™ for LABORATORY & SYSTEMS

ATE™ LINEAR PROGRAMMABLE POWER SUPPLIES FOR AUTOMATIC TEST EQUIPMENT SYSTEMS.

FEATURING:

- Full external control over both voltage and current with automatic crossover; separate voltmeter and ammeter for continuous output monitoring. Local control through 10-turn rheostats on front panel, remote through fixed gain power amplifier scaling from an input of 10 Volts to rated voltage.
- Digital control. ATE power supplies can be controlled by any of Kepco's systems programmers including the MATE-verified TLD 488-16.
- User selectable slow or fast mode of operation; slow mode is ideal for delivering constant voltage; in fast mode, the ATE can follow rapidly changing load voltages to deliver constant current, or follow high speed voltage or current programming.
- Two built-in, uncommitted amplifiers for scaling, summing, or other manipulation of programming signals. Both voltage and current control channels have full zeroing and calibration facilities for compatibility with Kepco's digital interfaces.
- Programmable/ tracking overvoltage protection.

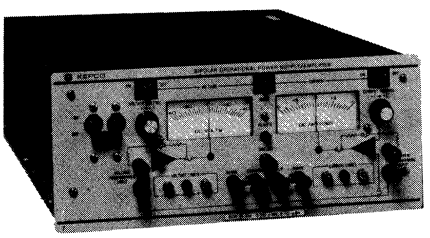
KEPCO®

THE POWER SUPPLIER™

POWER MANAGERS™ for LABORATORY & SYSTEMS

BOP™ 4-QUADRANT VOLTAGE/CURRENT STABILIZERS



These are four-quadrant bipolar power supplies that can be controlled (programmed) linearly from positive to negative output. They may be programmed as a voltage source with current limiting, or as a current source with voltage limiting. Their wide bandwidth encompasses nearly all of the audio spectrum for use as a powerful amplifier, or as a driver of complex waveforms for ATE operations. The BOPs are able to sink power when driving dynamic loads. IEEE-488 programming is possible with the optional internal BIT card (see below), or with one of the Kepco system programmers, including the MATE-verified TLD 488-16 which uses CIIL commands. For full TLD details, refer to page 30.

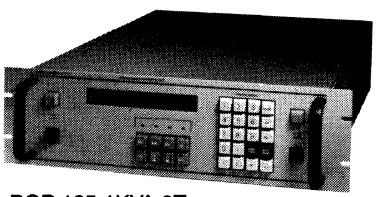
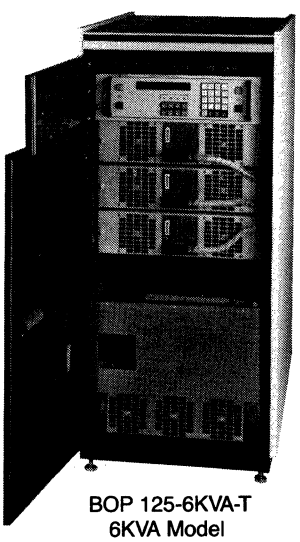
KEPCO. PACIFIC **THE POWER SUPPLIER™**

BOP-ac™ PROGRAMMABLE ac POWER SUPPLIES

GPIB-controlled ac power from 1KVA to 18KVA, 0-125Vac (rms), 47 to 2000Hz. Transient generation capability permits superimposition of amplitude and frequency disturbances including partial-cycle dropouts (6 & 18 KVA). A panel-mounted keyboard and 80-character LCD display offer local control and monitor. Linear design, high-efficiency circuit.



BOP 125-1KVA-3T
1KVA Model



BOP 125-6KVA-T
6KVA Model

This KEPCO product is backed by a firm 1-YEAR WARRANTY

KEPCO® THE POWER SUPPLIER™

POWER MANAGERS™ for LABORATORY & SYSTEMS

JQE™ 115/230V a-c input

GENERAL PURPOSE VOLTAGE STABILIZERS

Systems-type, voltage stabilizers with current limiting, programmable from the IEEE bus using Kepco digital interfaces. JQE's voltage control channel has an I-C front end for maximum stability and minimum offset. The rated power is delivered under the realistic thermal environs of a system's cabinet with no derating. The 10-turn voltage control is standard. For units requiring overvoltage protection and/or high speed programming, see the ATE group.

(1)External current sensing, using the *voltage* amplifier. Effects are measured for a 1-volt current sensing voltage drop.
(2)Whichever is greater.
(3)Typical temperature effect coefficients are: 0.005% per °C voltage mode; 0.01% per °C externally sensed current mode.
(4)One terminal grounded or connected so that the common-mode current does not flow through the load or (in current-mode) through a sensing resistor.
(5)20 Hz to 10 MHz.

For complete specifications send for Kepco Instrumentation Catalog 146-1716. Data and specifications subject to change without notice.

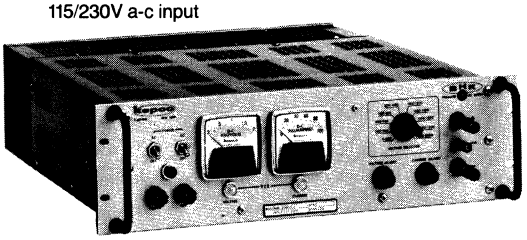
BHK™ 200 WATT AUTOMATIC CROSSOVER, CONVENTIONAL AND HIGH SPEED

115/230V a-c input



Models BHK 500-0.4M and BHK 1000-0.2M are programmable from the IEEE-488 bus using one of the stand-alone Kepco digital interfaces. For control of the 2000V model please consult the factory. The BHK are arranged in an automatic crossover configuration for control of both voltage and current. Provision is made for disconnecting the output capacitor for high speed programming.

200 WATT MODELS

MODEL	VOLTS	AMPS
BHK 500-0.4M	0–500	0–0.4
BHK 1000-0.2M	0–1000	0–0.2
BHK 2000-0.1M	0–2000	0–0.1

CONTROL/PROGRAMMING:
Output voltage is controlled from the panel by a combination of a 10-position decade switch and a 10-turn vernier control. This arrangement provides 0.005% resolution yet does not inhibit the ability to sweep program a BHK linearly through its entire range. External control can be exercised by a resistance (1000 ohms per volt) or by a control voltage, delivering 0 to +1 milliampere into the summing junction with respect to the plus (+) output/sense terminal. External signals can be substituted for, or summed with, the internal reference for additional control. BHK can be strapped for either conventional speed operation or for fast programming. In fast mode the output can be controlled at 0.5V per microsecond.

DIMENSIONS: $5^{7}/_{32}$"H x 19"W x $15^{5}/_{16}$"D (behind panel) **NET WEIGHT:** 38 lbs.

(1) ΔE_{io} for load in current stabilization mode is ΔE_O/open-loop gain. ΔE_O is the compliance voltage change.

The output effect can be calculated by the relationship:
$\Delta E_O = \pm \Delta E_r (R_f/R_i) \pm \Delta E_{io} (1 + R_f/R_i) \pm \Delta I_{io} (R_f)$,
where R_f is the feedback resistor and R_i is the input resistor from the reference, E_r.

KEPCO® THE POWER SUPPLIER™

POWER MANAGERS™ for LABORATORY & SYSTEMS

HIGH VOLTAGE MODELS

FOUR-QUADRANT VOLTAGE/CURRENT STABILIZERS

BOP-HV™

These high voltage power supplies share the bipolar and source/sink capabilities of the lower voltage BOP. Their outputs can be made to vary smoothly and linearly through their entire rated plus and minus ranges, passing linearly through zero. They can source as well as sink 100% of their current rating at any voltage setting. BOP-HV models are bounded in all four quadrants by four fully adjustable, programmable boundary limits, and are digitally programmable with any of the Kepco SN series systems programmers.

(1) Specifications are expressed as a *percent-of-setting* for the output range 10% to 100%. Below 10% output, specification limit is the rated percentage of the 10% output setting.
(2) Or 0.2μA, whichever is greater.
(3) Measured with the common terminal grounded so that the common mode current does not flow through the load.
(4) Peak-to-peak ripple is measured over a 20Hz to 10MHz bandwidth.
(5) For frequency components in the bandwidth of the current stabilizer. Beyond cutoff, noise will appear as a voltage component equal to the rated voltage mode noise.

This KEPCO product is backed by a firm 5-YEAR WARRANTY

KEPCO® THE POWER SUPPLIER™

BENCH TYPE POWER SUPPLIES

MSK™ SINGLE OUTPUT

This KEPCO product is backed by a firm 5-YEAR WARRANTY

Powerful linear power supplies with unique "preview" feature

This new series gives you a selection of five models, offering 100 Watts of clean, stable benchtop power. The Kepco Series MSK features front panel 10-turn precision controls for voltage and current, with automatic crossover between modes. A pair of LED mode indicators (green for voltage mode, amber for current), two 3½ digit meters and heavy duty output binding posts for easy connection to your breadboards, are also on the front panel.

The preview switch (d-c on-off) allows you to pre-set voltage and current with the digital meters displaying the set values. At "d-c off", no voltage is applied to the output terminals and no load current needs to be drawn to set the current control. At "d-c on", the set voltage is applied to the output terminals. The appropriate mode indicator is lit, and the meters indicate *actual* voltage and current.

Series MSK power supplies use fully dissipative, high gain linear (series pass) stabilizer circuits, for low noise output, good stability, and accurate resettability. A built-in quiet, low-speed fan ensures good cooling in the crowded environment of your laboratory.

100 WATT MODELS

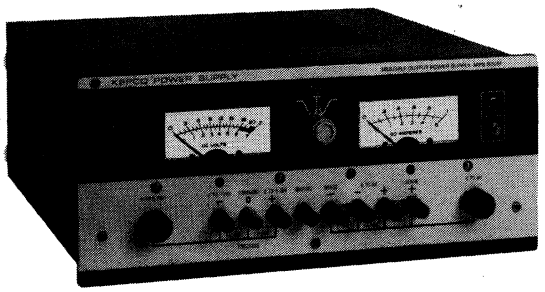
Note: Percentage values are referenced to the maximum rated voltage or current of the unit.

MPS 620M™ MULTIPLE OUTPUT



This power supply has been specifically designed to meet the needs of the IC/microprocessor experimenter.

The MPS 620M is actually two linear (series pass) power supplies in one: The first has a single 0-6V, 0-5A output for digital work; the second has two *tracked* outputs, 0 to +20V and 0 to −20V, both rated at 0-1Amp. The two power supplies are completely isolated from each other, sharing only the front panel meters and the chassis.

The 0-6V output is continuously adjustable with a 10-turn control on the front panel, and is backed up by a current limiter and overvoltage crowbar. The crowbar is set by a locking-type screwdriver adjustment. The fixed rectangular current limit circuit is set to approximately 110% of maximum current. The dual 0 to ±20V outputs are continuously adjustable by a single 10-turn front panel control, and tracking is better than ±1% +10mV. The outputs can be used in series to provide 0-40V, but since they share a common (center) terminal, they cannot be used in parallel. Both outputs are equipped with adjustable current limits.

70 WATT MODEL

OUTPUT	VOLTS	AMPS
Output #1	0 to 6	0-5
Output #2	0 to +20	0-1
Output #3	0 to −20	0-1

Outputs 2 and 3 are tracked.
Output 1 is protected by an overvoltage crowbar.

DIMENSIONS: 5 7/32"H x 12 17/32"W x 12 7/8"D **NET WEIGHT:** 29 lbs.

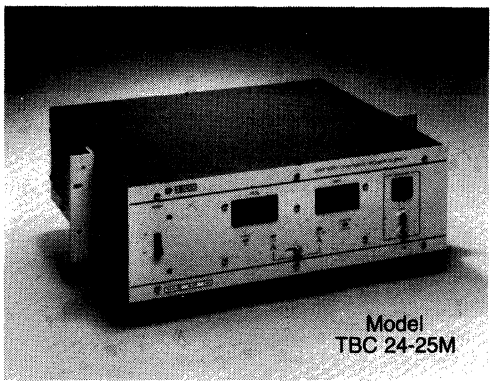
KEPCO® THE POWER SUPPLIER™

BENCH TYPE POWER SUPPLIES

TELECOMMUNICATION BATTERY CHARGERS
SINGLE PHASE • 12A TO 120A • 300 TO 3000 WATTS

TBC™



Model TBC 24-25M

Kepco's TBC are designed for float-equalize service to maintain battery arrays such as are found in many telecommunication installations. The TBC are fully filtered and stabilized battery eliminators that also find application as burn-in power supplies. The float and equalize settings are fully independent adjustments whose settings are made by screwdriver access through small sliding doors in the front panel. The digital voltmeter allows precise adjustment. A digital ammeter displays the charging current or output current.

If the current drops to zero – either because the ac mains power to the TBC is lost, the front panel circuit breaker is turned off or the voltage setting is adjusted below the battery's voltage, a "charging stopped" LED is illuminated and a flag signal is provided.

Equalize mode can be selected either with a front panel push button – or a remote contact closure. This sets the voltage to the equalize level (adjustable). A timer is activated that will reset back to float mode after a period of time (0.1 to 99.9 hrs) that can be set from the front panel with a thumbwheel selector. A flag signal is produced when the TBC is in equalize mode.

Kepco's TBC employ high frequency switching technology (100-150 KHz forward converters) for high efficiency, small size and light weight. The output is filtered so that residual voice band noise (on battery) is below 22dB rnC.

This KEPCO product is backed by a firm 5-YEAR WARRANTY

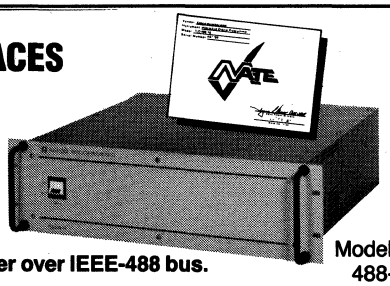
KEPCO®

DIGITAL PROGRAMMING INTERFACES

TLD 488-16™ MATE-verified INTERACTIVE DIGITAL PROGRAMMER



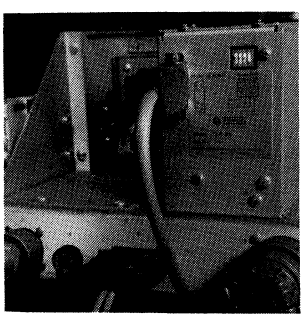
Model TLD 488-16

Commands and reacts to responses from up to 16 programmable power supplies... uses "CIIL" commands in communicating with computer or controller over IEEE-488 bus.

The Kepco TLD 488-16 digital interface is designed to operate with all Kepco Series ATE (Unipolar 50-1000W) and Series BOP (Bipolar 100-400W) to provide MATE-verified talker listener control using CIIL. Kepco-provided accessories include special mounting adapters for the power supplies to accommodate optional isolation relays per the MATE protocol.

You may use CIIL verbs and nouns with the TLD 488-16 to set up to 16 different power supplies with a voltage setting and current limit or current setting with a voltage limit.

The TLD measures the actual voltage or current, compares it with the setting and if not equal determines whether one of several conditions are responsible (out of range, overloaded, crowbarred, etc.) These are reported back to the host computer.



Isolation relay TLR 25

ISOLATION RELAYS TLR 25 AND TLR 200

Kepco offers two isolation relays which can be interposed between the power supply and the load in accordance with MATE system requirements: TLR 25, rated at 25 Amps, and TLR 200, rated at 200 Amps. They are operated by the TLD 488-16 through a separate, discrete interface and "I/O Isolation Relay Port," and respond to the CIIL commands "open" and "close." The address of each relay is set with a DIP switch on the back of the relay.

Interface functions implemented by Kepco's TLD 488-16 on the General Purpose Interface Bus (GPIB) defined by IEEE-488 are:

GPIB FUNCTION	SYMBOL SUBSET
Source Handshake	SH1
Acceptor Handshake	AH1
Talker(1)	T6
Listener(2)	L4
Service Request	SR1
Device Clear	DC1

(1)Basic talker, serial poll, unaddress if MLA
(2)Basic listener, unaddress if MTA

TLD 488-16 GENERAL SPECIFICATIONS

a-c voltage	115/230V; 50 - 60 Hz
Input current	@115V a-c: 5A; @230V a-c: 2.5A
Aux. d-c output	+5V at 10A
Ambient operating temperature range	0 to +55°C
Storage range	−20 to +75°C
Dimensions	(inches) 5 7/32H × 19W × 16 3/16D (mm) 132.6H × 482.6W × 411.2D
Weight (packed for shipment)	20 lbs., 9 kg.
Color	Gray, Fed. Std. 26440
Mounting	19" rack (Provisions for Jonathan 130-QD series slides)

PLUG-IN PROGRAM CARDS (Standard Multibus Size)

The TLD 488-16 has provision for up to four plug-in cards called TL 488-4A for Kepco's ATE power supplies or TL488-4B for Kepco's BOP series bipolar power supplies. Each plug-in card can control the voltage and current function of up to four power supplies. With a full complement of four TL 488-4A or TL 488-4B, the system will control 16 individual, isolated, power supplies.

MODEL TABLE

Specifications	For ATE Models: TL 488-4A	For BOP Models: TL 488-4B
Number of isolated input/output ports	4	4
Analog outputs/port	2 channels.	
Analog output channels mode of operation	Voltage and Current limit or Current and Voltage limit. Determined by noun modifiers within set command.	
Analog output voltage level	0 to +10V for Voltage or Voltage limit channel. 0 to +1V for Current or Current limit channel.	0 to ±10V for main Voltage or Current channel. 0 to +10V for Current or Voltage limit channel.
Analog output current level	0 to +2mA per channel.	0 to ±2mA for main channel. 0 to +2mA for limit channel.
Output impedance	<0.05 ohms.	
Output resolution	12 bit. (0.024%)	
Linearity error (0 to +70°C)	< ±½ LSB.	
Adjustments(1)	Full scale calibration. Zero adjustment.	
Temp. coefficient (per degree C)	±0.02% at full scale. ±20μV at zero.	
Input/output isolation	500V d-c.	
Power supply ident. codes	Set with DIP switch for each port.	
Input signals accepted from the power supply	Supply absent flag. Voltage/current mode flag. Crowbar flag. Voltage out of limit (0.1% of full scale). Current out of limit (1.0% of full scale).	
Input digital commands	Via Multibus from TLD 488-16. All signals TTL compatible.	
Power requirements	+5V at 2A, via Multibus from TLD 488-16.	+15V at 40mA, −15V at 40mA, & +5V at 15mA, per port; provided by BOP power supply via input/output cable port.
Card, physical characteristic	Width: 12" Length: 6.75" Thickness: 0.5" Net weight: 20 ounces	

(1) TL 488-4A: both channels. TL 488-4B: main channel only.

For complete specifications send for Kepco Instrumentation Catalog 146-1716. Data and specifications subject to change without notice.

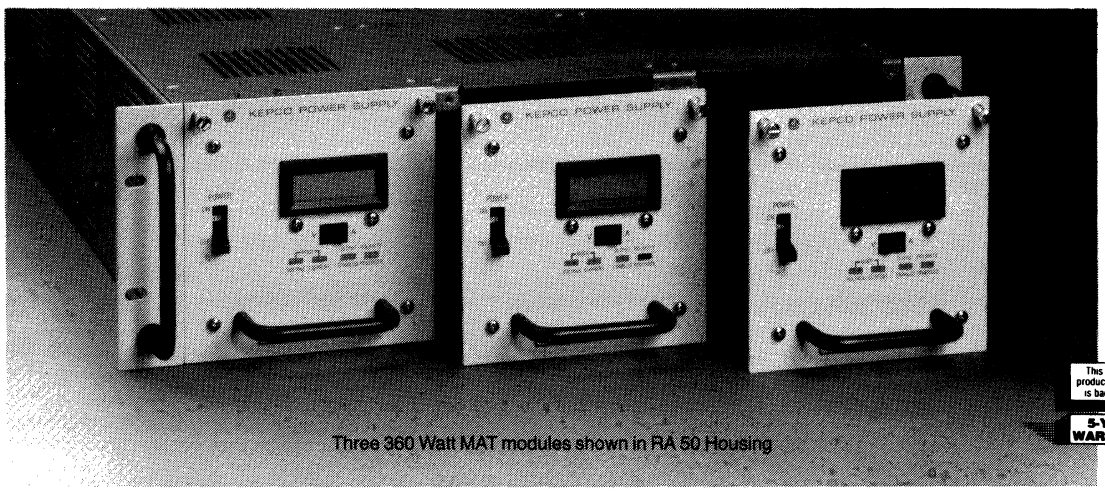
KEPCO® THE POWER SUPPLIER™

KEPCO, INC. announces a new class of Programmable Power Supplies that communicate and are controlled entirely by Digital Signals...Series TMA/MAT

Digital Power Supplies to the MATE Protocol..Kepco Series MAT



Three 360 Watt MAT modules shown in RA 50 Housing

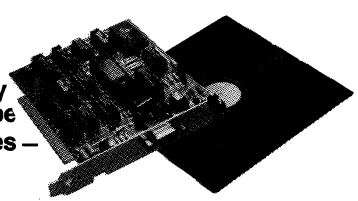
360 WATT MODULES – 1/3 RACK

Single output. Nominally 360 Watts.
Mount in RA 50 and RA 51.

Model	Volts	Amps	Power
MAT 6-32	0-6	0-32	192
MAT 15-20	0-15	0-20	300
MAT 25-14	0-25	0-14	350
MAT 36-10	0-36	0-10	360
MAT 55-7	0-55	0-7	385
MAT 75-5	0-75	0-5	375
MAT 100-3.6	0-100	0-3.6	360
MAT 150-2.4	0-150	0-2.4	360

NEW!

Use a PC to directly control Kepco's type MAT Power Supplies – without IEEE-488.



TMA PC-27 PLUG-IN CARD FOR YOUR PC

Software emulator of Kepco's model TMA 488-27. Where TMA 488-27 converts an IEEE-488 bus into the bit-bus to talk with a Kepco MAT power module, the new model, TMA PC-27, communicates directly from your PC to the MAT power modules. TMA PC-27 comprises a board that will fit into your PC or PC-AT or compatible computer. With the provided software, it allows your computer to emulate the whole TMA function. Your PC will communicate directly with up to 27 MAT power supplies providing all control and communication functions without requiring an IEEE-488 (GPIB) card.

720 WATT MODULES – 2/3 RACK

Single output. Nominally 720 Watts. Mount in RA 51

Model	Volts	Amps	Power
MAT 6-64	0-6	0-64	384
MAT 15-40	0-15	0-40	600
MAT 25-28	0-25	0-28	700
MAT 36-20	0-36	0-20	720
MAT 55-14	0-55	0-14	770

KEPCO® THE POWER SUPPLIER™

MAT GENERAL SPECIFICATIONS

PARAMETER	CONDITION	MAT POWER MODULE		
Description		**360W**	**720W**	**1080W**
Input Voltage Range	User Selectable	105-125V a-c 210-250V a-c		
Input Current max	115V a-c	7.0A	14.0A	21.0A
	230V a-c	3.5A	7.0A	10.5A
Input Frequency	Range	47-63 Hz		
Source Effect	Voltage	0.001% E_{omax}		
	Current	0.005% I_{omax}		
Load Effect	Voltage	0.002% E_{omax}		
	Current	3 mA		
Time 8 Hour Drift	Voltage	0.01% E_{omax}		
	Current	0.02% I_{omax}		
Temperature Coefficient/°C	Voltage	0.01% E_{omax}		
	Current	0.02% I_{omax}		
Ripple & Noise rms/p-p	Voltage	0.001% / 0.01% E_{omax} or 0.3mV / 3mV(1)		
	Current	0.03%/0.3% I_{omax}		
Transient Recovery	Voltage	100 µsec.		
Programming Resolution	Voltage	0.024% E_{omax} (12 Bits)		
	Current	0.024% I_{omax} (12 Bits)		
Data Read-Back Accuracy	Voltage	0.1% E_{omax}		
	Current	0.1% I_{omax}		
Operating Temperature	Range	0° to 50°C		
Remote Sensing	Range	0.5V per lead		
DC Output Isolation	Voltage	500V d-c		
Output Display	3½ Digit LCD	Switch Selectable Voltage/Current		
Indicators	4 LED	Voltage Mode, Current Mode, Output enabled, Polarity reversed		
Output Enable/Disable		Built-in power & sense relays		
Polarity Reversal		Built-in polarity reversal power & sense relays		
Protection	Overvoltage	Tracks program voltage, crowbars output & turns-off input		
	Overcurrent	Tracks program current, crowbars output & turns-off input		
	Overtemperature	Monitors heatsink temperature, crowbars output & turns-off input		
	Polarity Reversal	Built in diode protects unipolar supply output		
	Power Loss	Detects loss of a-c input power, disables output		
Mounting	Front	1/3 rack modules plug into RA 50		
		1/3 plus 2/3 rack modules plug into RA 51		
		Full rack mounts directly in 19" rack		
Filler Panels	For either RA 50 or RA 51	RFP 50-1 1/3 panel; RFP 50-2 2/3 panel		

(1) Whichever is greater

KEPCO®

DIGITAL PROGRAMMING INTERFACES

This KEPCO product is backed by a firm 5-YEAR WARRANTY

SNR 488™

CARD-CAGE STYLE PROGRAMMERS FOR MULTIPLE UNIT SYSTEMS

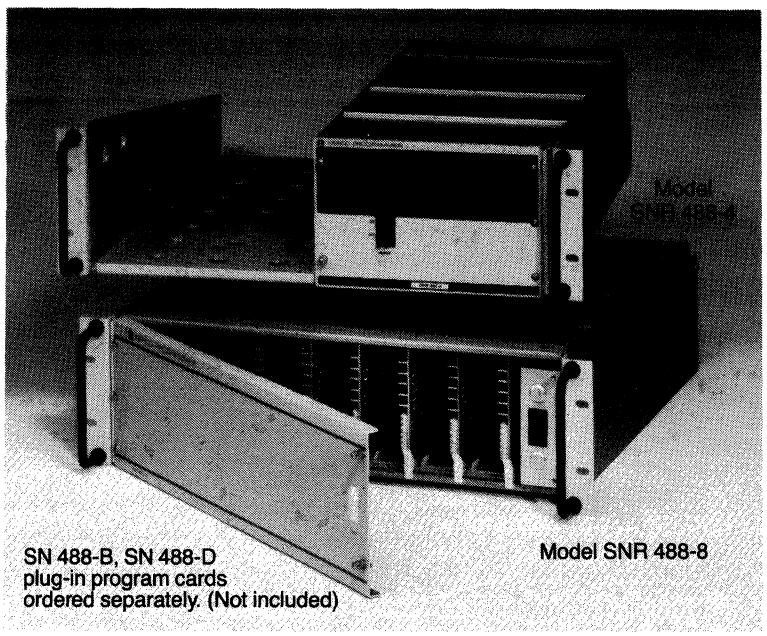
The SNR 488 system provides a card cage for plugging in dual channel program cards SN 488-B and/or SN 488-D.

Other provisions include:

IEEE-488 connector
Address select switch
Handshake card
Manual keyboard input connector
Local bus distribution to the card sockets

Each program card controls one Power Manager, and is isolated from the others in the card cage.

Two models of the SNR 488 card cages are available: **SNR 488-4** with space for four program cards, plus space for two ¼-rack or one ½-rack Power Managers. **SNR 488-8** with space for eight program cards.



SN 488-B, SN 488-D plug-in program cards ordered separately. (Not included)

Model SNR 488-8

SNR 488 GENERAL SPECIFICATIONS

	SNR 488-4	SNR 488-8
a-c voltage	105-125/210-250, 50-440 Hz.	
Power	≈ 6VA	
Dimensions (behind panel)	(inches) 5 7/32H × 19W × 17 13/16D (mm) 132.6H × 482.6W × 452.4D	
Weight (packed for shipment)	17 lbs. 7.7 Kg.	23 lbs. 10.5Kg.
Color	Two-tone black & gray Fed. Std. 26440	Gray Fed. Std. 26440
Mounting	19" rack (mounting "ears" supplied)	

SN 488-B plug-in program cards for SNR 488-4 and SNR 488-8, in 12 bit binary format.

SN 488-D plug-in program cards for SNR 488-4 and SNR 488-8, in 3 digit BCD.

SN cards can control two functions of any power supply in the following groups: ATE, BOP,(1) BOP-HV, JQE,(2) PTR, PAT, CC,(3) PCX-MAT,(2) BHK,(4) OPS IX,(4) and NTC.

RESOLUTION: 3 digit BCD (decimal) is 1 part in 999 (0.1%). 12 bit binary (hexadecimal) is 1 part in 4095 (0.024%).

DATA FORM: N = C AAA BBB (9 ASCII encoded characters). To "talk" to a power supply you should transmit a nine character set of the form:

N = C AAA BBB

N is the address of the particular program card to which you wish to "talk" (there are eight possible addresses from 0 to 7).

"=" is the ASCII character that separates the card address from data.

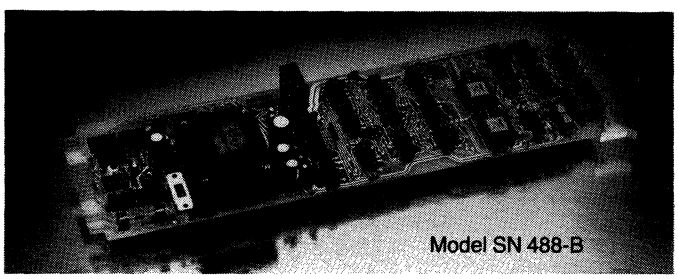
C is control character: 0, 1, 2,..., F (see Truth Table).

AAA is data as a percent of full scale (Channel A)

BBB is data as a percent of full scale (Channel B)

Note: The maximum output of the binary models is FFF (Hex). The maximum output of the BCD models is 999. In both instances "maximum" corresponds to an analog programming voltage of ± 10V or ± 1V (depending on the range and polarity selected).

(1) Instead of using built-in interface — when part of multiple unit installation
(2) Voltage channel only (3) Current channel only (4) 500V and 1000V models only



SN 488-B & SN 488-D GENERAL SPECIFICATIONS

SPECIFICATIONS		MODEL SN 488-B	MODEL SN 488-D

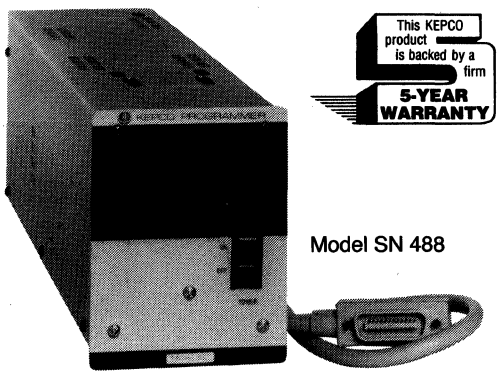
KEPCO® STAND ALONE DIGITAL INTERFACES FOR SINGLE OR MULTIPLE CHANNEL OPERATION

SN 488™ For use with buses using IEEE format (byte serial, bit parallel) data transfer

SN 500™ For use with buses using bit parallel data transfer



Model SN 488

These digital programmers are designed for use with all Kepco operationally-programmable power supplies (high speed and conventionally filtered) and/or voltage-controlled instruments. They enable you to interface your d-c power supplies with the logic bus of a computer-controlled system.

SN 488 and SN 500 are both available in decimal format (3-digit BCD), or in hexadecimal format (12-bit binary). A single channel instrument can be converted in the field to a dual channel model by plugging in auxiliary boards SN 603 or SN 612.

IEEE-488 STANDARD: The SN 488 implements the AH1 acceptor handshake and L1 listener plus listener-only functions of the IEEE-488 protocol.

PARALLEL INPUT: The SN 500 uses data buses having bit-parallel data transfer. Sixteen bits control one channel: two additional bits add a second full channel.

ISOLATION: The SN Series programmers incorporate optical isolation (up to 1000 Volts d-c), so they may be used to control floating power supplies.

CHANNELS: The SN 488 and SN 500 offer a choice of single or dual channel operation. Each channel is completely isolated from the other so that they can be used to drive independent instruments or two functions of the same instruments. SN cards can control two functions of any power supply in the following groups: ATE, BOP,(1) BOP-HV, JQE,(2) PTR, PAT, CC,(3) PCX-MAT,(2) BHK,(4) OPS IX,(4) and NTC.

POLARITY: The SN 488 and SN 500 provide a means of controlling positive or negative polarity. This feature is useful when the programmer controls a bipolar power supply such as the Kepco Series BOP.

RANGE: The SN 488 and SN 500 provide a means of controlling range over a 10:1 ratio. This is accomplished by a programmable attenuator. The "high" range provides a 0 to ±10V analog output; the "low" range provides a 0 to ±1V analog output. This multiplies small output resolution by 10:1.

RESOLUTION: 3-digit BCD (decimal) is 1 part of 999 (0.1%). 12 bit binary (hexadecimal) is 1 part in 4095 (0.024%).

(1) Instead of using built-in interface-when part of multiple unit installation
(2) Voltage channel only
(3) Current channel only
(4) 500V and 1000V models only

SN 488 & SN 500 MODEL TABLE

MODEL	NO. CHANNELS	DATA FORMAT	RESOLUTION
SN 488-121, SN 500-121	one	hexadecimal	12 bit binary
SN 488-122, SN 500-122	two (isolated)	hexadecimal	12 bit binary
SN 488-031, SN 500-031	one	decimal	3 digit BCD
SN 488-032, SN 500-032	two (isolated)	decimal	3 digit BCD
Field installable add-on channel:			
SN 612	1 added channel	hexadecimal	12 bit binary
SN 603	1 added channel	decimal	3 bit BCD
Interconnect devices for use with IEEE-488 bus.			
MODEL	TYPE		LENGTH
SNQ 488-1	Cable, printed circuit edge to IEEE-488		1 meter
SNQ 488-2	Cable, printed circuit edge to IEEE-488		2 meter
PC-488	Plug printed circuit edge to IEEE-488		—

Note: The SNQ cables have an IEEE-488 connector at one end and a printed circuit edge connector at the other end. Model SNQ 488-2 is supplied with each type SN 488 single/dual channel programmer (one cable services both channels). If the PC 488 adapter plug is used, a separate IEEE-488 cable should be ordered.

The SN 500 is supplied with a connector, PC 12, which may be field wired to the parallel data source.

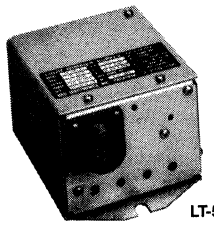
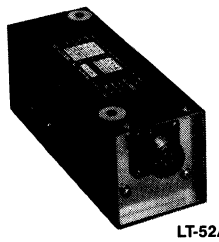
KGS ELECTRONICS DC POWER SUPPLIES

MODEL LT-SERIES SPECIFICATIONS

Input Voltage: 28 VDC nominal, 20 to 40 VDC
Output Voltage: Adjustable with external rheostat or potentiometer and most models have DC voltage control.
Regulation: 2% for line, 2% for load and 2% temperature.
Output Ripple: 50 mVpp max.
Altitude: 55,000 ft.
Protection: (Overvoltage) Output voltage is limited to approximately 125% of rating even though remote control rheostat opens or shorts, or internal failure occurs.
Temperature: −55°C to +71°C (sufficient cooling required at +71°C ambient)
Protection: (Overload) Input and output current limit when overload exceeds approximately 125% or rating.



LT-55



LT-52A

*(Specify output voltage. Total output power: 500 VA continuous.)

eem MINIGLOSSARY POWER SUPPLIES

Ambient reference: Refers to the temperature of the still air surrounding the power supply

Case reference: One of the specs that make up the nominal rating. The temperature of the case with the temperature of the surrounding still air at a stated temperature (usually 25°C).

Crowbar circuit: Protects the load. A protective circuit that applies a short circuit across the output immediately upon overload. (See overvoltage).

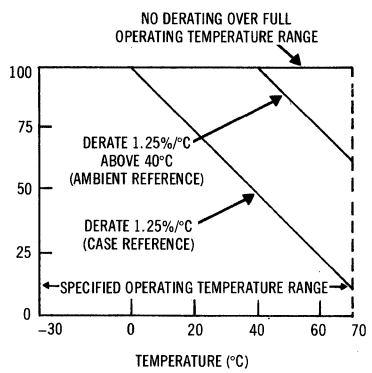

Fig. 1. Power output derating can be referred to ambient or case.

Derating: The degree output is reduced as temperature increases. Usually referenced to ambient case temperature and shown on a graph.

Efficiency: Ratio of the output power to the required input power. Usually expressed as a percentage given nominal environmental temperature.

EMI/RFI: Interference electronic circuitry caused by energy from electromechanical or radio frequency power supplies.

Foldback: Built-in protective circuits that automatically reduce the output voltage and/or current to very low levels in the event of an overload.

Holdover (Holdup): The interval that rated output will continue after input ceases. Usually milliseconds.

Input reflected current: The peak-to-peak alternating current generated by switching transients in DC/DC converters. Should not exceed 1%.

Inrush current limiting: Built-in circuits that monitor high currents through the rectifiers to the capacitors at turn ON. Circuit is usually inhibited as capacitors attain full charge.

Nominal rating: The spec value of the supply at stated conditions of input, output, and temperature.

Overshoot: A transient voltage change occurring during turn ON or OFF or during an abrupt load change.

Overvoltage (Overload) protection: Built-in circuits that protect the load or the supply by shutting it down or providing foldback.

Recovery: The time interval between the termination of an overload and restoration to normal operations.

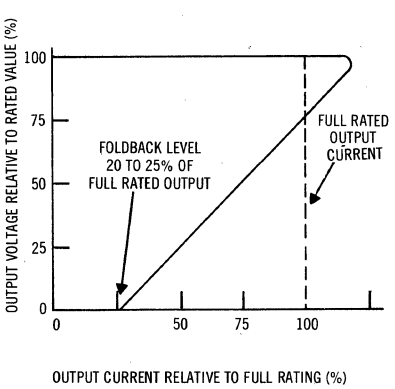

Fig. 2. Current foldback limiting self-resets with removal of fault.

Response: The time interval between a stated step change in input voltage or load current and return of output to normal operating conditions.

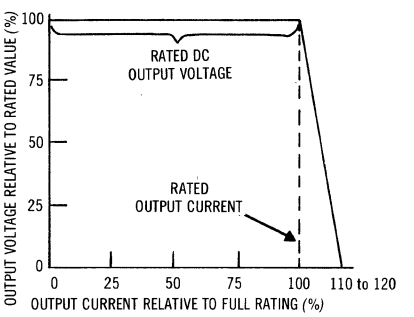

Fig. 3. Current limiting restrictions output current to a valve somewhat greater than full rated output; it resets when fault is removed.

Sensing: Regulation techniques that monitor output voltage and/or current. *Local sensing* refers to the output terminals. *Remote sensing* allows a feedback from the load circuit to the power supply.

Soft start: Allows the supply to start from zero current and/or voltage over a stated period of time during start up to prevent voltage overshoots and current imbalances.

Switchers: Power supplies using switching techniques to achieve high efficiency regulation. These techniques can have attendant EMI/RFI problems.

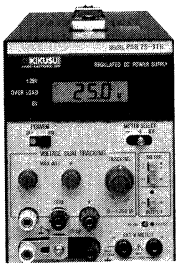
Tracking: The maintaining of fixed ratios between multiple outlets despite variations in line, load or temperature. Particularly important in supplies with symetrical (+)(−) outputs.

Transient protection: Circuitry designed to protect the supply from high amplitude line transients. Generally expressed in terms of peak voltage and maximum transient time duration.

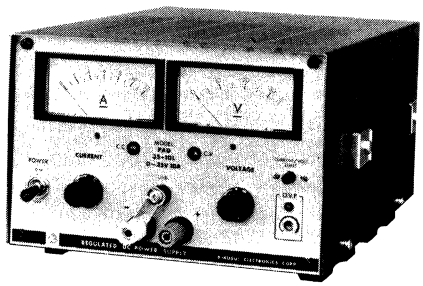
KIK POWER SUPPLIES

PAR SERIES

PAB SERIES



PAD SERIES



MULTI-RANGE – PAR Series
- 80 W in 4 ranges; 160 W in 3 ranges (8 V @ 10 A to 80 V @ 1 A; 16 V @ 10 A to 80 V @ 2 A).
- Ripple and noise < 300 μVRMS.
- Excellent EMI characteristics.
- Digital displays (voltage and current).

BENCH SUPPLIES – PAB & PAB-A Series
- 350 V @ .2 A to 5 A @ 8 V.
- Low cost, compact, small size.
- Excellent resolution (dual controls).
- Output on/off switch.
- Digital or analog readout.

DUAL TRACKING – PAB DU/TR Series
- Triple output: ±18 V @ ±2.5 A, ±32 V @ ±1.5 A, ± 25 V @ 1 A and 0–6 V @ 5 A.
- Adjustable, separate positive and negative tracking knobs.
- Applications include Op Amp and Bipolar IC testing.

HIGH CURRENT – PAD L Series
- 1000 V @ .2 A to 500 A @ 16 V.
- Low noise, high resolution.
- Options: preset output voltage selector (manual or scan), soft start, digital readout.

GPIB POWER SUPPLY CONTROLLER - PIA 3200
- Will control V and I of two Kik supplies.
- Full talk/listen function.
- Sequence contol mode provides: on-board memory for repetitive tests; storage for and recalls up to 6 test patterns at 256 steps per test; subset instruction codes to reduce bus traffic; and execution of tests via GPIB or LOCAL.

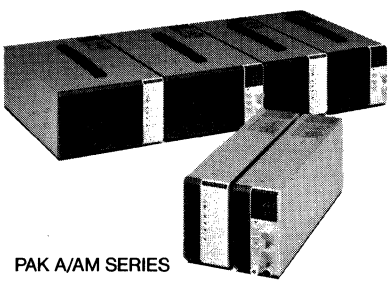
They cover every application. . . Kik's precision power supplies combine excellent line/load regulation and minimum ripple with long-term stability. All models are voltage and resistance programmable. Internal line filters eliminate EMI output noise. Demonstrated MTBFs from 92,000 to 300,000 hours.

Most supplies feature current/voltage limiting with automatic crossover as well as overvoltage protection.

Rack-mounting kits available for most supplies. In addition, our digital programming option (DPO) provides an interface for microprocessor and IEEE-488 GP-IB control.

Every Kik power source has a 30-day return priviledge, a 5-year warranty, and can be serviced in one of over 40 national centers.

Most supplies are in stock and shipped within 24 hours. Call us for your nearest Kik representative.



PAK A/AM SERIES

PLZ SERIES

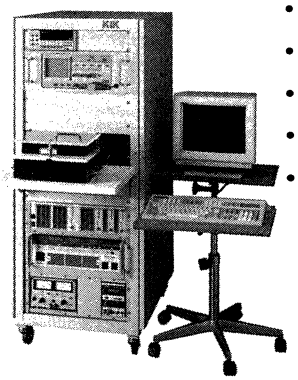
LOW NOISE DC SWITCHERS — PAK A/AM Series
- 15 models: 0-6/10/20/35/60 VDC with output capacities of 350/700/1 kW.
- Constant V, constant I.
- Reduced size, light weight.
- 70-80% overall efficiency.
- .05% line, .1% load reg.
- 2% ripple at full load current.
- Hi-Rel design, high MTBFs.
- Fail-safe design.
- Protection circuits.
- Bench or rack mounting.

GP-IB

DYNAMIC ELECTRONIC LOADS – PLZ Series

For power supply, capacitor and battery discharge testing.
- Up to 1000 W, 200 A (10 models).
- Input: 0–110 VDC.
- Built-in oscillator for dynamic load switching.
- Digital display of V, I and W.
- Master/slave parallel operation.
- Remotely controlled V, I and R (most models).
- Protection circuits (current, voltage, power, temp.).

KITS – Kikusui Integrated Test System



User-Configured, Expert Software
- Open software architecture using National Instruments LabWindows.
- Open hardware architecture - based on IEEE-488 bus.
- Comprehensive library of test routines and instruments.
- Complete analysis and reporting software.
- Programmed in C or QuickBASIC language.
- System instrumentation can include:
  - — AC and DC sources
  - — Electronic DC loads
  - — Hi-Pot insulation resistance testers
  - — Digital scopes
  - — Multimeters
  - — Switching matrices
  - — Other GPIB instruments
- MS-DOS computer based.

LH RESEARCH SWITCHING POWER SUPPLIES

LH Switching Power Supplies are available in:

- 10 to 2500 Watt models
- 1 to 9 Outputs
- Standard, Modified Standard and Custom Configurations
- Rack Systems to 20 kW

This extensive line of high quality products is backed by the LH commitment to help customers define the optimum power supply performance for each application. LH can then deliver the right unit on time, either off-the-shelf, or from over 3 million standard configurations, or a totally custom design.

Many LH switchers have achieved documented MTBF in excess of 200,000 hours, while some models have reached a demonstrated MTBF in excess of 500,000 hours (*over 57 years!*). And LH already has the technology to meet the international safety and emission standards for 1992 and beyond.

The latest LH innovations in switching power supplies are shown on these two pages. For more information on the complete product line, and a copy of our new full line catalog, call **1-800-LH-SALES.**

TMA SERIES

- Greater than 75% efficiency typical
- 115 or 230V AC, 1 phase input
- Protected against input line transients (IEEE 587)
- Meets FCC & VDE conducted emission specifications (Level A)
- UL/CSA/TUV/IEC*
- Many standard options

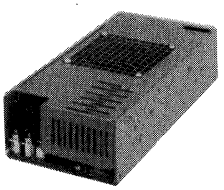
SMA HIGH DENSITY SERIES

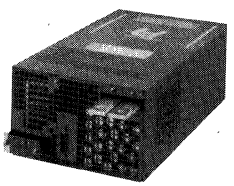
- 75-80% efficiency for 5V output
- 115 or 230V AC, 1-phase input
- Protected against input line transients (IEEE 587)
- UL/CSA/TUV/IEC*
- Meets FCC & VDE conducted emission specifications (Level A)
- Many standard options

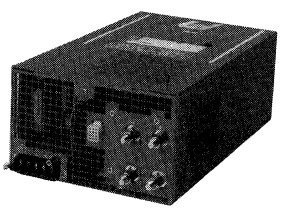
PSMA SERIES POWER FACTOR SWITCHING POWER SUPPLIES

- 99% (1-phase) and 95% (3-phase) typical PF performance at full load
- 85-265V AC input range without strapping
- Full 20 msec hold-up at 85V AC
- Precision current share capability
- Very low total harmonic distortion
- Meets IEC 555, UL 1950, IEC 950*

*Consult factory for status of specific configurations







SINGLE OUTPUT — 175 to 2500 Watts —See Table 1 for Dimensions

Total Power	V1 Outputs Expressed as Volt/Amps												Model Series
	2V	2.2V	3.3V	4.5V	5V	5.2V	6V	12V	15V	24V	28V	48V	
175W					35			15	12	7.5	6.5	4.0	TMA11
300W					60			25	20	13	11	6.5	TMA31

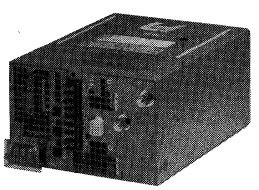
2000W	400	400	400	400	400	385	333	168	134	84	72	42	PSMA91*
2500W	500	500	500	500	500	481	417	210	168	105	90	52	SMA101

*Available without power factor correction by deleting 'P' prefix.

DUAL OUTPUTS — See Table 1 for Dimensions

Total Power	Outputs Expressed As Volts/Amps								Model Series
	V1 (select one)[1]			V2 (select one)[1]					
	4.5V	5V	12V	2V	2.2V	5V	12V	24V	
225W		30	13			9	6 (10)	3 (5)	TMA22
400W		60	25			16 (20)	16 (20)		TMAX42
1000W[1]	167	150	63	55	55	55	42		PSMAX22*
1500W	250	250	104	55	55	55	42		PSMAX82*
2000W	300	300	125	55	55	55	42		PSMAX92*

[1]Select one listed output each for V1 and V2; read currents horizontally.
[2]1250 Watts when ordered as the SMAX22 version (see note (*).
*Available as high density SMA Series (without power factor correction) by deleting 'P' prefix.
NOTE: Peak current indicated in ( ) for 10 seconds maximum.



THREE OUTPUTS — See Table 1 for Dimensions

Total Power	Outputs Expressed As Volts/Amps														Model Series
	V1	V2 (select 1)[1]							V3 (select 1)[1]						
	5V	2V	5V	12V	+12V	15V	+15V	24V	5V	12V	–12V	15V	–15V	24V	
225W	30				4 (8)						2				TMA23
							3.2						1.6		
400W	60				10 (14)						6				TMA43
							8						5		
				16 (20)					4						TMAX43
				16 (20)				8 (10)		4					
1000W	150	30	30	25		20		12.5	30	25		20		12.5	PSMAX23*
1500W	250	30	30	25		20		12.5	30	25		20		12.5	PSMAX83*
2000W	300	30	30	25		20		12.5	30	25		20		12.5	PSMAX93*

[1]Select one listed output each for V2 and V3; read currents horizontally.
*Available as high density SMA Series (without power factor correction) by deleting 'P' prefix.
NOTE: Peak current indicated in ( ) for 10 seconds maximum.

FOUR OUTPUTS — See Table 1 for Dimensions

Total Power	Outputs Expressed As Volts/Amps																	Model Series
	V1	V2 (select 1)[1]							V3 (select 1)[1]					V4 (select 1)[1]				
	5V	2V	5V	12V	+12V	15V	+15V	24V	12V	–12V	15V	–15V	24V	5	12V	15V	24V

Rack Mounted Power Systems

LH provides both standard and custom-built rack mounted power supply systems, assembled from off-the-shelf power supplies and standard enclosures. Selected rack sizes, enclosure depths, panel features and options give maximum design flexibility to package the system you need.

Assembled from the widest range of proven switching and linear power supplies available, your rack mount power system will get the most from your power supply dollar in terms of performance, quality and reliability.

The PA series rack-mounted power system is based on proven LH power supply technology and engineering experience, with the options and configurations to match your most critical application requirements.

In many cases, 2000 watts is not adequate to meet high power applications. LH has the expertise and the experience to design and build a power system to meet virtually any specification. Our engineering professionals have configured some of the most specialized rack power systems (using LH chassis and LH power supplies) in the industry.

• Power Factor Correction • Precision Current Sharing
• Uninterruptible (Battery Back-Up) • Latest Technology
• 10 Watt Modules to 20,000 Watt Rack Systems
Call 1-800-LH-SALES to meet your application requirements!

LOGITEK POWER PRODUCTS

THE LOGICAL CHOICE OF THE TECHNICAL MIND

DC/DC CONVERTERS AC/DC POWER SUPPLIES

FOR COMMERCIAL, INDUSTRIAL AND MILITARY APPLICATIONS

STANDARD POWER SUPPLIES

A complete range of DC/DC and AC/DC converters ranging from 50-1000 watts with individual units being parallelable to achieve greater levels.

CUSTOM DESIGNS

Logitek provides custom power supplies, up to 1000 watts, to meet the most rigid specifications, including size, power, environment and unique application requirements. Options include:

- Nuclear Hardening
- EMI Shielding
- Tempest Qualification
- Self-test Capability
- Virtually unlimited input/output combinations
- Spike and Transient testing to MIL-STD-1399

CONFORMANCE TO MILITARY SPECIFICATIONS

Logitek power supplies serve the low and medium power needs of military equipment. They are designed and manufactured in accordance with, but not limited to the following military specifications:

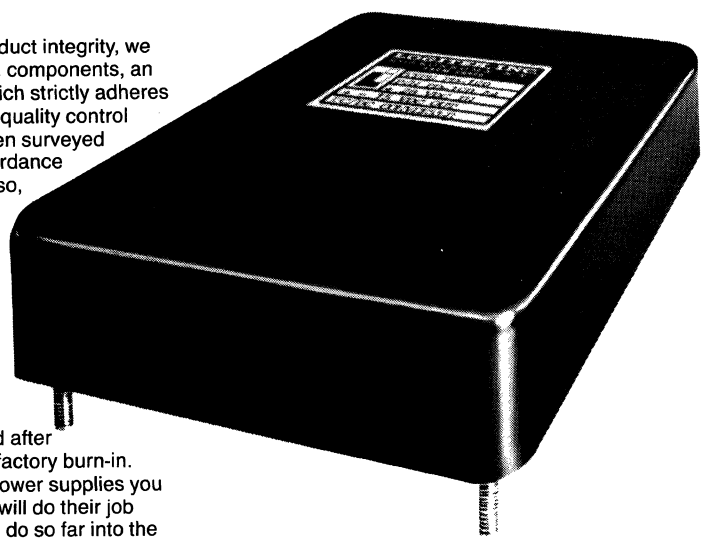
- MIL-STD-810C
- MIL-STD-704
- MIL-HDBK-217
- MIL-STD-461
- MIL-E-5400
- MIL-I-45208
- MIL-Q-9858A
- MIL-STD-38510
- MIL-STD-454
- NAVMAT P4855-1

All Logitek products carry a 3-year warranty and Logitek's standard 100 hour factory burn-in.

LOGITEK QUALITY

Logitek's internal qualification test program, in addition to any special testing that may be required for your specific application, ensures that all our power supply designs will meet or exceed your most demanding specifications.

And to further our product integrity, we use only MIL qualified components, an inspection system which strictly adheres to MIL-I-45208, and a quality control system which has been surveyed and approved in accordance with MIL-Q-9858A. Also, Logitek's facility is now qualified to MIL-STD-2000.



In addition to our many preliminary, in-process, and post production inspections, we run numerous functional tests, both before and after our routine 100 hour factory burn-in. The final result: the power supplies you receive from Logitek will do their job right, and continue to do so far into the future.

OTHER NON-STANDARD OUTPUTS ARE AVAILABLE UPON REQUEST. For Unit Size see Page D•1886

OPTIONS*

1. Input of 220-240 VAC/50 Hz to VDE, BS, SAA or other standards
2. Switchable input 110/220 VAC 50/60 Hz
3. Private Label per Customer Requirements
4. Custom Design per Customer Specifications
5. UL/CSA Applications for Non-Approved and Custom Design Models
6. Regulated Outputs of Standard DC Models
7. Ground Pins for DC Output Models
8. Ground Pin and Center-Tap for AC Output Models
9. Screw Terminal Enclosure for AC Output Models
10. Specially Molded Output Cords and Connectors
11. Desk Type Enclosures
12. Enclosures for European, Australian or other Standards (VDE, BS)

See EEM page D•1886 for output plug options

GENERAL SPECIFICATIONS:

1. Input: 120 VAC/60 Hz 2. Maximum AC Output: 50-60 VA
3. Maximum DC Output: 40 VA 4. Output: ±0.5V at Rated Load
5. Operating Temperature: 0° to 40°C
6. Dielectric Withstanding Voltage: 1500 VAC for 1 Sec.
7. Enclosure: Molded in Noryl, Black Color
8. Output Cord: 6 ft., 20-22 AWG, Black Color
9. Safety Standards: Built per UL 1310 and CSA Specifications

DC REGULATED POWER SUPPLIES

General Specifications:

Input Voltage: 105V to 129V (117V ±10%)
Input Frequency: 57 to 63 Hz
Voltage Regulation: over all ±5%
Ripple Voltage: 50mV P-P max. at full load, low line
Dielectric Strength: 1500 Vrms
Overload Protection: Thermal shutdown

Storage Temperature: −20°C to +85°C
Operating Temperature: 0°C to +50°C
Humidity: 10% to 90%
Burn-In: 8 hours
Safety: UL 1310, UL 1012, and CSA C22.2 No. 223.
Ground Pin: is optional on most models.

INVERTERS DC to AC OUTPUT

NEW

100 WATT PORTABLE CAR INVERTER

Specifications

Input voltage: 10–15 VDC
Output voltage: 115 VAC/60 Hz
or 220 VAC/Hz
Regulation: ±5%
Output Power: 100 Watt Continuous
Peak Output: 200 Watt
Frequency Regulation: ±1%
No Load Current: 60 mA
Output Waveform: modified Sine wave
Efficiency: 90%
Dimensions: L = 5″, W = 3¾″, H = 1⅜″
Weight: 1 lb.

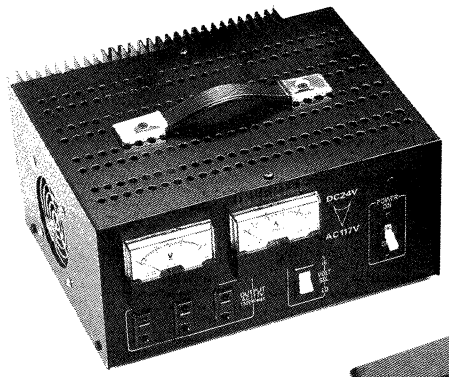
AC power switch is optional.

Model No: LZINV100–115 Volts
LZINV100 E-220 Volts

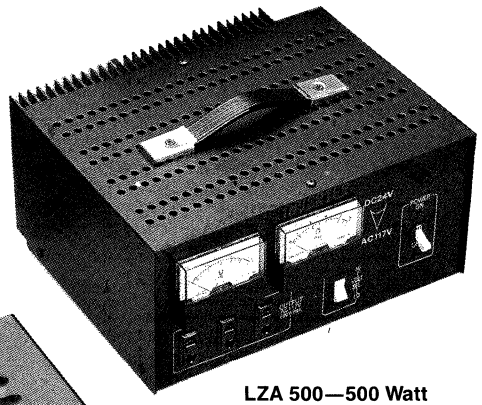
300–1000 WATT INVERTERS SQUARE WAVE

MODEL	Input Voltage	Output Voltage	Output Frequency	Output Capacity	Weight	Dimension
LZA 300	DC 12V	117V or 220V	50/60 Hz	300W MAX.	5.3kg	195 x 125 x 225m/m
LZA 500	DC 12V	117V or 220V	50/60 Hz	500W MAX.	10kg	280 x 160 x 240m/m
LZA 500A	DC 24V	117V or 220V	50/60 Hz	500W MAX.	8.5kg	280 x 160 x 240m/m
LZA 1000	DC 24V	117V or 220V	50/60 Hz	1000W MAX.	12.2kg	280 x 160 x 240m/m

NOTE: For 117 Volt model add U after the PN.
For 220 Volt model add E after the PN.



LZA 1000—1000 Watt



LZA 500—500 Watt

LZA 300—300 Watt

UNIVERSAL INPUT SWITCHING POWER SUPPLIES

General Specifications

AC Input: 90-260VAC / 47-63 Hz
DC Ouptuts: Output 1 adjustable 5%
Output 2 tracks Output 1
Temperature Coefficient: 0.02% / °C, all outputs
Humidity: 0-90%
Temperature Range: Operation: 0° to 50°C at rated output power
Storage: – 40°C to 80°C
Switching Frequency: 30-40 KHz
EMI: Meets FCC Class 'B' and VDE 0871 Class B rules using static load

Efficiency: 70% minimum
Overload Protection: All Outputs protected through short circuit conditions, automatic recovery
Overvoltage Protection: Output 1: output level exceeding 115-135% causes shutdown, automatic recovery
Hold-up Time: 20 ms after loss of nominal AC Input, for specified load regulation
In-rush Surge: 20A Pk/115 VAC, 40A Pk/230 VAC
Hi-pot Test: 1500 VAC / 3750 VAC

IEC950 FCC

NOTES:
(1) Other outputs & custom made power supplies are available upon request.
(2) For unit size dimension drawing please contact our sales office.
(3) Most models have a minimum purchase of 500 units. Lead time: 12 wks. A.R.O.

JAPANESE STYLE POWER SUPPLIES

All models are designed to comply with JISC (MITI) Japanese Industrial Standards. Approvals are pending.

DC / DC CONVERTERS

1 to 3 WATTS
REGULATED

Specifications:

- Input range: ±5%
- Input filter: Pi or Capacitor Network
- Isolation: 500 Vdc
- Isolation Resistance: 10^9 Ohms
- Switching Freq.: 25 KHz min.
- Line regulation: ±0.02% max.
- Load regulation: ±1% max.
- Ripple: 0.5-1% P-P max.
- Operating Temperature: −25°C to 71°C
- Storage Temperature: −55°C to 105°C
- Humidity: 20-95% Non-condensing

Hearst Engineering Software

ICMASD...IC Alternate Source Directory

The all new 1991 version of the world famous Alternate Source Directory is now available in floppy disk form for your IBM XT & AT and 100% compatible personal computer with hard drive.

The **1991 ICMASD** contains the more than 180,000 listings that appear in the Alternate Source Directory Section contained in Volume Two of the printed version of the 1991 IC Master ...plus additional discontinued parts. The database includes complete vendor addresses and phone numbers.

You can personalize the **ICMASD** for your application. The program allows you to add comments, up to 20 digits long, to each listing. These comments can be part numbers, prices, or any information specific to your needs. You may also add, delete and/or discontinue devices!

For greater flexibility the base number search feature enables you to access parts by base number, i.e., the device number stripped of prefixes and suffixes. You don't need to know the manufactures codes to call up any of the alternates to these devices.

The **1991 ICMASD** is fast, convenient and very user friendly!

Complete program documentation is included. When ordering, be sure to specify if you want the **1991 ICMASD** on three, double-sided, double-density disks OR on one high-density disk.

For immediate delivery you can order the **1991 ICMASD** at $179.50* simply by charging your Visa or MasterCard credit card. To place your order or for more information, call or write:

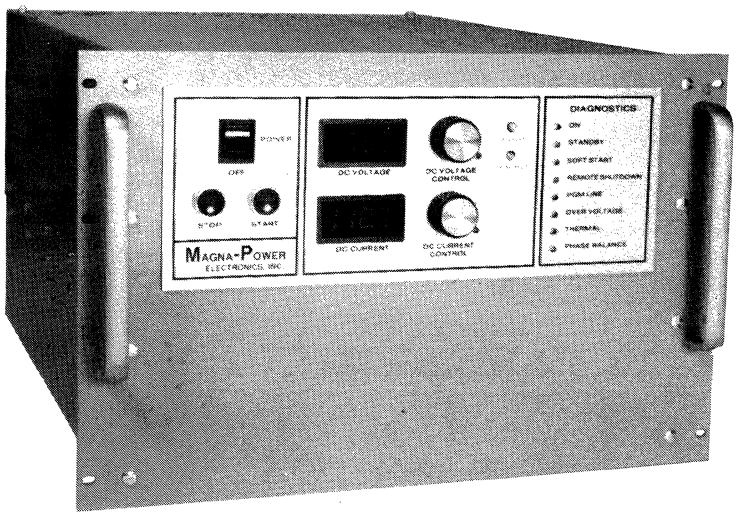
PX SERIES

THREE PHASE, 10 KW DC POWER SUPPLIES

FAST DELIVERY!!!
Stock to 4 Weeks



FEATURES

- 6 Models: 16 to 500 Vdc, 20 to 600 Adc
- Series and parallel master slave operation
- Programming resistors isolated from output
- Optional EMI suppression on ac lines meets VDE 871A
- OVP shutdown standard, SCR crowbar optional
- Digital meters standard
- Digital control lines optically isolated
- Exclusive control loop diagnostics
- High dielectric withstand: 2500 Vac
- Automatic V/I crossover
- IEEE-488 compatible
- Air exhaust in rear of cabinet
- Power factor corrected for low currents

MODELS AND RATINGS

Model	Output Voltage Vdc	Output Current Adc	Ripple Voltage mVrms
PX16-600	16	600	50
PX32-300	32	300	30
PX80-125	80	125	50
PX125-80	125	80	60
PX250-40	250	40	90
PX500-20	500	20	130

Note: Specifications subject to change without notice.

SPECIFICATIONS:

Input voltage: 208/240 Vac, 50-60 Hz, 3ø (440/480 Vac, 50-60 Hz, 3ø optional)

Regulation line and load combined: .10%

Stability: .10% for 8 hours after 30 minute warm up

Transient response: 75 ms to recover within 2% of regulated output with 50 to 100% or 100 to 50% load change

Ambient Temperature: 0 to 50°C

Programming resistors: 1K full scale for output voltage, output current, and over voltage shutdown

Temperature coefficient: .04%/°C of maximum output current

Size: 12 1/4"H x 19"W x 24"D

Weight: 260 lbs

APPLICATIONS

CW Lasers
Capacitor Forming
Electroplating
Battery Charging
Aging Racks for Semi-Conductors
General Electronics Applications
Focusing Coils for Accelerators
Cryogenic Magnet Applications

PRICE

All models: $4495

OPTIONS

SCR crowbar: $195
EMI filter: $295
440/480 Vac input: $195.00
Non-standard output: $495
Other options: consult factory

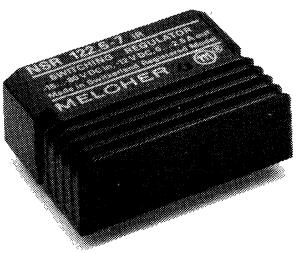
TEL: 800-828-9712 • FAX: 508-881-5082

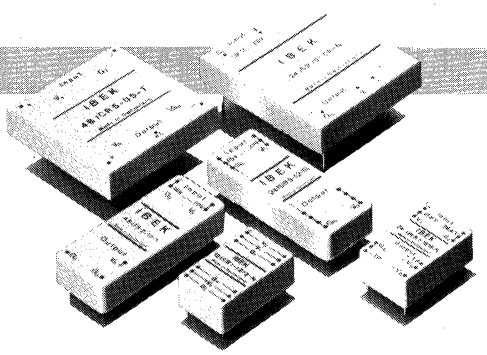
Switching mode regulators

MELCHER offers two basic versions of switching mode regulators, namely positive- and negative switching regulators. The positive switching regulators have the negative polarity defined as system ground, and the negative switching regulators have the positive polarity defined as system ground (e.g. telephone applications). 5...720 W Output power range.



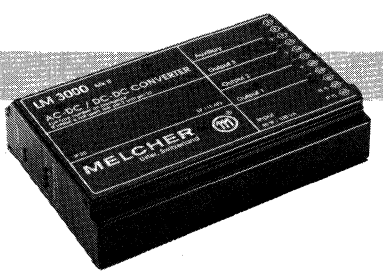
DC-DC converters

These units can supply output power from 1...50 W. Different versions with one, two or three outputs are available, all of them with a large number of options.
Efficient input circuitry absorbs source transient voltage and an input filter efficiently attenuates radiation interference.



AC-DC converters

These converters can supply output power from 20...50 W. Different versions with one, two or three outputs are available, all of them with a large number of options. The AC-DC converters are mechanically identical and electrically similar to the DC-DC converters.



System application engineering

Unlimited possibilities of combining power supply modules exist as a result of our applications engineering facility. Based on standard units power supplies can be individually designed to customer requirement. Some examples

Dynamic behavior

- Input voltage range up to 1 : 10 . . . . . highly flexible in application
- High efficiency up to 95% . . . . . low thermal stress and high reliability
- Constant efficiency over the whole input voltage range. . . . . stable operational conditions
- Continuously open/short circuit proof . . . . . self protected
- No derating within full temperature range . . . . . full load handling capability
- Excellent static and dynamic response . . . . . reliable and precise regulation
- Input undervoltage control and cut out . . . . . prevents malfunction at insufficient voltage levels

Mechanical design

- Very compact design . . . . . high power at low volume
- Solid and robust construction . . . . . ideal for mobile application
- Aluminium case serving as heat sink and as shield for radiation interference . . . . . uniform temperature distribution and low RFI emissions

Environmental durability

- Ambient temperature range. . . . . – 25°C...71°C (– 40°C...85°C)
- Relative humidity as per IEC 68-2-3. . . . . 93% at 40°C for 56 days
- Shock as per IEC 68-2-27:9 shocks. . . . . 100 g
- Bumping as per IEC 68-2-29: 6000 shocks . . . . . 40 g
- Vibration as per IEC 68-2-6:60...2000 Hz. . . . . 5 g/10 g
  Vibration as per IEC 68-2-6:10...60Hz . . . . . 0.35 mm/0.70 m
- Input transient/surge protection: IEC 801-4, IEC 571, RIA 12, VDE 0435, IEC 255.4 . . . . . 5 kV
- High frequency disturbance withstand as per VDE 0435, IEC 255.4 . . . . . 1.0 kV/2.5 kV

Security approvals, RFI levels

- SEV. 1061.1981, 1085.1983
- VDE, IEC, EN . . . . . VDE 0805, IEC 950, EN 60950
- High isolation test voltage up to 4 kV. . . . . VDE 0804, VDE 0806, IEC 380
- Low RFI: better than class B, as per . . . . . VDE 0871
  better than class B, as per . . . . . VDE 0878
- Low leakage currents: B, BF, CF . . . . . VDE 0750, IEC 601-1
- Underwriter Laboratories Recognition . . . . . UL 1012

Quality and reliability features

- Low component stress
- Precision screening of high quality components
- System research and development for design optimization
- Low temperature rise on components
- 100% burn-in at $T_A = 70°C$. . . . . for 24 h
- 100% function test and parameter test
- High MTBF figures as per MIL-HDBK 217-E

Data sheets

- Data sheets and application notes available

Switching Regulators

ISR Family

Input: 24 V Nominal, (V_{out} + 4)...33 VDC
Outputs: 5, 12, 15 Volts, 5 Watts and 10 Watts

Small Size!

Model	$V_{out\ nom}$	$I_{out\ nom}$	Temp. Range	Dimensions
24 ISR 5-05-N[1,3]	+ 5 V	1.0 A	0...+71° C	1" X 2" X 0.4"
24 ISR 5-12-N[1]	+ 12 V	0.42 A	0...+71° C	1" X 2" X 0.4"
24 ISR 5-15-N[1]	+ 15 V	0.33 A	0...+71° C	1" X 2" X 0.4"
24 ISR 5-05-S[1,3]	+ 5 V	1.0 A	-40...+85° C	1" X 2" X 0.4"
24 ISR 5-12-S[1]	+ 12 V	0.42 A	-40...+85° C	1" X 2" X 0.4"
24 ISR 5-15-S[1]	+ 15 V	0.33 A	-40...+85° C	1" X 2" X 0.4"
24 ISR 10-05-N[2,3]	+ 5 V	2.0 A	0...+71° C	2" X 2" X 0.4"
24 ISR 10-05-S[2,3]	+ 5 V	2.0 A	-40...+85° C	2" X 2" X 0.4"

[1] Available with inhibit (suffix I). Example: 24 ISR 5-05-NI
[2] Available with inhibit (suffix I). Potentiometer (suffix P) or combined (suffix IP) Example: 24 ISR 5-05-SIP
[3] For V_i = 11 to 9 V: linear derating of the output current I_o from 100 to 80% of $I_{o\ nom}$

PSK Family

Inputs: (Vout + 4V)...80 Vdc
Outputs: 5, 12, 24, 36 Vdc at 16, 20, or 25 Amps
All output voltages fully adjustable from 0...110% of nominal setting.

Model	Input Voltage	Output Voltage	Output Current	Efficiency	Ambient Temperature
PSK 5A16-7	8...80 V	5.1 V	16 A	82%	-25...71°C

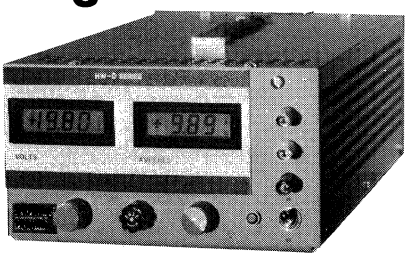
HWD Constant Voltage/Constant Current Supplies

FEATURES

- Digital Ammeter/Voltmeter
- Remotely Programmable
- Remote Sensing
- Series and Parallel Operation
- 500 μ Volts Ripple
- .01% Load Regulation
- .01% Line Regulation
- Separate Voltmeter and Ammeter
- Models to 200 Volts
- Half Rack Size or Bench Mounting



APPLICATION

The HWD Series power supplies are designed to be used in the lab bench or for system application. The use of digital meters provides accurate readings of output voltage and current without the need of external DVM'S.

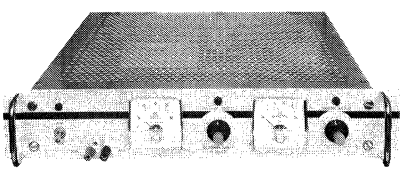
PR Constant Voltage/Current Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- All Silicon Semiconductors
- Mode Lites
- Low Ripple
- .01% Regulation
- Constant Voltage/Constant Current
- Parallel Operation



APPLICATION

The PR Series find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. The voltage to current crossover point may be set anywhere within the limits of zero to full rated output voltage and zero to full rated output current.

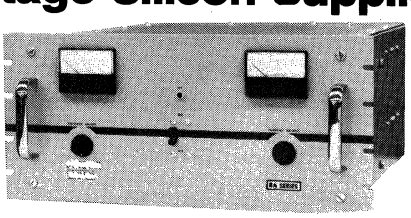
RA Constant Voltage Silicon Supplies

FEATURES

- High Power — Small Size
- Remotely Programmable
- Low Ripple
- Parallel Operation
- .01% Regulation
- All Silicon Semiconductors



APPLICATION

The RA Series are all silicon, relatively high in power, and tightly regulated. They find application in the laboratory and in systems where both versatility of operation and a high degree of regulation is required. Adjustable solid state current limiting provides load protection.

Model Number	Output Volts	Output Amps	Regulation Line %	Regulation Load %	Panel Ht.	Price

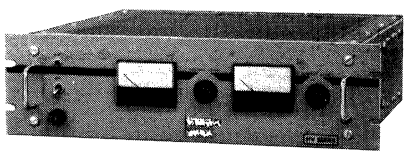
HV Constant High Voltage Supplies

FEATURES

- All Solid State
- Adjustable Current Limit
- < 1 Millivolt Ripple
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing



APPLICATION

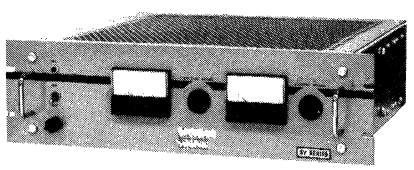
The HV is a versatile series of constant voltage units adjustable from zero to full rated voltage. Adjustable solid state current limiting is a feature. Options provide for either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		Regulation		Size	Price
	Volts	Amps	Line %	Load %		
HV 350-1	0-350	1		0.01	3½ × 19 × 16½	$2450.
HV 350-2	0-350	2	0.005	0.01	5¼ × 19 × 16½	2900.
HV 350-3	0-350	3	0.005	0.01	7 × 19 × 16½	3250.
HV 350-5	0-350	5	0.005	0.01	8¾ × 19 × 16½	3700.

SV Constant High Voltage Power Supplies

FEATURES

- All Solid State
- Adjustable Current Limit
- 1 Millivolt Ripple
- 0.01% Regulation
- 10-Turn Voltage Adjustments
- Remote Programming
- Remote Sensing
- Meters



APPLICATION

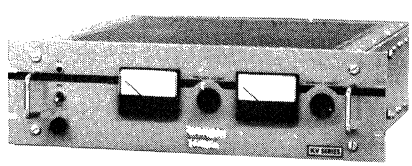
The SV is a versatile series of constant voltage units adjustable from 0 to full rated voltage. Options provide either systems or laboratory use. Crossover from constant voltage to current limiting is automatic solid state and noninterrupting. Units may be operated in parallel for increased current capacity.

Model Number	Output		RMS Ripple	Regulation		Size	Price
	Volts	Amps		Line %	Load %		
SV 600-0.5	0-600	0-0.5	<3mv	0.01	0.01	3½ × 19 × 16½	$2900.
SV 600-1	0-600	0-1	<3mv	0.01	0.01	5¼ × 19 × 16½	3500.
SV 600-2	0-600	0-2	<3mv	0.01	0.01	7 × 19 × 16½	4400.

KV High Voltage Power Supplies

FEATURES

- Output 100 to 1500 VDC
- Voltage Regulated 0.5%
- Current Regulated 0.5%
- Voltmeter and Ammeter
- Ripple 0.5% RMS
- Voltage/Voltage Programmable
- Resistance Programmable



APPLICATION

The KV1000 Series Power Supplies are constant voltage/constant current units with automatic crossover. Models are available with up to 3 ampere current capacity over the full voltage range. Options such as remote voltage and current programming, remote turn on and turn off make the unit a versatile piece of equipment for laboratory or manufacturing operations.

Model Number	Output		Regulation %		Panel Height	Price	Model Number	Output		Regulation %		Panel Height	Price

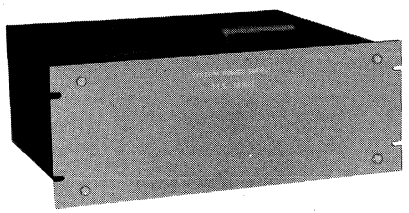
MS High Power System Component Power Supplies

FEATURES

- Most Complete Coverage
  Up to 600 Volts
  Up to 1200 Amperes
- Low Cost
- All Solid State
- Extreme Reliability



APPLICATION

Strictly designed for incorporation into systems, these supplies are considered as components. They are of exceptionally high reliability; yield the highest power at the lowest cost; and provide complete coverage of all possible needs.

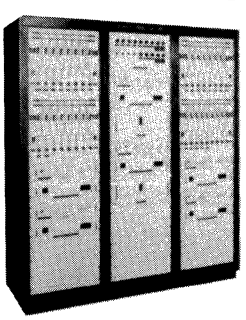
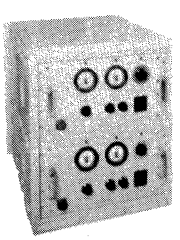
NOTE: The digits of the Model Number indicate the output voltage and current in amps. Example: MS9-600 has an output of 9 volts, current of 600 amps. MS9-1200 has an output of 9 volts at 1200 amps. **Consult factory for prices.**

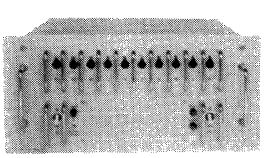
Custom Power Supplies and Systems



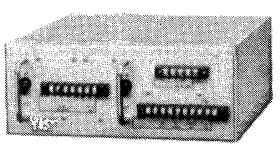
Double redundant regulated DC power distribution system for process industry. Features no break transfer and battery backup.



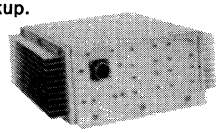
High power, 150-volt, constant current/constant voltage, shipboard-qualified power supply.



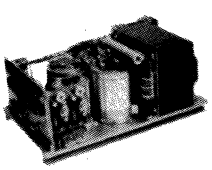
Regulated no-break, redundant 24-volt dc, 15-ampere, 10-channel power distribution system for television studios.



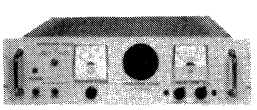
Uninterrruptable power supply, with internal battery charger, used for avionics instrumentation.



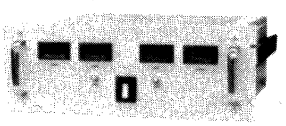
Mil Spec 4 output regulated power supply.



Regulated multi-output power supply for computer.



Automatic constant current battery charger with automatic range selection based on battery temperature and voltage level.



±5V 50A linear regulated power supply for semi-conductor testing and burn-in.

NOTE: Not pictured are these special devices: (a) Power supply for CW lasers; (b) Redundant power systems for military telephone communications systems; (c) Xenon lamp power supplies; (d) True RMS regulated ac power supplies; and (e) High current dc power supply for automotive production line testing.

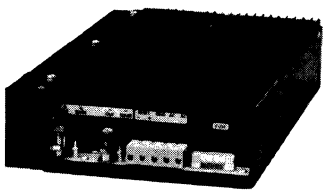
SM High Current Switching Power Supplies

FEATURES
- Soft Start—Solid State
- Overvoltage Protection
- Current Limit
- Remote Shut Down
- Over Temperature Protection
- 47-400 Hz AC Input
- Convection Cooled
- Fully Enclosed
- −0° to +70°C Ambient
- Lightweight
- Input Line Filter



SPECIFICATIONS
- Line Regulation 0.1%
- Load Regulation 0.1%
- Ripple and Noise 2% pp
- Efficiency 75% Typical
- Temperature Coefficient .02%/°C
- Stability 0.1%/8 hours
- Hold Up Time 16.5 MSec Minimum

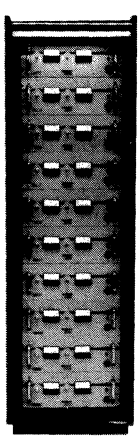
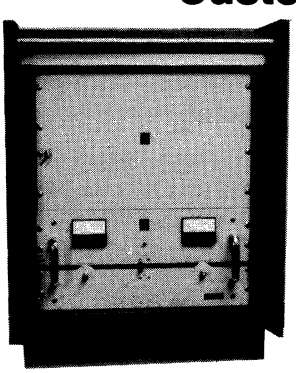
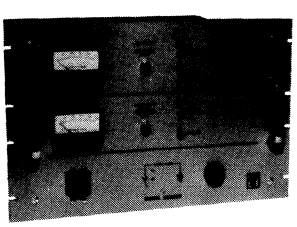
Custom Power Supplies and Systems



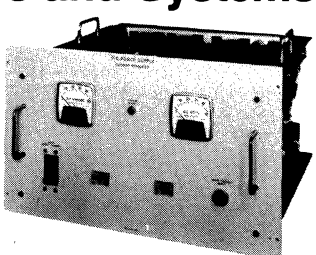
48-volt, 240-ampere redundant power supply for process industry.



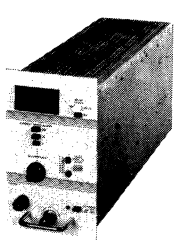
24-volt, 50 ampere distributed power system for process industry.



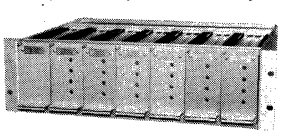
Tracking power supply: ± 15-volt, 75-ampere.



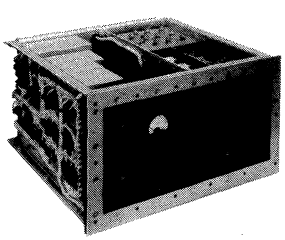
Constant 100 ampere current power supply for Xenon lamp application.



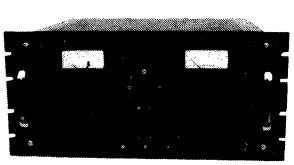
Constant current power supply. 3 ranges: 0-2ma, 0-20ma, 0-200ma. Maximum output voltage 1200 volts.



24-channel, individually adjustable, constant current distributed power source.



Multi-output Mil Spec power supply.



± 13-volt, 40-ampere power supply for telecommunications industry. Designed for redundant operation.

1 to 2000 Watts

YOUR CHOICE OF POWER TECHNOLOGIES

Discrete • Part Hybrid • Full Hybrid

Modular Devices Inc (MDI) designs and manufactures a wide range of standard and custom power supplies for aerospace, military and industrial use. MDI has a complete thick film hybrid capacity on site, which permits us to produce unique power electronic functions for our customers more quickly and more efficiently.

Switching power supply technology for critical aerospace, military and industrial application is constantly achieving higher operating frequencies, smaller sizes and higher power densities. These technological trends make it inevitable that signal and power hybrids will form a key part of future state-of-the-art power electronic equipment. With MDI's high technology power supply capability and custom hybrid facility, MDI is uniquely positioned to apply the best and most appropriate packaging technology to your diverse and challenging requirements.

MDI offers the optimum technology for each application.

Discrete Power Electronics encompasses a wide spectrum of power supply products as well as areas such as servo and power amplifiers, motor drives and controls. MDI's power supply technology incorporates the latest advances in high frequency switch mode power FET techniques. MDI's product capability includes:

- AC to DC power supplies to 5 KVA with single and multiple outputs with power densities to 4 W/in^3
- DC to DC converters to 2 KVA, operating frequencies to 400 kHz, power densities to 10 W/in^3
- DC to AC static inverters to 2 KVA, inputs 12 VDC to 350 VDC, output from 50 Hz to 1600 Hz
- Design and construction to MIL–E–16400, NAVMAT P–4855A, WS 6536E, MIL–STD–2000 and other military specifications

Hybrids combined with discrete components allow great volumetric efficiency as compared to all discrete designs. MDI's packaging technology incorporates the latest advances in NC milled and dip brazed enclosures, FLEX PRINT wiring and surface mount technology. This product capability provides:

- Higher packaging densities than all discrete designs
- Lower cost and quicker delivery than all hybrid designs
- Best suited for aerospace/high reliability, high density requirements at power levels from 50 watts to 1 KVA

Full Hybrid Power Supplies using thick film, chip and wire/surface mount components within hermetic hybrid enclosures allows ultimate power density. Low tooling and set up costs and availability of unique hybrid enclosures make power hybrid technology economical for small production runs. Careful computer aided thermal analysis and proven thermal management techniques assure high reliability. MDI's hybrid power supply technology incorporates the latest advances in high frequency techniques, power hybrid and miniature magnetic components. MDI's product capacity includes:

- Standard, off the shelf DC to DC converters to 50 watts, operating frequencies to 400 kHz, power densities to 40 W/in^3
- Custom variations of standard DC to DC converters to 100 watts
- Custom DC to AC static inverters to 10 watts
- Design and construction to MIL–STD–883 "S" level, "B" level and other requirements

We can modify these units to meet your custom converter requirements.

Features

- Completely self contained Thick Film Hybrid DC-DC Converter
- Operates from 16 - 80 VDC for MIL-STD-704/1275 applications
- Internal EMI filter
- Fully isolated
- Single, dual or triple outputs
- Current limiting, power on soft start
- 200 kHz operation for low ripple and fast response time
- No external capacitors required
- High reliability screening available, specify "M" (e.g. 2650M-T15)
- Full hermetic package
- "S" level configuration available
- Radiation hardened available

Specifications

INPUT: 28VDC nominal
Range: 16 to 50 VDC continuous.
Survives 80 V transients/MIL-STD-704

OUTPUT: Voltage & Current (see chart)

REGULATION: (see chart)

RIPPLE: 50 mV peak-to-peak, typical

PROTECTION: Short circuit protection by current limit.

ISOLATION:
Input to case: 500 VDC
Input to output: 500 VDC*
(*) inputs shorted to case, outputs shorted together

ENVIRONMENT:
Operating temperature:
- 55°C ambient to +85°C case
Linearity derates to zero at 115°C
Storage temperature: -55°C to +150°C
Shock: 50G
Acceleration: 500G
Vibration: 30G

WEIGHT: 2.5 ounces

DIMENSIONS: 1.345" x 1.945" x 0.495"
(without flange)

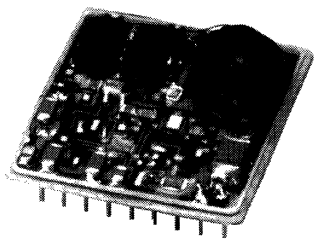
4 Watt HYBRID

DC-DC CONVERTERS

SERIES 2578



Features

- Completely self contained Thick Film Hybrid DC-DC Converter
- Operates from 16 - 80 VDC for MIL-STD-704/1275 applications
- Fully isolated
- Single, dual or triple outputs
- Current limiting, power on soft start
- 200 kHz operation for low ripple and fast response time
- No external capacitors required
- High reliability screening available, specify "M" (e.g. "2578M-5")
- Full hermetic package
- Radiation hardened available

Specifications

INPUT: 28VDC nominal
Range: 16 to 50 VDC continuous.
Survives 80 V transients/MIL-STD-704
Current: 200 mA typical at full load

OUTPUT: Voltage & Current (see chart)

REGULATION: (see chart)

RIPPLE: 50 mV peak-to-peak, typical

PROTECTION: Short circuit protection by current limit.

ISOLATION:
Input to case: 500 VDC
Input to output: 500 VDC*
(*) inputs shorted to case, outputs shorted together

ENVIRONMENT:
Operating temperature:
- 55°C ambient to +85°C case
Linearity derates to zero at 115°C
Storage temperature: -55°C to +150°C
Case rise 30°C typical at full load
Shock: 50G
Acceleration: 500G
Vibration: 30G

MECHANICAL:
Dimensions: 1.075" x 1.075" x 0.375"
Terminals: PC board mount
Case: Kovar header, tin plate cover
Weight: 0.5 ounces

Other input/output voltages and custom configurations are available.

210/270 Watt

MULTIPLE OUTPUT POWER SUPPLY

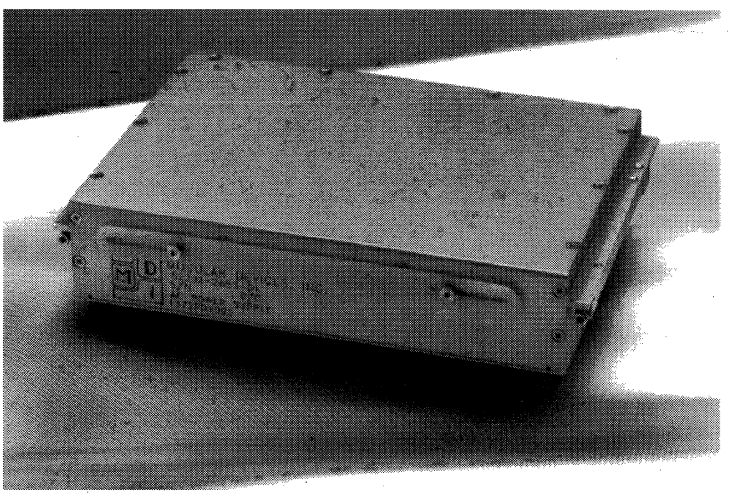
MODEL 2652/2653

Description

The model 2652/2653 are very compact multiple output power supplies designed for direct plug in to full ATR cases for VME bus and related applications. These power supplies operate from a wide range of input power sources, including single phase 200 VAC, 3Ø 115 VAC (both at 400 Hz) 208 VAC at 60 Hz (with derating), or a 270 VDC input to MIL-STD-704D parameters. A high frequency power FET design delivers ample system power with low output ripple. A full EMI filter is contained within the unit. These rugged power supplies are well suited for airborne and other demanding environments.

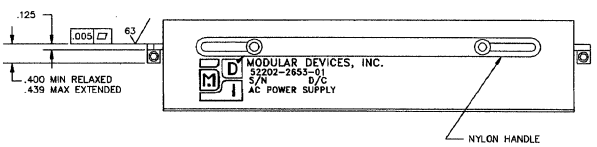
Model 2652 delivers 210 watts with three outputs: 5 VDC at 30 A, ±15 VDC at 2 A.

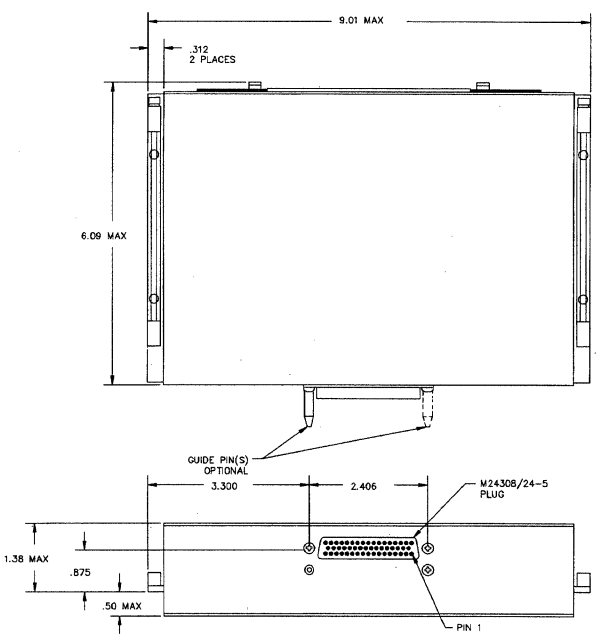
Model 2653 delivers 270 watts with four outputs: 5 VDC at 40 A, ±12 VDC at 2 A.



Features

- Low profile: 1.88 inches thick
- Operates from a wide range of power sources
- Conduction cooled via side wedge locking
- Power density 2.8 W/in^3 for 4 outputs
- Fully EMI filtered
- TTL level power inhibit input
- AC line dropout/fault indicator output
- Overtemperature shut down
- Strap handle for easy removal
- All high reliability components
- ESS burn in standard





Specifications

INPUT VOLTAGE:

100-130 VAC line-neutral 57-440 Hz 3Ø

200-260 VAC line-line 360-440 Hz 1Ø

220-340 VDC per MIL-STD-704 Rev D

DC OUTPUTS

#2652: 5 VDC at 30 A, ±15 VDC at 2 A

#2653: 5 VDC at 40 A, ±12 VDC at 2 A, -5.2 VDC at 4 A

EFFICIENCY: #2652: 75% (typ)
#2653: 70% (typ)

REGULATION, LINE: 100 mV

REGULATION, LOAD: 100 mV

OPERATING FREQUENCY: 100 kHz (typ)

OUTPUT RIPPLE: 25 mV rms/100 mV_{p-p} on main 5 VDC outputs; 50 mV rms/150 mV_{p-p} on all other outputs

OVERCURRENT PROTECTION: all outputs protected above 110%

OVERVOLTAGE PROTECTION: all outputs protected above 120%

ISOLATION: 450 VDC input/outputs, chassis; 45 VDC outputs to chassis

ENVIRONMENT:

Temperature, operating: -55°C to 85°C, derate to zero at 105°C

Temperature, storage: -62°C to 105°C

Shock: 15 Gs peak

Vibration: 6 Gs rms per Navmat P-9492

Humidity: per MIL-E-5400 Class 2

EMI: meets MIL-STD-461 CEO3, CEO7, CS01, CS02 and CS06

FINISH: Gold chem film per MIL-C-5541 Class 3

WEIGHT #2652: 4.3 LBS; #2653: 4.5 LBS

We can modify these units to meet your custom converter requirements.

10 & 20 Watt

DC-DC REGULATED CONVERTERS

SERIES 2639 - 2669

MODEL NOS. 2659 & 2669 ALSO PROVIDE REMOTE ADJUSTMENT FOR LAMP DIMMER, FLASHER, MOTOR CONTROL AND OTHER FUNCTIONS

REMOTE ADJUSTMENT NOT AVAILABLE WHERE INDICATED (*)

Features

- Available in single & dual output
- 1.56 watts/cubic inch (#2639/59)
- 2.78 watts/cubic inch (#2649/69)
- Silicon rubber encapsulation
- Environmentally rugged for military application
- Operates down to zero load
- Parallelable
- Remote potentiometer for lamp dimming, flashing, motor controls (#2659/2669 only)

Specifications

INPUT:
28VDC nominal
Range: 22 to 40 VDC cont.
50VDC for 1 second maximum
Reverse polarity protected to 50VDC
Current (#2639/59):
530 mA typical at full load
Current (#2649/69):
1020 mA typical at full load
Other inputs available

OUTPUT ADJUST UNITS:
A 10K rheostat connected between the adjust output and positive output varies output from full-to-zero voltage. Over 50 VDC, a 100K pot is used. Adjust pot may be up to 100-ft from unit.

MINIMUM LOAD: zero

REGULATION: (see chart)

RIPPLE: (see chart)
Frequency: 150KHz ± 20%

PROTECTION:
Short circuit protection by current limit.

ISOLATION:
Input to case: 500 VDC
Input to output: 500 VDC
inputs shorted to case, outputs shorted together

ENVIRONMENT:
Operating temperature:
- 55°C ambient to +100°C case
Storage temperature:
- 55°C to +150°C
Meets or exceeds MIL-E-5400

EMI: Input filter reduces conducted emissions.

MECHANICAL:
Dimensions (#2639/59): 4"x2"x0.8"
Dimensions (#2649/69): 4"x2"x0.9"
Terminals: turret solder type
Case: extruded aluminum with black anodized finish
Encapsulation: RTV silicon rubber
Weight (#2639/59): 9.6 ounces
Weight (#2649/69); 11 ounces

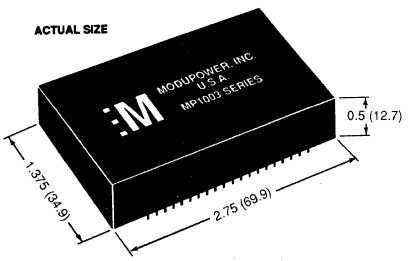
POWER SUPPLIES

MP1003 SERIES

3 Watt AC Power Supply



FEATURES

- P.C. Board Mount
- Over Current Protection
- Over Temperature Protection
- Over Voltage Protection
- UL, CSA Pending

DESCRIPTION

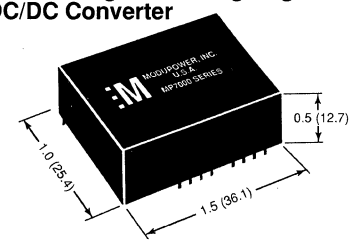
This power supply is a small size module that is convenient for automatic insertion into a printed circuit board. Reliability is assured by providing current limiting, thermal shutdown, over and under voltage protection and filtering.

GENERAL SPECIFICATIONS

Input
Voltage Range: AC 85 to 132V, DC 110 to 70V
Frequency: 1MHz Typ
Efficiency: 70% Typ
Isolation: 1500VAC, 1500VDC
Output Voltage: 5VDC
Output Current: 0.6A
Line Regulation: +/-1%
Load Regulation: +/-5%
Output Ripple: 50mVp-p
Operating Temperature: 0° to +70°C

MP7000 SERIES

1A Wide Range Switching Regulator & DC/DC Converter



FEATURES

- Wide Input Range
- Filter on Input and Output
- No External Components Needed
- Thermal Shut Down and Current Limit Protection
- Up to 1A Output Current
- More than 80% Efficiency
- +/-3% Regulation over Line and Load
- Low Power Standby Mode
- Adjustable Output Version

GENERAL SPECIFICATIONS

Operating Temperature Range: –25°C to + 70°C

Storage Temperature Range: –55°C to + 150°C

SELECTION GUIDE

Part #	Input Range	Output Voltage
MP7001	7-35V	5V
MP7003	14-35V	12V
MP7004	17-35V	15V
MP7008	7-35V	3.3V
MP7009	7-35V*	Adjustable

* Input must be at least 2V above output.

DESCRIPTION

The MP7000 series modules are a hassle free means of providing a regulated output from raw DC or DC/DC conversion.
The modules are non-isolated regulating DC/DC converters that offer high efficiency and protection with pulse by pulse current limiting and thermal shut down. The package is convenient for automatic insertion on printed circuit boards.
A logic level On/Off control is also provided.

OUTPUT CHARACTER (SHOWN FOR MP7003)

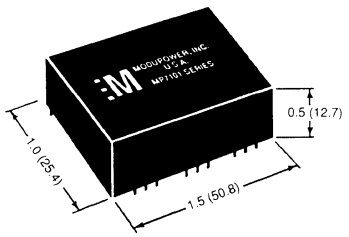
POWER SUPPLIES

MP7101SERIES
1A 5V to 3.3V Converter



FEATURES
- No External Components Needed
- Thermal Shut Down and Current Limit Protection
- Up to 1A Current
- No EMI or Spikes Generated

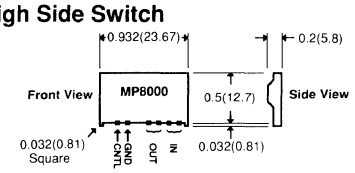
DESCRIPTION

The MP7101 is a convenient way to derive 3.3V to power newer forms of circuits without adding a power supply to the system. The low profile dual in line package allows automatic insertion and minimum stacking height.

GENERAL SPECIFICATIONS

Input Voltage Range: 4.5V to 10V
Maximum Output Current: (Continuous) 1.0A
Output Voltage: 3.3V ± 5%
Load Regulation: 0.3%
RMS Output Noise: 0.1 MV RMS
Operating Temperature Range: -25°C to +85°C
Storage Temperature Range: -55°C to +150°C

MP8000 SERIES
High Side Switch

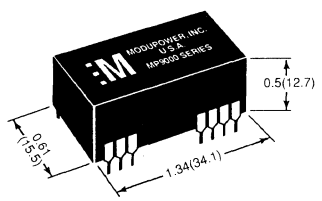


FEATURES
- Zero Footprint Package
- Surface Mount or SIP
- 5V CMOS Logic control
- 0.1 OHM on Resistance
- Up to 5 AMP
- 250 µA Leakage

DESCRIPTION

The MP8000 is designed to allow control of the power to loads that are connected to a chassis such as the hard drive or display in a lap top computer. The switch operates from a Vcc of 4.5V to 7V (other versions to 32V) and the switch is rated to 32V. The low leakage and significantly reduces current consumption from a battery.

MP9000 SERIES
2 Watt DC/DC Converter



SELECTION GUIDE

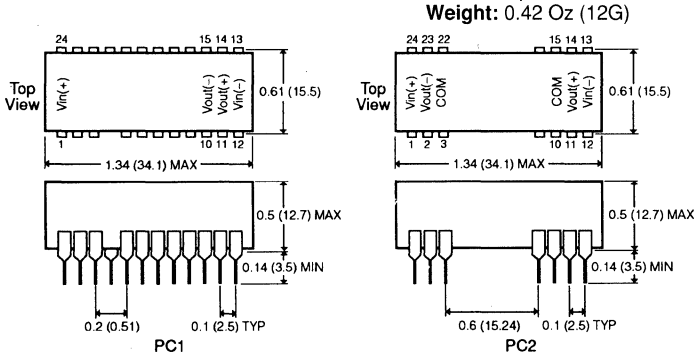
Part #	Input Voltage	Output Voltage
MP9001	5V	5V
MP9002	5V	9V
MP9003	5V	12V
MP9004	5V	15V
MP9005	5V	18V
MP9006	5V	24V
MP9011	12V	5V
MP9012	12V	9V
MP9013	12V	12V
MP9014	12V	15V
MP9015	12V	18V
MP9016	12V	24V
MP9053	5V	+/-12V
MP9054	5V	+/-15V
MP9063	12V	+/-12V
MP9064	12V	+/-15V

FEATURES
- 24 Pin DIP Configuration
- Regulated Output
- Isolation of 500VDC Minimum
- Short Circuit Protected
- Thermal Shut Down Protected

DESCRIPTION

This series is intended to be a low cost DC/DC converter that mounts on a board just like an integrated circuit. The output is fully isolated from the input, allowing voltage inversion or supplying external circuitry.

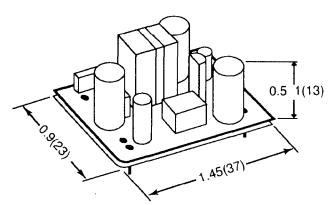
MECHANICAL CONSTRUCTION



GENERAL SPECIFICATIONS

Isolation Voltage: 500 VDC Min
Isolation Resistance: 100M OHM
Operating Frequency: 20kHz Min
Protection: Short Circuit and Thermal Shutdown
Operating Temperature: -20°C to +70°C
Storage Temperature: -40°C to +100°C
Operating Humidity: 10% to 90% RH
Storage Humidity: 10% to 90% RH
Output Voltage Tolerance: +/-5%
Output Ripple: 100 mVp-p Max @ 20MHz BW
Filter: Single has Pi Filter on both Input and Output
Weight: 0.42 Oz (12G)

MP9100 SERIES
1.8 Watt Regulated DC/DC Converter



DESCRIPTION

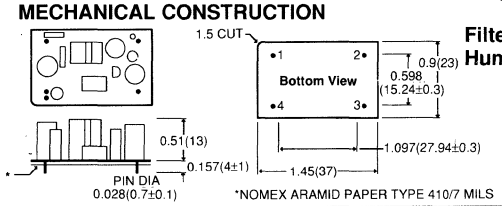
This series is intended to be a low cost DC/DC converter on a small integrated circuit board. The output is fully isolated from the input, allowing voltage inversion or supplying external circuitry.

FEATURES
- Regulated Output
- High Isolation of 2000VDC Minimum
- Short Circuit Protected

SELECTION GUIDE

Part #	Input Voltage	Output Voltage	Output Current
MP9102	5V	9V	200mA
MP9112	12V	9V	200mA
MP9141	48V	5V	400mA

MECHANICAL CONSTRUCTION



GENERAL SPECIFICATIONS

Isolation Voltage: 2000 VAC Min
Isolation Resistance: 100M Ohm
Input/Out Resistance: 100M Ohm
Input/Output Capacitance : 50pF
Protection: Short Circuit
Operating Temperature: 0°C to +60°C
Storage Temperature: -20°C to +85°C
Output Voltage Tolerance: +/- 5%
Output Ripple: 100 mVp-p Max @ 20MHz BW
Filter: Pi Filter on Output and Input
Humidity: 10% to 95% RH

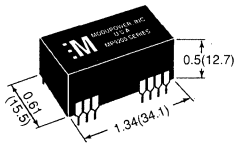
POWER SUPPLIES

MP9200 SERIES
1 Watt DC/DC Converter with High Isolation



DESCRIPTION

This series is intended to be a low cost DC/DC converter that mounts on a board just like an integrated circuit. The output is fully isolated from the input, allowing voltage inversion or supplying external circuitry.

GENERAL SPECIFICATIONS

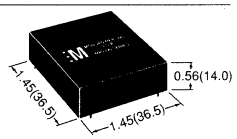
Isolation Voltage: 2000 VDC Min
Isolation Resistance: 100M Ohm
Operating Frequency: 20kHz Min
Protection: Short Circuit and Thermal Shut Down
Operating Temperature: 0°C to +55°C Full Load
0°C to +70°C Half Load

FEATURES

- 24 Pin DIP Configuration
- Regulated Output
- High Isolation of 2000VDC Minimum
- Short Circuit Protected

Storage Temperature: -10°C to +85°C
Operating Humidity: 10% to 90% RH
Storage Humidity: 10% to 95% RH
Output Voltage Tolerance: +/-5%
Output Ripple: 200 MVp-p Max @ 20MHz BW
Weight: 0.4 Oz. (12G)

MP9300 SERIES
2 Watt DC/DC Converter With High Isolation



DESCRIPTION

This series is intended to be an inexpensive high isolation DC/DC converter that conveniently mounts on a printed circuit board and is only 0.56 inch high. The output is fully isolated from the input, allowing voltage inversion or supplying external circuitry.

GENERAL SPECIFICATIONS

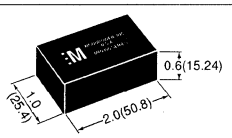
Isolation Voltage: 2000 VDC Min
Isolation Resistance: 50M Ohm
Operating Frequency: 30kHz Min
Protection: Short Circuit
Operating Temperature: 0°C to +50°C
Storage Temperature: -40°C to +85°C

FEATURES

- Printed Circuit Board Mounting
- PWM Regulated Output
- High Isolation of 2000VDC Minimum
- Short Circuit and Overload Protected
- 70% Efficiency

Humidity: 20% to 90% RH
Output Voltage Tolerance: +/-5%
Output Ripple: 100 MVp-p Max @ 20MHz BW
Weight: 1 Oz. (28G)

MP9400 SERIES
6 Watt Regulated DC/DC Converter



DESCRIPTION

This series provides 6 watts of DC/DC conversion with 60% efficiency. The package can be conveniently mounted on a printed circuit board and is only 0.6 inch high.

GENERAL SPECIFICATIONS

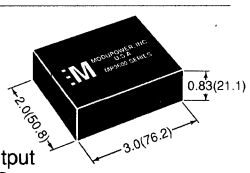
Isolation Voltage: 500 VDC Min
Isolation Resistance: 100M Ohm
Operating Frequency: 20kHz Min
Operating Temperature: 0°C to +55°C Full Load
0°C to +70°C Half Load
Storage Temperature: -20°C to +85°C
Operating Humidity: 10% to 90% RH

FEATURES

- Single or Dual Regulated Output
- High Isolation of 500V Minimum
- Short Circuit Protected
- Low Profile Metal Case

Storage Humidity: 10% to 95% RH
Output Voltage Tolerance: +/-5%
Output Ripple: 200 MVp-p Max @ 20MHz BW
Filter: Pi Filter In and Out
Weight: 1.3 Oz. (39G)

MP9600 SERIES
6 Watt Regulated DC/DC Converter



DESCRIPTION

This series provides 20 watts of DC/DC conversion with typically 72% efficiency. The package can be conveniently mounted on a printed circuit board and is only 0.83 inch high.

GENERAL SPECIFICATIONS

Isolation Voltage: 500 VDC Min
Isolation Resistance: 100M Ohm
Operating Frequency: 80kHz Min
Operating Temperature: 0°C to +55°C
Storage Temperature: -40°C to +85°C
Operating Humidity: 10% to 90% RH
Storage Humidity: 10% to 95% RH

FEATURES

- Single or Dual Output
- PWM Regulated Output
- Isolation Voltage of 500VDC Min
- Short Circuit And Overload Protected

Output Voltage Tolerance: +/-5%
Output Ripple: 200 MVp-p Max @ 20MHz BW
Filter: Pi Filter In and Out
Weight: 5 Oz. (14 G)

MultiPower, Inc.

YOUR POWER SUPPLY PARTNER

A Spectrum Electronics Corporation

Our Work Is The Design And Manufacture Of Custom Switching Power Supplies From 3 Watts Single Output To 2000 Watts And Over 20 Outputs

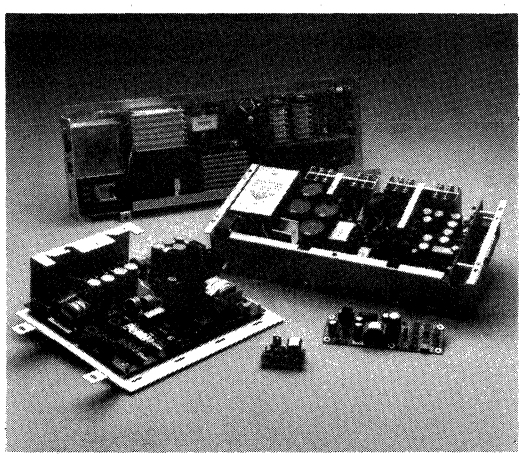
FEATURES:

- HIGH-FREQUENCY—100KHz TECHNOLOGY
- BATTERY BACK-UP WHEN YOU NEED POWER THAT CANNOT FAIL
- INTEGRATED HV/LV DESIGNS
- CUSTOM PACKAGING
- SURFACE MOUNT APPLICATIONS
- PROVEN CIRCUITS WHICH ENABLE MULTIPOWER TO QUICKLY AND ECONOMICALLY CONFIGURE A DESIGN TO UNIQUE CUSTOMER REQUIREMENTS

APPLICATIONS

- MEDICAL
- TEST AND MEASUREMENT
- FLAT—SCREEN TECHNOLOGY
- COMMUNICATIONS
- AVIATION
- SPECIALTY COMPUTER
- INDUSTRIAL AND ROBOTICS

TYPICAL POWER ASSEMBLIES



MultiPower, Inc.'s Switching Power Supplies Are Custom Engineered For OEM's:

We have:

- DESIGNS ACCOMMODATING A WIDE RANGE OF VOLTAGE AND WATTAGE REQUIREMENTS
- SHORTENED LEAD TIMES FROM QUOTES TO PROTOTYPES
- MAGNETIC DESIGN AND MANUFACTURING IN-HOUSE
- DESIGNS COMPLY WITH DOMESTIC AND INTERNATIONAL SAFETY AND EMI/RFI REGULATIONS
- LIGHT-WEIGHT, LOW-LEAKAGE SWITCHING SUPPLIES WHICH DO NOT REQUIRE HEAVY ISOLATION TRANSFORMERS
- SAFETY AND REGULATORY CERTIFICATION STAFF IN-HOUSE

MPI is one of the most reliable suppliers, on a large scale, of transformer and magnetic components to the computer, data processing, communications & medical and recreational electronics OEMS. All units meet MPI's stringent QC standards and are UL CSA & VDE listed as required.

The product categories below provide general specification information for our basic product lines. However, our ability to design and manufacture custom components, to your specs, makes us the industry's true "super source".

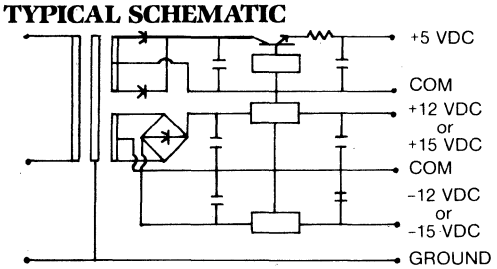
TYPICAL SCHEMATIC



NORTHERN AMPOWER CORPORATION

Designers and Manufacturers
of Standard & Custom Built Power Supplies

The "N40" Series

(0-40 volt, 0-250 amp, D.C. Power Supply)

The N40-250 is a versatile piece of testing equipment that has proved its performance in developmental, life, and durability testing. It was originally designed for testing automotive flasher systems and conforms to SAE J68, J112, J234, J235, J259, J564, J589b, J590e, **J823c**, J945b, J1054, J1056, and J1104 specifications. It can be used to test headlamps, incandescent tungsten lamp loads, radios, light switches, power locks, D.C. motors, solenoids, electro magnets, or virtually any automotive or other **high inrush current** electrical system or component.

Performance Oriented

The N40-250 is a stiff, quick response power supply with ample power for testing complete systems requiring high current capacity.

A Stiff Power Supply

The N40-250 generates and maintains a virtually constant output voltage regardless of load fluctuations. The N40-250 is specifically designed to respond to the high surges encountered with initial startup, thereby testing the product itself rather than the power source.

Quick Response

The N40-250's ability to react to a sudden change in load, at high current rates, is unequalled in the industry. The transient surge recovery response of under 100 microseconds is 1000 times better than conventional SCR methods. Fast response translates to a truer test of your product (nearer to battery characteristics).

Ample Power

Full system testing requires high current capacity to accommodate the load fluctuations from initial surges. The N40-250 delivers what you need, when you need it—consistently and dependably.

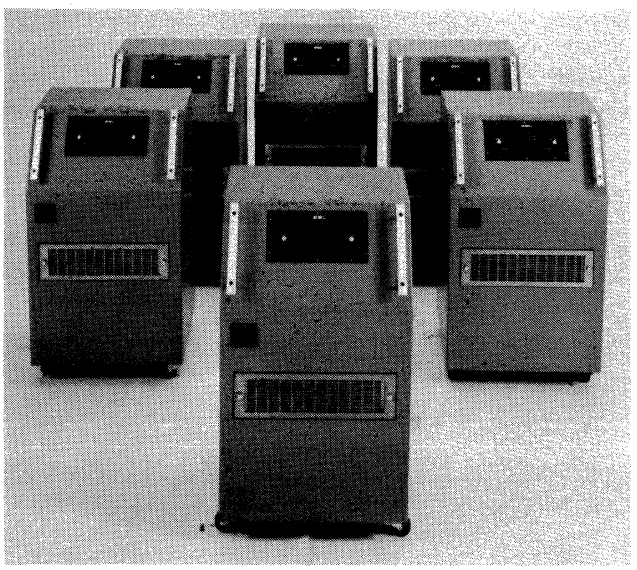
N40 Series Specifications

- **Voltage range**—0 to 40V D.C., continuously variable.
- **Current ranges**—Available in 125 amp increments to 2000 D.C. amps, continuously variable over each range.
- **Voltage regulation**—
  DYNAMIC—Does not deviate more than 1.0 volt from no load to full load. Recovers 63% of maximum excursion within 100 microseconds.
  STATIC—Does not deviate more than 0.2%.
- **Ripple**—75 millivolts, peak to peak, maximum.
- **Overload capability**—Meets all regulation specifications at twice rated current for 0.1 seconds, then automatically reduces current to front panel set value if the overload persists.
- **Input power**—208/230/460V A.C., 3 phase. (Other 3 phase input voltages available on special order.)
- **Physical characteristics**—41.25" height, 22.5" width, 21" depth, 485 lbs. weight. (N40-250 only)

In the real world, inrush current can cause part failures. Testing must not mask these inrushes and the effects of their rapid transitions and recovery cycles if it is to be a valid test of your **product**.

After your product is out in the market is not the time to find out what **our** testing equipment could have revealed. By developing your products with NAC power supplies, you'll push your product in the developmental stages so that it will perform under real life conditions.

Don't find out about your product tomorrow what you could have discovered today. Give us a call. We're ready to meet your needs.



Features

- ***Exceptionally fast transient response***—Recovery from surge to running level in less than 100 microseconds—1000 times faster than conventional SCR methods.

- **Short term 100% overload capability**—In response to initial surges, the N40 series can draw 100% overload (2 times the maximum specified current) without going out of regulation.
- **Current limiting**—In the event of a short circuit or product failure, the current can be limited to a lower level.
- **Provisions for remote sensing**—Remote sensing enables you to sense the voltage at the point nearest to the testing, thereby elliminating the errors caused by the resistance of long output leads.
- **Remote programmability**—The voltage can be remotely controlled with a 0-4 volt D.C. signal (0.1 v/v).
- **Adjustable overvoltage trip point**—When the preset maximum voltage level is exceeded, the unit automatically shuts down. Ideal for protecting valuable prototypes. (Front panel adjustable.)
- **LED fault indicators**—The N40 series provides a clear display of Loss of Phase, Overvoltage, Over temperature, and Current Limit. These indicator lamps are located on the unit's front panel for easy monitoring.
- **Front panel mounted voltmeter and ammeter**—Convenient, easy to read digital display.
- **Front panel circuit breaker**—Reliable protection from overloading with convenient access.
- **A full wattage supply**—Unlike many other power supplies, NAC's N40 series will output full current at any voltage setting.
- **Thermal protection shutdown**—The N40 series' internal fan-cooled heat sink has a temperature sensitive switch which causes shutdown upon cooling failure. This feature eliminates the potential for overheating.
- **Casters and Handles**—The N40 series is built for maneuverability.
- **Quality internal and external components for longevity**—Our products are built to last—many of our early models are still performing in industry today, after 20 years or more.
- **Limited warranty**—We warrant the N40 series to be free from defects in materials and workmanship for three years. Complete warranty policy available on request.

CUSTOM AC/DC POWER SUPPLIES
CONVERTERS, INVERTERS, CONTROLLERS

FROM WATTS TO MEGAWATTS

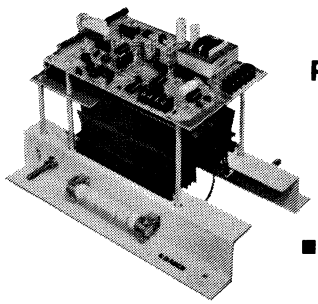
NWL TRANSFORMERS

- AC/AC & AC/DC power supplies and controllers
- Silicon controlled rectifier (SCR) supplies
- High or low amperage and voltage
- Regulated: voltage, current and power
- Polarity reversing power supplies
- Transformers (oil, silicone, water-cooled, epoxy, dry)
- Reactors/chokes/filters

MEP CONTROLS

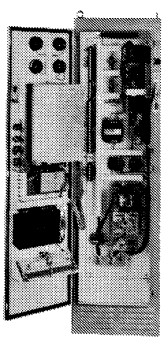
- Full service contract electronic engineering and manufacturing
- Phase angle and zero crossover modular power controllers
- Phase angle and zero crossover analog and microprocessor firing circuits
- Voltage current regulators and current limiters
- DC amplifiers (5 AMP + 25 AMP models)
- Microprocessor Control Systems

TYPICAL OF THE RANGE OF NWL CAPABILITIES . . .

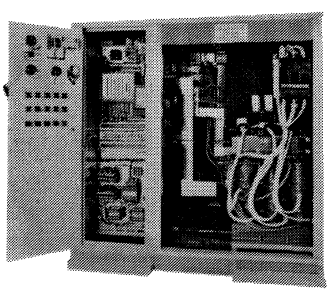


Phase Angle Modular Power Controllers

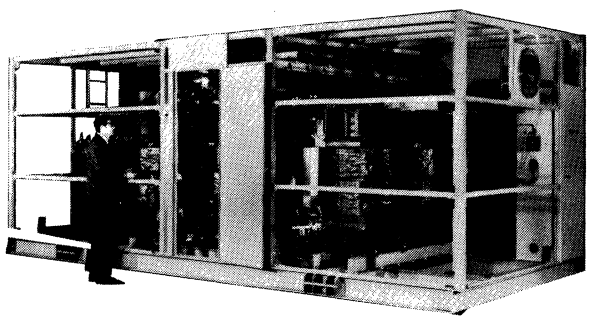
- AC line amperes: from 40 to 495
- "Linear" firing circuit
- RC network and MOV
- SCR's individually fused



Patented Microprocessor based SCR Controller with spark-rate logic for electrostatic precipitator application.



DC Power Supply for Super-conducting Magnets — 0-50 VDC @ 5000 Amps DC. Incorporates 12 pulse output, phase-angle controlled SCR's, L.C. Filter and programmable controller.



6.34 Megawatt Power Supply

• 20-ton unit for Compact Toroid Experiment (CTX). . .entirely produced at NWL's facilities. . .from micro-electronics, to magnetics, to fabrication and assembly, to full-load testing

MANUFACTURING RANGE
Up to 300 KV
1 mA to 50,000 AMP
4 Hz to 50 kHz
1 VA to 6,000 KVA
Dry, Oil-Filled, Silicone Fluid-Filled, Water Cooled, and Epoxy Cast Units Available.

NWL also manufactures various types of power transformers, reactors, chokes. See our full page ad in the transformer section of EEM. Our engineers are available to assist you in selecting magnetic components to meet your application requirements.

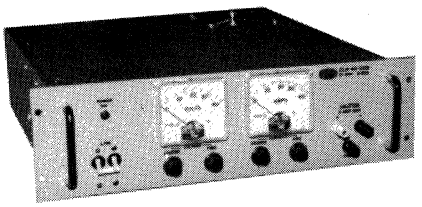
ORAM CUSTOM DESIGNS AND MANUFACTURES POWER SUPPLIES AND TRANSFORMERS TO ANY SPECIFICATIONS. CONTACT US WITH YOUR REQUIREMENTS.

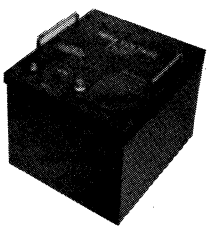
POWER SUPPLIES

Low Voltage/High Current Power Supplies–DLR Series



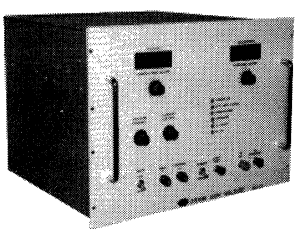
- ☐ Low voltage (up to 1000V DC), high current (up to 5000A).
- ☐ Extremely low ripple with very good regulation and stability.
- ☐ Overcurrent, overvoltage, and overtemperature protection.
- ☐ Available in customer specified enclosures.

Power Packs–P Series



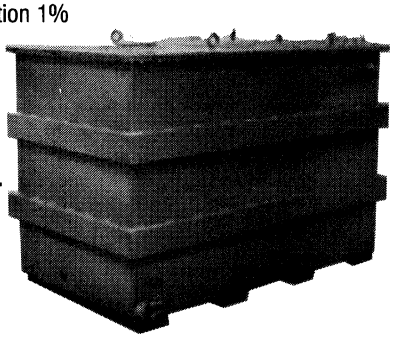
- ☐ Output voltage range from 3KV to 100KV.
- ☐ Output current range from 1mA to 20mA.
- ☐ Single phase input at customer specified input voltage.
- ☐ Fixed output polarity or floating pos-neg output.
- ☐ Oil filled, epoxy filled, or other insulating medium available.
- ☐ Mounting by 1/4-20 mounting studs at bottom of each unit.
- ☐ Surge limiting resistors.
- ☐ Estimated life exceeds 30,000 hours at rated voltage and current.
- ☐ Custom requested features and specifications available.

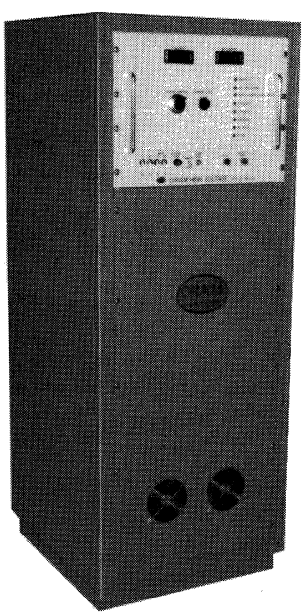
Unregulated High Voltage Power Supplies–DS Series



- ☐ Output voltage range from 1KV to 500KV.
- ☐ Output current range from 1mA to 50A.
- ☐ Adjustable overload and overvoltage trip point.
- ☐ Standard ripple is 2% rms of rated voltage. Ripple reduction of 1/10 or 1/100 is available as an option.
- ☐ Standard enclosure is in a rack mount chassis or customer specified.

Regulated High Voltage Power Supplies–DSR Series





- ☐ Output voltage from 1KV to 500KV.
- ☐ Output current range from 1 milliampere to 50 amperes.
- ☐ Regulated power supply with voltage regulation or current regulation or automatic crossover regulation between voltage and current; regulation 1%
- ☐ Standard is 2% rms of rated voltage. Ripple reduction of 1/10 or 1/100 available as an option.
- ☐ Standard enclosure is in a rack mount chassis or customer specified.

Tube Regulated High Voltage Power Supplies–DTR Series

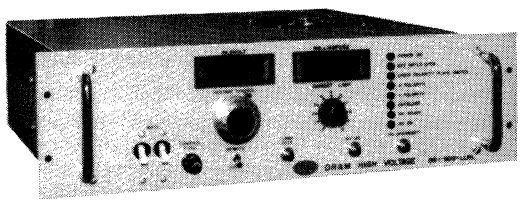
- ☐ Output voltage from 1KV to 500KV; reversible polarity available as an option.
- ☐ Output current range from 1 milliampere to 50 amperes.
- ☐ Standard regulation is ±0.05% for line and load with option for regulation of ±0.01% or ±0.001% for line and load.
- ☐ Standard ripple is 0.05% with option for ripple of 0.01% or 0.001%
- ☐ Stability is 0.02% short term and 0.05% per 8 hour period, better stability available.
- ☐ Standard enclosure is in a rack mount chassis or customer specified.

ORAM HIGH VOLTAGE

P.O. BOX 1176, KLEMP ROAD, DAYTON, TX 77535-1176
Telephone: (409) 258-5553 FAX: (409) 258-5555

Switching Power Supplies–DSF Series

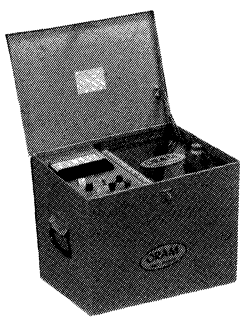
- ☐ Output power level to 10KW; output voltage to 200KV with higher voltage available, please consult factory.
- ☐ Precise regulation with automatic crossover between voltage and current regulation.
- ☐ Standard regulation is ±0.05% for line and load, better regulation available.
- ☐ Ripple is 0.01% rms (0.1% above 100KV).
- ☐ Reversible polarity models available.
- ☐ Remote programming capability.
- ☐ High efficiency at maximum power output.
- ☐ Standard enclosure is in a rack mount chassis or customer specified.



TEST INSTRUMENTS

Liquid Dielectric Testers

- ☐ Voltage Range from 50KV to 90KV.
- ☐ Memory meter to record breakdown voltage.
- ☐ Automatic motorized rise rate with manual dwell at any voltage.
- ☐ Accurately test for breakdown voltage of insulation oils in accordance with ASTM specifications.
- ☐ Customized units Features.



Non-Destructive AC/DC Hipot and Insulation Tester

- ☐ Selectable AC (15KV) or DC (40KV) output with function indicator.
- ☐ Audible failure signal.
- ☐ Continuously adjustable overload sensitivity control from 50μA to 5mA for non-destructive testing.
- ☐ Gravity operated output shorting solenoid.
- ☐ Enclosed in either bench top or 19″ rack mount.
- ☐ Customized units Features.

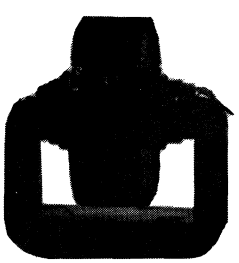
Resistive Voltage Divider

- ☐ High input impedance precision resistive divider network.
- ☐ Wide range of rated voltage, corona free.
- ☐ Accuracy of 0.5%, 0.25% or 0.1% available.
- ☐ Portable compact construction with BNC connectors.
- ☐ Custom division ratios.
- ☐ Digital or analog meter readout.

Transformers are available with a wide variety of voltage ratings and sizes to suit most customer needs.

- ☐ High Voltage—air or oil or epoxy insulation.
- ☐ High Voltage Isolation—air or oil or epoxy insulation.
- ☐ Filament—isolation with air or oil or epoxy insulation.
- ☐ High Voltage Filter Chokes.
- ☐ Saturable Core Reactors.

Transformers features custom designing with customer specified input and output voltage(s). Operation frequency of 60 hertz or 50 hertz or 50/60 hertz or 400 hertz or customer specified operation frequency are available, specify when inquiring.

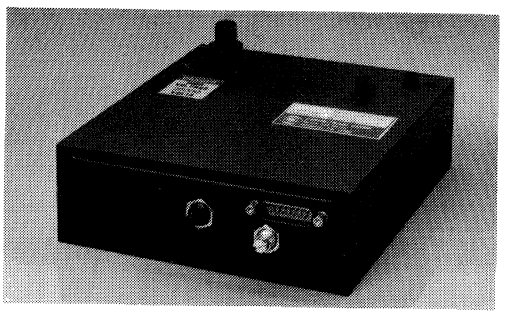


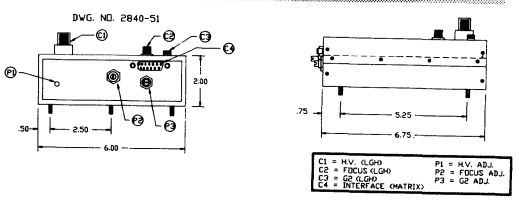
Penn-Tran Corporation

Designers and Manufacturers of CRT Deflection Components

A Spectrum Electronics Corporation

30 Watt High Voltage Power Supply For Military and Airborne Applications MIL HVS 2825





Performance Specifications

Input	28VDC ± 2 Volts
Anode Voltage	25KV (less than ± 1%)
Anode Current	0-1.2 MA
Ripple (P-P)	7.5 Volts (P-P) @ 1.2 MA
Temperature Coefficient	100 PPM/°C
Line Regulation	.05%
Focus Voltage	5-8 KV
G2 Voltage	200-1000 VDC
G1 Voltage	−150 VDC
Operation Temperature	−55° to 70°C

High Voltage Power Supplies

Engineers know us for quality and innovation in the design and manufacture of deflection components for CRT Displays and television cameras. High Voltage Power Supplies are part of the new Penn-Tran's team of deflection components, exactingly designed, manufactured and backed by our 45 years as a pioneer in the field.

These power supplies are suitable for multiple customer-specified applications, or we will design a prototype to suit your application. UL listed file.

Hi-Reliability Ultra-Miniature DC-DC Converters

New Series AV
up to 1000 VDC Output
See pages 1922 & 1923

New Series AT
.200 height—
Up to .75 Watts
See pages 1924 & 1925

OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

New Series HVA
70-170V DC Input,
3 Watts

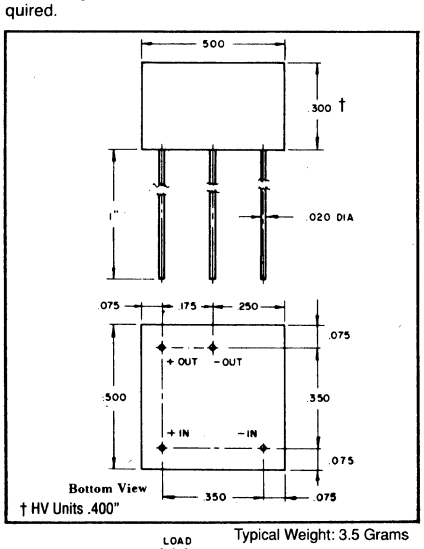
OPTIONS AVAILABLE
- *Expanded operating temp (−55°C to +85°C)*
- *Stabilization Bake (125°C ambient)*
- *Temperature Cycle (−55°C to +125°C)*
- *Hi Temp, full power burn in (100% power, 125°C case temp)*

Hi Reliability Ultra-Miniature DC-DC Converters

FEATURES
- Up to 1.25 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Ultra-miniature size (0.3" Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Input/output isolation
- Single and dual output
- No heat sink required
- Up to 250V Output

New Series AT .200 height— Up to .75 Watts See Pages 1924-1925

This series of unregulated DC-DC converters are produced in an ultra-miniature encapsulated package. 84 different models are available. The units feature single and dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.



Typical Weight: 3.5 Grams

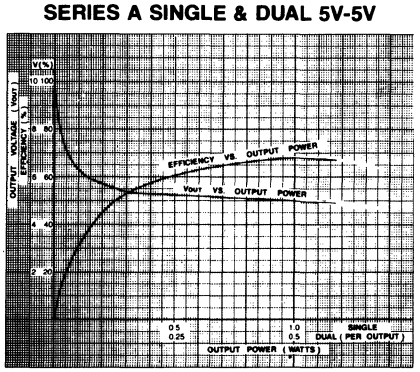
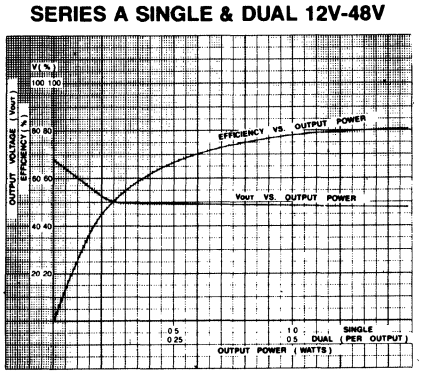
SERIES A SINGLE & DUAL 5V-5V



SERIES A SINGLE & DUAL 12V-48V



TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: *OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT*

Input voltage range: 5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 32V DC
48V models 25 to 50V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V
100V, 150V, 200V & 250V models ± 3.0V

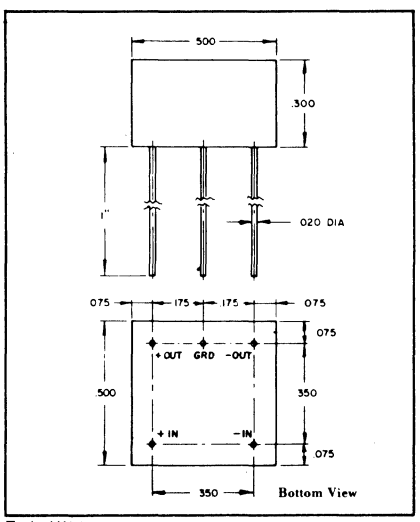
Converter frequency: 20 – 40 KHz

Output temperature coefficient:
0.05%/°C for 5V output.
0.04%/°C for 12 & 15V output.
0.02%/°C for 24, 28, 48, 100, 150, 200 and 250 volt outputs

Operating temperature: –25°C to +70°C ambient. No heat sink is required.

Storage temperature: –55°C to +125°C

Isolation: 100 megohms min. @ 500V DC



Typical Weight: 3.5 Grams

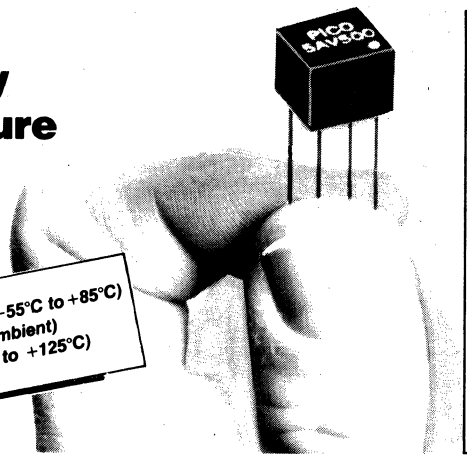
SERIES AV

Hi Voltage Hi Reliability Ultra-Miniature DC-DC Converters

.400 ht. up to 500 VDC output



OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, burn in

- 1.25 watt output at 70° ambient
- Ultra-miniature size 0.400" height, 4.0 grams weight, 0.1 cubic inches volume
- 4 input voltage ranges 5, 12, 24 and 28 VDC
- 100 megohm @ 1000 VDC input/output isolation
- MIL-STD 883 options available
- No heat sink or electrical derating required

This series of unregulated high voltage DC-DC converters are produced in an ultra-miniature encapsulated package. 36 different models are available. These single output isolated units will operate over the temperature range of −25° to +70°C with no heat sink or electrical derating. For military applications an operating temperature range −55°C to +85°C is available. An optional environmental screening package per MIL-STD-883 is also available.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: *OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT*

Input voltage range: ±10% all models

Output voltage tolerance at full load–nominal input: See chart for specific model. Please keep loaded to minimum of 10% at all times.

Converter frequency: 20 – 40 KHz

Output temperature coefficient: 0.02%/°C for all models

Operating temperature: −25°C to + 70°C ambient. No heat sink.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 1000V DC

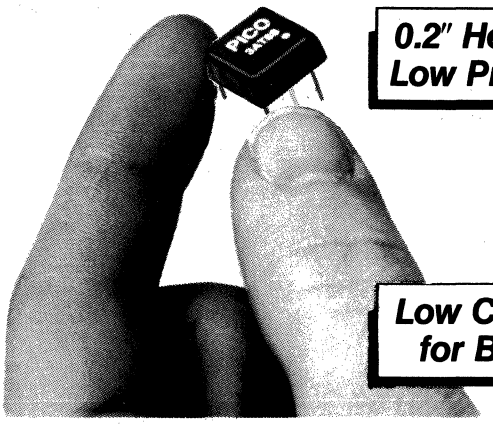
SERIES AT

High Reliability Ultra-Miniature, 0.2″ ht. DC-DC Converters

OPTIONS AVAILABLE
- Expanded operating temp (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)



0.2″ Height Low Profile

No External Components Required

Low Current Consumption for Battery Applications

FEATURES
- Ultra-miniature, 0.200″ height
- Low current consumption
- No external components required
- 4 convenient input voltages, 3-5-9-12V DC
- Up to 0.75 watt output at 20°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Single and dual outputs
- Isolated: 100 megohms at 500V DC
- No heat sink required

This series of unregulated DC-DC converters offer you a 0.200″ tall, package. 24 different models are available and all offer very low current consumption to operate in battery driven circuits. Isolated, single and dual outputs will operate from −25°C to +70°C with no heat sink or derating required. Built-in output capacitors and 4 convenient input voltages also help in simplifying your design.

Ordering Instructions: No minimum. Net 30 days F.O.B. Mt. Vernon, New York.

TYPICAL CHARACTERISTICS:

Test conditions: 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: OUTPUT VOLTAGE IS DIRECTLY PROPORTIONAL TO THE INPUT VOLTAGE.

Input voltage range: 3V models 2.5 to 3.5V DC
5V models 4 to 6V DC
9V models 7 to 11V DC
12V models 9 to 14V DC

Converter frequency: 50 to 70 KHz

Output temperature coefficient: 0.05% per °C all models

Operating temperature: −25°C to +70°C ambient. No heat sink or derating required.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 500V DC

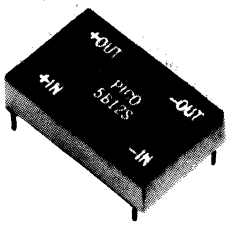
SERIES B
Hi Reliability Ultra-Miniature DC-DC Converters Up to 2.5 Watts

FEATURES

- Up to 2.5 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Ultra-miniature size (0.3" Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Single and dual isolated output
- No heat sink required

This series of unregulated DC-DC converters comes in a miniaturized encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.



OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)

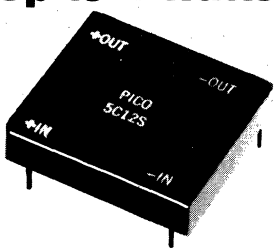
SERIES C Hi Reliability Miniature DC-DC Converters Up to 4 Watts

FEATURES

- Up to 4 watts output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- Miniature-size (0.3" Height)
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC
- Single and dual isolated outputs
- No heat sink required

This series of unregulated DC-DC converters are produced in an miniaturized encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.



OPTIONS AVAILABLE
- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)

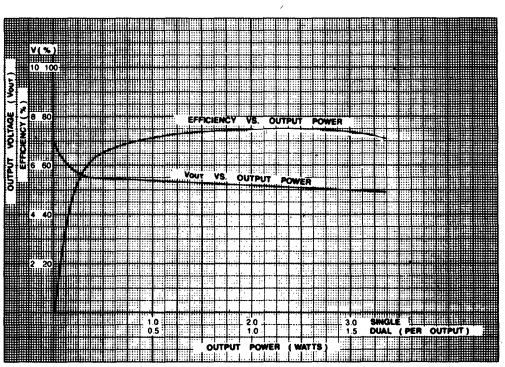
SERIES C SINGLE & DUAL 48V-5V



PICO Electronics, Inc.
453 N. MacQuesten Pkwy.
Mt. Vernon, N.Y. 10552
914-699-5514
FAX 914-699-5565

*For immediate engineering assistance or to place an order—**Call Toll Free 800-431-1064***

TYPICAL CHARACTERISTICS: **Test conditions:** 25°C ambient and input voltage at nominal value unless otherwise specified.

LINE REGULATION: *OUTPUT IS DIRECTLY PROPORTIONAL TO THE INPUT.*

Input voltage range: 5V models 4 to 6.5V DC
12V models 9 to 15V DC
24V models 17 to 28V DC
28V models 21 to 31V DC
48V models 25 to 50V DC

Output voltage tolerance at full load:
5V models ± 0.25V
9V models ± 0.3V
12V & 15V models ± 0.4V
24V & 28V models ± 0.5V
48V models ± 0.7V

Converter frequency: 20 to 40 KHz

Output temperature coefficient: 0.02%/°C

Operating temperature: −25°C to +70°C ambient. No heat sink is required.

Storage temperature: −55°C to +125°C

Isolation: 100 megohms min. @ 500V DC

Short circuit protection: Temporary

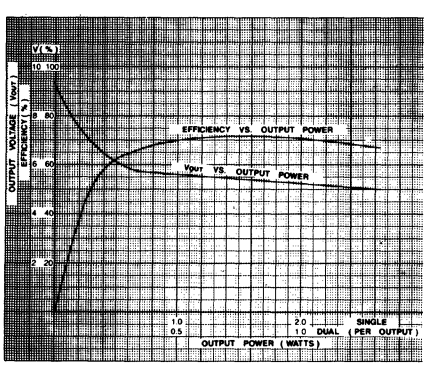
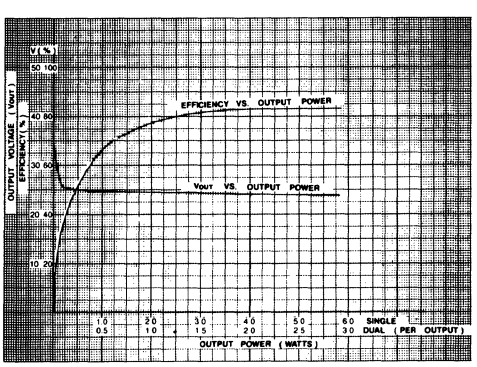
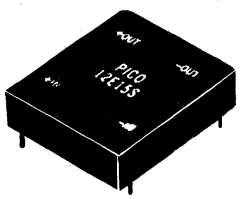
SERIES C SINGLE & DUAL 5V-5V



SERIES C SINGLE & DUAL 24V-24V



SERIES E Hi Reliability Miniature DC-DC Converters Up to 7 Watts



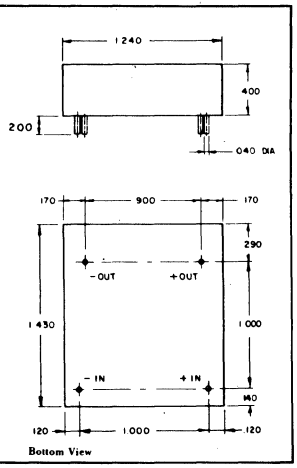
FEATURES

- Up to 7 watt output at 70°C ambient
- Encapsulated semiconductors, conservatively rated for maximum reliability
- 5 input voltage ranges 5, 12, 24, 28 and 48V DC
- 100 megohm @ 500V DC isolation
- Single and dual isolated outputs
- No heat sink required
- Output filter included (No external capacitors required)

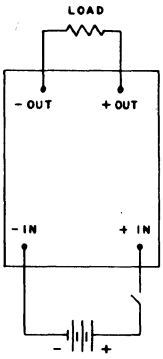
This series of unregulated DC-DC converters are produced in an ultra-miniature encapsulated package. 68 different models are available. The units feature single and isolated dual outputs. They will operate over the temperature range of −25°C to +70°C. No heat sink is required.

OPTIONS AVAILABLE

- Expanded operating temp. (−55°C to +85°C)
- Stabilization Bake (125°C ambient)
- Temperature Cycle (−55°C to +125°C)
- Hi Temp, full power burn in (100% power, 125°C case temp)



Typical Weight: 25 Grams



Delivery— stock to one week
